Do., with option to be paid in Philadelphia	76 @ 78

American Railroad Journal.

Saturday, February 23, 1867.

Stock Exchange and Money Market.

The supply of Money available to responsible borrowers is steadily increasing, and is now largely in excess of the current demand of business, either speculative or legitimate, which tends to produce more steadiness, and greater ease in the loan and discount market. Accommodation is mainly sought after by Stock Exchange and Gold Room operators, to whom call loans are readily made at 5 per cent. on the pledge of the public funds and 6@7, generally 6 per cent. on other prime stock collaterals. To the large dealers in Government securities, aid is freely given at 4@5 per cent. per annum. Of prime short date commercial paper, the offerings are unusually limited, and meet with a prompt market at 6½@7 per cent. per annum. The last city bank statement indicated a decrease of $2,986,052 in the legal tender reserve, $2,169,543 in the deposits, $1,364,-681 in the specie line, with an increase of $2,862,-503 in the loans, and $179.309 in the circulation, during the past week. The decrease in legal tenders and increase in loans are attributed in a large measure to purchase of, or advances on, Government securities. There has been also a further considerable transfer of deposits, on country bank accounts, from the city banks to the United States Sub-Treasury, the cash reserve of which shows an additional increase of about thirteen million dollars. The specie reserve of the banks is now $14,792,626, against $10,368,758, same time last year. The city bank deposits are now $196,072,292, against $189,777,290 week ending Feb. 17, 1866. The legal tender reserve amounts to $64,642,940, against $66,741,980 same time last year. The circulation now stands at $32,956,309 against $22,983,274 same time last year. The loans are now $259,131,328, against $243,068,252 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $75,980,638 a day, against a daily average of $84,804,255 the preceding week; and $85,401,200 the week ending with Feb. 2. The current week's exchanges average $89,500,-000 a day.

The main changes in the Philadelphia Bank footings, last week, were as follows: Increase of loans, $128,801; decrease of legal tender reserve, $766,503; increase of deposits, $239,122; decrease of specie, $6,504; and increase of circulation, $22,990.

National Bank notes to the amount of $170,130 were issued last week, making the total issue to 1,663 banks thus far $301,465,016, against $282,-555,440 at the close of the last fiscal year, June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $2,638,032, leaving, with the existing 1,650 banks, an actual circulation at this date, of $298,826,984. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,849,-450; and for the public deposits, $38,761,450—making a total of $379,110,950. The Treasury Department, last week, redeemed and destroyed $401,000 of worn and mutilated fractional currency, and issued $216,226 worth of new.

The U. S. Sub-Treasury receipts, week ending with Feb. 16, were $20,170,768, including $2,917,-088 from customs duties; payments, $9,817,231; balance at the close of the week, $119,311,790, against $108,958,253 at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $5,372,585, and payments, $3,421,414; on Tuesday, receipts, $5,471,099; payments, $1,456,074. The balance at the close of business on Tuesday stood at $125,277,987, against $112,647,900 a week previous.

Government revenues have been most liberal in the way of customs, since our last. The excises, last week, yielded $2,676,388, against $6,100,000, the preceding week; customs at the port of New York, $2,917,088, and at the outports, about $950,000 (in coin) more, making the grand total income for the week equal about $7,994,000 in currency, against disbursements of over $3,000,000 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $196,000,000.

The following is a tabular statement of the amount of gold certificates which have been issued and redeemed, with the amount outstanding:

	Issued.	Redeemed.	Outstand'ng
20s ..	$267,020	$165,300	$101,720
100s ..	4,797,800	3,020,200	1,777,600
500s ..	549,000	191,500	357,500
1,000s ..	22,449,000	18,580,000	3,869,000
5,000s ..	144,685,000	126,740,000	17,945,000
10,000s ..	5,000,000	5,000,000	....
Total	$177,747,820	$153,697,000	$24,050,820

The Gold market has been measurably free from speculative excitement, during the week. The demand has been mainly for coin for Custom House purposes. The speculative business has been unusually limited. The range of prices has been from 136 to 137½, and the closing quotation on Tuesday 136¾. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $159,664. The customs demand for Gold last week, averaged $486,181 a day; thus far, this week, it has been equal to $722,000 a day, or equal to a weekly aggregate of $4,332,000. The arrivals of specie from Europe, Havana and other foreign ports, during the past week reached only $4,150, and from California, none. The total customs revenue of the Government, in coin, at this port since July 1, 1866, has been $77,828,889, against $85,660,609 same time in the preceding fiscal year. The total receipts of California gold at this port since July 1, 1866, have been $28,422,940, against $16,523,782 same time last year, showing an increase this year, of $11,899,158. The exports of specie from this port, last week, were $563,497. The total outflow of specie from the port, thus far in the current fiscal year has been $21,022,134, against $15,753,528 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $90,000, making the total coin interest disbursements through the Government office, since July 1, 1866, $33,431,408, against $29,277,534 for the same time in the preceding fiscal year. The specie exports from San Francisco from Jan. 1, to Jan. 10, 1867, reached $2,122,861, against $1,010,801 same time in 1866.

Foreign exchange has been in more demand, since our last, and has again improved a shade in price. There has been a considerable addition to the available supply of bills, in the shape of drafts made against export purchases of American securities. Bankers' 60 day bills on London closed on Wednesday at 108⅜@108⅞, and on Paris to 5.20@5.15; sight bills on London to 109⅜@109½; and on Paris to 5.17½@5.13¾. The offerings of produce bills have been moderate since our last.

The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,297,924 making the total value of exports since July 1, 1866, $106,334,820, against $138,906,323 same time in the preceding fiscal year.

Government securities have been more than usually brisk and buoyant, since our last. To the active home investment demand, has been added a renewed export inquiry for Five-Twenties of 1862, and of the earlier issues of 1865. The available supplies of all classes of the national stocks have been very moderate. The older issues of the six per cent. gold-bearing bonds have been positively scarce. Many of our own people, holding such bonds, are exchanging them for the new series of the Five-twenties at a difference of about 4@4½ per cent. in their favor on the trade, being allowed by the commission houses 110¼ for the Sixes of 1881 and 111¼ for the Five-twenties of 1862, while being charged 106@106¼ for the consolidated Five-twenties of 1865. It is chiefly in this way that a sufficient amount of the old bonds is being obtained to satisfy the foreign call for them. U. S. sixes of 1867 closed here on Wednesday at 134@135; U. S. sixes of 1868, at 131@133; U. S. sixes of 1881, 110@110¼; U. S. Five-twenties of 1862 at 111¼@111½; U. S. Five-twenties of 1865 at 109@109⅛; U. S. Five-twenties of 1865, consolidated, 106106⅛; U. S. Ten-forties at 101½@101¾, and U. S. Seven-thirties at 105⅝@106⅛. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ¼@½ of 1 per cent. on these figures:

June, 1864	117⅝	May, 1865	112¼
July, 1864	117⅛	August, 1865	111¼
August, 1864	116⅝	September, 1865	110¾
October, 1864	114⅝	October, 1865	110½
December, 1864	113⅜		

Business at the Stock Boards in railway and miscellaneous securities was on a restricted scale, and at drooping rates up to the close of the week ending with Saturday last. During the first half of the current week, a speculative demand of considerable magnitude was developed, fostered by the ruling low figures, and the increasing ease in money, and the latest dealings on Tuesday indicated a rather brisk yet feverish market. Much higher prices were looked for by nearly all parties, in the event of speculation reviving fully to the old average on a cheap and abundantly supplied money market. The Pacific Mail Shares fluctuated most violently during the week, under clique manipulations.

General business is very tardily reviving, and, in the produce line, especially in breadstuffs and cotton, only on a reduced range of prices. Middling grades of cotton left off at 32½@34 cents per lb. as extremes. The stock of cotton now here is estimated at about 218,000 bales. The receipts at the port this week, have averaged 3,500 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 288,500 bales, against exports of 184,500 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 1,120,000 bales against 1,275,000 bales same time last year; exports, 581,000 bales, against 704,000 bales same time last year; estimated stock at latest dates, 630,000 bales, against 517,000 bales same time last year. Foreign merchandise has been comparatively quiet, outside the dry goods and grocery lines, in which, especially in dry goods, there has been a pretty fair average trade at moderately firm prices. The total imports of foreign dry goods, last week, were $1,699,087, and the total amount marketed $3,516,738. The value of foreign merchandise imported last week, was $4,973,066—making the grand total specie value of last week's imports of dry goods and merchandise, $5,772,153, and since July 1, 1866, $167,130,109, against $180,068,239 same time in the preceding fiscal year. The ocean freight market has been moderately active, with 581 vessels of all classes in port. For Liverpool we quote flour at 2s. 3d.@2s. 6d. per bbl.; grain at 6@6½d. per bushel; cotton at ⅜@½d. per lb.; and heavy goods at 15s.@30s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 5.	Feb. 13.	Feb. 19.

Ill. Central	81	81½	*77¾

* Ex-dividend.

The New York exports, exclusive of specie, for the week ending Feb. 19, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$4,928,307	$3,297,924
Prev. reported	27,099,880	20,430,501
Since January 1	$32,028,187	$23,728,425

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$4,792,474	$1,699,087
Gen. merchandise	3,340,821	4,078,066
Total for the week	$8,133,295	$5,772,153
Previously reported	31,745,008	24,892,785
Since January 1	$39,878,303	$20,664,938

The commerce of New York from July 1st to date compare as follows:

	1865–'66.	1866–'67.
Imports merchandise	$181,962,501	$161,597,970
Exports produce	138,906,323	106,334,820
Exports specie	15,853,825	20,806,583

The balance in the Sub-Treasury on Tuesday was $125,277,987 42.

Steamships between Baltimore and Bremen.

The regular monthly meeting of the directors of the Baltimore and Ohio Railroad Co., was held in Baltimore on the 13th inst. After the transaction of the usual routine and some general business, the President stated that he had the satisfaction of announcing that the protracted negotiations with the North German Lloyd Steamship Company for the establishment of a line of first class steamers, to run regularly between Baltimore and Bremen, had, since the last meeting of the board, been consummated.

The derangements connected with the war in Europe, and subsequently the necessity of full correspondence upon a number of important points, prevented earlier action. The contract, however, is now completed, and the line is to be established permanently, the agreement being that not less than two first class iron steamships shall be run regularly for not less than five years.

The leading parties connected with this important enterprise in Bremen express the judgment that there will be business for a line of four steamers at a very early period.

In order to prevent delay, the closing correspondence on this subject took place by the Atlantic cable, and under the agreement thus made contracts have been entered into with eminent builders on the Clyde for two splendid steamships, of 2,500 tons burthen, to be finished in a superior manner and with elegant accommodations for first class, as well as extensive arrangements for other descriptions of passengers.

The ships are to cost $700,000, and the contract requires that they shall be completed in time for their voyages to commence in February next, so that in one year from this period this great enterprise, it is expected, will be in successful operation.

The President stated that the agreement requires that the Baltimore and Ohio Railroad Company shall erect extensive piers and wharves at Locust Point to accommodate vessels of the size designed, which is much greater than of vessels heretofore used in connection with the business of the port, and that arrangements were being made to construct these large improvements, embracing covered piers, with complete facilities for loading and discharging cargo without regard to the weather, and equal in character to those of the North German Lloyd Steamship Company, now in use at Hoboken, New York.

The President added that it was arranged that the highly respected house of Messrs. Albert Schumacher & Co., were to represent and manage the affairs of the company in Baltimore.

Propositions have also been received from extensive proprietors of steamship companies in England for the organization of a company with large interests to be owned there, by which iron steamers of large size and of first class will be placed permanently upon a line between Baltimore and Liverpool.

It is the design of the Baltimore and Ohio Company to make the improvements at Locust Point so extensive as to embrace accommodations for the numerous large steamers which it is expected will, at no distant day, ply between Baltimore and European ports.

Maryland—State Revenues.

The following statement will show the receipts into the State Treasury from the city of Baltimore and each county of the State for the years 1865 and 1866:

County.	1865.	1866.
Allegany	$42,276	$44,213
Anne Arundel	26,239	24,132
Baltimore	54,426	80,711
Calvert	5 543	9,400
Caroline	5,074	6,507
Cecil	25,840	32,029
Carroll	30,950	38,926
Clarles	5,735	21,268
Dorchester	19,242	20,216
Frederick	70,949	84,373
Harford	14,371	28,016
Howard	17,707	13,681
Kent	12,015	21,954
Montgomery	13,236	22,396
Prince George's	30,856	17,726
Queen Anne's	15,477	13,116
St. Mary's	11,013	12,340
Somerset	15.064	30,563
Talbot	18,267	18,217
Washington	48,698	54,435
Worcester	12,516	13,887
	$496,493	$608,106
Baltimore City	693,825	770,545
Totals	$1,190,318	$1,378,651

☞ The number of passengers carried by the Milwaukee street railway during the past year is set down at 741,775. Total receipts $45,815 45.

Railroad Earnings.--Weekly.

The earnings of the Marietta and Cincinnati Railroad the 1st week in Feb., 1867 .. $18,127 00
Corresponding week previous year.... 19,777 00

Decrease $1,650 00

The earnings of the Detroit and Milwaukee Railroad for the week ending Feb. 14th, 1867, were $24,624 00
Corresponding week of 1866..... ..... 22,134 00

Increase..... .... $2,490 00

The earnings of the Chicago and Northwestern Railway for the second week in Feb., 1867, were.... .... $143,287 42
Corresponding week of previous year.. 122,625 20

Increase..... .... $20,662 22

The earnings of the Grand Trunk Railway of Canada for the week ending Feb. 2d, 1867, were $90,237 00
Corresponding week of previous year.. 111,113 00

Decrease... .... $20,876 00

The earnings of the Michigan Central Railroad for the 2d week in Feb., 1867, were... $63,887 39
Corresponding week of previous year.. 66,273 29

Decrease..... .... $2,385 90

The earnings of the Michigan Southern and Northern Indiana Road for the 2d week in Feb., 1867, were.... .... $72,684 00
Corresponding week of 1866 .... 70,697 00

Increase..... .... $1,987 00

The earnings of the Chicago and Rock Island Railroad for the 2d week in Feb., 1867, were.... .... $39,559 00
Corresponding week of previous year.. 40,145 00

Increase..... .... $586 00

Railroad Earnings--Monthly.

The earnings of the Cleveland and Pittsburg Railroad for the month of Jan., 1867, were:

From freight $82,819 40
" passengers 43,059 80
" miscellaneous 5,300 00

$131,179 20

Jan., 1866:
Freight, passengers, etc 168,798 81

Decrease..... .... $37,619 61

Law of Insurance.

HOW FAR STATEMENT IN POLICY WARRANTS THE CHARACTER OF THE PROPERTY INSURED.

The case of Smith against The Mechanics' and Traders' Ins. Co., lately decided by the Court of Appeals of this State involves an interesting question of insurance which will be better understood by a brief statement of the facts elicited on the trial. The action was brought on a policy of insurance of $2,500, issued by defendants to Alexander Smith, and by him duly assigned to plaintiff. The policy was upon one of several buildings adjoining or contiguous, and constituting an establishment known as "Smith's Carpet Factory." The risk came under the class of special hazards, and the premium was at the rates charged for that class. The property insured is described in the policy in these words: "$400 on his two story framed building used for winding and coloring yarn, and for storage of spun yarn, situate at West Farms, Westchester County, New York, known as part of Smith's Carpet Factory, marked F on plan of premises filed in the office of the Brooklyn Fire Insurance Company; $1,600 on stock wrought and unwrought and in process of being wrought in the above building; $500 on machinery and fixtures in said building."

The policy also contained a clause in these words: "And it is agreed and declared to be the true intent and meaning of the parties hereto, that in case the above mentioned premises shall, at any time after the making and during the time this policy would otherwise be in force, be appropriated, applied or used to, or for the purpose of carrying on or exercising therein any trade, business or vocation denominated hazardous, or extra hazardous, or specified in the memorandum of special rates in the terms and conditions annexed to this policy, or for the purpose of carrying on or exercising therein any trade, business or vocation denominated hazardous, or extra hazardous, or specified in the memorandum of special rates in the terms and conditions annexed to this policy, or for the purpose either of depositing, storing or keeping therein any of the articles, goods or merchandise in the same terms or conditions denominated hazardous, or extra hazardous, or included in the memorandum of special rates, except as herein expressly provided for, or hereafter agreed to by this corporation, in writing, to be added to or indorsed upon this policy, then and from thenceforth so long as the same shall be so appropriated, applied or used, these presents shall cease and be of no force or effect."

Among the subjects enumerated in the memorandum of special rates contained in the conditions annexed to said policy are "wool mills, wheelwrights and wool waste, and generally all mills and manufacturing establishments requiring the use of fire heat not before enumerated."

In October, 1861, the manufacture of carpets having been temporarily suspended under the pressure of the times, the insured placed in the building covered by the policy in suit, thirteen hand looms for weaving woolen army blankets, which looms were in part made from materials before used in manufacturing carpets, and partly from new materials. On the 1st of November, 1861, defendant, for an additional premium at an enhanced rate, consented that building "C," one of the several constituting the carpet factory, be occupied for weaving, fulling and storage purposes, and gave privilege "to run the mill nights for the term of three months."

After this period the insured commenced weaving army blankets by hand power in the building insured by defendants, and continued that business until the whole establishment was destroyed by a fire, which occurred in January, 1862, and originated in another building. There was no evidence that the change in the use of the building increased the risk, and plaintiffs offered to show that the risk was, in fact, decreased, but the evidence offered was excluded. It was proved that the process of "fulling" was never used in the manufacturing of carpets, but was a necessary part of the manufacture of blankets; and that it was not customary for carpet factories to be run nights. On the trial the plaintiffs were nonsuited, and the judgment entered thereon was affirmed at General Term.

The opinion of the Court was written by DAVIS, J.—The statement of the policy, that the building insured was "used for winding and coloring yarn, and for storage of spun yarn," was undoubtedly a warranty of its then present use. (Jenkins *vs.* Chenango Mutual Ins. Co., 2 Denio, 75; Wall *vs.* The East River Ins. Co., 3 Seld., 370.) This is all that is settled by the above cases. But there is no pretense that the building in this case was not used at the time of the insurance precisely as stated, and therefore, none for saying that the warranty was broken *in presento*, as it was in the cases cited. The only question, therefore, on this part of the policy, is, whether it contains a warranty that the building, during the continuance of the policy should be used only "for winding, coloring and storing yarn, with the fixtures and machinery then in it." In O'Niel *vs.* The Buffalo Ins. Co., the premises were described as occupied by a certain individual as a private dwelling. The occupant moved from and ceased to occupy the house several weeks before the fire, and it stood vacant when burned. This Court held that the description in the policy must be regarded as a warranty of the fact that the person named was the occupant at the date of the policy, and nothing more. (3 Comstock, 122.) In Catlin *vs.* The Springfield Ins. Co., (1 Sum., 435,) the policy was on a dwelling house, "at present occupied by one Joal Rogers as a dwelling house, but to be occupied hereafter as a tavern, and privileged as such," it was held that there was no continuing warranty that the house should be occupied as a tavern or otherwise, and that the company were liable, although the building was destroyed while vacant, by foul means, which probably could not have occurred if it had been occupied. A distinction was made in the Court below between the use of the word "occupied," and the word "used," in the description of policy as to the effect upon the question of continuing warranty; but to my mind the suggestion is without force. Both relate to the present actual use of the property, and are, when so applied, synonymous in the intent and meaning. If the Courts do not find a warranty in the phrase occupied in a particular manner, it would be overstraining to find one in the words, used in a special way. If an insurance company desire to protect itself by a warranty as to future or continued use in the same manner as when insured, it may always do so by language, the objects and meaning of which will be understood by both parties, and the Courts should not continue to use words which are fully satisfied as a description of a present use or condition, into a promissory warranty as to future use, the designated use must continue, or the warranty will be broken, for Courts have no right to say that the insured may abandon the particular use or occupancy, and allow the premises to lie vacant or idle; for the very act of requiring such a warranty is conclusive that the insured considered the continuance of the designated use or occupancy material to the risk, and made his contract accordingly. In my opinion there was no continuing warranty of future use in the clause of the policy under consideration.

The view that the description was not designed as such continuing warranty, is strengthened by the fact that the company have retained in the policy the clause in regard to using or appropriating the property in any manner included in their tabular statement of hazardous, extra hazardous and special rates; and thus by force of

the well known maxim "*expressio unius est exclusio alterius*," assented to changes not within the prohibition.

Another question of the case is, whether the change of use of the building from the purposes named in the description to the use of the hand looms for weaving blankets, falls within the prohibition just referred to. In considering this question, it is to be remembered that the property was insured as part of a manufactory of woolen fabrics—carpets made of wool—and is therefore properly within the designation "wool mills," as used in the list of special rates. Indeed, the factory is described by defendants as "the mill" in the privilege given for running nights. It was insured at the special rates fixed by the company because of the kind of business carried on. In making the change, no new or additional business was superadded to that of manufacturing carpets. The latter was temporarily abandoned, and the making of blankets temporarily substituted. The same material was used, preparing substantially in the same manner, but brought to a differently constructed loom for the purpose of turning out a different fabric.

But there was no change of the premises or of the business from something not "hazardous or extra hazardous," or not specified in the memorandum of special rates, to something coming within either.

The wool mills remained wool mills, although they made blankets instead of carpets for the time being, and never by the change lost their character as a manufactory of woolen goods in which they were insured. In no just sense of the prohibitory clause above quoted, was there any change obnoxious to its provisions; for an establishment within the special rates, because it manufactured woolen goods of one kind, was no more within than because it made the same material into a different kind of goods. In my judgment, the policy was not forfeited by force of the clause relied upon by substituting the making of blankets for carpets in the manner described in the evidence, because it was no such change or different "appropriation" as is contemplated by that clause.

I think the judgment should be reversed, and a new trial ordered.

All the judges concurring, the judgment was reversed.

Lykens Valley Coal Trade.

During the last year the Franklin Coal Company suspended operations, and a new Company has been organized to work the Colliery, under the name of the Lykens Valley Coal Company. This Company commenced late last year, and only sent 1,385 tons of coal to market in 1866. They expect to do a large business this year. The Summit Coal Company in this coal basin, commenced business in April last, under the superintendence of Maj. Anthony, and sent 70,112 tons to market, via the Summit Branch Rail Road which connects with the Lykens Valley Rail Road. The proprietors of the old Lykens Valley Colliery, are also sinking a slope on the seven foot vein, which lies in close proximity to the new one worked, a distance of about two miles from the present slope, and propose working both veins at this point also. This will be called the New Lykens Valley Colliery. The Upper Dauphin *Register*, from which we glean the above, states that the trade from that Region can be doubled in 1866, if they can procure facilities for transportation.

Boston, Hartford and Erie Railroad.

This company opened its line from Boston to Southbridge on the 11th inst. The ups and downs in the history of this line have been so many and so perplexing and its progress so slow, that a good many people have begun to believe in a sort of inherent impossibility of anything ever coming of it; and except for a few local passengers the unpretending station at the foot of Summer street and the trade winding its way over the South Boston flats stand as memorials of a past speculation rather than the beginning of a great project of future usefulness. Nevertheless trains now start over that route for a terminus 64 miles distant from this city, actually a longer line than is owned by either of the seven "principal" roads centring here, except the Boston and Maine and the Old Colony and Newport.

This Southbridge line, leaving this city at the foot of Summer street, strikes what has been known as the Norfolk County Railroad, originally planned as a through line to New York by Robert G. Shaw and others of our strong men of the last generation; it passes over that route to Blackstone, skirts along the northern edge of Rhode Island until it enters Connecticut and reaches Mechanicsville, distant 60 miles from Boston, throwing off a branch at East Thompson, 17 miles long to Southbridge, whence an extension of only 18 miles would enable it to tap the Western Railroad at Palmer and give that line another entrance to this city.

Between Mechanicsville and Willimantic, a distance of 26 miles, some work has been done towards the extension of the track. The filling of this gap of 26 miles will bring the road into connection at Willimantic with the Providence, Hartford and Fishkill road, and will open through Hartford and New Haven a new route to New York, which would be 12 or 15 miles shorter than any now traveled.

The Providence, Hartford and Fishkill line, just referred to, has also been consolidated with the Boston, Hartford and Erie. This line is built from Providence to Waterbury, Connecticut, 122 miles, and an extension of about 77 miles to Fishkill will throw it into connection with the New York and Erie road, forming a great through line of transportation to the West.

We must add to these the old Air Line road, now owned by the Boston, Hartford and Erie and called its Woonsocket Division, over which cars run from the Boston and Worcester station 37 miles to Woonsocket, whence it has pushed forward about 8 miles into the rich manufacturing region of the Pascoag Valley. Thus we have approximately—

	Miles.
Boston to Mechanicsville and Southbridge	64
Providence, Hartford and Waterbury	122
Woonsocket Division (Air Line)	37
Pascoag Extension	8
	231

—all now consolidated under one ownership and soon to come under the same management, and requiring but 18 miles of new track to give the Western Railroad a new route to this city, less than 26 miles to give us a new and shorter line to New York, and only 77 more to give us a new through line to the West. To this it is to be added that so far as local business is concerned, the line opened to-day and the proposed extensions to Willimantic and through the Pascoag Valley open some of the most flourishing manufacturing districts of New England, hitherto unprovided with railway facilities. These simple facts are enough to show that the new line, which is coming forward with so little noise, deserves and must soon have more attention than it has yet had as assisting in the solution of our great transportation question; and they may also serve to explain the meaning of one of our leading merchants, who lately told the Board of Trade that the Boston, Hartford and Erie road could if it chose present a stronger claim for aid from the State than any other line now projected or in progress.—*Boston Advertiser.*

New Almaden Mines.

The quicksilver mines of California are known as the New Almaden mines, and have been open since 1850. In August, 1863, a period of 10 years and 11 months, the total amount of ore consumed was 102,313,442 pounds, and the produce of quicksilver 308,756 flasks, or 23,519,834 pounds. From November, 1863, to December, 1864, the total product was 46,216 flasks, or 3,566,200 pounds, to which is to be added 720 flasks from washings. In 1865 the gross product was 47,078 flasks, or 3,604,465; pounds, to which is to be added 116 flasks from washings. The gross product for 1866 was 30,029 flasks. The following is a comparative statement of all the quicksilver exported from California to various countries since 1862:

To	1862. Flasks.	1863. Flasks.	1864. Flasks.	1865. Flasks.	1866. Flasks.
New York	2,265	94	1,695	6,800	3,500
Great Britain	1,500	1,062	1,609	10,400	10,400
Mexico	14,778	11,590	7,483	2,650	6,450
China	8,725	8,889	18,908	14,250	17,250
Peru	3,439	3,376	4,300	5,500	5,500
Chili	1,746	500	2,674	2,000	2,600
Cen. America	40	40	30	....	....
Japan	25	....	262	....	....
Australia	800	300	103	200	200
Panama	424	120	45	....	....
Victoria, V. I.	5	42	21	....	....
Total	33,747	26.014	36,918	41,800	45,900

The other quicksilver mines in California did not average 1,000 flasks per month in 1866.

Borax was discovered in California in 1856, and since that time but one company has been formed for its production. About two tons of crude cystal are produced daily.

Commerce of San Francisco in 1866.

Arrivals from New York, 58; Freight List		$1,807,000
" Boston 17; " "		543,000
Exports from San Francisco to New York		4,602,000
" " Boston		752,000
" of hides to New York		128,879
" " Boston		95 272
" of copper ores to New York		186,388
" " Boston		77,133
" of wheat to New York (sacks)		284,433
" " Boston "		14 907
" of wine to New York (packages)		3,400
" " Boston "		200
Receipts of lumber at San Francisco	131,000,000	feet.
" rice "	25,000,000	lbs.
" sugar "	40,000,000	lbs.

FOREIGN COMMERCE.

The foreign commerce of San Francisco is very important, and the amount of duties collected annually is next to Boston. Last year,

25	vessels arrived from Liverpool	with	assorted	cargoes.
4	" " London,	"	"	"
20	" " Japan,	"	teas, &c.	
7	" " Callao,	"	assorted	cargoes
4	" " Calcutta,	"	"	"
4	" " Batavia,	"	"	"
12	" " Bordeaux,	"	"	"
30	" " Hong Kong	"	"	"
8	" " Hamburg,	"	"	"
12	" " Manila,	"	"	"
6	" " Shanghai,	"	"	"

Also a large fleet from Rio Janeiro, Cardiff, Shields, Glasgow, Australia, Sandwich Islands, &c., all loaded with large and valuable cargoes. Once Boston and New York supplied California almost entirely, but now the port of San Francisco has a direct foreign trade to all quarters of the earth.

☞ The Cumberland *Union* says that the Chesapeake and Ohio Canal tolls on coal have been reduced from 92 to 62 92-100 cents per ton, and that the board of public works have confirmed the action of the canal board.

Journal of Railroad Law.

FENCING RAILWAY UNDER WISCONSIN STATUTE.—LIABILITY OF COMPANY.

The case of Johnson *vs.* Milwaukee and St. Paul Railway Company, lately decided by the Supreme Court of Wisconsin, contains a construction of a statute, relative to fencing railroads, and is applicable to similar statutes in other States. In this case it was decided that where the owner of lands across which a railroad company had constructed its track, recovered damages for such taking, prior to 1860, it must be presumed that the expense of building and maintaining a suitable fence along the line of the road where it crossed said land was included in the damages; and the owner of the land would not either before or after the passage of Ch. 268, Laws of 1860, (which requires every railroad company to erect fences along its track,) maintain an action against the company for injuries done to his cattle, which escaped upon the track in consequence of defects in such fence.

The facts sufficiently appear from the opinion which was delivered by

COLE, J.—In the stipulation of facts made in this case, it was agreed that the cattle and colt which were injured by the company, escaped from the plaintiff's land into and upon the railroad track, in consequence of a defect in the fence on either side of the railroad track, where the road passes through the plaintiff's land. And the ground of liability mainly relied on grows out of the alleged neglect of the company in not making and repairing such fence along the plaintiff's land, so as to prevent his stock from escaping through it upon the railroad track. The question then is, can we say, upon the admitted facts in the case, that the company was bound to build and maintain a fence along the line of its road where it crosses the plaintiff's land so as to render it liable to him for injuries happening in consequence of the want of such fence? It is claimed and insisted that Ch. 268, Laws of 1860, imposed upon the company the imperative duty of fencing its road where it crosses his land, and therefore that the liability of the company in this case is clear and undoubted. The Circuit Court sustained this view of the law; but in this decision we think there was error.

The stipulation states that commissioners were appointed in 1856, under the provisions of the charter of the Milwaukee and Horicon Railroad Company, (to the rights and privileges of which company the defendant has succeeded,) to appraise the damages of the plaintiff by reason of the railroad crossing his land. Such appraisement was had; but it appears that the plaintiff was not satisfied with the award of the commissioners, and took an appeal to the Circuit Court, where there was a re-assessment of the damages. The judgment obtained in the Circuit Court has been fully satisfied and discharged. Now, although the stipulation does not specifically say that the expense of building and maintaining a suitable fence along the line of the road where it crosses the plaintiff's land was one of the items taken into consideration by the jury in assessing his damages; yet we suppose the necessary presumption is that it was, and that the plaintiff had already been paid such expense in the land damages. The charter authorized and required the commissioners to estimate the value of the land taken or required by the company; and all damages which the owner might sustain by reason of the taking of the same for the construction of the use of the road. Sec. 12, Ch. 450, Laws of 1852. And this Court has held that fences made necessary by the running of a railroad through a farm, in order that such farm may be as securely used as before, were legitimate and proper items of damages for the jury to consider. The Milwaukee and Miss. Railroad Company *vs.* Eble, 4 Chandler, 72; Robbins *vs.* Milwaukee and Horicon Railroad Company, 6 Wis., 636. Now in 1856 there was no general statute requiring railroad companies to enclose their roads by fences. As the law then stood, commissioners, or a jury, in estimating the damages for the land taken for the use of the road, could consider and allow the owner the expense of building and maintaining a fence as a part of the compensation allowed him. Such expense formed a proper element in the estimate of damages, and we must therefore assume that the plaintiff has already been paid the expense of fencing. If he has been paid this expense in the assessment of damages, then it is obvious that no obligation is imposed upon the company to maintain a fence across his land so far as he is concerned. The duty of making and repairing the fence through which the cattle escaped upon the road devolved upon him, and not upon the company. Nor are the rights and duties of the parties in respect to each other changed by the law of 1860. For if before the passage of that law the plaintiff was bound to erect fences between the railroad and his land, then he cannot charge the company with negligence because it omitted to do that which it was his duty to do. See Morse *vs.* The Boston and Maine Railroad, 2 Cushing, 336; Corwin *vs.* The New York and Erie Railroad Company, 3 Kernan, 42. Whether the statute of 1860 enlarges the liability of the company and imposes increased responsibility upon it, so far as third persons are concerned, is a matter we need not now consider. Here the plaintiff claims to recover on account of the neglect of the company to build a fence which he himself was bound to maintain or repair. If it was his duty to keep up suitable fences along the railroad track before the passage of the law of 1860, because he had been paid the expense of fencing in the compensation allowed him for the taking of his land, that obligation remains unimpaired, and the relations of the parties are not changed by this statute.

For these reasons the judgment of the Circuit Court must be reversed, and a new trial awarded.

Texas and New Orleans R. R.

The Chairman of the Senate Committee on Railroads, has reported favorably upon an act relative to the Orange and New Iberia Railroad. We have not yet learned the provisions of this bill, but judge it to be for the relief of the road in question. As this matter is attracting some attention, we have thought a short review of the operations of the company would prove interesting.

In 1859 the Legislature of Louisiana granted a charter to the Texas and New Orleans Railroad, for building a road direct from the Sabine to New Iberia, and the Company is now working it. The route was divided in two divisions, viz: The Texas division extending from Houston to the Sabine, and the Louisiana division from the Sabine to New Iberia. In 1861, the Texas division had constructed 108 miles of road, and had contracted for the building of the entire Louisiana division, and were receiving iron from England for the road, when the war broke out and put a stop to further operations. During this time, however, the road was kept in running order. Upon the reorganization of the Louisiana division, a short time ago, Col. Gentry was elected President of the Board, being at the same time President of the Texas division. The President, with Mr. Congreve, who is largely interested in the Texas division, after several efforts, succeeded in making the most satisfactory arrangements in New York, and in settling matters to the satisfaction of the large bondholders there.

We are informed that the rails have been contracted for in England for the entire route, from the Sabine to New Iberia, and their delivery will soon commence. Arrangements have been made to settle with the State of Texas for the first mortgage—the amount being nearly $500,000. It is then contemplated to issue new first mortgage bonds, based on the one hundred and eight miles of finished road; and, with the proceeds, commence the building of the Louisiana division. The arrangements are completed for the speedy building of the road from Orange to the Calcasieu River, at or near Lake Charles. The company have purchased, and have now in the river, two first-class steamers, which, by the 15th of February, will be running regularly between Sabine Pass and Berwick Bay, connecting at the Pass with good river steamboats, that will run up the river to Beaumont or Orange, whence passage to Houston, by railroad, will be a matter of a few hours' travel.—*N. O. Com. Bulletin.*

Railroads in Kansas.

The Governor of Kansas, in his recent Message to the Legislature, gives the following account of the railroad interest in that State:

These are indispensably necessary to the development of our resources and to our material prosperity; and their construction should be encouraged in every judicious and proper manner. The war, and the insecurity of everything on account of it; the scarcity and high price of labor, not only delayed but almost compelled the suspension of work on all our railroads. Notwithstanding these embarrassments and impediments, there are now completed, and in successful operation, about 300 miles of railroads in Kansas. The Union Pacific Railway, Eastern Division Company are now prosecuting the work on their road with commendable energy and success. The road was completed from Wyandotte to Lawrence, in 1864, a distance of 40 miles; from Lawrence to Topeka, in 1865, a distance of 27 miles; and during the year 1866, from Topeka, westward, nearly 100 miles, and the grading mostly completed for 50 or 60 miles further; also, the branch road from Leavenworth to Lawrence, a distance of 33 miles, making for the year 1866, about 133 miles of road, or one-half mile for each working day, against an average of 35 miles for the years 1864 and 1865. It is the confident expectation of the company to be able to complete 200 miles during the present year. The completion of this great national thoroughfare to the western boundary of our State, will be the means of adding tens of thousands to our population, and millions to our taxable property. It will increase the value of land along the line of the road fully $50,000 per mile, in connection with the additional wealth from immigration.

The Missouri River Railroad, from Wyandotte to Leavenworth City, a distance of 33 miles, has been completed during the year and is in successful operation.

The Central Branch Union Pacific Railway, commencing at the city of Atchison, and running almost due west, is progressing rapidly. The heavy grading on the first 20 miles, necessary to make it a first class road, retarded the work until recently. It is now being pushed forward with rapidity, and about 60 miles are already completed and in successful operation. It is a first class and substantially constructed road.

The St. Joseph and Denver Railroad is completed to a distance of about 15 miles, and is in running order. The company feel confident of being able to push the road forward to its junction with the main line of the Union Pacific Railroad, without delay.

The former Directors of the Leavenworth, Lawrence and Galveston Railroad Company have transferred the franchises of their road to a company which promises to complete the road to the southern boundary of the State, within two years. The fulfillment of this agreement is confidently expected by those personally acquainted with the parties, to whom the franchises of the road have been transferred.

The completion of the Union Pacific Railway, Eastern Division, to the vast coal fields and gypsum beds in the Smoky Hill; of the Leavenworth, Lawrence and Galveston Railroad to the large coal veins in the Osage country; and of the Border Tier Railroad, from Kansas City to the extensive marble and coal beds in the vicinity of Fort Scott, will mark a new era in the progress and prosperity of our State.

The Union Pacific Railroad, Southern Branch, has a large land grant from the Government, and also one of 125,000 acres from the State. The company is making every necessary arrangement for the commencement of work at an early day. I trust a liberal spirit will be exercised in the adoption of such legislation as may be necessary to secure the early completion of these great and much needed enterprises. Such other railroads within the State, as commend themselves to your consideration, will, I trust, receive at your hands, such favorable consideration as each of their interests require.

I do also recommend that you require by legislative enactment, that the President or Superintendent of each railroad within the State, report between the 1st and 15th of December, of each year, to the office of the Secretary of State, the number of miles of road completed, the number of miles in process of construction, the cost per mile of construction, the cost per mile for right of way, the rate of fare and freight, the cost of management of road; also, the gross and net receipts or deficits for each month during the year, and the amount of damages claimed for stock killed, the amount paid and to whom.

Maryland—Internal Revenue Receipts.

The following statement will show the receipts into the U. S. Treasury from Internal Revenue in each collection district of the State of Maryland, during the years named:

	1864.	1865.	1866.
First	$95,182 00	$237,198 63	$256,709 96
Second	488,999 26	826,825 84	1,158,187 22
Third	1,851,504 94	3,399,810 64	5,325,005 41
Fourth	267,926 77	465,278 87	551,191 66
Fifth	307,209 96	493,649 85	567,477 92
	$3,010,822 93	$5,422,763 93	$7,858,672 17

The receipts into the United States Treasury from Baltimore City for 1864 and 1865, were as follows:

From customs, hospital and ton'ge duties	$108,210 00
Miscellaneous receipts	167,450 32
Bank tax	90,893 03
Internal and coastwise intercourse	321,971 20
	$688,524 55

The semi-annual duty paid by National Banks for 1864 and 1865, was as follows:

July 1, 1864	$2,241 88
January 1, 1865	9,829 22
July 1, 1865	15,262 30
January 1, 1866	63,557 63
	$90,891 03

☞ A bill has been introduced into the New Jersey Senate authorizing the Raritan and Delaware Bay Railroad Company to issue bonds to the amount of $2,500,000 additional to those now issued.

☞ A bill has passed the Maryland House of Delegates, by a large majority, authorizing the running of the Baltimore City Passenger Railroad cars on Sunday.

To Engineers and Railway Contractors.

WANTED by a gentleman of 25 years' practical experience in constructing Railways and Harbors, a situation as Engineer or Superintendent of Works in all detail; having conducted many important Railway and other Works in Europe and Canada, offers his services to gentlemen connected in such operations, where energy and competent knowledge is required. Good references given as to character, qualifications, &c., to Engineers of first-class standing. Letters addressed as under will receive attention. A. B., Weaverton Post Office, Frederick County, Maryland.

THE STEAM SIPHON PUMP

IS THE MOST SIMPLE, EFFECTIVE, AND DURable device for raising water by steam yet discovered.

It is an independent lift and force pump without piston, plunger, valves, or movable parts of any kind. With the STEAM SIPHON WATER STATION a Locomotive can raise water with its own steam, and fill its tender in the same time as from an ordinary tank, thus dispensing with tanks, pumping machinery, and men to attend them. It cannot get out of order, or freeze up, and is an efficient fire engine where steam power is employed, as at Machine Shops, Car Shops, Elevators, &c. For Circulars and other information address

ENGINEERS AND CONDUCTORS'
WATCHES.

THE AMERICAN WATCH COMPANY, of Waltham, Massachusetts, request us to publish the following letters, recently received, recommendatory of Waltham Watches for railway use. The Pennsylvania Railroad Company have for several years furnished to their employees watches specially made for them by the Waltham Company, and it is this class of watches the Superintendent, Mr. Williams, refers to. Similar watches (in strong silver or gold cases, with plate-glass crystals) we are prepared to supply, named and engraved to order; and of them, as being most suitable for the use of Engineers, Conductors, Station-Masters, of Expressmen and Messengers, the Company give the most ample guarantee. It is a remarkable fact that Railroad Companies using our watches suffer much less from collisions and similar accidents than any others.

Any of the grades of Waltham watches may be purchased of Watch Dealers generally throughout the country.

ROBBINS & APPLETON,
182 Broadway, New York.
ROBBINS, APPLETON & CO.,
158 Washington Street, Boston.

PENNSYLVANIA RAILROAD CO.

OFFICE OF THE GENERAL SUPERINTENDENT,
ALTOONA, Pa., 15th Dec., 1866.

GENTLEMEN,—The Watches manufactured by you have been in use on this Railroad for several years by our Enginemen, to whom we furnish watches as part of our equipment. There are now some three hundred of them carried on our line, and we consider them good and reliable timekeepers. Indeed, I have great satisfaction in saying your watches give us less trouble, and have worn and do wear much longer without repairs, than any watches we have ever had in use on this road. As you are aware, we formerly trusted to those of English manufacture, of acknowledged good reputation, but as a class they never kept time as correctly, nor have they done as good service as yours.

In these statements I am sustained by my predecessor, Mr. Lewis, whose experience extended over a series of years. Respectfully,

EDWARD H. WILLIAMS,
General Superintendent.
AMERICAN WATCH COMPANY, Waltham.

NEW YORK CENTRAL RAILROAD.

LOCOMOTIVE DEPARTMENT, WEST. DIVISION,
ROCHESTER, Dec. 24, 1866.

GENTLEMEN,—I have no hesitation in saying that I believe the great majority of Locomotive Engineers have found by experience that Waltham Watches are the most satisfactory of any for their uses. They run with the greatest accuracy and steadiness, notwithstanding the rough riding of an engine, and as I have never known one to wear out, they must be durable. I hope to see the time when Railway Companies will generally adopt your watches, and furnish them to all Engineers and Conductors. In my opinion it would greatly tend to promote regularity and safety.

Yours respectfully,

CHARLES WILSON, G. Chief Engineer,
Brotherhood of Locomotive Engineers.

New York, Saturday, March 2, 1867.

Trade and Tonnage of the Canals.

The Auditor of the Canal Department has submitted to the Legislature the Annual Report of the tolls, trade and tonnage of the Canals of New York during the season of navigation of 1866, in which all the matters required to be presented to the Legislature are fully and particularly set forth. Additional tables and comparative statements are embodied in the report, which have been carefully compiled from official documents in the Auditor's possession, in order to show, as far as practicable, a comprehensive view of the trade and tonnage, by the canals, between the great lakes and the Hudson River and New York. From this document we learn that the whole amount of tolls received was $4,436,639, which is composed as follows:

On boats and passengers	$228,468
On products of the forest	940,688
On products of animals	10,366
On products of vegetable food	2,512,286
On other agricultural products	1,998
On manufactures	153,372
On merchandise	131,021
On other articles	458,440
	$4,436,639

The whole amount of tonnage arriving at tide water by way of the Erie Canal, from Western States and Canada, during the last season of navigation, was 2,235,716 tons. The whole amount of tonnage arrived at tide water, the products of this State, during the same period, was 287,948 tons.

The whole number of barrels of flour arriving at tide water through the canals during the last season of navigation, was	590,704
The whole number of bushels of wheat arriving during the same period, was 7,584,166, which turned into flour, calculating five bushels to the barrel, would make	1,516,833
Total in barrels	2,107,537

The total number of bushels of corn arriving at tide water during the same period, was 26,516,535.

The whole number of boats, new and old, registered during the last year, was 485, with a tonnage of 74,630, making an average tonnage of 154.

The total number of lockages at Alexander's lock for the season, was 29,882. The greatest number of lockages at any one lock, was 30,263, at lock 45, Frankfort.

Comparing the season of 1865 with that of 1866, it shows an increase in revenue of $596,684, and an increase in tonnage of 1,045,566, divided among the different classes as follows:

Products of the forest, inc	302,679	
Vegetable food, inc	101,234	
Manufactures, inc	20,409	
Merchandize, inc	24,910	
Other articles, inc	607,599	
		1,056,831
Products of animals, dec	8,431	
Oother agricultural products, dec	2,834	
		11,265
Increase		1,045,566

The whole amount of tonnage transported on the canals during the last season of navigation, ascending and descending, was 5,775,220, and is composed as follows:

Products of the forest	1,769,994
Products of animals	18,810
Vegetable food	1,763,931
Other agricultural products	3,319
Manufactures	302,241
Merchandize	179,878
Other articles	1,737,047
	5,775,220

The value of such tonnage is as follows:

Products of the forest	$28,754,821
Products of animals	7,377,796
Vegetable food	77,854,997
Other agricultural products	1,378,141
Manufactures	18,389,992
Merchandize	100,169,211
Other articles	37,038,718
	$270,963,676

The total movement of freight, or number of tons carried one mile during the last season of navigation, was 1,012,448,034.

The total movement of the several classes composing such tonnage is as follows:

Products of the forest	238,798,859
Products of animals	2,190,916
Vegetable food	475,656,914
Other agricultural products	483,500
Manufactures	42,096,332
Merchandize	40,031,747
Other articles	218,289,766
	1,012,448,034

The increase in lockages at Alexander's lock is 3,845. In flour and wheat, comprised in the returns of vegetable food, there has been a decrease in tonnage the past year of 159,393, and a decrease in tolls of $262,722. In corn and oats there has been an increase in tonnage, during the same period, of 232,639, and an increase in tolls of $389,728. Under the head of "products of the forest," there was an increase in tonnage upon shingles, boards and scantling of 279,827 tons, and an increase in the tonnage upon timber, staves and wood of 23,967, and a decrease in pot and pearl ashes 1,396 tons. Under the head of "other articles," there was an increase in the tonnage of anthracite and bituminous coals, for the same period, of 415,930, and an increase in sundries of 24,085 tons.

	Tons of each class carried on the canals.	Tons of each class carried on the railroads.	Tot. tons of each class carried.
Prod. of forest	1,769,994	730,605	2,500,599
Prod. of animals	18,810	1,322,770	1,341,580
Vegetable food	1,763,931	1,581,785	3,345,716
Other agri. prod.	3,319	445,480	448,799
Manufactures	302,241	1,019,382	1,321,623
Merchandise	179,878	1,334,768	1,514,646
Other articles	1,737,047	2,775,686	4,512,733
Total	5,775,220	9,210,476	14,985,696

The whole number of bushels of barley transported on the canals in 1865, was..... 5,336,416
The whole number transported in 1866.. 7,867,041

Showing an increase in 1866 of.... 2,530,625
The whole number of bushels of barley which arrived at tide water in 1865, was.... 4,523,583
The whole number of vessels which arrived in 1866, was..... 7,129,167

Showing an increase in 1866 of.... 2,605,584
The whole amount of tolls received on barley and barley malt, in 1865, was..... $146,433
And in 1866..... 251,482

Showing an increase in tolls of..... $105,049

The following statement shows the number of tons of each class of property carried on the canals during the season of navigation, in the year 1866, and on all the railroads in the State from the first of October, 1865, to the 30th September, 1866:

Mileage on the canals..... 1,012,448,034
Mileage on railroads..... 1,048,363,225

The mileage on the canals, or number of tons moved one mile, has increased since 1865, 168,532,255 tons, and the mileage on the railroads has increased during the same period 181,715,685 tons.

Baltimore and Ohio Railroad.

The Baltimore and Ohio Railroad Company have in contemplation the shortening of their line between Baltimore and the Relay House, and of course to all points beyond. The improvement consists of the laying of a track immediately adjoining the Relay House in a direct line to the city limits, by which a distance of 1½ miles will be saved, and a quarter of an hour of time economized. It is intended to lay the new tracks from a point west of Gwynn's Falls. In the execution of the work a very fine iron or stone bridge will be constructed over Gwynn's Falls.

☞ The grantees of the West New Hampshire Railroad have accepted their charter and organized their corporation. Hon. T. M. Edwards, of Keene, has been chosen President.

The Pennsylvania Railroad.

TWENTIETH ANNUAL REPORT.

PHILADELPHIA, Feb. 19, 1867.

To the Stockholders of the Pennsylvania Railroad Company:

The following statement will exhibit the financial condition of the company on the 1st of January last, and the earnings and expenses of your railroads and canals during 1866:

DR.

To capital stock.....		$20,000,000 00
To first mortgage 6 per cent. bonds	4,980,000 00	
To second mortgage 6 per ct. bonds	4,904,840 09	
To lien of State upon the public works sold to this company, bearing 5 per cent.....	6,600,000 00	
To short bonds, or debentures, 6 per cent.....	1,554,015 75	
To mortgages and ground rents, 6 per cent.....	170,184 32	
To bills and accounts payable, including dividends due to stockholders, unpaid.....	3,062,144 45	
To extra dividend fund.....	1,110,000 00	
To contingent fund.....	1,000,000 00	
To Harrisburg and Lancaster Railroad Company's stock.....	1,182,550 00	
To Harrisburg and Lancaster Railroad Company's bonds.....	700,000 00	
To Balance.....	870,415 02	
		$46,134,149 54

CR.

By balance standing on the books of company for the construction of the railroad between Harrisburg and Pittsburg, including branches to Indiana and Hollidaysburg, (in all 276 miles); also for costs of stations, warehouses, shops, and shop machinery, on the whole road from Philadelphia to Pittsburg.....	$13,500,000 00	
By cost of Harrisburg and Lancaster Railroad, when delivered to this company, including branch to Columbia (in all 55 miles.....	1,882,550 00	
By balance standing on the books of the company, for the purchase of the Philadelphia and Columbia R. R. and the Pennsylvania Canals..	6,600,000 00	
By balance standing to debit of equipment of the road, consisting of 452 locomotives, 240 passenger cars, 103 baggage, mail, and express cars, 6,953 freight cars, and 923 road cars	3,371,214 93	
By cost of real estate of company and telegraph line....	3,421,480 91	
By extensions of Pennsylvania R. R. to the South Bank of the Monongahela, and to the Delaware River, including wharves and grain elevator.....	2,121,157 77	
		30,896,403 61
By 14,533 shares Harrisburg and Lancaster Railroad stock.....		726,650 00
By Western Pennsylvania Railroad stock and bonds.....		183,450 00
By cost of first and second mortgage bonds, Pittsburg and Steubenville Railroad Company....		738,205 20
By Steubenville and Indiana Railroad first mortgage bonds, owned by company.....		1,262,651 52
By Philadelphia and Erie convertible 7 per cent. bonds (the remainder of the $3,000,000 loan being in sinking fund).....		439,000 00
By amount of other bonds and stocks of municipal and railroad corporations.....		1,570,342 74
By cost of bonds and stocks in sinking fund.....		1,996,367 68
By amount of fuel and materials on hand for repairs to locomotives, cars, and maintenance of way on Pennsylvania Railroad.....		1,378,404 10
By amount advanced to pay for fuel and materials on hand for repairs to locomotives, cars, and maintenance of way for Philadelphia and Erie Railroad.....		449,220 89
By amount advanced to operate Philadelphia and Erie Railroad..		725,130 02
By amount of bills and accounts receivable, and amount due from other railroads.....		4,148,063 93
By balance in hands of agents....		577,018 89
By balance in hands of Treasurer, including $420,000 U. S. 6-20's..		1,043,241 46
		$46,134,149 54

The shareholders will perceive by comparing the above items with their cost, as shown in previous reports, that in addition to the payment of dividends upon your original investment, equal to 46 per cent. above legal interest, the cost of your road from Philadelphia to Columbia has been reduced $900,000, and from Harrisburg to Pittsburg $6,426,855, from the surplus profits of the company; and the equipment of the line, which has cost $10,603,559 55, is now represented at $3,371,214 93.

The sinking fund, which cost $1,996,367 68, it is believed is ample, with its accruing income, to take up at maturity the debt of the Harrisburg and Lancaster Railroad Company, the second mortgage bonds of this company, and still leave in it all the stocks that it is important that this company should retain for the security of its traffic. This conservative policy has been pursued in view of the adventitious character of the traffic of the line during the past five years, and for the purpose of giving the company a financial strength which will render the continuance of its dividends certain, independent of the action or policy of rival lines.

The company has been placed in this strong position while it has, at the same time, to a larger extent than any other corporation of the kind, promoted the development of the interior of the Commonwealth by aiding the completion and extension of other railroads where private capital would not incur the risks of such investments.

The Pennsylvania Railroad was commenced under the sanguine hope that it could be completed and equipped without incurring a debt. The efforts of the company in this direction, in view of the great abuse that had attended the financial operations of the earlier corporations of this State, were eminently wise and worthy of an earnest effort to carry them into effect. But after some years of persistent labor it became evident that the enterprise was too great for the local capital of this city without submitting to a delay in its completion, which neither the commercial prosperity of Philadelphia nor the interest of the shareholders of the company would justify. This policy was therefore abandoned for one which limited the mortgage indebtedness of the company to its capital stock.

At the commencement of its work, the views of the company extended only to the construction of a railway between Harrisburg and Pittsburg. But in operating such a line in connection with the uncertain and frequently adverse management of the Philadelphia and Columbia Railroad, under the State authorities, it became evident that it must fail to meet the just expectations of its projectors, unless an independent connection could be made with its commercial depot, or a lease or purchase of the existing lines effected. After many abortive efforts, this object was accomplished by a lease of the Harrisburg and Lancaster Railroad, and the purchase of the State improvements at a high price, but upon a satisfactory credit. The great point, however, of securing harmonious action throughout the line, from Philadelphia to Pittsburg, was accomplished, which at once imparted new life and vigor to the enterprise, and insured its prosperity.

It was early foreseen that a trunk line, intended to accommodate the traffic between the East and West, would fail in its object if wholly dependent upon the uncertain navigation of the Ohio River as a feeder. The earlier commencement of the other trunk lines has already diverted the routes of the railroads in progress from the commercial centres of the West towards the East to their works. To overcome this disadvantage, it became essential that other lines connecting your road with these trade centres of the West should be commenced, and to effect this, direct and efficient aid by this company towards their construction was necessary. So fully impressed were the shareholders of this company at the time of the importance of this movement, that, in voting such aid, they exceeded the views of the Directors. The three principal lines selected for such aid were one to Cincinnati, a second to the centre of

Ohio, at Columbus, and a third towards Chicago. The connection with Cincinnati *via* Marietta was adopted, and failed from the inadequate means provided to construct a line over what proved to be an unexpectedly rugged country. The line to Chicago was only saved as an investment after the failure of the credit of that company, by much labor and large additional outlays by this company to secure its completion. These efforts were crowned with entire success, and the enterprise, both financially and as a feeder of your main line, has met our most sanguine expectations.

The line to Columbus, which also afforded an equally good connection with Cincinnati as that *via* Marietta, though leaving a large district of country tributary to another railway, after long delays, growing mainly out of a failure to procure adequate legislation in Virginia, has recently been brought into efficient use, and promises satisfactory results. The Pennsylvania Railroad Company will own as a preferred shareholder more than half the capital stock of this line.

The eastern end of this line, known as the Pittsburg and Steubenville Railroad to the Virginia State line, was commenced under the patronage of the city of Pittsburg and Allegheny County, but owing to the absence of any legal right to extend its road to the Steubenville and Indiana Railroad across Virginia, it failed to obtain a credit that would justify any responsible individuals in undertaking its construction. A further increase of its capital stock was therefore impracticable.

A contract was entered into by the Pittsburg and Steubenville Railroad Company, with parties of insufficient capital, for the completion of this line, which, as might have been expected, only resulted in still further embarrassing the condition of the company by a disproportionate increase of its indebtedness, compared with the work done. After further efforts to secure other parties to build the road, a contract was entered into with the Western Transportation Company for that object—a corporation in which this company became the chief shareholder, and through its instrumentality a concession was obtained from Western Virginia, permitting the construction of a railroad across that State. From this period the work was pushed with as much vigor as the condition of the labor market would permit, notwithstanding the extraordinary advance that had taken place in every element that entered into the cost of constructing railways. Under this contract, the work has been opened for use for more than a year. In view of the expenditures that had been made upon the line, and those directed to be made under the commutation act, it was, at the time, deemed best to advance the means required to complete this line; but, in consequence of the unexpectedly large amount required, it would have probably been better to have permitted the road to have been sold, and thus divested it of the complications surrounding it and which now render such a sale essential to ascertain the relation of its creditors. There is much work still to be done, to complete this road in a manner that will enable it to meet the demands of its traffic.

The Marietta line, which had enlisted the warmest support from the shareholders and merchants of this city of either of the lines mentioned, became so hopelessly involved that the funds advanced by this company for the construction of that part of the road between Marietta and Wheeling were taken without our assent to meet its debts incurred upon the line west of that point. In consequence of this misapplication of the means furnished by this company and the immense sums that would have been absorbed in carrying out the original plan, it was not deemed prudent to make any attempt to save the amount invested in the enterprise under your instructions. This amount was accordingly charged to profit and loss, and its stock no longer appears among your assets.

The interest of the company in the Chicago line has nearly all been disposed of at a profit to this company fully equal to its loss upon the Marietta line. But for the timely aid afforded by this company, it would have proved, as an investment, nearly as unproductive.

The completion of the Columbia route having, in consequence of want of legal authority in Virginia, been thrown into a period of inflated prices, its cost has so far exceeded our anticipations that it will require a long time for it to repay this company in direct returns for the outlays incurred. For these expenditures it has received various securities, some of which have been disposed of, and on the remainder there will probably be no loss except a few years of interest, for which the indirect advantages gained by the company must be its compensation.

The shareholders will perceive, from this resume of the operations of the company, the extent of the means required, and the labor and responsibility incurred to save the original investments made under your instructions, to build up new lines to connect yours with the trade centres of the West—expenditures that were necessary to the success of your own work, but which a few years' earlier commencement of it would have rendered unnecessary, as the tendency of the Western lines would probably then have been towards Pittsburg.

These expenditures have frequently been referred to by shareholders as unwise, without reflecting that they were the result of their own action, and that the officers of the company are really the parties to complain of the immense unrequited labor and responsibility they have had to assume to save the object the company had in view in making these investments, and in providing the means necessary to affect them. That they have required outlays, to secure the original objects, far exceeding any just expectation at the time they were entered into, is quite true; but this has arisen from the inadequate stock basis furnished by their shareholders for the completion of these works and the subsequent increased cost of building railways. The result, however, we think will justify the policy of this company.

These extraordinary outlays were commenced while the traffic of this line was comparatively small, and burthened by a heavy impost duty levied by the State, and assessed upon no other competing line, greatly diminishing its ability to meet these necessary expenditures to insure the prosperity of the State—and from which burthen it was only released upon condition that the company would apply the unpaid instalment towards the construction of the Mifflin and Centre County, Bedford, Bald Eagle Valley, Tyrone and Clearfield, Ebensburg and Cresson, Western Pennsylvania, and Pittsburg and Steubenville Railroads—all improvements within this Commonwealth. The effect of this mandate was the same as that which followed the appropriations made by the stockholders to Western lines, already stated, entailing upon this company either the loss of the whole investment directed to be made or advances of the additional amounts required to complete these works. The Board saw no other alternative but to meet this difficulty by the adoption of a liberal and active policy, and thus bring all of these lines into productiveness as speedily as practicable. The outlays necessary to secure this object, from the causes already referred to, have been very large, but the results have proved much more satisfactory than if the original expenditures had been suffered to remain unproductive, as would have been the case if they had simply fulfilled the requirements of the law. The further extension of some of these lines will still be necessary, to enable them to become productive and meet the wants of the districts they were built to accommodate.

We have thus presented to you the extent and the causes for the unusually heavy expenditures made by this company on account of its tributaries. The magnitude has made it necessary, not only to protect the investments made in them, but also to secure the control of other lines important to their success. This policy has eventuated in a system which includes the Philadelphia and Erie and Northern Central Railroads, by which the company's cars find their way over continuous and unbroken lines, under one control, from Columbus, Erie and Pittsburg to Philadelphia and Baltimore.

To meet the expenditures, but partially enumerated, without financial sacrifices, and still preserve the relation between the share capital and debts of the company, as already indicated as the settled policy of this company, has been attended with some difficulties. But the rule is one that should not be exceeded by any prudent railway corporation.

To preserve this relation, and place your financial system upon a basis that may be easily understood, while it is at the same time sufficiently comprehensive for the future wants of the traffic seeking your line—which will doubtless increase with the growth and prosperity of the country—the Directors have procured an amendment to the charter which permits the requisite increase of the share capital of the company and prohibits the issue of mortgage bonds exceeding its capital stock.

The increase of the capital of the company, under this act, may be effected in one of three ways. First, by a sale of the shares. Second, by a subscription to the stock of the company, in which each shareholder will have the right to participate in proportion to his interest; and Third, by stock dividends.

The first plan is deemed inexpedient. The second, which is the best, has been objected to by the city of Philadelphia, in consequence of her inability to participate in the advantage of such subscription, owing to a constitutional prohibition of the further exercise of such powers by municipal corporations. The third, therefore, is the only one to meet existing circumstances, and with a view to carry this plan into effect, the Directors have passed the resolution annexed to this report, which is submitted for your approval. It is believed that in addition to cash dividends, a dividend of 5 per cent. in stock may be declared annually under any ordinary condition of the country, and still leave an ample surplus to the credit of profit and loss to preserve the property of the company at its present high standard of efficiency and value.

The responsibilities assumed by this company, through the endorsement of the bonds of other railroad corporations, are confined to the first mortgages of the Philadelphia and Erie Railroad Company, amounting to five millions of dollars, the Western Pennsylvania Railroad Company for eight hundred thousand dollars, and the Connecting Railway Company for one million of dollars. In the two last named companies the Pennsylvania Railroad Company is also the owner of nearly all their share capital, and upon the first it has a lease for 999 years.

The Connecting Railway has been leased to the Philadelphia and Trenton and Camden and Amboy Railroad Companies for legal interest upon its whole cost, which will be twice the amount of coupons falling due upon the issue of its bonds so guaranteed.

The net revenues of the Western Pennsylvania Railroad Company, since its extension to Pittsburg, have been sufficient to meet its interest, and these must continue to increase, while the thirty per cent. due to the Philadelphia and Erie Railroad Company under its lease, and first applicable to the payment of the coupons upon their bonds, is already largely in excess of the amount required for this object. It will, therefore, be seen that the revenues of these companies are amply sufficient to meet the interest upon the bonds so endorsed, and that they cannot become a charge upon the net revenues of this company.

The bonds of these railroad companies, with the exception of $1,200,000 of those of the Philadelphia and Erie Railroad Company, were endorsed after their purchase by this company, and were so endorsed to secure a better market price for this company when sold by it.

The propriety of selling the bonds of lines aided by this company, either with or without its endorsement, is questioned, inasmuch as [illegible]

results can be obtained by the use of the direct credit of the company. Hitherto, however, there has been no alternative, as the powers of the company have been too circumscribed to act upon such a policy.

The earnings and expenses of the Pennsylvania Railroad, and the roads worked by it, except the Philadelphia and Erie Railroad, were for 1866 as follows:

EARNINGS.

From passengers,		
" 1st class	$3,245,800 06	
" emigrants	139,721 25	
		$3,385,521 31
" United State troops		560,945 44
" " " mails		82,780 00
" express matter		374,369 22
" general freights		11,709,293 59
" miscellaneous sources		471,023 28
		$16,583,882 84

EXPENSES.

Conducting Transportation—		
For ordinary expenditures	$3,492,008 80	
For erection of passenger and freight stations and extension of existing buildings	154,743 42	
		$3,646,752 22
Motive Power—		
For ordinary repairs and renewals	$2,919,122 47	
For erection of machine-shops and engine-houses	121,724 59	
For additional tools and shop machinery ($27,515 56 of which was for the Philadelphia and Erie Railroad shops)	85,225 77	
For additional locomotives purchased during 1866	671,758 80	
		3,797,831 63
Maintenance of cars—		
For ordinary repairs and renewals, &c. &c.	$1,070,912 77	
For additional freight cars	693,766 27	
For additional passenger cars	196,363 06	
		1,961,042 20
Maintenance of Road—		
For ordinary repairs of railways and renewals of structures	$2,845,465 58	
For additional second track and sidings	250,965 09	
		2,096,430 65
For general expenses		288,852 57
Total expenditures connected with the business of the Pennsylvania Railroad Compay, including addition to the facilities for transportation on its own road and that of the railroads it operates, etc.		$12,790,909 27

RECAPITULATION.

Gross earnings		$16,583,882 84
Total ordinary exp.	$10,616,362 17	
Total extraordinary expenses, consisting of additional second track and sidings, additional locomotives, cars, &c	2,174,547 10	
		12,790,909 27
Leaving a balance of		$3,792,978 57

The gross revenue of the line for 1866 is equal to $46,323 41 per mile of main line of road (358 miles), and is less than the aggregate receipts in 1865 $875,286 65.

The decrease upon passengers and emigrants is		$788,671 56
The decrease upon expresses is		109,354 63
The decrease upon Government troops is		717,899 16
		$1,615,925 35
The increase on United States Mails	$2,599 45	
The increase on regular freights	515,728 22	
The increase on miscellaneous	222,311 03	
		740,638 70
Total decrease		$875,286 65

The whole number of passengers carried in 1865 was 2,861,836, and during the past year, 2,673,568. The average distance traveled by each passenger was 52 miles, and the previous year 71⅛ miles; this difference being due to the larger amount of through travel and troops in 1865.

The number of tons of freight (including 266,359 tons of fuel and other materials transported for the company) was 3,452,718, employing 1,413,181 tons of coal. The increase in the coal traffic is 388,424 tons, and the whole tonnage of the road exceeds that of last year 653,908 tons, nearly 25 per cent.

The ordinary expenditures for working and maintaining the company's roads were $10,616,362 17, which is equal to 64 per cent. of their revenues, or, including the expenditures for construction and equipment upon its own line, and the outfit of the Philadpelphia and Erie, and other railroads, 77.12.

The earnings of the company's canals were:

From Susquehanna Division	$252,681 42
" Juniata "	35,175 32
" miscellaneous sources	10,010 42
Total earnings	$297,867 16

Against $181,015 38 for 1865.

The cost of maintaining, enlarging and operating the canals was:

For Susquehanna Division	$130,212 98
For Juniata Division	101,501 50
For Western Division	1,723 55
Total expenses	$233,437 98

Showing a net profit during 1866 of.. $64,429 18

Estimating the value of these canals when purchased at one million of dollars, they now stand this company, including interest and the cost of their renewals and enlargement as far as it has progressed, about $2,750,000, for which sum they will be sold to the Pennsylvania Canal Company for stock in said company, in pursuance of the policy sanctioned at your last annual meeting.

It is believed that the growing bituminous coal and lumber transportation that may be thrown upon the Pennsylvania Canal, at or near Huntingdon, will, upon its enlargement, make it a profitable investment. Above Huntingdon, it must in consequence of a great amount of lockage, eventually be abandoned, and a railway occupy its route, along which there exists an abundant water power to give life and activity to a large manufacturing population.

The earnings of the Philadelphia and Erie Railroad, in 1866, were:

From passengers	$686,621 78
" troops	18,203 13
" freight	1,744,299 13
" express matter	26,941 43
" mails	18,501 96
" miscellaneous sources	16,584 36
	$2,541,051 79

Deducting taxes, overcharges, &c., $98,589 13 from $2,541,051 79, leaves $2,442,462 66 as the sum upon which 30 per cent. is due the the Philadelphia and Erie Railroad Co., amounting to ... $732,738 80

The operating expenses during the same period were:

For conducting transportation	620,845 80	
For maintenance of way	624,245 02	
For motive power	682,947 62	
For maintenance of cars	158,936 09	
		$2,819,713 33
Showing a loss to this company in operating the line of		$278,661 54

This loss is largely to be attributed to the bad condition of the older bridges erected by the Philadelphia and Erie Railroad Company over the Susquehanna, and the unfinished character of the work generally, upon the whole line.

The passenger travel has fallen off during the year, in sympathy with that of nearly all of the other railways of the country. To this general depression, this line has also had added to it the loss of travel from the decay of the speculative excitement of the oil region, while the same train accommodation has to be maintained.

The tonnage of the Philadelphia and Erie is mostly made up of cheap products, that can only be moved at low rates of transportation, which, under the existing condition of the business of the country, are inadequate to meet the cost of their movement at the per contage stipulated in the lease of the road. This traffic has been quite irregular during the past year, though in the aggregate it has largely increased over that of 1865, and must continue to grow with the increase of the population of the region traversed, while the relative transportation expenses can only be reduced by this enlargement of its business and a fall in the prices of labor materials.

Arrangements are being made to increase the business of the road by the establishment of a line of steamers, between Erie and the other lake ports, under the patronage of this company, with anticipations of successful results.

The future of this great work is very encouraging, but its traffic, as in all other similar projects, will require the application of capital and time to develop. The transportation facilities are ample for the accommodation of all the business that can be offered to it during the present year.

The whole revenue of the Pennsylvania Railroad Company from its several lines is as follows, viz:

From the Pennsylvania Railroad and branches	$16,583,882 84
From the Pennsylvania Canal	297,867 16
From the Philadelphia and Erie Railroad	2,541,051 79
	$19,422,801 79

And the expenses of operating these lines are

Pennsylvania Railroad, ordinary	$10,616,362 17	
Pennsylvania R. R., extraordinary	2,174,547 10	
Pennsylvania Canal.	233,437 98	
Philadelphia & Erie Railroad	2,086,974 53	
Thirty per cent. reserved to pay taxes and interest on debt of Philadelphia and Erie R. R. Company	732,738 80	
		$15,844,060 58
Balance		$3,578,741 21
From which deduct payments made during the year to the shareholders of the Pennsylvania Railroad Company for dividends	$1,737,969;	
the balance to debit of interest and		

coupon account, $539,859 57; the amount due to the Harrisburg and Lancaster Railroad Company under lease, $135,274 18; the taxes on dividends and coupons, $438,855 57; and the annual sum of $460,000, due to the State of Pennsylvania for the purchase of the main line of public works, amounting in all to.....	3,301,958 32
Leaving a surplus of.....	$276,782 89

This is the result of the year's operations of your railways and canals after charging all expenditures for new work and additional rolling stock, &c., together with an instalment of $100,000 upon the principal of the debt due the State, &c., to expense account.

The demands upon your Treasury during this year, in addition to the ordinary expenditures for operating the road, will be about the same as estimated for 1866. To the completion of the Connecting Railway and the increase of facilities for the business upon the West Pennsylvania and Pittsburg and Columbus lines there will be added the extension of the Tyrone and Clearfield Branch to the town of Clearfield, near the centre of the great lumber and coal region of the Alleghenies. A number of improvements upon the Main Line, heretofore deferred in consequence of the high rates of wages and materials, will not admit of further delay; while the road between Lancaster and Philadelphia, located before the successful application of locomotive steam power upon railways, requires extensive alterations in its alignment to place it in harmony with the other portions of your railway.

That portion of this line crossing the high range of hills bordering the Great Valley commencing near Haverford College and extending to Valley Creek, a space of over twenty miles, embraces the worst-located parts of the old line, and requires alterations which will amount to nearly a new road for this distance. An appropriation of a quarter of a million of dollars annually to this object for a few years will make these changes, the interest upon which sum will be more than repaid in the dimished cost of moving and maintaining the rolling stock of the company.

Your directors have alluded in previous reports to the rapid destruction of iron rails, and the increased cost of replacing them, under the frequent interruptions to the workmen from the numerous trains now passing over the line. Every effort to materially improve the quality of the iron to meet the wants of the augmenting traffic of the trunk lines having heretofore failed, attention was directed to the introduction of steel rails, and, with a view to test their efficiency, the President, while in England, in 1862, ordered a few hundred tons for trial. These proved so satisfactory that larger importations have been made of Bessemer steel rails, which have entirely confirmed our expectations of their success. The cost of steel rails is at present about twice the price of the best iron rails, while their durability is fully eight times greater. It is confidently believed, however, that with enlarged works, increased knowledge of the ores required to produce the best quality of this metal, and greater experience in its production, they will be successfully manufactured at home and the price very largely reduced. At present the demand is equal to the supply, and prices are maintained. To avoid the heavy annual outlays that a change from a cheap to a dearer material would necessarily entail upon your revenues, it is proposed to continue for the present to re-roll the worn-out rails, and replace the annual wear and tear with steel rails. The general introduction of steel rails is now wholly a commercial question, in which the cost of the increased capital required for their purchase becomes the chief impediment to their general adoption. While the business of a line is small, it will still be economy to use iron rails, at an ordinary rate of interest upon capital, until the cost of producing steel is reduced to its minimum. When this result is accomplished, the general public will be materially benefited by the reduced cost of transportation which the introduction of steel rails will enable railway companies to afford.

The company has also laid 500 tons of rails the wearing surface of which had been "steeled" by Dodd's process. The increased durability imparted to the rail by this process will probably extend its life three-fold, while its additional cost thus prepared is about 25 per cent. From the result of our experience it would seem that rails so treated will prove a valuable article as an intermediate between steel and ordinary iron rails.

The Directors have given to the subject of establishing a line of steamships between this port and Europe, committed to them at your last annual meeting, all the consideration which its importance required; but they have not yet arrived at a satisfactory conclusion as to the best means of effecting this desirable object. Proposals have been asked until the 1st of May next, by public advertisement, of those engaged in this business to establish such a line, under concessions, and a subsidy to be paid by this company during the continuance of the contract.

In their last Annual Report, your Directors referred to the introduction of express freight lines upon your railway as a new feature in the policy of the company, and one which had heretofore been opposed by its officers as unnecessary to the efficient conduct of the transportation departments of the Trunk lines. While these views remain substantially unchanged, they are quite clear that the introduction of these lines upon the Pennsylvania Railroad—after every effort had been made to secure their withdrawal from rival lines—because not only a necessity, but a duty which the Board owed to the shareholders. A failure to make use of this weapon, so dexterously and persistently used by our competitors, in various forms, to promote their interests, would have shown as little foresight as would have been attributed to the General Government if it had failed to meet the preparations known to be in progress upon the Merrimac, by the building of a more efficient iron-clad.

From the statistics of the company it appears that the ordinary freight business of the road has continued to grow in its usual ratio since the introduction of these freight lines, showing that their sustenance is abstracted from the business of similar organizations that exist upon rival routes, whose competition they were introduced to meet—gaining for this company a business not heretofore enjoyed by it, and which could not be secured by any other means.

It also appears from the same sources that the freights brought to the road by these lines pay to the company better net rates than is derived from any other portion of the company's through business. The success of these lines, in collecting and distributing freights throughout the West, has been due to the inability of many of the Western railways to supply cars sufficient to accommodate the through traffic originating along their own and connecting roads, and, in consequence, the traffic has heretofore sought rival avenues, whose equipment was sufficient to furnish the means for its transportation.

Under existing contracts between this company and the freight lines it seems that the only point it is necessary to solve is whether the rates charged for this freight by the railroad companies are as large as the express freight companies can pay and preserve the full efficiency of their organizations. As at present advised, the Directors are disposed to believe that they are, and that the interests of the company would suffer great damage by their withdrawal from its service while such lines, or other organizations to effect the same objects, are maintained upon competing routes.

The chief element of profit of these freight lines has been in the *margins* paid to them, above the ordinary railroad rates, by merchants disposed to patronize a medium of transportation where the responsibility is direct, immediately accessible and undivided from the point of shipment to the point of delivery of their merchandize, rather than a line made up of various railway corporations, of whose responsibility they are not familiar. Advantages such as are afforded by these organizations cannot, for obvious reasons, be fully accorded to shippers by any railway company.

That the enterprise has proved successful to its proprietors, in view of the large amount of capital ventured in an untried field, should be a matter of gratification to the shareholders of the Pennsylvania Railroad Company, whose interest it was intended to and has so largely promoted. This success is mainly due to the thorough knowledge of the freight business possessed by those to whom the control of these organizations was first entrusted, and their comprehension of the means required to achieve the object of their creation, united to a disposition and ability to embark whatever capital was required to secure favorable results to this company and themselves. In other hands it might have proved a failure.

The Board has deemed it important to say this much in explanation of their action upon a subject which has met with considerable animadversion from the captious, and to assure the shareholders that under its contract it has entire control of these organizations, and as long as their operations conduce to your interest they will be maintained; if otherwise, they will be abolished.

It will be gratifying to shareholders to learn from a careful examination made of the statistics of the freighting business of the company, that of the 3,186,359 tons of freight carried over the road during the year, only 158,264 tons of through freight has passed from points east of Philadelphia to and from Pittsburg and the West, and 61,862 tons to and from Baltimore, while 330,959 tons of through freight have been carried to and from Philadelphia and the West. The remainder, 2,635,274 tons, was local traffic of the State, between local stations, and from them to and from Philadelphia and Pittsburg. Philadelphia, therefore, in addition to the large local traffic mentioned above, enjoys one hundred per cent. more of the through traffic transported over the line than New York, Providence, Boston, and all other points on the Atlantic seacoast combined east of Philadelphia.

Since your last annual meeting, the Superintendent of Motive Power and Machinery (J. P. Laird, esq.) resigned his position, and the Board has appointed as his successor R. E. Ricker, esq., who for many years had been connected with the active management of Western railways, and he will no doubt make a successful manager of the important department committed to his charge.

The acknowledgements of the Board are due to the officers of the company generally for the prompt and efficient manner in which the business of the line has been conducted during the past year.

By order of the Board.

J. Edgar Thomson,
President.

☞ The field work of the survey for the railroad from Monument to Wood's Hole, has been completed, and the engineers are now engaged on the profiles and maps, which will show which is the best route. The survey has been very thorough, and a route has been ascertained, which though not the shortest, can be constructed, it is said, at a very much less expense than could the most direct line.

☞ Several gentlemen in Brantford and neighborhood have proposed to raise the sum of $50,000 for the purpose of grading a branch road from Brantford to Lynden, to connect that town with the Great Western Railway. After the grading is done, it is proposed to make it a present to the Great Western Railway Company, they undertaking to equip and run the road in connection with their line.

American Railroad Journal.

Saturday, March 2, 1867.

Stock Exchange and Money Market.

The money market has exhibited rather more activity, since our last, chiefly in the way of applications for and from speculative sources. The demand has been freely responded to by the principal lenders at steady rates for call loans, namely, as a rule, 5 per cent. on the pledge of the public funds, and 6 per cent. on the other prime stock collaterals. Exceptional negotiations have been reported above and below these figures; but they have not been of sufficient magnitude to establish different prices. The Government has been making heavy disbursements, especially during the past two or three days, chiefly in redemption of Seven-Thirty notes of the first issue, which mature on the 15th of the coming month of August. Nearly five and a half millions of these notes were bought in by the United States Assistant Treasurer at this port on Monday and Tuesday of the current week. The outflow of currency from the Treasury in this form is reducing the enormous cash reserve of the Department, and adding largely to the currency balances of the city banks, thus tending decidedly to augment the available supply of money, and modify the price of accommodation advantageously for temporary borrowers in good standing. Notwithstanding the liberal disbursements of Monday and Tuesday from the Treasury office here, the balance at the close of business on Tuesday was full three millions more than a week previous. The disposition to discount business paper has diminished during the week, and was seriously checked on Tuesday, in consequence of the failure of a rather prominent house in the grocery line, whose notes were current in the open market quite recently at 7 per cent. per annum. This is now the minimum rate on the best short date commercial paper, the supply of which is gradually on the increase. The flow of money from the interior is decidedly in favor of this market, and the next bank statement is expected to show the beneficial influence of the current. The last weekly statement of the city banks indicated an increase of $2,248,055 in the deposits, $49,832 in the circulation, and $4,692,666 in the loan item, with a decrease of $1,489,045 in the legal tender, and $1,279,170 in the specie reserve. The changes are due mainly to the Treasury negotiations, and the active customs drain of coin, during the week. The specie reserve of the banks is now $13,513,456, against $14,213,351, same time last year. The city bank deposits are now $198,420,347, against $183,241,404 week ending Feb. 24, 1866. The legal tender reserve amounts to $63,153,895, against $61,602,726 same time last year. The circulation now stands at $33,006,141 against $22,959,918 same time last year. The loans are now $257,823,994, against $239,776,200 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $73,929,014 a day, against a daily average of $75,980,638 the preceding week; and $84,804,255 the week ending with Feb. 9. The current week's exchanges average about $86,000,000 a day.

The main changes in the Philadelphia Bank footings, last week, were as follows: Decrease of loans, $118,409; decrease of legal tender reserve, $1,055,149; decrease of deposits, $1,404,704; decrease of specie, $26,887; and increase of circulation, $43,462.

National Bank notes to the amount of $199,405 were issued last week, making the total issue to 1,663 banks thus far $301,664,421, against $282,555,440 at the close of the last fiscal year, June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $2,811,032, leaving, with the existing 1,650 banks, an actual circulation at this date, of $298,853,389. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,349,450; and for the public deposits, $38,761,450—making a total of $379,110,950. The Treasury Department, last week, redeemed and destroyed over $300,000 of worn and mutilated fractional currency, and issued $206,304 worth of new.

The U. S. Sub-Treasury receipts, week ending with Feb. 23, were $25,815,877, including $2,781,958 from customs duties; payments, $12,175,317; balance at the close of the week, $132,952,351, against $119,311,790 at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $2,735,404, and payments,

$4,790,783; on Tuesday, receipts, $3,655,809; payments, $6,528,720. The balance at the close of business on Tuesday stood at $128,024,061, against $125,277,987 a week previous. The cash balance in the hands of the United States Assistant Treasurer (Boston) at the close of business February 28 was $12,899,682 93—week previous $12,713,044 26—showing an increase of $186,638 67. Coin on hand $9,839,078 37—week previous $9,352,524 22—showing an increase of $486,554 15.

Government revenues have been again very liberal in the way of customs, since our last. The excises, last week, yielded $2,460,320, against $2,676,388, the preceding week; customs at the port of New York, $2,781,958, and at the outports, about $920,000 (in coin) more, making the grand total income for the week equal about $7,856,388 in currency, against disbursements of over $7,909,979 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $198,500,000. The customs revenue is unexpectedly liberal, as is the income from excise unexpectedly meagre, thus far in the new year. It is stated in Washington despatches that the next public debt statement, which will appear, about the 5th of March, will exhibit a heavy increase on the gold balance, amounting to several millions of dollars, from which the interest on the ten-forties, due on the 1st March, will be paid. The forthcoming statement will be more favorable than that of last month, when there was an increase of the public debt, caused by heavy payments of interest during the month.

In the Gold Market there has been suddenly started an upward speculative movement, on alleged rumors from Washington adverse to harmonious action on the part of the executive and legislative branches of the Government, and of practical inaction on the part of the present Congress on the important fiscal measures now before it. The lowest figures of the week were made on the opening day, namely 137½, and the highest on the closing day (Wednesday,) which were 140½. The speculative business was particularly brisk the last two days. On Wednesday afternoon Washington reports were circulated to the effect that the President would sign the reconstruction bill which passed Congress last week. The latest quotation on Wednesday was 139½, showing a fall of full one per cent. from the highest figures of the day, the market closing heavily, with a decided turn in favor of the *bear* interest. The customs demand has been animated all through the week, giving material aid to the inflationists of the Gold Room. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $184,879. The customs demand for Gold last week, averaged $463,659 a day; thus far, this week, it has been equal to $673,616 a day, or equal to a weekly aggregate of $4,041,696. The arrivals of specie from Europe, Havana and other foreign ports, during the past week reached only $25,215, and from California, $961,871. The total customs revenue of the Government, in coin, at this port since July 1, 1866, has been $80,761,889, against $88,268,404 same time in the preceding fiscal year. The total receipts of California gold at this port since July 1, 1866, have been $29,384,811, against $17,750,791 same time last year, showing an increase this year, of $11,634,020. The exports of specie from this port, last week, were $473,000. The total outflow of specie from the port, thus far in the current fiscal year has been $21,279,592, against $16,414,023 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $82,000, making the total coin interest disbursements through the Government office, since July 1, 1866, $33,513,404, against $29,277,534 for the same time in the preceding fiscal year. The specie exports from San Francisco from Jan. 1, to Jan. 17, 1867, reached $3,250,000.

The following is a tabular statement of the amount of gold certificates which have been issued and redeemed, with the amount outstanding:

	Issued.	Redeemed.	Outstand'ng
20s ..	$271,420	$169,000	$102,420
100s ..	4,830.200	3,079,500	1,750,700
500s ..	561,500	206,500	355,000
1,000s ..	22,677,000	18,793,000	3,884.000
5,000s ..	144,685,000	127,970,000	16,715,000
10,000s ..	5,000,000	5,000,000	.....
Total	$178,025,120	$155,218,000	$22,807,120

The foreign exchange market opened more firmly, with a fair inquiry for sterling bills, which were in moderate supply; but, subsequent to the closing of the mails for the Boston steamer on Tuesday, there was less demand from the importing interest, and the market closed tamely and languidly on more liberal offerings. Bankers' 60 day bills on London closed on Wednesday at 108¾@109, and on Paris to 5.18¾@5.15; sight bills on London to 109⅝@109¾; and on Paris to 5.15¾@5.13⅛. The offerings of produce bills have been quite extensive since our last. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $4,017,029 making the total value of exports since July 1, 1866, $109,351,849, against $142,105,374 same time in the preceding fiscal year.

Government securities have been in active investment demand, especially the Five-twenties of all issues, the latest issue of 1865 having been the favorite. There has been considerable business transacted in the old 2-20s of 1862, on foreign account. Seven-thirties have been freely purchased for exchange or conversion purposes. There has been increased activity in the compound interest notes, which have improved a shade. The rise in gold on Wednesday stimulated trade in the coin bearing bonds. U. S. sixes of 1867 closed here on Wednesday at 134@135; U. S. sixes of 1868, at 131@133; U. S. sixes of 1881, 110¼@110½; U. S. Five-twenties of 1862 at 111⅛@111⅜; U. S. Five-twenties of 1865 at 108⅝@108⅞; U. S. Five-twenties of 1865, consolidated, 106⅝@106¾; U. S. Ten-forties at 101⅝@101¾, and U. S. Seven-thirties at 105⅝@106. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ¼@½ of 1 per cent. on these figures:

June, 1864.....117⅝	May, 1865 .....112⅜
July, 1864.....117⅛	August, 1865....111⅜
August, 1864....116⅝	September, 1865..110⅞
October, 1864....114⅝	October, 1865....110⅝
December, 1864..113⅝	

The following is the full statement of estimated outstanding three years' compound interest notes and interest due thereon to date of maturity, read in the Senate a few days since by Mr. Sherman:

Date of Issue.	Estimated Outstanding.	Interest at Maturity
June 10, 1864.....	$6,000,000	$1,164,313 78
July 15, 1864.....	17,500,000	3,395,915 19
Aug. 15, 1864.....	39,265,000	7,619,463 42
Oct. 15, 1864.....	17,400,000	3,376,409 90
Dec. 15, 1864.....	10,500,000	3,784,019 78
Total.....	$99,665,000	$19,340,122 13
May 15, 1865.....	$19,499,640	$3,783,940 22
Aug. 1, 1865.....	12,500,000	2,425,653 71
Sept. 1, 1865.....	6,400,000	1,241,934 71
Sept. 15, 1865.....	2,000,000	388,104 59
Oct. 1, 1865.....	2,000,000	388,164 59
Oct. 16, 1865.....	1,000,000	194,052 30
Total.....	$143,064,640	$27,761,921 95

Railway and miscellaneous stock dealings have been rather more extensive, during the past week, but prices have been variable, and by no means, strong or buoyant. Early in the week, there was a bad break in Pacific Mail Shares, which seriously disturbed the whole market. The subsequent declaration of only a three per cent. quarterly dividend by the company added to the depression of the stock, and the feverishness of the market generally. The latest dealings indicated less life and increased heaviness in the market.

General business has been somewhat brisker, in this line of domestic produce, but at easier rates for the leading articles, especially for cotton and breadstuffs. Toward the close, more firmness was apparent, caused in part by the rise in gold, which tended to stimulated speculation. Middling grades of cotton left off at 30½@32½ cents per lb. as extremes. The stock of cotton now here is estimated at about 230,000 bales. The receipts at the port this week, have averaged nearly 6,000 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 398,000 bales, against exports of 202,000 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 1,283,000 bales against 1,350,552 bales same time last year; exports, 650,000 bales, against 761,000 bales same time last year; estimated stock at latest dates, 625,000 bales, against 515,000 bales same time last year. In foreign merchandise, there has been more doing, chiefly in dry goods and groceries, which have been comparatively steady on all seasonable lines. The total imports of foreign dry goods, last week, were $2,357,312, and the total amount marketed $2,708,111. The value of foreign merchandise imported last week, was $4,215,294—making the grand total specie value of last week's imports of dry goods and merchandise, $6,572,606, and since July 1, 1866, $168,170,576, against $189,213,344 same time in the preceding fiscal year. The ocean freight market has been more active, with 536 vessels of all classes in port. For Liverpool we quote flour at 2s.@2s. 3d. per bbl.; grain at 6@6½d. per bushel; cotton at $\frac{5}{16}$@⅜d. per lb.; and heavy goods at 20s.@@30s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 13.	Feb. 19.	Feb. 27.
Consols	91	91	91
U. S. 5-20's of 1862....	73¼	74	73¼
U. S. 5-20's of 1865....	72	72½	71¾
Erie	39½	37¼	36¾
Ill. Central.....	81½	*77¾	76¾

* Ex-dividend.

The New York exports, exclusive of specie, for the week ending Feb. 26, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week.....	$3,199,051	$4,017,029
Prev. reported.....	32,028,187	23,728,425
Since January 1.....	$35,227,238	$27,745,454

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$4,619,244	$2,357,312
Gen. merchandise.....	2,631,599	4,215,294
Total for the week.....	$7,250,843	$6,572,606
Previously reported....	39,878,303	30,664,938
Since January 1.....	$47,129,146	$37,237,544

The commerce of New York from July 1st to date compares as follows:

	1865–'66.	1866–'67.
Imports merchandise.	$180,213,344	$168,170,576
Exports produce.....	142,105,374	109,351,849
Exports specie	16,414,023	21,279,592

The balance in the Sub-Treasury on Wednesday was $115,973,751 70.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Pennsylvania Iron sent to England.

The Pittsburg *Republican*, of 23d ult., says a lot of samples of Bloomfield iron were sent on that day to Sir Frederick Bruce, the British Minister at Washington city, D. C., and consigned as a present to the Board of Admirality, in London, for the purpose of experimenting in the manufacture of "heavy ordnance." We believe that heretofore the British Government has been unsuccessful in casting large guns from metal purchased at home or elsewhere, and they now desire to try the Bloomfield iron, which has stood the most severe tests possible, and has as yet to succumb. The large 15 inch rifle gun at Fortress Monroe was made from this iron, and has already been fired 528 rounds—100 pounds of powder to the charge—and is to-day in as good order and apparently as perfect as the first day she was discharged. It is presumed this gun will stand 1,000 firings before any perceptible change in the bore will be noticed.

☞ In the steel rail mills, at the "Cyclops" Steel Works, Sheffield, a mass of iron, weighing one ton, is dropped from a hight of 36½ feet upon the middle of the rail, placed upon three-foot supports, as a test of its strength. The rails rarely break, but occasionally bend, under this tremendous trial.

Railroad Earnings.—Weekly.

The earnings of the Marietta and Cincinnati Railroad the 2d week in Feb., 1867 ... $19,118 00
Corresponding week previous year.... 21,790 00

Decrease $2,672 00

The earnings of the Detroit and Milwaukee Railroad for the week ending Feb. 21st, 1867, were $25,306 00
Corresponding week of 1866..... 19,379 00

Increase..... $5,927 00

The earnings of the Chicago and Northwestern Railway for the third week in Feb., 1867, were..... $143,454 00
Corresponding week of previous year.. 94,075 00

Increase..... $49,379 00

The earnings of the Grand Trunk Railway of Canada for the week ending Feb. 9th, 1867, were $110,313 00
Corresponding week of previous year.. 117,933 00

Decrease..... $7,620 00

The earnings of the Michigan Central Railroad for the 3d week in Feb., 1867, were... $70,642 00
Corresponding week of previous year.. 57,200 00

Increase..... $13,442 00

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in Feb., 1867, were..... $71,946 00
Corresponding week of 1866 ..... 56,988 00

Increase..... $14,958 00

The earnings of the Chicago and Rock Island Railroad for the 3d week in Feb., 1867, were..... $43,217 00
Corresponding week of previous year.. 52,419 00

Decrease $9,202 00

The earnings of the Western Union Railroad for the week ending Feb. 14, 1867 . .. $6,490 19
Corresponding week previous year.... 10,073 33

Decrease..... $3,583 14

Journal of Railroad Law.

INDIVIDUAL LIABILITY OF OFFICERS OF CORPORATION.—JURISDICTION OF FOREIGN STATUTE ACTIONS.

The case of Bird *vs.* Hayden, just decided by the Superior Court of this city decides that the personal liability for debts of a corporation, imposed upon its officers who fail to perform a duty with which they are charged by the charter, is in the nature of a penalty.

Hence, the courts of this State have no jurisdiction of actions to enforce such liability, where the charter creating it was granted by another State.

The personal liability of stockholders, where they are made liable, is an original liability; and an action against them is upon their contract made by them in a qualified corporate capacity; but where the corporate capacity is not thus qualified, and the members or officers are not liable as original or principal debtors, but by reason of something imposed on them by the statute, the action must be upon the statute, to recover a debt in the nature of a forfeiture.

The facts of the case fully appear in the opinion of

Monell, J.—Actions to recover penalties, or forfeitures, created by the Statutes of other States, being local, are not cognizable by the courts of this State. This is understood to be well settled (Scoville *vs.* Canfield, 14 Johns., 338; United States *vs.* Lathrop, 17 Id., 4; Story on conft. of Laws, §§ 620, 621), and was conceded by counsel on the argument.

It is claimed, however, that this is not such an action; but that it is an action to recover upon a contract made by the company, which by force of the statute, the defendant has became individually liable to pay.

There is nothing in the act of incorporation of this company which renders the directors or stockholders liable in the first instance for the debts of the company, as there is in the general banking and other laws of this State. There is no personal liability if the company fails to pay, and hence there is no right of action against the stockholders for any debt contracted by the company, nor against the officers, so long as they discharge the duty imposed upon them by law. It is only upon their neglect or refusal to perform such duty, that they render themselves liable.

The personal liability of stockholders, when they are made liable by the charter or act of incorporation, is from the inception of the debt. They become originally liable; and the happening of no event, is necessary to charge them. The company is invested with a qualified corporate capacity, but no immunity or exemption from personal liability for the debts of the company is conferred upon the stockholders. In those cases, in judgment of law the debt is contracted upon the terms and security authorized by the statute, and the creditor, having exhausted his efforts to collect from the company, may resort, by a common law action, directly to the stockholders, not to recover a penalty or forfeiture, nor upon a cause of action in the nature of a forfeiture, but to recover a simple contract debt, for which he was liable at the time the debt was contracted. The action in that case is not upon the statute, and a mere reference to it is all that is necessary to show the connection of the stockholder therewith, and the liability it creates.

But where there is no qualification to the corporate capacity of the company, and where the stockholders are not answerable to the creditors of the company as original and principal debtors, but they, or the officer, became liable by reason of some act the performance of which is imposed on them by the statute, then the action must be upon the statute, to recover a debt in the nature of a forfeiture, for a failure, to perform a duty. In the one case the absence of any immunity from personal liability renders the shareholders liable when the debt is contracted; in the other the director's liability is created by his own act or omission to act.

It seems to me very clear, therefore, that the personal liability imposed upon the officers of a corporation, who shall have neglected or refused the performance of a duty, with which they are charged by the statute, in the nature of a penalty, and was designed as a punishment for such neglect. Such is the plain import of the language of the statute. The directors shall file a certificate, and if they refuse or neglect, they shall forfeit to the creditors the amount of their respective debts. The object of requiring a certificate to be filed was to enable all who thereafter dealt with the company, to ascertain its pecuniary condition; hence the penalty goes to such creditors as may have been deprived of this course of information.

A charter, or an act of incorporation, is doubtless a contract; nevertheless, penalties and forfeitures may proceed from it; and where the charter is conferred by public law, and the penalty is created by public law, it becomes, to all intents, a penal statute; and if the general manufacturing law of Massachusetts had ordained, that if the directors neglected to file a certificate they should forfeit ten thousand dollars to the use of the creditors, the statute would have not been any more penal than in the form it now has. In either case, it must be a penalty or forfeiture, and must be sued for and recovered as such.

The case of Corning *vs.* McCullough (1 N. Y. II. Comst. I., 47) involved the consideration of this question, and received a very careful examination by the court. The ninth section of the act incorporating the Rossie Galena Company provides that the stockholders of the company should be jointly and severally personally liable, for the payment of all debts contracted by the company. The question was, whether the statute limitation of three years in bringing an action upon a statute made for a forfeiture or penalty, given in whole or in part to any person who would prosecute for the same, applied to that case. The court in a very elaborate opinion, delivered by the late Chief Justice Jones, held, that to come within the statute the action must be on the statute for a forfeiture or cause, the benefit and suit whereof is limited wholly or in part to the party aggrieved. The learned Judge says, "I think the intention of the legislature to have been to apply them to forfeitures, and penalties, and causes of action of the like character, partaking of the character of penal actions."

The distinction between the original liability of stockholders, and such as attaches to officers for neglect of duty, is clearly drawn, and constantly kept in view in the case referred to; and it is held that in the former case, the stockholders, being original debtors, are liable as co-partners, and are not exempted by the corporate capacity of the company; and in the latter, that their liability not being original they could only be charged by their own act. In the one case, the action was a common law action for the recovery of the penalty. The court say—"The liability of this defendant to these plaintiffs is neither for a penalty inflicted upon him for any offence committed by him, nor for any forfeiture incurred by him, nor does it possess any element or feature of a penal character, assimilating it to either forfeiture or penalty." Again, "It is the policy of the statute to limit the commencement of actions for forfeitures and penalties to shorter periods of time than actions on contracts, and for vested rights, and legislative enactments subjecting the aggressor to a specific measure of damages, or a specific compensation for the injuries he causes, may be in their nature penal."

Exparte Van Riper (20 Wend., 614) is fully sustained by Corning *vs.* McCullough. There Van Riper, a director of the bank, was personally liable. The fourteenth section of the charter provided that the president and director should jointly and severally be and continue liable, individually to every creditor, for the payment of the debts of the bank; and the court held, that the

liability was original, and not incurred by any subsequent act. This case is referred to, and approved by Mr. Justice Bronson, in his concurring opinion in Corning *vs.* McCullough.

In both these cases the line is distinctly drawn between the original personal liability of the stockholder or director, created by the charter or act of incorporation, and such liabilities as attach by some subseqent act of the officers.

In Garrison *vs.* Howe (17 N. Y., 458) the defendant was sought to be charged as a trustee of a manufacturing company. The act of incorporation required the trustee to make and file an annual report, &c., and declared that for any neglect to do so the trustees should be individually liable for the debt of the company. The trustees neglected to file their report. The question of jurisdiction did not arise, but David, J., "if the statute was simply a remedial one, it might be said that the plaintiff's case was within the equity; for the general object of the law doubtless was besides enforcing the duty of making reports for the benefit of all concerned, to enable parties proposing to deal with the corporation, to see whether they could safely do so. But the provision is highly penal, and the rules of law do not permit us to extend it by construction to cases not fairly within the language."

In a recent case in this court (Merchants Bank of New Haven *vs.* Bliss, 23 Abb. Pr., 225), a question similar to that in Corning *vs.* McCullough (supra) arose. The defendant was sued as a trustee of a manufacturing company organized under the general law of this State, which contains, substantially, the same provision respecting the duty of the trustees to make and file a report and their personal liability for not doing so, as are contained in the Massachusetts law, and he was sought to be made liable, by reason of the trustees having failed to make their report. The inquiry was, whether the statute of limitations of three years for actions upon a statute for a penalty or forfeiture applied, and it was held that it did. The court, in elaborate opinions delivered by two justices, decided that the action was necessarily upon the statute to recover a penalty or forfeiture.

This question has also been very carefully examined, and fully considered by the Supreme Court of New Jersey (Derrickson *vs.* Smith, 3 Dutch, N. J., 166). It arose under our general manufacturing law; and the defendant was sought to be held liable in that state, the corporation being located, and the neglect of the officers having occurred in this State. The court held the action was for a penalty, and could not be maintained in that State. The case is well supported on principle, as well as by the authority of the cases I have above referred to.

The examination I have been able to give this subject has strengthened and confirmed the views I entertained at the trial, and I see no reason now to change them.

The exception should be over-ruled, and Judgment directed for the defendant.

☞ The Governor of Michigan has vetoed the Port Huron and Lansing Railroad bill on the ground that it is unconstitutional and inexpedient. The bill allows ten per cent. on the assessed valuation to be given to the road by all townships in any county traversed by the road. The Governor says the system will create an enormous flood of bonds, which capitalists cannot take and the issuers cannot pay, and the credit of Michigan, forced to go begging, will stand low in the market.

Steel Rails Improved.

We would call attention to the following analysis of Beers' Vibratory Rail. (See advertisement on our first page.) The principle is that of a modified scroll. The objects are: economy in weight and cost; security against breakage; and relief to the wear of the rolling stock by removing the causes which produce and perpetuate the oscillation of a train.

The effect of this peculiar form is to increase the strength by securing a *lateral* deflection under pressure, as well as a *vertical;* and thus tax the lateral strength—or resistant power—in addition to the vertical strength; while the vertical only is made available in the T rail.

This *new element* of strength is equal to fully thirty per cent. in *steel* rails, and twenty in *iron.* Or, in other words, will maintain the full strength after that reduction in weight of metal.

Security against breakage, is the logical result of diverting the strain from across the base, as in the T rail, by distributing the same over a large amount of vertical surface; and the residue only, of force not expended in producing the lateral deflection, is thrown across the base; and even that residue is neutralized, to a great extent, by diversion from any focal point in the base, by the presence of a lateral deflection.

This *lateral* deflection is practically a vibratory deflection only; as a permanent deflection in that direction, even at the end of the rail, is opposed by more than five times the amount of surface under tensile strain, which can be made available to resist a permanent vertical deflection in a vertical rail.

The oscillation of a train is the effect of inequality in the foundations of the rail; which difficulty is positively unavoidable in practice; and to mitigate which, numerous plans more or less ingenious have been proposed; all of which have failed, not only to furnish a remedy, but even to touch the question involved; as, up to the present day, the principle universally in use is to place a vertical rail in form of a solid beam, or anvil, across a succession of sills, or ties—no two of which can rest upon a supporting material of *positive* equal density—consequently the train, when rapidly approaching the tie which rests upon the firmest support as compared with its immediate neighbors, finds its progress opposed by an abrupt and arbitrary increase of grade, which greatly augments the friction and abrasion, causing a violent lateral thrust and recoil, as well as a heavy blow from the wheel, when landing upon the rail at a lower gradient beyond the obstruction.

Now this thrust, with its responsive recoil, and inevitable blow, will be materially modified by the substitution of a rail of semi-scroll form, which shall yield slightly, and instantly, at this particular point, under the increased pressure of the wheel, as it dashes against this abrupt grade, and thus lessen materially the aggregate height of the obstruction, and respond to the modified blow from the wheel beyond the obstruction, by an instantaneous vibration, which will absorb, or neutralize the effect of the blow which produced it.

It is unnecessary to discuss the *importance* of a principle which will reduce the first cost of a mile of single track some $4,000; and practically prevent, or greatly modify, the oscillation of the train, by which its own destruction, and that of the rail also, is fearfully accelerated. Orders for this rail in steel, or in iron; will be filled at short notice. *

Pennsylvania Railroad.

We publish elsewhere the report of this company for the year 1866. The resolutions alluded to therein, and which are made part of the report, are as follows:

RESOLUTIONS.

Resolved, That for the purpose of consolidating the Bonded and other indebtedness of the Pennsylvania Railroad Company and to raise funds to meet the annual demands upon the Treasury of the Company for new tracks, additional equipment, enlargement of depots, extensions of sidings, and to meet the legitimate demands of the traffic of the country drained by the road of said Company and its branches, for increased railroad accommodations, and also to preserve the proper relation between the share capital and debts of the Company, the following financial programme be and the same is hereby adopted:

First—That the Bonds of the Pennsylvania Railroad Company secured by the First and Second Mortgages, and those due the Commonwealth issued for the purchase of the Main Line of Public Works, and other indebtedness, be paid out of the proceeds of, or be retired by, Bonds to be secured by a Consolidated Mortgage upon the whole or such portion of the line from Philadelphia to Pittsburg, with its equipment, and for such amount as the President and Board of Directors may determine, and the issue of the Bonds secured thereby shall at no time exceed the capital stock as the same may from time to time be increased.

Second—Dividends to be made semi annually of not exceeding Four per cent. from the net profits of the Company, payable in cash, free of United States and State taxes, and that a stock dividend of Five per cent., based upon profits already earned, be declared at the regular dividend term in May next, and thereafter, in addition to the semi-annual cash dividend, a stock dividend of Five per cent per annum be declared annually, if the net earnings of the Company will warrant the same.

Dry Goods Trade.

The following is a statement of the warehouse movement of Foreign Dry Goods at the Port of New York during the six months ending December 31, 1866:

Stock in warehouse July 1st, 1866		$34,232,315
Entered for warehousing for 6 months.		53,806,471
Received from other ports for 6 months		1,637,071
Supply		$89,675,857
Withdrawn for consump.	$50,247,428	
Exported from warehouse.	4,962,386	
Transported to other ports.	1,556,863	
		56,766,677
Stock in bond Jan. 1, 1867		$32,909,180
" " 1866		24,814,848
" " 1865		31,791,882
" " 1864		14,926,582
" " 1863		11,871,406
" " 1862		13,442,531
" " 1861		18,917,672
" " 1860		11,536,536

☞ A double track is soon to be laid on the Hudson River Railroad between Barrytown and Tivoli. The contract for the work has been taken by Mr. F. Pigeon, of Saugerties, who will commence the work as soon as the ground is in a fit condition.

San Francisco Mint Operations.

The following is an abstract of the official statement of the business of the U. S. Branch Mint at San Francisco during the year 1866:

Gold Deposits	$17,279,898 35
Silver „	1,077,705 55
Total	$18,357,603 90

The localities from whence gold bullion was received is as follows:

California	$9,600,317 16
Idaho	2,361,025 64
Oregon	1,074,437 58
Montana	789,450 73
Nevada	57,038 76
Arizona	19,046 16
Parted from silver	528,486 22
Fine bars	2,673,533 48
Foreign coin	85,522 47
Foreign bullion	116,040 15
Total gold	$17,279,898 35

The localities from whence silver bullion was received is as follows:

Nevada	$723,165 64
Arizona	373 68
Idaho	110,984 31
Oregon	183 68
Parted from gold	129,484 38
Bars	11,976 16
Foreign coln	22,016 51
Foreign bullion	79,521 24
Total silver	$1,077,705 55

GOLD COINAGE.

	No of pieces.	Value.
Double Eagles	842,250	$16,845,000
Eagles	20,000	200,000
Half Eagles	43,920	219,600
Quarter Eagles	38,960	97,400
Total	945,130	$17,362,000

SILVER COINAGE.

	No of pieces.	Value.
Half dollars	1,054,000	$527,000
Quarter dollars	28,000	7,000
Dimes	135,000	13,500
Half dimes	120,000	6,000
Totals	1,337,000	$553,500

GOLD AND SILVER COINAGE MONTHLY.

1866.	Gold.	Silver.
January	$315,000	$....
February	909,000	10,500
March	1,325,000	35,000
April	1,113,000	....
May	2,160,000	5,000
June	1,120,000	....
July	975,000	29,000
August	1,725,000	33,000
September	1,855,000	61,000
October	2,210,000	102,000
November	2,100,000	114,000
December	1,555,000	164,000
Total	$17,362,000	$553,000

RECAPITULATION

	No of pieces.	Value.
Gold coined	945,130	$17,362,000
Silver coined	1,337,387	553,500
Total	2,282,517	$17,915,500
Silver fine bars		437,407
Total		$18,352,907

The Gold coinage was $3,871,500 less than in 1865, though $1,444,360 in excess of 1864. The Silver coinage last year was $182,250 in excess of 1865, and $188,500 in excess of 1864. The value of the refined silver turned out was $175,257 larger than in 1865, and $396,861 in excess of 1864. The total value of the coin and bars turned out for the past year was $3,513,993 less than in 1865, though $2,029,721 more than in 1864.

Canadian Railways.

The following is an official statement of the Traffic Returns of the Canadian Railways, as far as reported, for January, 1867:

	1867.	1866.	Miles in operation.
Great Western	$242,170	$215,287	345
Grand Trunk	432,615	431,076	1,377
London & Port Stanley	2,079	1,794	25
Northern	24,093	23,813	94
Welland	2,753	1,114	25
Prescott and Ottawa	6,849	6,806	54
Total	$710,559	$679,890	1,920

Tonnage of New York.

The number of vessels arriving and departing from the port of New York, together with the tonnage and seamen employed during the fourth quarter of the year 1866, is officially stated as follows:

Entered at New York from foreign ports during the three months ending December 31, 1866:

	No. of Vessels.	Tonnage.	No. of Seamen.
American vessels	306	212,041	6,328
Foreign vessels	684	400,399	14,526
Total	990	612,440	20,854
Same time in 1865	1,036	594,759	20,765
" 1864	1,010	481,902	17,232
" 1863	1,185	551,245	20,880
" 1862	1,359	653,431	20,266
" 1861	1,395	715,200	21,818
" 1860	1,063	557,361	18,824

Entered at New York from foreign ports during the year 1866:

	No. of Vessels.	Tonnage.	No. of Seamen.
American vessels	1,640	990,116	30,567
Foreign vessels	3,187	1,776,318	64,738
Total	4,827	2,766,434	95,305
Same time in 1865	4,640	2,248,273	78,959
" 1864	4,775	2,261,907	81,750
" 1863	4,983	2,382,374	82,136
" 1862	5,406	2,552,481	81,817
" 1861	4,077	2,483,705	78,264
" 1860	4,346	2,164,601	72,510

Cleared at New York for foreign ports during the three months ending December 31, 1866:

	No. of Vessels.	Tonnage.	No. of Seamen.
American vessels	310	204,407	6,489
Foreign vessels	675	415,527	14,865

" 1860	3,812	1,970,998	66,750

Coastwise commerce of New York during the three months ending December 31, 1866:

	Entered Coastwise. No. vessels.	Tons.	Cleared Coastwise. No. vessels.	Tons.
1860	385	152,461	1,044	683,679
1861	324	98,939	508	341,971
1862	570	199,546	1,076	210,151
1863	346	135,010	735	239,557
1864	329	156,296	742	244,889
1865	795	368,600	1,314	547,132
1866	778	427,349	905	551,893

Coastwise commerce of New York for the year ending December 31, 1866:

	Entered Coastwise. No. vessels.	Tons.	Cleared Coastwise. No. vessels.	Tons.
1860	1,571	529,015	4,908	1,902,508
1861	1,240	393,024	2,905	952,919
1862	1,382	477,010	2,302	619,808
1863	1,602	625,013	2,897	869,976
1864	1,318	568,111	2,979	895,952
1865	2,260	1,041,138	4,075	1,596,635
1866	2,708	1,451,638	4,364	2,046,147

Annexed is a comparative statement of the Foreign Trade of New York, including the value of imports and exports, and showing the proportion under the American and Foreign flags from 1860 to 1866, inclusive:

	In American Vessels.	In Foreign Vessels.
1860	$233,893,593	$149,923,149
1861	165,604,513	138,983,675
1862	150,177,598	238,614,915
1863	82,501,244	320,771,309
1864	74,016,606	406,227,306
1865	83,349,607	345,750,622
1866	114,051,506	438,458,614

The duties collected on the portion of the imports marketed here during the year, were divided as follows:—On goods brought in American vessels, $25,081,606; and on goods in foreign vessels, $102,195,616.

The annexed table includes only the arrivals at the port, during the years named, of vessels engaged in the foreign trade, and is exclusive of vessels arriving from other domestic ports:

	No. of Arrivals.	Tons. American.	Tons. Foreign.	Total tons.
1860	4,346	1,487,539	677,062	1,164,601
1861	4,077	1,618,258	865,447	2,483,705
1862	5,406	1,472,989	1,079,492	2,552,481
1863	4,983	986,713	1,395,634	2,382,347
1864	4,775	845,172	1,416,735	2,261,907
1865	4,640	774,458	1,473,815	2,248,273
1866	4,827	990,116	1,776,318	2,766,434

Finances of Kentucky.

The report of Wm. T. Samuels, Esq., Auditor of Public Accounts, states that the estimated receipts for the fiscal year ending October 10, 1867, are $886,181. The estimated expenditures for the same time are $990,900. The debts due the State of Kentucky on the 10th of October 1866, were $2,144,711. The debt due by the State on that day, and which the Treasurer is bound to pay on demand, was $470,033. The total amount of the State debt was $5,238,691. Of this debt $1,621,289 was due to the board of Education, and is therefore a debt of the State to itself. The annual interest on the State debt is $297,994. The State owns stock in internal improvements, the present value of which is uncertain, amounting in the aggregate to $4,830,475; in banks and railroads, $1,542,819. The amount in the Treasury to the credit of the Sinking Fund, was $1,290,377. The Commissioners of the Sinking Fund had on deposit in the Farmers' Bank of Kentucky, bearing interest, $171,399. Estimating the stocks in internal improvements to be worth one-half of the stated value, and the State now has resources amply sufficient to pay off her entire debt.

Progress of the Anthracite Coal Trade of Pennsylvania.

Coin Movement on the Pacific Coast.

The aggregate Coin Movement on the Pacific Coast, through the port of San Francisco, during the year 1866, was as follows:

Coined	$17,362,000
Coin received from interior	5,099,456
Supply	$22,461,456
Shipped by steamers	$4,397,210
Exported to China, &c	495,023
Paid in for duties	7,457,472
Sent inland	9,907,244
	22,256,949
Surplus of supply	$204,507

This, says the *Alta California*, gives a small figure for the increase of coin at San Francisco, but there is to be taken into account $553,500 of silver coinage, mostly paid over to those who had gold coined, and from which it was parted. This would give $778,007 as the increase that remained to the city circulation out of a supply of $22,461, 456. The amount of money paid in for duties and exported by the Treasuary to the East, where it now remains in the Government vaults, amounts to one entire third of the supply of coin. The export of silver from San Francisco during 1866 was as follows:

Per steamer	$9,039,936
To China	3,946,114
Total	$12,985,150

The silver of the port is mostly received from Nevada, and, according to the tables we recently published, the amount brought down in the past year was $15,215,218. This is the value of the silver bars, but it must be borne in mind that these are not pure silver. The value is one half gold. The average of the bars received is about 945 fine silver, 55 fine gold. It follows from this that as 99 ounces of fine silver are worth $128 an ounce of silver, 915 fine is worth $1 22.18. Also, that as 387 ounces fine gold are worth $8,000 an ounce, 55 fine is worth $1 13.69. Hence of the value received from Nevada, about 51.80 per cent. is silver, and 48 1-5th per cent. gold. The metal exported east is mostly Nevada bars, while that sent to China is mostly refined bars, very nearly pure. These are refined at a cost of some 4½ per cent., and are exported at an expense of 1½ per cent. to China, where the bars 998 touch, or as the English express it, 17 better, are worth 10 @11 premium. They are then sold or converted into sterling bills, which in the past year have ranged from 56d. per dollar to 52d. per dollar. The sterling so furnished is sold in New York, and drawn against here; but in the last year, sterling in New York has been as low as 5½ per cent., or 52d. per dollar—the same price that it was at a corresponding period in China. The silver shipped by the steamers goes to London, where it has ranged from 62⅛d. per ounce to 60¼d. per ounce. Those violent fluctuations have caused the silver to range here from 2 per cent. premium to 2 per cent discount.

Milwaukee as a Shipping Port.

The Milwaukee *Wisconsin* gives the following statement of the number of vessels of all classes arrived at, and departed from, the Port of Milwaukee during the year 1866:

Arrived from	Am. Ports.	Foreign Ports.	Total.
January	14	..	14
February	7	..	7
March	25	..	25
April	199	..	199
May	429	30	459
June	471	25	496
July	451	26	477
August	446	20	466
September	396	16	412
October	480	17	497
November	459	6	465
December	97	1	98
Total	3,474	141	3,615

Departed to	Am. Ports.	Foreign Ports.	Total.
January	14	..	14
February	8	..	8
March	30	..	30
April	232	2	234
May	451	29	480
June	471	13	484
July	465	11	476
August	454	5	459
September	415	3	418
October	482	11	493
November	435	5	440
December	67	..	67
Total	3,524	79	3,603

The discrepancy between the arrivals from foreign ports, and departures, arises from the fact that the Grand Trunk Railway Steamers clear for Port Huron, and arrive from Sarnia.

Central Ohio Railroad.

We learn from Zanesville, that the Baltimore and Ohio Railroad Company have completed for the Central Ohio Division ninety-seven new cars, viz: 10 lightning express, 19 stock, 50 house and 18 gondola, a portion of which are already on the road, and the remainder will be put on as fast as practicable; and that they purpose making extensive improvements on the road as rapidly as possible after the season becomes favorable, which will enable it to meet the wants of shippers acd the expectations of the public generally.

St. John Passenger Railway.

At the last session of the General Assembly of the Province of New Brunswick, an act was passed to incorporate the "People's Street Railway Co.," with authority to construct a railway upon the streets of the city of St. John, and upon the streets, highways and bridges in the county of St. John, as may be agreed upon between the company and the authorities of the city and county. The capital of the company to be $200,000 in 10,000 shares of $20 each. The first section of the railway to be made and completed from Reed's Point to Indian Town in three years from the passage of the act. Assessments are to be made from time to time as the work progresses; not exceeding 20 per cent. at any one time, and payable within 30 days after notice of such call is given. The company are also authorized to raise money upon mortgage of their road, and to issue bonds therefor. The act further provides that the cars may be run with steam or horse power. The first three instalments on the capital stock are to be paid as required during the progress of the work; the fourth, upon the completion of the road; and the fifth in 30 days thereafter. It is proposed to issue stock certificates for the full amount subscribed, upon the payment of the first instalment, which, together with all subsequent payments, is to be endorsed upon the certificates. Six per cent. interest is to be allowed on all payments by shareholders until the completion of the road. Upon the completion of the first section, or so soon as a sufficient amount of stock is subscribed, it is the intention of the grantees, W. K. Reynolds and associates, to proceed with the construction of the remaining sections. He proposes to build and equip the whole road, with one line of rails, turnouts and sidings, also four steam or locomotive cars, and two light horse cars, with horses, harnesses, etc., at the rate of $34,500 per mile of track; or he will finish and put in thorough working order, the entire road, from Reed's Point to Indian Town, as above, for $92,000. Upon the completion of the whole road, with the contemplated branches, it is estimated that forty locomotive cars will be required.

☞ A meeting of the citizens of Belfast, Me., was recently held to take into consideration the subject of a railroad to Moosehead Lake. A committee was appointed to make a full investigation of the practicability of the proposed enterprise, and adopt such preliminary measures as would bring the whole matter practically before the citizens of Belfast for action.

☞ J. Dutton Steele, Esq., has been chosen Chief Engineer of the Wilmington and Reading Railroad, the new line of road which is to run from Wilmington, Del., to Birdsboro, Pa. This important railroad connection will be commenced this season and completed at an early day. Edward Brooke, Esq., of Birdsboro', is President of the company.

☞ A cable telegram has been received by the President of the James River and Kanawha Company, from Mr. De Billet, stating that the Societe Generale de Paris had agreed to furnish the maximum capital of $40,000,000 required for the Virginia Canal Company.

Interest and Dividends.

The Pacific Mail Steamship Company have declared a dividend of three per cent. out of the net earnings of the quarter ending January 31, 1867, payable at the office of the company Friday, March 1.

BORDEN & LOVELL,

COMMISSION MERCHANTS.

CUMBERLAND COALS.

NEW YORK BELTING & PACKING CO.

MANUFACTURERS OF

VULCANIZED RUBBER FABRICS,

Adapted to Mechanical Purposes.

Patent Smooth Belting, (Patented Nov. 22, 1859,) vulcanized between layers of a patent metallic alloy, by which the stretch is entirely taken out, the surface made perfectly smooth, and the substance thoroughly and evenly vulcanized. This is the only process that will make reliable Rubber Belting.

Hose never needs oiling, and warranted to stand any required pressure.

Steam Packing in every variety, and warranted to stand 300 degrees of heat.

Solid Emery Vulcanite —Wheels made of this are solid, and resemble stone or iron; will wear out hundreds of the ordinary wheels.

Directions, Prices, etc., can be obtained by mail or otherwise.

JOHN H. CHEEVER, Treasurer.

Warehouse, 37 & 38 Park Row, N. Y.

AMERICAN STEEL RAILS.

The undersigned are now ready to Contract for the delivery of rails made of **Bessemer** or **Pneumatic Steel,** wholly **American,** and of the best quality.

PENNSYLVANIA STEEL CO.,
421 Walnut Street,
Philadelphia.

CAMBRIA IRON CO.,
400 Chestnut Street,
Philadelphia.

RAILWAY ROLLING STOCK.

United States Patent, Dated 1866.

A new mode of retaining and sustaining the tires of railway wheels. The property in this invention, which is largely adopted by Railway Companies in England, is for sale as regards the United States. Apply to JOHN GEDGE & SON, Patent Agents, 11 Wellington Street, Strand, London. 1m7

THE ATLANTIC BRIDGE WORKS,

Office, No. 157 Broadway,

NEW YORK.

POST, McCALLUM & CO.,

Bridge and Roof Builders,

Are prepared with all the necessary machinery and an experienced corps of assistants, to sink **Hollow Piles** and **Coffer Dams** by the **pneumatic process** for the foundations of Bridges, Docks, Sea Walls, Light Houses, or other marine constructions.

By the use of new patented machinery they are able to perform work of this character with much greater rapidity than has been possible heretofore, and at reduced cost.

Parties in the Western States may apply to Gen. Wm. S. Smith, care of Boomer, Boyington & Co., No. 14 Dearborn St., Chicago, Illinois.

SHIP FELT, CARPET FELT, BOILER FELT.

THE very superior Felt, manufactured by the Lowell Felting Mills, can now be furnished in quantities to suit purchasers, from the new and extensive mills now completed. Also, pipe, truss, upholstery and all other Felts. Apply to the branch office of the Company.

EDW. F. DAVISON, 136 Pearl St.

FOR SALE,

A SET OF BOILER PLATE BENDING ROLLS, six feet long, suitable for bending iron No. 4 in thickness, and under.

POOLE & HUNT,

417 **Baltimore, Md.**

RAILROAD TIES.

The undersigned are prepared to furnish Railroad Ties of **Hackmatack, Cedar, Pine, Hemlock** and **Spruce** in any quantity. Also every description of **Northern** and **Southern Pine, Oak** and **Spruce** for **Railroad Cars, Bridges, &c., &c.**

Orders from Railroad Companies, Manufacturers and others are respectfully solicited.

Pacific Mail Steamship Company's

THROUGH LINE TO

CALIFORNIA,

And Carrying the U. S. Mail,

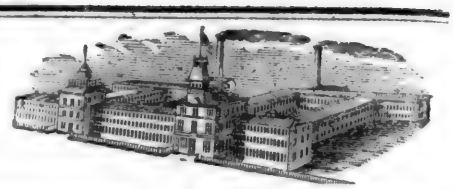
VIA PANAMA RAILROAD.

LEAVE PIER NO. 42 NORTH RIVER FOOT OF Canal Street, at 12 o'clock noon, as follows:

March 1.—RISING STAR, Capt. W. G. Furber, connecting with GOLDEN CITY, Capt. Watkins.

March 11.—HENRY CHAUNCEY, Capt. A. G. Gray, connecting with MONTANA, Capt. Sutton.

March 21.—OCEAN QUEEN, Capt. T. A. Harris, connecting with CONSTITUTION, Capt Caverly.



All Departures touch at ACAPULCO; those of 1st and 21st connect at Panama with steamers for SOUTH PACIFIC PORTS, 1st and 11th for CENTRAL AMERICAN PORTS. Those of 1st touch at MANZANILLO.

Departure of 11th each month connects with the new steam line from Panama to Australia and New Zealand.

Steamer of March 1st, 1867, will connect with the Company's steamer COLORADO, to leave San Francisco for Yokohama and Hong Kong on April 3, 1867.

100 Pounds Baggage allowed each adult. Medicine and attendance free. For Passage Tickets and all further information apply at the office, on the wharf foot of Canal Street, North River, New York.

9m35 F. R. BABY, Agent.

ENGINEERS AND CONDUCTORS'

WATCHES.

THE AMERICAN WATCH COMPANY, of Waltham, Massachusetts, request us to publish the following letters, recently received, recommendatory of Waltham Watches for railway use. The Pennsylvania Railroad Company have for several years furnished to their employees watches specially made for them by the Waltham Company, and it is this class of watches the Superintendent, Mr. Williams, refers to. Similar watches (in strong silver or gold cases, with plate-glass crystals) we are prepared to supply, named and engraved to order; and of them, as being most suitable for the use of Engineers, Conductors, Station-Masters, of Expressmen and Messengers, the Company give the most ample guarantee. It is a remarkable fact that Railroad Companies using our watches suffer much less from collisions and similar accidents than any others.

Any of the grades of Waltham watches may be purchased of Watch Dealers generally throughout the country.

ROBBINS & APPLETON,
182 Broadway, New York.

ROBBINS, APPLETON & CO.,
153 Washington Street, Boston.

PENNSYLVANIA RAILROAD CO.

OFFICE OF THE GENERAL SUPERINTENDENT,
ALTOONA, Pa., 15th Dec., 1866.

GENTLEMEN,—The Watches manufactured by you have been in use on this Railroad for several years by our Enginemen, to whom we furnish watches as part of our equipment. There are now some three hundred of them carried on our line, and we consider them good and reliable timekeepers. Indeed, I have great satisfaction in saying your watches give us less trouble, and have worn and do wear much longer without repairs, than any watches we have ever had in use on this road. As you are aware, we formerly trusted to those of English manufacture, of acknowledged good reputation, but as a class they never kept time as correctly, nor have they done as good service as yours.

In these statements I am sustained by my predecessor, Mr. Lewis, whose experience extended over a series of years. Respectfully,

EDWARD H. WILLIAMS,
General Superintendent.

AMERICAN WATCH COMPANY, Waltham.

NEW YORK CENTRAL RAILROAD.

LOCOMOTIVE DEPARTMENT, WEST. DIVISION,
ROCHESTER, Dec. 24, 1866.

GENTLEMEN,—I have no hesitation in saying that I believe the great majority of Locomotive Engineers have found by experience that Waltham Watches are the most satisfactory of any for their uses. They run with the greatest accuracy and steadiness, notwithstanding the rough riding of an engine, and as I have never known one to wear out, they must be durable. I hope to see the time when Railway Companies will generally adopt your watches, and furnish them to all Engineers and Conductors. In my opinion it would greatly tend to promote regularity and safety.

Yours respectfully,

CHARLES WILSON, G. Chief Engineer,
Brotherhood of Locomotive Engineers.

AMERICAN WATCH CO., Waltham, Mass.

American Railroad Journal.

New York, Saturday, March 9, 1867.

Baltimore and Ohio Railroad.

We have received a copy of the Report of this company for the fiscal year ending September 30, 1864, which was presented at the annual meeting of the company held in Baltimore on the 13th of November, 1866. The protracted difficulties connected with the war, and the great delays in the adjustment of accounts with the Goverment, has prevented the directors from preparing and submitting the Report at an earlier date. The report embraces the statements of the Treasurer, and of the Masters of Transportation, Road and Machinery. These contain much matter of interest, and will be more particularly alluded to in a subsequent number.

At various periods during the year under review, sections of the main stem were repeatedly occupied by the Confederate forces, and numerous raids continued to be made upon the line. Frequent conflicts, and a number of great and decisive battles took place upon and in the vicinity of the road. Property of the company of great magnitude and value, as during the preceding years of the war, were destroyed at numerous points. Among which may be mentioned the fine iron bridge at Monocacy three spans, much damaged by iron shot. Mead's stone arch bridge was blown up. Three trestle spans of the Harper's Ferry bridge were destroyed by Government forces. The canal span, all the woodwork connected with the iron spans of the main bridge, and the timber track and platforms upon 16 spans of the trestling upon the iron columns in Harper's Ferry were destroyed by Confederate forces. Much damage to this bridge was also caused by the severe freshets of April and May, in that year. The following trestle bridges were burned: Opequon, Tuscarora, Rattling, Pillar (9 spans) Back Creek (partially destroyed a second time,) South Branch, (east span do.,) North Branch, (12 trestles,) Patterson's Creek (2 spans twice burned,) Warrior's Run. Between Harper's Ferry and Cumberland 29 open culverts were burned. The destruction of track and sidings at different points, embraced upwards of 16 miles, together with water stations, engine houses, machine and paint shops, passenger and telegraph offices, platforms, etc.

The raid on Piedmont and Bloomington on the 5th of May, 1864, was followed by great loss to the company. The mail train bound east, consisting of engine, tender, 1 baggage, 1 mail and 4 passenger cars was captured and burned. Two freight trains, consisting of 2 engines and 18 loaded cars were destroyed near the arch bridge at Bloomington; 22 cars were also burned at Piedmont. An iron clad car, a house car loaded with hay, and one gondola car were destroyed. The hand and truck cars were used by the Government forces after the battle of the 9th of July at Monocacy. Much of this equipment was thus destroyed. On the 12th of July, at Beltsville, on the Washington Branch, a train consisting of 5 passenger, and 3 freight cars were captured and burned; 2 gondola and 11 ballast cars were also destroyed. The repeated destruction of the telegraph line between Monocacy and Piedmont, during the year, was equivalent in the reconstruction required, to a continuous line of 125 miles.

Upon each occasion of invasion and destruction, the arrangements of the company were so perfected, that at the earliest moment at which the Government troops were prepared to re-occupy the line, reconstruction was rapidly effected. In every instance large organized forces, with full supplies of the material required, had been held in readiness, and were promptly forwarded from the east and the west to the requisite points, the extensive damage repaired, and the important military and other work of the road resumed without delay. The Report of the Master of Road is especially interesting, as it embraces full particulars of the destruction, and of the operations of that department in connection with the restoration of the track and works of the company.

Notwithstanding the varied embarrassments affecting its operations, the company was enabled to work the entire route from Baltimore to the Ohio River for three-fourths of the year, and chiefly by this comparative advantage over the preceding year, succeeded in securing the improved financial results as shown in the annexed summary of its operations.

The gross earnings of the main line were $8,577,692 25—exceeding those of the preceding year $2,067,747 19, and those of the fiscal year 1862, $4,095,833 27.

The expenses of working and keeping the road and machinery in repair amounted to $3,270,509 05—being 38.12 per cent. upon the earnings; showing an increase of 7.93 per cent. compared with the previous year, and of 6.28 per cent. compared with the fiscal year of 1862. The working expenses, as compared with 1863, shows an increase of $1,304,661 64—making the increase of net profits $763,085 55. As compared with 1862, the working expenses have increased $1,843,303 22, with an increase of net profits amounting to $2,252,530 05.

During the fiscal year the sinking fund for the redemption of the city loan increased to $899,864 24—showing a gain of $39,899.

Additional advances to the Northwest Virginia Railroad Company, after crediting all earnings received, viz: for payment of interest and for expenditures in improving the condition of the road, amounted to $143,972 29, exclusive of the payment of $1,200,000, to the city of Baltimore, and of $13,000 for bonds of that company, having liens upon its property in Parkersburg.

A dividend of six per cent. was paid on the 26th of October, 1863, and one of four per cent. on the 26th of April, 1864.

The liabilities of the company, were reduced

during the year as follows: Loan redeemable in 1867, $44,803 28; in 1875, $60,250; in 1880, $47,500; and in 1885, $539,500—making a total reduction in the fiscal year 1863–'64, of $692,053 28.

The balance of cash in the Treasury, Sept. 30, 1864, after deducting $161,250 for payment of interest on the city loan, and on the bonds of the company which matured October 1, 1864, was $268,023 30.

The earnings of the Washington Branch for the year were $864,480 79—showing an increase of $161,357 20 compared with the previous year, and of $86,064 12 compared with 1862. The expenditures charged amounted to $606,018 40, which deducted from the revenue, produced the net sum of $258,462 39—showing a decreased gain compared with the preceding year of $171,427 88; and of $366,126 53 compared with 1862. The expenditures charged are for the construction of second track, and other improvements, and for repairs of depots, bridges, water stations and railway, and for pumping water—a system having been adopted by which the earnings are equitably divided, upon a basis requiring all the expenses connected with transportation, the repair and use of machinery, and of the shops and stations of the company in Baltimore, to be paid by the main stem—the expenses of the road department alone being charged to the branch.

At the close of the preceding year the work upon the double track between the Relay House and Washington had been commenced; and during the month of February following, the second track between Washington and Annapolis Junctions, was completed and placed in use. A portion of the work between the latter point and Washington was also accomplished prior to the close of the year.

A dividend of five per cent. was paid Oct. 16, 1863, and one of five per cent., April 16, 1864.

The earnings of the Northwestern Virginia Railroad for the fiscal year amounted to $696,702 99; and the working expenses to $569,667 83—leaving the net earnings $127,035 16. The earnings were $250,482 13 more than for the previous year, while the expenses increased $165,572 76—an increased comparative net result of $84,909 37. The ratio of working expenses to earnings was 81.76; in 1863, it was 90.55; and in 1862, 73.25.

The aggregate earnings of the Main Stem, Washington Branch and Northwestern Virginia Railroads, were $10,138,876 03; and the expenses, $4,446,195 28—leaving as net earnings $5,692,680 75; showing an aggregate net increase over the preceding year of $676,567 04.

During the year 219,122 new cross ties, and 9,123 tons of new rails were placed in the track of the Main Stem, equal to 97 miles of new track. Upwards of 2,873 tons of new rails, and 50,972 new cross ties were used in the track of the Washington Branch, and 987 tons new rails, and 80,478 cross ties on the Parkersburg Branch.

The company have 221 locomotives. The number of miles run during the year was: On the Main Stem, 3,493,376; on the Washington Branch, 435,144; on the N. W. Va. R. R., 416,837—total, 4,345,357, an increase over the previous year of 615,099 miles.

The liabilities of the company on the 30th of September, 1864, were: capital stock, $13,151,962; preferred stock, $3,000,000; bonds, $4,420,530 50; City loan, $5,000,000; open accounts, $422,136 14; unclaimed dues, $33,355 29; Washington Branch, $567,477 35; profit and loss, $13,087,651 31—total of balance sheet, $39,683,112 59. The assets were: Cost of road, second track, real estate and rolling stock, $24,993,206 22; stock and bonds, $4,348,103 86; N. W. Va. R. R., $4,054,515 25; sinking funds, $1,647,055 90; materials, $462,161 76; bills receivable, outstanding dues, uncollected revenue, etc., $3,910,046 80; balance in the Treasury, $268,023 30—total, as above, $39,683,112 59.

The capital stock of the Washington Branch is $1,650,000, which represents the cost of road and equipment.

☞ The Atlantic and Pacific Railroad Company are about closing a contract with Messrs. Dodge & Co., who built the Marietta road, to build fifty miles extension of the Southwestern branch beyond Rolla.

Cleveland and Pittsburg Railroad.

The earnings of this road for the years ending November 30, 1865 and 1866, were as follows:

	1865.	1866.
From freight	$1,569,584 06	$1,498,631 56
" passengers	1,029,065 60	788,922 77
" miscellaneous	97,727 86	64,351 50
	$2,696,377 52	$2,351,905 83
Expenses, viz:		
Motive power & cars	$758,368 98	$627,880 03
Maintenance of way and structures	551,416 19	494,567 48
Transportation & general expenses	649,798 39	574,731 96
	$1,959,583 56	$1,697,179 47
Earnings less expenses	$736,793 96	$654,726 36
To which add receipts from Pittsburg, Ft. Wayne and Chicago Railway Co., being this company's share of surplus earnings		256,065 73
Balance		$910,792 09
From which there has been paid—		
Mortgage interest	$257,681 50	
Interest on notes, etc	5,790 54	
Lease of P., Ft. W. & C. track	85,000 00	
		348,472 04
Leaving, as balance of the year's business		$562,320 05

—which sum has been mainly appropriated to the payment of the following items:

New equipment		$124,611 63
Union depot, Cleveland		44,770 82
Other new structures and improvements		49,171 10
Settlement of Allegheny County claim		50,137 38
Notes for three Pony Engines		39,058 89
Notes for Penn street property		30,000 00
Other indebtedness liquidated		8,485 48
Dividend of June 10th, 1866, and Government tax on same	$227,003 15	
Less amount taken from assets of the Treasurer at close of last fiscal year	100,000 00	
		127,003 15
Total		$473,238 45

It may be proper after this showing, to explain to the stockholders, especially to those not familiar with the history of this company, the reasons why it has not seemed to the Directors practicable to resume the payments of regular dividends at the present time. The principal reason is the great increase of the company's business, for the proper performance of which large outlays have been made necessary. Nine years ago the company failed, and after struggling with many embarrassments, was finally, in the year 1860, placed in the hands of a receiver, by the order of the United States Court. In this condition it struggled on, liquidating and compromising its liabilities, but without means to increase its facilities for business. Three and one half years ago the road was again put into the hands of the stockholders, with some old claims still hanging over the company, amounting in the aggregate to a large sum, and with a railway and equipment which had been strained to its utmost in the attempt to perform the business which was offering.

When it is considered that since June, 1863, the business of the company has nearly doubled, some idea may be formed of the outlay which this great increase of traffic has made necessary.

During this period there have been bought,

20 new engines	$414,600 66
7 passenger and 2 baggage cars	40,479 96
571 freight and coal cars	399,782 61
New iron rail has been purchased for extension of side tracks, and as a reserve for purposes of re-rolling	371,037 18

New structures have been erected and improvements made as follows:

Union depot, Cleveland	$128,779 59
Round house, machine shop and tenement houses at Wellsville	133,124 86
New buildings and improvements at Cleveland	19,085 64
Bedford Bridge	71,244 30
Allegheny Bridge extension	26,659 29
Machinery for repair shops	37,481 51

Over fifty acres of land have been purchased at Cleveland, indispensable for the vastly increasing traffic in coal and iron ore. Grounds in Pittsburg have also been purchased and great improvements made, for the accommodation of the freight department at that point, at an aggregate expenditure of | $171,829 36
Old indebtedness has been paid amounting to | 334,014 44

In addition to all of which dividends as follows have been paid to the stockholders:

October, 1863	$155,044 00	
April, 1864	159,253 00	
October, 1864	161,355 00	
February, 1865	212,729 25	
January, 1866	215,653 00	
		904,034 25

The grand total of all of which items is $3,052,153 60, of which $800,000 was furnished by sale of capital stock. The balance, $2,252,153 60, being applied from the earnings of the company.

The Directors are convinced that had the stockholders been satisfied to wait a little longer for dividends, the business of the road would have been more speedily developed, and the company would have sooner reached a position to make them regular returns upon their investment.

The road is now in first class condition as a business line, and is well equipped for the present traffic. The grounds recently purchased at Cleveland need very considerable outlays to bring them into a condition to be of the greatest use, and it is imperative if the competition of rival interests with which the business of another year must contend, is to be properly met, that these improvements be entered upon at once and vigorously pushed to completion.

The income of the company from all sources during the year has been as follows:

Gross earnings, as above		$2,351,905 83
Received from Pittsburg, Ft. Wayne and Chicago Railway Co	256,065 73	
Issues of capital stock and scrip	345 40	
Received from miscellaneous sources	3,869 21	
Due on bills and pay rolls	154,996 52	
Assets at close of 1865, as per last report	354,144 73	
		$3,121,827 42

Disbursed as follows:		
Operating expenses, as above		$1,697,179 47
Mortgage interest		257,681 50
Interest on notes and accounts		5,790 54
Lease of P., Ft. W. and C. R'y track		85,000 00
Dividend of Jan., 1866		215,653 00
Government tax on same		11,350 15
Bills payable		69,091 86
Stock scrip retired		302 92
Dividend bonds and scrip retired		3,410 25
River line bonds and certificates		4,194 80
4th mortgage scrip		577 51
Allegheny County scrip		50,137 38
Expenditures on account of construction and equipment		124,611 63
Expenditures on account of new structures and improvements		96,979 66
Balance in hands of Treasurer	$205,579 53	
Lawrence Railroad and Transp. Co. stock	10,000 00	
Bills receivable	12,230 67	
Materials at shop	134,069 60	
Bal. of personal acc'nts	137,486 95	
		499,366 75
		$3,121,327 42

The company have 68 locomotives, 31 first class, and 5 second class passenger cars, 14 baggage, 9 express, 18 way, 1 paymasters, 318 box, 21 slat, 732 gondola, 17 platform, 16 wood, 43 gravel, 8 wrecking, 37 hand, 32 ditching and 7 truck cars. Miles run by passenger trains, 390,350; by freight trains, 728,910; by wood and gravel trains, 297,-801; by mixed trains on Tuscarawas Branch, 23,-620—total, 1,440,681, an increase over 1865, of 10,940 miles. Tons of freight carried one mile, 70,918,104, an increase over 1865, of 9,227,804 tons. Total number of cars hauled one mile, 11,-763,958, an increase over 1865 of 1,938,688 miles.

CONDENSED BALANCE SHEET.

	1865.	1866.

President.—J. N. MCCULLOUGH.

Directors.—J. N. McCullough, Jas. F. Clark, T. P. Handy, W. W. Holloway, B. F. Jones, J. H. Shoenberger, J. H. Banker, David Dows, C. W. Durant, John Steward, John F. Tracy and Thomas Slocomb.

Superintendent.—J. H. DEVEREUX.

☞ In Kansas the Legislature has adopted a railroad bill limiting passenger fares to five cents per mile, and freight tariffs to sixty cents per one hundred pounds for first class freight for one hundred miles; fifty cents for second class, and forty cents for third class. The bill takes effect on the first of June.

Albany and Susquehanna Railroad.

Ever since the unfinished line of railroad was projected we have earnestly favored its construction, as an important public improvement, of peculiar interest to the inhabitants of the Southern Tier, and of vast consequence to the locality through which it passes, as an act of justice to that population which has cheerfully paid in taxes its share of the State funds appropriated in railroads and canals in other sections of the State. The interests of this sequestered region were too long ignored, and are yet not fully recognized. The people who reside between Albany and Binghamton have been subjected to much expense to find profitable markets. They sought, and, after years of concentrated effort, secured the passage of a law granting some aid in the construction of the work. Liberal subscriptions were made along the line at the outset. These were increased as the work progressed, and the auxiliary assistance furnished by the State gave a new impetus to the project. Last year a bill to render still further aid was vetoed by the Governor, along with several other measures, which would have materially added to the burden of taxation.

Gov. Fenton, in his veto, admitted the great importance of the railroad, but was compelled to withhold his signature from economical considerations. Not discouraged at the unlooked for result, disheartening as it was, the company pushed forward the work, and renewed the call for aid along the line, already heavily drawn upon.

The railroad is now in running order as far as Sydney, Delaware Co., a distance of 104 miles from Albany, and within 36 miles of Binghamton. The portion to be built involves much expense, from heavy gradings or deep cuttings. The local trade and travel on the finished section has surpassed anticipation, and indicates the financial prosperity of the enterprise when completed. The resources of the company are nearly exhausted.

Hon. J. Van Valkenburgh, of Binghamton, has introduced a bill in the Assembly, pledging $250,-000, from the State, when the road is finished to Binghamton.

We earnestly hope that the Members of the Legislature from the entire Southern Tier will give an effective support to this bill. Should it become a law, the railroad can be completed by midsummer.

We believe that Steuben County has been uniformly in favor of this project during the six or eight years that it has been, with various fortunes seeking Legislative aid. It is proper to say in this connection that the success of the railroad project thus far has been largely owing to the indefatigable, zealous exertions of Hon. J. Ramsey, of Schoharie Co., now the President of the company, who while Senator, and before and since, has been the most influential in securing local and State aid, and securing the recognition of the claim of that secluded region to a share in the fostering care of the State. He has labored with a courage and tenacity that is rare indeed. The Albany and Susquehanna Railroad will be his memorial for all time to come.—*Corning Journal.*

Ashland Iron Co.

Both branches of the Maryland Legislature have passed a bill incorporating the Ashland Iron Company of Baltimore County, and it is now a law. Messrs. George Small, Edward Patterson, Jr., Samuel Small, Philip A. Small, James C. Clarke and W. Latimer Small are the corporation. The capital stock is set down at $150,000, in shares of $250, with the privilege, if it should be necessary, to increase it to $1,000,000. The company have the right to purchase, hold and dispose of property, real, personal or mixed, fee simple or leasehold; to erect iron works and other necessary buildings in Baltimore County or Baltimore City for the manufacture of iron and coal, and to do whatever else may be necessary for the manufacture and working of iron and coal, and for the transportation thereof; to own vessels, cars, wagons and other vehicles, and to do all things generally as may be proper and necessary to procure ore, coal, etc. The corporation is also vested with all necessary powers to lay down and contract, and to use and operate, lateral and tram railways, with double or single tracks, to their works, to and from ore banks or mines, and also to connect with the Northern Central Railroad, or any other railroad passing through Baltimore County, at such points as they may deem most desirable, on such terms as may be agreed upon with said railroad company, but shall have no power to condemn land for that purpose.

Performance of Locomotives on the Illinois Central Railroad.

We are indebted to Samuel J. Hayes, Esq., Superintendent of Machinery, for a copy of his Annual Statement, showing the performance of locomotive engines on the several divisions of the Illinois Central Railroad during the year ending December 31, 1866. The following is an abstract:

	Chicago division.	South division.	North division.	Total.
Miles of road	252 5	230.75	225.0	708.25
Number of engines	69	41	41	149
Miles run—				
By passenger trains	389,927	299,064	288,810	977,801
By freight trains	934,013	500,671	681,738	2,116,422
By other trains	268,330	136,148	105,161	509,639
Total miles run	1,592,270	935,883	1,075,709	3,603,862
Materials used—				
Lbs. of waste used	21,314	14,999	15,096	52,309
Gal. of oil used	12,471	9,825	8,543	30,839
Cords of wood used	2,539	2,691	1,110	6,341
Tons of coal used	46,733	25,611	29,463	101,807
Running expenses—				
Cost of wages	$33,994	$56,277	$58,098	$208,369
Cost of repairs	239,422	194,045	143,540	577,007
Cost of stores	18,979	14,594	13,280	46,853
Cost of fuel	137,165	82,713	83,635	303,513
Cost of cleaning engines	20,321	12,443	9,201	41,966
Total cost	$509,881	$560,072	$307,754	$1,177,708
Average per mile run—	Cents.	Cents.	Cents.	Cents.
For oil, waste & tal	1.19	1.56	1.25	1.30
For repairs	15.03	20.73	13 34	16.01
For fuel	8.61	8 84	7.77	8.42
For wages	5.90	6 01	5.40	5.78
For cleaning	1.27	1.33	0.85	1.16
Total	32.00	38.47	28.61	32.67
Average miles run—				
To one cord of wood	69.29	54.46	42.37	68.56
To one ton of coal	32.52	34.05	36.50	34.04
To one pint of oil	15.36	11.90	15.59	14 28
Av. number cars per trip	13.98	12.47	10.87	12.44

The above oil includes that used in head lights and in lamps of engineers; wood is rated at $5.80 per cord, and coal at $2 62 per ton, loaded on tenders; Oil $1 18 per gallon; waste 20 cents per pound. Rebuilding, superintending, teaming and all other expenditures relating to repairs, are included in the above cost of performance of locomotives. Two empty cars are rated as one loaded. Whole number of engines owned by the company, 149. The average cost per mile is as follows:

	Cents.
For passenger engines	32.39
For freight engines	32.33
For construction engines	23.74
For switching engines	26.79
For each car drawn, Chicago division	2.29
For each car drawn, South division	3.08
For each car drawn, North division	2.63
For each car drawn, entire road	2.62

Samuel J. Hayes, Superintendent of Machinery; George Holton, M. M., Chicago Division; David Oxley, M. M., South Division; J. B. Edams, M. M., North Division.

☞ The bill granting State aid to the Albany and Susquehanna Railroad Company passed the House on the 2d inst., by a vote of 76 to 25. It had previously passed the Senate.

Railroads of Massachusetts.

A tabular Statement of the Railroads of the State, their Capital and Cost, Length, Earnings and Expenses, Dividends, &c., for the year ending 30th November, 1866.

(Prepared by Hon. OLIVER WARNER, Secretary of the Commonwealth.)

Companies.	Capital Account.				Cost of road and Equipm'nt.	Length of Road.	Gross Earnings.				Operating and Repairs.	Earnings less Expenses.	Dividends.

‡ The length of Passenger Railroads is stated in equivalent single track, not by miles of route.

Black Band Iron Ore.

In Wales and Scotland there is a kind of ore called black band. It is but a few inches thick, and consists in the union of coal and iron. It is consequently easily smelted—the contents of coal being almost sufficient alone to reduce the iron. This ore had for many years been thrown away as earthy slates, and large piles of it had accumulated around the mine pits. Its ferruginous qualities were finally detected, and almost immediately furnaces sprung up in long lines for miles and miles through the coal field where the black band existed. There is one little narrow basin in South Wales which produces between twenty-five thousand and thirty thousand tons of pig metal per week, and consumes more coal than all the iron works in the United States combined. In that small patch it is no unusual thing to see fifteen and twenty furnaces side by side, and the whole scene for over twenty miles, includes nothing but furnaces, roasting kilns, rolling mills, coal and iron mines, and the usual clamor of machinery and of bituminous fires from thousands of tall chimneys. In Pennsylvania, until very recently, no such ore as black band had been found; nor has iron, coal and limestone been mined in the same measure (although the two former lay together), except to a moderate extent in certain districts in the western slope of the Allegany mountains. In addition to the several veins and kinds of black band already proved, there are many beds of workable and rich hematite, besides enormous deposits of a concretionary ore and limestone immediately outside the coal measures—veins ten, fifteen and twenty feet thick. Besides this there are several veins of rich bowlder ore, generally lying over veins of coal, most if not all of these could be worked to advantage. Besides all this, there are not less than forty millions of tons of pulverized coal lying in vast artificial hills around our coal breakers, all of which will prove available for roasting ores, improving their quality and increasing their richness. Since, therefore, it is a physical fact that veins of black band, much richer in iron and three times the thickness of those of Wales, occur here side by side with great beds of anthracite coal; and that enormous deposits of hematite and limestone occur in near proximity, with rich and beautful valleys of shale and calcareous soil creeping around the rugged slopes of the metalliferous mountains, and inviting the sluggish pace of the farmer—why should not Schuylkill county blaze with long lines of furnaces and rolling mills and workshops of every description. Why should it not rival the population, the industry and the wealth of the same geological belts in England, Scotland and Wales? Why should we allow John Bull to outstrip us in the production of iron in our own market, when we have the means to prevent it? To form an idea of the real value of this black band discovery, we will conclude with a simple estimate. The vein of McGinnes is over three feet thick. A cubic yard we will estimate to weigh three tons—or say about 4,500 square yards to the acre, which, multiplied by three, will give 13,500 tons to each acre of ground. The deviation from perpendicularity of all our measures would increase the number of tons to at least fifteen thousand per acre. Estimating the accruing value of each ton, for a period of twenty years—leaving out interest on original cost of land, which the surface value would offset—at an average of thirty cents, we find that this single vein of Mr. McGinnes would yield $2,250 per acre! Add to this the value of the coal, not less than $3,000 per acre, and we find the whole to be worth not less than $5,000 per acre. And this is exclusive of the surface, which is often worth from $500 to $1,000 per acre for building lots. Now, while such lands are really worth that amount of money, they are trifled with in such manner that they often yield little or nothing—for the reason that the coal only is worked. To obtain the coal, expensive outside machinery has to be erected; immense wastage occurs in its preparation, while the process of preparing it is itself very expensive. But were the iron brought up with the coal, and both poured into the furnace, no breakers would be required—no loss of coal would ensue—no cost of breaking it up, and no cost of hauling the debris away. It would be difficult to say what amount could not be saved by the introduction of furnaces at our mines, instead of coal breakers. Many of the coal breakers cost quite as much as an ordinary furnace; and while one would save 25 per cent, of the aggregate amount annually mined in that region, it is a most scandalous fact that the other destroys 25 per cent of the aggregate.—*Pottsville Standard.*

Massachusetts Savings Banks.

The following is an abstract of the returns of the Saving Institutions of Massachusetts for the years 1866 and 1865:

Annual expenses of the institutions	219,257 03	203,348 56

European and North American Railway.

The friends of Western Extension will be pleased to learn that there is every prospect of the work at this end of the line being carried on in good earnest as soon as the opening of the season will permit. In the city of Bangor and at other points immediately adjacent, several gangs of laborers are now employed in blasting rock and otherwise prosecuting such work as the weather will allow. The stone for piers to cross the Bangor River are being prepared and the foundation will be put in order forthwith. In fact, everything looks promising so far as the Bangor end of the line is concerned; and we are informed that the Contractors, Messrs. Pierce & Blaisdell, are fully determined to push the matter forward with all possible speed. One of the Contractors may be expected here in the course of a short time fully prepared to put things in satisfactory shape.

Mr. Burpee has been active and energetic in his department, and we feel quite sure will spare neither labor nor trouble in doing his part of the work.—*St. John News.*

☞ The following gentlemen have been elected directors of the Pennsylvania Railroad Company, for the ensuing year: J. Edgar Thomson, Josiah Bacon, John Rice, Wistar Morris, Alexander Nimick, (Pittsburg), Samuel T. Bodine, Joseph B. Myers, Edward C. Knight, Washington Butcher, John M. Kennedy.

American Railroad Journal.

Saturday, March 9, 1867.

Stock Exchange and Money Market.

The supply of money has been on the increase, gaining rapidly on the current wants of responsible borrowers, but the disposition to grant accommodation has been rather lessened by the numerous reports of National bank troubles and defalcations, and of mercantile failures of more or less importance. The action of the late Congress on political and currency measures has tended to strengthen, rather than diminish, public confidence, as is indicated by the sudden fall in gold, without any correspondingly severe depression in the funded obligations of the Government. The ruling price of call loans has been six per cent., with exceptional negotiations at one per cent. above and below this figure. Mercantile paper has been in less request and rather more sharply scrutinized. The minimum rate on prime short date notes has been seven per cent. per annum; and on names ranking as strictly good 7½@8 per cent. per annum have been the quotations. The city banks have been moving steadily in favor of an easy market. The last weekly statement showed an increase of $2,342,437 in the loans, and $288,292 in the circulation, with a decrease of $1,934,075 in the specie reserve, chiefly due to the customs drain, $401,433 in the deposits, and $139,700 in the legal tender reserve. The specie reserve of the banks is now $11,579,381, against $17,181,130, same time last year. The city bank deposits are now $198,018,914, against $181,444,378 week ending Feb. 24, 1866. The legal tender reserve amounts to $63,014,195, against $58,760,145 same time last year. The circulation now stands at $33,294,433, against $22,994,086 same time last year. The loans are now $260,166,436, against $235,239,412 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $77,689,089 a day, against a daily average of $73,929,014 the preceding week, and $75,980,638 the week ending with Feb. 9. The current week's exchanges average about $93,000,000 a day.

The main changes in the Philadelphia Bank footings, last week, were as follows: Decrease of loans, $415,543; increase of legal tender reserve, $313,059; increase of deposits, $721,375; decrease of specie, $14,350; and increase of circulation, $15,166.

National Bank notes to the amount of $171,000 were issued last week, making the total issue to 1,663 banks thus far $301,835,421, against $282,555,440 at the close of the last fiscal year, June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $2,811,032, leaving, with the existing 1,650 banks, an actual circulation at this date, of $299,024,399. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,849,450; and for the public deposits, $38,761,450—making a total of $379,110,950. The Treasury Department, last week, redeemed and destroyed over $270,000 of worn and mutilated fractional currency, and issued $314,000 worth of new.

The U. S. Sub-Treasury receipts, week ending with March 2, were $17,580,658, including $3,152,289 from customs duties; payments, $40,666,248; an unusually heavy outflow; balance at the close of the week, $109,866,761, against $132,952,351 at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $3,955,696, and payments, $4,142,290; on Tuesday, receipts, $763,000; payments, $772,960. The balance at the close of business on Tuesday stood at $110,606,107, against $128,024,061 a week previous.

Government revenues have been again quite prolific, during the past week. The excises, last week, yielded over $4,650,000, against $2,460,320, the preceding week; customs at the port of New York, $3,152,288, and at the outports, about $1,104,000 (in coin) more, making the grand total income for the week equal about $10,502,000 in currency, against disbursements of over $3,926,769 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $203,150,000.

The Compound Interest note bill passed by Congress and signed by the President, provides for the issue of $50,000,000 of three per cent. loan certificates, instead of $100,000,000, and

abolished that provision of the House bill which forbade the payment of interest by a bank holding the deposits of another bank.

The Gold Market has been very severely depressed, since our last. The speculative demand has failed to sustain the buoyancy of prices. The customs inquiry has been quite brisk, but has been promptly met. The extremes of the week have been from 140⅜ on Thursday, Feb. 28, to 135½ on Wednesday, March 6, indicating a fall of nearly 5 per cent. within the week. The *bear* operators have been putting out short contracts quite freely against the immediate future of the market. The closing rate on Wednesday was 135⅝, on a weak and irregular market. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been about $204,000. The customs demand for Gold last week, averaged $525,381 a day; thus far, this week, it has been equal to $915,627 a day, or equal to a weekly aggregate of $5,493,762. The arrivals of specie from Europe, Havana and other foreign ports, during the past week reached only $20,000, and from California, $828,514. The total customs revenue of the Government, in coin, at this port since July 1, 1866, has been $84,024,093, against $91,686,514 same time in the preceding fiscal year. The total receipts of California gold at this port since July 1, 1866, have been $30,209,325, against $17,750,791 same time last year, showing an increase this year, of $12,458,534. The exports of specie from this port, last week, were $759,-182. The total outflow of specie from the port, thus far in the current fiscal year has been $22,254,325, against $16,522,487 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $1,544,400, making the total coin interest disbursements through the Government office, since July 1, 1866, $35,139,640, against $30,551,-753 for the same time in the preceding fiscal year. The specie exports from San Francisco from Jan. 1, to Jan. 31, 1867, reached $4,502,399, against $3,313,531 same mouth last year.

The foreign exchange market has been much depressed, by the largely increased offerings of bills, and the restricted inquiry from the importing interest. The closing negotiations for Wednesday's steamers were on the basis of our reduced quotations. Bankers' 60 day bills on London closed on Wednesday at 108@108¼, and on Paris to 5.25@5.18¾; sight bills on London to 108¾@109; and on Paris to 5.18¾@5.16¼. The offerings of produce bills have been liberal since our last. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $4,492,564 making the total value of exports since July 1, 1866, $1I3,844,413, against $148,909,205 same time in the preceding fiscal year.

Government securities have been quite freely dealt in, through the week, and the earlier dealings were at full prices. The later transactions indicated a slight reaction in values, in part, due to the decided fall in gold. At the modified figures, the demand was active, even up to the close. The new 5-20s of 1865 were in quick request for home investment purposes. U. S. sixes of 1867 closed here on Wednesday at 134@135; U. S. sixes of 1868, at 131@133; U. S. sixes of 1881, 109⅛@109¾; U. S. Five-twenties of 1862 at 109¼@109¾; U. S. Five-twenties of 1865 at 107¾@108; U. S. Five-twenties of 1865, consolidated, 106⅝@106⅞; U. S. Ten-forties at 97½@97⅝, ex-coupon, and U. S. Seven-thirties at 105⅝@106. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ¼@½ of 1 per cent. on these figures:

June, 1864	117½	May, 1865	112¼
July, 1864	117	August, 1865	111¼
August, 1864	116½	September, 1865	110¾
October, 1864	114½	October, 1865	110½
December, 1864	113½		

The Stock Market has been very heavy, and prices have declined sharply on nearly all the list of railway and miscellaneous share property under extensive realizations, chiefly on account of the *bear* element. The speculative demand has been less active, as operators have been unusually distrustful, and reluctant to assume new responsibilities in the present temper of the market. The comparatively easy money market has not been sufficient in its influence to prevent the reaction

General business has been rather more active since our last, but in the instance of domestic produce at quite variable prices, generally against sellers. Middling grades of cotton left off quite heavily at 30½@32½ cents per lb. as extremes. The stock of cotton now here is estimated at about 205,000 bales. The receipts at the port this week, have averaged nearly 5,000 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 45,000 bales, against exports of 218,362 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 1,391,600 bales against 1,335,000 bales same time last year; exports, 716,420 bales, against 828,800 bales same time last year; estimated stock at latest dates, 610,000 bales, against 504,000 bales same time last year.

The movement in foreign merchandise, have been on the increase, owing in part to the increasing willingness of holders to meet the wants of the buyers. The total imports of foreign dry goods, last week, were $3,315,737, and the total amount marketed $4,158,864. The value of foreign merchandise imported last week, was $2,-583,217—making the grand total specie value of last week's imports of dry goods and merchandise, $5,898,954, and since July 1, 1866, $174,-069,530, against $195,321,100 same time in the preceding fiscal year. The ocean freight market has been pretty brisk, with 502 vessels of all classes in port. For Liverpool we quote flour at 2s.@2s. 3d. per bbl.; grain at 6@6½d. per bushel; cotton at $\frac{5}{16}$@$\frac{11}{16}$d. per lb.; and heavy goods at 20s.@@30s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 19.	Feb. 27.	March 5.
Consols	91	91	91
U. S. 5-20's of 1862	74	73¼	73¾

Erie	37¼	36¾	36¼
Ill. Central	*77¾	76¾	76½

* Ex-dividend.

The New York exports, exclusive of specie, for the week ending March 5, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$6,803,831	$4,492,564
Prev. reported	35,227,238	27,745,454
Since January 1	$42,031,069	$32,238,018

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$2,547,990	$3,315,737
Gen. merchandise	3,559,766	2,583,217
Total for the week	$6,107,756	$5,898,954
Previously reported	47,129,146	37,237,544
Since January 1	$53,236,902	$43,136,498

The commerce of New York from July 1st to date compares as follows:

	1865–'66.	1866–'67.
Imports merchandise	$195,321,100	$174,069,530
Exports produce	148,909,205	113,844,413
Exports specie	16,489,497	22,038,774

The balance in the Sub-Treasury on Wednesday was $111,833,497 90.

The National Debt.

The following is a comparative statement of the Public Debt of the United States:

	Feb. 1, 1867.	March 1, 1867.
Debt bearing int. in coin.	$1,420,145,541 80	$1,464,855,191 80
Debt bearing interest in currency..	819,672,740 00	787,028,880 00
Matured debt not presented	15,791,454 31	14,576,689 07
Debt bearing no interest.	430,163,803 72	424,126,528 32
Total...	$2,685,773,539 83	$2,690,587,289 19
Coin in Treasury.....	$97,354,603 69	$107,271,031 12
Currency....	45,069,187 58	52,552,368 27
	$142,423,791 27	$159,823,399 39
Debt less cash in the Treasury.....	$2,543,349,748 56	$2,530,763,889 80

The total debt shows an increase since the 1st of February of $4,813,749 36. The balance in the Treasury shows an increase, as compared with February 1st, of $17,399,608 12. Deducting the amount on hand from the aggregate debt, both on the 1st of February, and the 1st of March, the decrease of debt would be $12,585,858 76. The total debt on the 31st of August, 1865, stood at $2,845,907,626 56. The balance in the Treasury at that date amounted to $88,218,055 13. Deducting the cash in the Treasury from the aggregate debt both on the 31st of August, 1865, and 1st of March, 1867, and the actual decrease in the Public Debt since that period has been $226,925,681 63.

☞ The Marquette, Mich., iron mines produced, in 1866, 296,872 tons of iron ore, and 18,437 tons of pig iron.

Illinois Central Railroad.

The statement of this Company for the month ending February 28, 1867, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold.....	8,819.28 for	$91,348 72
Acres Int. Fund Lands sold.....	191.95 for	1,727 55
Acres Free Lands sold..	1,899.76 for	19,116 29
Total sales during month of Feb., 1867	10,910.99 for	$112,192 56
To which add Town Lot Sales		200 00
Total of all.....	10,910.99 for	$112,392 56
Cash collected in February..		$142,281 16

TRAFFIC DEPARTMENT.

Receipts from Freight		$371,406 00
do.	Passengers	122,437 06
do.	Mails.....	6,358 33
do.	Rent of Road.....	4,000 00
do.	Other Sources.....	50,000 00
Total Receipts in Feb., 1867.....		$554,201 39
Total Receipts in Feb., 1866.....		$512,027 89

Merchants' Union Express Co.

We invite attention to the Advertisement of this company in another column. The transportation of the company is done on express passenger trains without a moment's unnecessary delay, and the local delivery is equally prompt; mistakes are rectified on the spot, and losses are adjusted as soon as satisfactorily ascertained. The rates charged are only a fair compensation for the services performed, and in all cases twenty-five, and sometimes fifty per cent. less than the tariff of the old monopoly. The principal quarters of the company, in this city, is the fine building on the corner of Broadway and Franklin street, formerly known as the International Hotel. It has been several months in the course of alteration to suit the convenience of this particular business. How effectually the establishment has been designed and perfected, can be best appreciated on a personal visit.

Bessemer Steel Rails.

Bessemer Steel Rails of American manufacture, and of the best quality, may now be purchased of the Cambria Iron Company and the Pennsylvania Steel Company, two of the most vigorous and substantial manufacturing firms in the Union. The Cambria Iron Company owns the well-known establishment at Johnstown, Pa., and has now the largest capacity for producing rails of any mill in the country, and employs some three thousand men. Hon. DANIEL J. MORRELL is the Manager. The Pennsylvania Steel Works have an extensive establishment near Harrisburg, and are represented by such men as S. M. FELTON, the eminent railroad President and financier, and Dr. LAMBORN, who is personally known to many iron and steel men. The high character of all parties connected with the new manufacture, and the vast resources at their command, are ample guarantees for its vigorous prosecution, and for the excellence of the article they offer the public.

☞ The Milwaukee and La Crosse Railroad has been sold at auction. It was bought by the Milwaukee and St. Paul Railroad for $100,920, subject to incumbrances.

☞ A new railway from Norristown to Allentown, Pa., is projected.

Railroad Earnings.—Weekly.

The earnings of the Marietta and Cincinnati Railroad the 3d week in Feb., 1867 ...$19,807 00
Corresponding week previous year.... 18,121 00

Increase.... .... $1,686 00

The earnings of the Detroit and Milwaukee Railroad for the week ending Feb. 28th, 1867, were $22,942 00
Corresponding week of 1866.... .... 23,840 00

Decrease $1,348 00

The earnings of the Chicago and Rock Island Railroad for the 4th week in Feb., 1867, were.... .... $48,489 00
Corresponding week of previous year.. 43,374 00

Increase.... .... $5,115 00

The earnings of the Western Union Railroad for the week ending Feb. 21, 1867 . .. $4,960 32
Corresponding week previous year.... 7,767 92

Decrease.... .... $2,807 60

The earnings of the Chicago and Northwestern Railroad for 4th week in Feb., 1867..$161,528 00
Corresponding week previous year .. 111,449 00

Increase.... .... $50,079 00

The earnings of the Grand Trunk Railway of Canada for the week ending Feb. 16th, 1867, were.... .... $109,955 00
Corresponding week of previous year. 100,648 00

Increase.... .... $9,307 00

Journal of Railroad Law.

MAINTENANCE OF FENCES.—NEGLIGENT KILLING OF ANIMALS.

By the case of Bradley *vs.* The Buffalo and N. Y. R. R., it was decided that railroad companies are required to erect and maintain fences on the sides of their roads, and to construct cattle guards at all road crossings, suitable and sufficient to prevent cattle, horses, sheep and hogs, from getting on such railroad track. The Court in this case, also say that the fact that the road crossing is at or near the depot, and that, to make such cattle guard there, would inconvenience the company, will not excuse them from complying with the positive requirements of the statute.

The action was brought to recover the value of a horse killed on the railroad of defendants by one of their engines; the horse having got upon the road as alleged, by the neglect of the defendants to construct and maintain a "cattle guard" at a road crossing.

WRIGHT, J.—Railroad companies are required, by statute, "to erect and maintain fences on the sides of their roads," and "to construct and maintain cattle guards at all road crossings, suitable and sufficient to prevent cattle, horses, sheep and hogs from getting on to such railroads;" and it is expressly declared that, "so long as such fences and cattle guards shall not be made, and when not in good repair, such railroad corporation and its agents, shall be liable for damages that shall be done by the agents or engines of the corporation to any cattle, horses, sheep or hogs thereon." (Laws of 1854, chap., 282, § 8.) It is conceded and found by the referee, in this case, that there was a non-compliance by the defendants with these statute requirements, both as to fences and cattle guards, and that the consequence was, the plaintiff's horse strayed upon their track and was killed by one of their engines. There were two road crossings east of the defendants' station house at Kanona, the one at the distance of 200 feet, and the other 527 feet, at neither of which were there any cattle guards or fence, or anything to prevent animals from going on their track. At these unguarded points the plaintiff's horse went upon the track, and was killed near the station house by the engine of a passing train. Yet, notwithstanding this plain violation of a statutory duty by the railroad company, by reason of which the plaintiff lost his horse, the referee held that the company was not liable, and dismissed his complaint.

The judgment cannot be sustained. The duty enjoined is to construct and maintain cattle guards at all road crossings, and it is not for Courts to nullify, by construction, the plain and explicit requirements of the statute—to hold, as was done by the referee, that the road crossing adjacent to the station buildings of a railroad company are not within its purview. When the statute declares that cattle guards shall be constructed "at all road crossings," we have no right to create exceptions, or say, in effect, that because a railroad company chooses to locate its station buildings, not on, but near a public highway crossing, and thereby cattle guards may inconvenience it and the public, it is not bound to construct and maintain them. Such a construction does violence both to the letter and policy of the statute, which is, to guard against the destruction of property and human life consequent upon animals straying upon the road, thus endangering not only their own lives by being run over, but the lives of travelers by throwing the trains from the rails. The present case illustrates completely this policy. Here were two public roads crossing the track in a thickly populated district, with not one safeguard required by the statute to prevent animals from straying on it. The precise thing which might have been apprehended happened—the precise thing, too, against which the statute was intended to guard. A horse strayed upon the track, and was killed.

The train it is true, was not thrown from the rails, and there was no sacrifice of human life; but this was providential, for under similar circumstances, such a disaster might have resulted from the defendants' violation of duty.

It was no answer then to the plaintiff's action that the two road crossings were adjacent to the station buildings of the defendants. In omitting to construct cattle guards at these crossings, they neglected a statutory duty, and thereby damage ensued to the plaintiffs for which they were clearly liable. Inconvenience was no excuse to them. If a railroad company finds it inconvenient to build cattle guards at road crossings near its depot or station, it must take the chances of paying for injuries sustained by reason of their not being built, or it must keep a sufficient watch to prevent accidents. The order of the Supreme Court should be affirmed, and judgment absolute rendered against the defendants.

LEONARD, J.—The referee, before whom this action was tried, dismissed the complaint, because the facts proven in evidence did not sustain the case.

The judgment entered for the defendants on his report was reversed by the General Term of the Supreme Court seventh district, and a new trial was ordered.

The defendants now appeal from that order, and have stipulated that an absolute judgment be entered against them if the order be affirmed.

The action is brought to recover the value of a horse belonging to the plaintiff, which was killed by the engine of an express train while passing along the line of the railroad track of the company near their depot at Kanona. It appears from the report that there were no cattle guards where the railroad crosses two public highways near the depot, where a lane, leading from another highway running parallel to the railroad, intersects with the track of the defendants.

The horse could not have reached the track of the railroad, nor the depot grounds where he was killed, if the track had been fenced in at the lane, nor if cattle guards had been constructed at the points where the track intersected the highway. The depot was more accessible to the public without them.

The railroad act directs that fences and cattle guards shall be constructed and maintained, and declares that the corporation shall be liable for all damage done by their agents and engines to any cattle, horses, sheep, &c., along their line, unless such fences and guards are constructed and kept in repair they shall not be liable for such injuries. (2 R. S., 5th ed., 689, 690, § § 55, 56.)

The statute prescribes a duty, and imposes a penalty in case of its neglect, from which the corporation are to be wholly relieved in a compliance therewith.

The rule of construction prescribes that statutes imposing penalties, in case they are disobeyed, shall be held to be mandatory, and that Courts shall not then consider the circumstances of a case, or its hardships or inconvenience. The intention of the Legislature in such cases cannot be held to be different from that which they have by their language declared.

If the construction of fences and guards, or their repair is neglected, a railroad company can be relieved from liability for injuries to cattle, horses, &c., only by employing a sufficient watch to prevent estrays from coming on to their track. It is no excuse that the cattle, horses, &c., were at large in violation of law. (Corwin *vs.* The New York and Erie Railroad Company, 3 Kern., 42.)

The order appealed from should be affirmed with costs, and the judgment against the defendants be made absolute.

Order affirmed and judgment absolute.

The Hoosac Tunnel.

The Joint Standing Committee of 1866 on the Hoosac Tunnel and Troy and Greenfield Railroad, authorized to visit the Tunnel and Railroad, examine into the condition and progress of the work, and to fully report the result of such examination, have submitted their report to the Legislature. It gives extracts from the records of the corporation from its organization until the surrender of the road to the State, under the mortgage, to show the financial condition of the company, its dealings with the contractors for constructing the road and tunnel, and also the embarrassed condition of the contractors and corporation from 1855 to 1861; extracts from some of the laws passed upon the subject of the railroad and tunnel; a synopsis of the action and condition of the corporation at the time of, and previous to, the surrender of the

road; the relation of the contractors to the corporation and to the State; and a particular description of the condition and progress of the work during the past year.

The account of the Commonwealth with the enterprise is given in a table, so that the value of the work done by the contractors at the time of its abandonment by them, may be compared with the payments made to them therefor from the State treasury. This table is as follows:

The amount paid from the State treasury for work and materials upon the tunnel		$170,131 95
Amount paid upon the road west of the tunnel		50,000 00
Amount paid upon the road east of the tunnel		505,256 92
		$725,388 87
Amount earned by contractors under the contract upon the tunnel	$129,475 00	
Amount earned by contractors under the contract upon the road west of tunnel	50,000 00	
Amount earned by contractors under the contract upon the road east of tunnel, including temporary work	410,204 00	
		589,679 00
		$135,709 87
Over-payment in reckoning sterling exchange, say		44,000 00
Over-payment when the work stopped in July, 1861		$179,709 87
Further payments made upon the work by the State from July, 1861, to January, 1867		140,226 95
Total amount paid more than earned		$319,936 82

From the above statement the report says it appears that the contractors with the Troy and Greenfield Railroad corporation have received from the State $319,936 82 more than the value of the work which the corporation surrendered under the mortgage, and that the State has lost that amount of money in its efforts to assist in the construction of the work. On the authority of Hon. J. W. Brooks it is further stated that the loss to the State in the transaction by the failure of Messrs. Haupt & Co. to perform their contract in a proper manner, will reach the sum of $350,000.

The dimensions of the tunnel are as follows: The rock cutting is 24 feet high and 24 feet wide. The brick work is 26 feet high and 26 feet wide. The bottom of the tunnel will contain a culvert three feet deep at the centre. Through this culvert the water from the tunnel is to be discharged. It now receives in addition to the water accumulating in the tunnel, a 12-inch pipe, to carry air at a low pressure for ventilation; an 8-inch pipe to carry air for driving the drilling machines; and a 3-inch pipe for carrying water for use in the holes which are being drilled. Should it be found advisable to use gas in carrying on the work, provision is made for a 4-inch pipe to carry the gas from the place of manufacture. The track is to be placed 3½ feet above the bottom of the rock tunnel, and 4½ feet above the bottom, where lined with brick.

Considerable space is given to the description in detail of the work already accomplished. At the east end of the tunnel the Deerfield Dam is completed. The canal is finished as far as wheel pit No. 3. The machine shop is about 72 feet long and 36 feet wide. It has three turbine wheels. A fourth wheel is designed, but is not required at the present time, and the pit to receive it is not completed. In the basement of the machine shop are two compressors. The first was put in in January, 1866. It has four cylinders, 13 inches in diameter, and 20 inches stroke. This compressor is used to drive the drills, and furnish air to the blacksmith shop. The second compressor was put in some time in October. It has four cylinders, 25 inches in diameter, and 24 inches stroke, and is used for ventilation one fourth of the time, two hours after each blast, viz., from 8 to 10 A. M., from 4 to 6 P. M., and from 12 to 2 A. M. The compressors work satisfactorily; the loss of power in the transmission of air from the machine shop to the drills, a distance of 4,500 feet, being hardly perceptible. The machine shop is well stocked, and so is the blacksmith shop. The force employed at this point in July was 165; the first day of November 115. The progress of the excavations at the east end heading for the year ending December 1866, has been 569 feet; at the rate of 47.42 per month. The progress during the six months ending May, 1866, was 338 feet; an average per month of 56 feet 4 inches. One week was lost in June in introducing the machine drills in consequence of which the progress that month was reduced to 50 feet 6 inches. During the five months ending November 30, the progress has been 219½ feet, being an average of 43.9 feet per month.

At the central shaft the working force July, 1866, was 58; November 1, 81; of this number 40 were engaged out of the shaft, and 41 in. The depth of the central shaft when completed will be 1,037 feet from the surface; its form is an ellipsis, whose axes are 27 and 15 feet. On the fifth day of May it had reached the depth of 300.5 feet. At this time the hoisting apparatus was removed from the shaft and work of excavation ceased. The new hoisting apparatus was fitted on the first day of August, and the drilling commenced on that day. Previous to the change in the hoisting apparatus the monthly progress had averaged about 18½ feet per month. The advance in October and November was 46 feet. The gain over the previous rate of progress is attributable to the practice of simultaneous blasting. On the first day of January, 1867, the shaft had been sunk 393 feet, leaving for excavation 644 feet.

The west shaft has an area of about 8 by 13 feet, and was excavated by Messrs H. Haupt & Co. Its depth is 316 feet. The cost of the structures, as reported in July, at this point, was $35,550 94; as reported in November, $40,010 13. The working force at this shaft in July was 123; in November 103. At this point there is one engine of 100-horse power and one of 40-horse power, and one compressor having four cylinders of a diameter of 13 inches and 24 inches stroke. The west heading from this shaft was advanced 293 feet, and the east heading 1,042, on the first day of December, 1866. The progress for the year ending November 1, 1866, at the heading of this point was 636.7, being a fraction over 53 feet per month. For the last four months, ending December 1, 1866, the progress was 322.1, being a fraction over 64 feet per month, which exceeds by four feet per month the highest estimate for hand-drilling by the engineers in 1862, and by 30⅓ feet the estimate of Mr. Latrobe. The west heading at this shaft was at first driven 6 feet 11. It has been found advisable to enlarge it to the dimensions of 10 feet 6 inches by 15 feet. The east heading was being enlarged as was the other by contract from 6 feet by 15 to 10½ by 15. The work was begun on the 15th of July, 1866.

The new shaft is located about 264 feet westerly of the west shaft. Its dimensions are six feet by thirteen in the clear; the rock to be removed from an area of eight by fifteen feet. On the first of January about thirty-eight feet of stone remained for excavation in this shaft. The water in the tunnel stopped the work from below, and the work is driven upon one face only at the present time. There are two small engines at this point, one of fourteen and one of ten horse power.

The total expense of the tunnel and the land and works connected therewith under the administration of the commissioners, as found Nov. 1, 1866, was $1,482,973 20.

Of the experiments with various drilling machines some account is given in the report, and the committee recommend that should the Burleigh drill—the only one now being tested—prove unsuccessful, and further attempts with machines be made, their usefulness be tested outside of the tunnel, and meanwhile the excavation with hand drills be resumed. The material result of the experiment with "Dr. Eurhardt's powder" was as follows:—With 261 days' work and 139½ lbs. of powder, 202 buckets of stone were removed; while in the preceding week, using common powder (schaghticoke) with 251¾ days' labor and 236 lbs. of powder, 168 buckets of stone were taken out. The cost of the experimental powder is about twice as expensive as the common powder, and its superior strength is apparent from the above result.

During the summer some experiments were made with nitro-glycerine. A quantity costing $934 29 was brought to the works by Colonel Schaffer. After repeated trials outside the works, during which about three-fifths of the material was consumed, it was introduced into the tunnel at the east heading of the west shaft. In these three days there were taken out of the enlargement 151.76 yards of stone. To remove this quantity with powder would cost, on an average, per yard, $9 84; actual cost with glycerine, $6 20; difference, $3 64; multiplied by 151.76 gives $552 40; in the same time there was removed of heading 60,15 yards; to remove an equal amount by powder costs, per yard, $16.25; actual cost with glycerine, per yard, $6.05; difference, $10 20, $10 20 multiplied by 60 15 gives $613 53,—$1,165 93; cost of the glycerine used during the three days being 2-5 of $934 29, $350 36; saved, by using glycerine, in three days, $815 57, which is a saving by the use of glycerine, per day, of $276 85.4; and allowing three hundred successful working days in the year, an annual saving of $81,557 40.

It appears from the report that of the work now in progress on the road and tunnel there is performed by contract,—the construction of the railroad from Greenfield to the east end of the tunnel; the enlargements east and west in the tunnel at the west shaft; the excavation of the new shaft; and the arch masonry and excavation at the west end; while the work at the east end, at the central shaft, the heading and lifting at the west shaft, the lifting at the new shaft, and the work at the brickyard have been performed by the State. No criterion has been afforded enabling the committee to determine upon the comparative economy of the different modes of operation.

In concluding their report, the committee say that they are of the opinion that the commission should be re-organized in such manner that the State could command the whole time of its members; that a greater degree of personal attention should be given by them to the work than it has heretofore received; that the commissioners should keep minutes of their doings which shall be open to the inspection of the governor and council and the appropriate legislative committee; that their monthly communications to the governor and council should embrace, in addition to the past, and the requisition for the current month, a report of the operations, the progress of the work during the previous month, and the manner and extent of their own superintendence of the same. The committee are also of opinion that a due regard to economy in conducting the enterprise requires that the commissioners should at once, by experiment, ascertain the probable time required to excavate the enlargement of the tunnel, and that the work upon the enlargement be regulated and pursued with a view of avoiding any unnecessary delay in operating the road after the heading is removed.

☞ The following gentlemen have been elected directors of the Northern Central Railroad for the ensuing year: J. D. Cameron, Wistar Morris, William Colder, A. E. Rapp, B. F. Newcomer, George Small, Jacob P. Jones, Thomas A. Scott, John M. Kennedy, E. C. Biddle, Henry Welsh and John A. Wright.

Railroads in California.

Though the people of California and the entire Pacific coast are at this time much aroused on the subject of railroads, being animated, as it were, with a common sentiment of their overruling importance, still the present is more the era of discussion than of actual railroad construction, there being but three or four enterprises of this kind, and some of them of no great magnitude and only of local importance, now in course of building in the State. Chief among these is the

CENTRAL PACIFIC RAILROAD.

This Company was incorporated to build a railroad from the tide waters of the Pacific to the Eastern boundary of the State—extending the same thence till it shall meet the trans-continental road approaching from the East. The Donner Pass route over the Sierra-Nevada having been adopted, after the most full and careful preliminary surveys, the work of grading was commenced in 1863, since which time it has been carried on with an expedition, under all the circumstances, creditable to the company, and generally satisfactory to the public, the track now being laid and the cars running to Cisco, 93 miles from the initial point of the road at Sacramento, and only 12½ miles from the summit of the Sierra, to which point it is expected it will be completed next summer, with the exception of 2 miles upon which much tunneling and other heavy work will require to be done. Cisco will, therefore, probably remain the terminus of the road until June or July next, at which time a long stride will be taken to some point on the eastern slope. If the main tunnel is not completed at that time a temporary track will be laid across the summit. Tunnel No 2, at Emigrant Gap, a short distance beyond Cisco, has already been completed. This tunnel is three hundred and fifty feet long and five thousand feet above the level of the sea. There are two other tunnels on the line which are being worked as rapidly as possible. One will be two hundred feet and the other four hundred feet long. The main tunnel at the summit will be about one thousand six hundred feet long. All the tunnels are made wide enough for a double track. The altitude of Cisco being 5,911, leaves an elevation of only 1,100 feet to be overcome to reach the top of the Sierra, requiring an average grade of more than 91 feet to the mile; but this is considerably less than the maximum grade allowed by law, and the summit itself will be reached and passed through a nearly level valley. Since the commencement of the winter storms precluding successful labor on the mountains, the company have sent a force of some 3,000 laborers to prosecute operations on the Eastern slope, they being distributed along the Truckee from Crystal Peak eastward to the Big Bend of that river. The company are sending out iron by nearly every ship leaving New York for California, and before this time next year expect to have 30,000 tons on hand or enough to lay the track to the north bend of the Humboldt River, more than a hundred miles beyond the eastern base of the Sierra Nevada. They have also had three exploring and surveying parties in the field during the past eight months, making preliminary surveys for the line of their road between the Truckee River and Salt Lake City, which work has been finally accomplished. A complete and thorough survey of the ground from the Humboldt on the north to the Overland Stage route on the south has also been made, and the company will soon be furnished with accurate maps of the entire belt of country traversed, with the height and locality of mountains, passes, etc., and all information necessary to enable them to finally locate their road through Eastern Nevada and thence on to Salt Lake. The portion of the road already finished, though exceedingly expensive, owing to the rugged character of much of the country to be crossed, is substantially built.

SAN FRANCISCO AND SAN JOSE ROADROAD.

This Company, incorporated in July, 1860, with a capital of $2,000,000, completed their road in December, 1863, since which time it has been doing a large and profitable business. Its length is fifty miles, extending from San Francisco to San Jose, through one of the richest and most important agricultural districts in the State, insuring for it a large and profitable, as it will no doubt continue to enjoy, a constantly-increasing business.

WESTERN PACIFIC RAILROAD.

This Company was incorporated in 1862, with a capital of $5,400,000, for the purpose of building a railroad from San Jose to Sacramento, via Stockton, to form the connecting link between the San Francisco and San Jose Road, and the latter and the Central Pacific Road, the whole to constitute Western Division of the National Pacific Railway, and which when completed, in sections of twenty miles each, will receive Government thirty-year six per cent. Bonds to the amount of $16,000 per mile, and Government lands to the extent of every alternate section within twenty miles on each side of the road, which is one hundred and twenty miles in length, or seventy-four miles from San Jose to Stockton, and forty-six miles from Stockton to Sacramento. But about twenty miles of this road, reaching from San Jose to Alameda Canon, has not yet been completed—the work, owing to some difficulty between the principal and the sub-contractors, having been delayed. The surveyors are said to have completed running the final lines between Sacramento and Stockton, and that ground will soon be broken on that division of the road, and also that work will soon be resumed and pushed with vigor on the section between the latter place and San Jose.

STOCKTON AND COPPEROPOLIS RAILROAD.

This road is designed to connect the city of Stockton with the rich copper mines at Copperopolis, a distance of thirty-nine miles. A contract has been made by the company for the entire construction of this road, for the sum of $1,250,000, and some twenty miles of the work has been already graded and made ready for the ties. The route is throughout favorable to the speedy construction of the work, which it is expected will be carried forward to an early completion.

SACRAMENTO VALLEY RAILROAD.

This road, extending from the city of Sacramento to Folsom, a distance of twenty miles, is the first railroad completed in the State. Its original cost was large, yet for several years it earned not only sufficient to cover working expenses and repairs, but also a surplus to be divided among the owners; of late, owing to the Central Pacific Railroad, diverting much of the business and travel over that route, its revenues have been materially diminished, though it is still considered good property, being the feeder of the large and rich county of El Dorado, and also retaining a considerable portion of the Washoe trade.

PLACERVILLE AND SACRAMENTO VALLEY RAILROAD.

This road taps the Sacramento Valley Railroad at Folsom, and is now in good running order as far as Shingle Springs, a distance of twenty-six miles. Efforts are being made to extend it to Placerville, nine miles further, this being the ultimate point of its destination.

THE FREEPORT RAILROAD,

formerly connecting Freeport on the Sacramento River with Latrobe at the junction of this with the Folsom and Placerville road having been disposed of to the Sacramento Valley Company, its superstructure has been taken up and its rolling stock removed for use elsewhere. It was nine miles long, and, though built in 1863, had been used but little, the proprietors having lost a good deal of money in a vain attempt to divert the Washoe trade and travel from Sacramento.

CALIFORNIA CENTRAL RAILROAD,

eighteen miles long, connects Folsom with Lincoln. It has been in operation several years, but the business transacted over it has not been large. The viaduct over the American River at Folsom is one of the finest specimens of bridge architecture in the State.

THE YUBA RAILROAD

is in course of construction from Lincoln to Marysville, a distance of twenty-two miles, the grading being all completed and the material for the superstructure nearly all on hand, it is expected that the cars will soon be running on the road.

THE NORTHERN CALIFORNIA RAILROAD,

completed and running, connects Marysville and Oroville, a distance of twenty-nine miles. It has therefore been self sustaining, with a steadily increasing business, and should the road to Oregon be built, of which this will then become an important link, it may yet prove a profitable investment to the stockholders.

SAN FRANCISCO AND ALAMEDA RAILROAD.

The main trunk of this road commences at the western end of the Encinal of Alameda, and passing through San Leandro and Hayward's, extends to Vallejo's Mills, where it intersects the Western Pacific Railroad. A branch is also to be built from Hayward's to another point in Amador Valley. The portion from Alameda to Hayward's, 16½ miles, is now in operation, and work on the ballance is being pushed ahead. A line of first class ferry boats runs in connection with this road, the distance from the city to the western terminus being 5½ miles.

SAN FRANCISCO AND OAKLAND RAILROAD.

The present western terminus of this road begins at the end of a wharf extending 3,500 feet from the Oakland Encinal into the Bay of San Francisco, whence it runs through the town of Oakland to San Antonio, a distance of 5 miles. It is the intention of the Company to extend this wharf and also their road to the Island of Yerba Buena opposite, whence this city will be reached by ferry boats in the space of four minutes, the intervening distance being only about one mile. The daily average number of passengers now crossing on this line is estimated at 2,500. The road will ultimately be extended to connect with the Alameda Railroad.

SOUTHERN PACIFIC RAILROAD.

The purpose of this Company, recently organized in this city, is to build a railroad from San Jose to the Colorado River, there to connect with the Southern Railroad from Missouri, leading through New Mexico and Arizona, and which is to have its western terminus at some point on that stream. This California link is to pass through the towns of Gilroy and San Juan, and thence up the San Bonito Valley, and crossing the Coast Range follow up the Great Tulare Valley, and escaping through some of the passes at its head strike across the open desert for its point of destination. The officers of this Company are T. J. Phelps, President; Chas. M. Fox, Secretary; and Wm. J. Lewis, Engineer. They have filed with the Register of the Land Office a map of the preliminary survey of the route. They have been busily engaged of late securing the right of way, and work it is said will at once be commenced at San Jose, the Company intending to have their road completed to Gilroy, a distance of thirty miles, by next fall. They will hereafter apply to Congress for the subsidies usually granted in aid of such works.

The project of constructing a railroad from Benicia to Sacramento, and also another from Vallejo to Marysville, long since entertained, and towards the accomplishment of which preliminary steps were then taken, has lately been revived, and as the friends of the enterprise claim with encouraging prospects of its being early undertaken, and in good time carried to a successful consumation. It is even said that the contract for building the Vallejo road has been let, the rails and rolling stock having been provided for and to be on the way as fast as required. The road is to be built without Government aid, adequate means having been secured through private enterprise. The question of building a railroad to connect Oroville, in California, with Portland, in Oregon, and also one between other points wholly within this State, has been much agitated of late, and it is highly probable that some of these projects will be undertaken before long. Towards aiding in the construction of the California and Oregon

road Congress has donated 6,400 acres of public land per mile along the line of the road, and the Legislature of Oregon, at the last session, passed an act to pay the interest on the bonds of the company to the amount of $1,000,000, at the rate of seven per cent., for a term of twenty years. These grants have been declared sufficient by many railroad men to justify the construction of the road, at least for a considerable distance northward from Oroville, where the country is level and the trade considerable.—*San Francisco Mercantile Gazette.*

Alabama and Florida Railroad.

From a letter published in the *N. Y. Herald* a few days since, we make the following extracts. It is dated Pensacola, Fla., Feb. 10, 1867, and says:

The great and all-absorbing topic which engrosses the attention of the people of this section, of more weight, I may say, to them than the subject of the President's impeachment or any other political matter which has sprung up since the war (reconstruction not excepted,) is the rebuilding of the Alabama and Florida Railroad, of Florida, from this point to Pollard, a place just beyond the Alabama State line. The completion of this road would give us a through communication with New York by rail.

It will be remembered by many of your readers that at the beginning of the war this road was nearly completed. The rebel authorities, deeming its speedy completion a "military necessity," co-operated with the contractors, and by a pressing management pushed it through to completion. At the evacuation of this place by the rebels in the Spring of 1862 the most of the track was torn up by them. The iron was carried up into the interior, and in a short time seized by the rebel Government and placed upon other roads in order to facilitate the transportation of troops and munitions of war. At the close of the rebellion, with no responsible parties to look to for indemnity, the road was in a bad fix. Very fortunately, however, for its interests, some fifteen hundred bales of cotton had been purchased during the war by the directory of the road. This cotton, with other assistants, such as debts due and collected and some credit, served to rebuild some thirteen miles of the road and stock it with two locomotives and a number of cars. These latter are running daily, and so our railroad may be said to have at least a start.

The President of the road (Mr. Avery) has made repeated trips to the North, endeavoring to secure capital enough to rebuild the road, but so far his efforts have met with little or no success. He is again on his way to the North to attend a meeting of the first mortgage bondholders, who reside mostly in New York, to be held on the 20th inst., and it is hoped that his mission will be attended with much more success than his former ones have been.

Northern Illinois Railroad.

We regret to learn that all prospect of completing arrangements with the Western Union Railroad for the construction of the link from Milwaukee to Burlington, has been dissipated. The managers of the Western Union road gave assurances that the link should be constructed, provided Milwaukee would subscribe two hundred thousand dollars to the stock. After much labor this amount was raised. In the meantime the Western Union Company had made such contracts with the Northwestern, for a branch to Chicago that Milwaukee was left in the lurch.

We think Milwaukee should go ahead and build the road, and ask the Legislature to give it the rights of connection with the Western Union, as was promised and contemplated, upon the raising of the two hundred thousand dollars subscription. —*Mil. Wis.*

☞ The Union Pacific Railroad will be opened to Salina two hundred miles from Kansas City, about April 1st.

Pittston Branch Railroad.

We learn that the Lehigh Valley Railroad Company have purchased the Pittston Branch of the Lackawanna and Bloomsburg Railroad; the understood price is $50,000. A week or two since we mentioned that the Lehigh and Susquehanna Railroad Company were actively engaged on the rock bluffs, south of town. They having lost the Pittston Branch, this work is now suspended, and the force of laborers transferred a few feet lower on the bluff to cut a new towing path for the canal. It is understood that the Lehigh Valley road, after crossing the canal near Mill Creek, will keep between the canal and river to a short distance north of the Tompkins' Shaft, where it will cross to the east or berme side, following the line of the Lackawanna and Bloomsburg Branch, through town to the present depot at North Pittston, where it will cross the Lackawanna and Bloomsburg Railroad, and continue up the River Susquehanna.

By this transfer of the Pittston Branch to their rival, the Lehigh and Susquehanna Co. are literally BLUFFED out of town—at least the bluffs prevent their getting in, except by an ascending grade from Port Griffith through the depression where the Railroad of the Pennsylvania Coal Co. is now built.—*Pittston Gazette.*

James River and Kanawha Canal.

The President of this company, in a communication to the Virginia House of Delegates, transmitting a telegram from M. Ernst Bellot des Minieres, who was then in London, says:

"By this announcement I understand that one of the great credit institutions of France, called the 'Societe Generale,' has completed the organization of the maximum capital of $40,000,000 authorized by the charter of the Virginia Canal Company, which expired by its own limitation in December last; that this amount is subscribed by a number of the principal banking houses of Europe; and that M. Bellot desires to be informed by telegraph whether a bill reviving and extending the charter of the Virginia Canal Company, as requested by him, has passed the General Assembly of Virginia and the Legislature of West Virginia."

The bill which passed the House extends the time for six months for compliance with its terms by M. Bellot & Co., and was likewise promptly passed by the Senate.

Huron and Ontario Ship Canal.

At a meeting of the friends of this project, held at Toronto, Ca., on the 28th ult., the following resolution was adopted:

Resolved, That this meeting is of the opinion that the proposed canal is the most important project ever submitted to the people of Canada; that it is the duty and interest of every one to aid and assist in the enterprise.

The President stated that it was the intention to ask of the Legislature a free grant of ten millions acres of the public land, and municipal aid would be asked from Toronto to the extent of five hundred thousand dollars. The resolution in favor of the canal was carried by a large majority.

☞ The Evansville, Henderson and Nashville Railroad Company has recently been chartered by the State of Kentucky. The company has purchased the old road bed of the Edgefield and Kentucky Railroad. The capital stock is $2,000,000, with authority to borrow money and issue bonds. This road penetrates the coal fields of Kentucky, fifteen miles north of Hopkinsville.

☞ Russia sheet iron has been successfully manufactured at the Mahoning Works, Youngstown, Ohio, by the process of George C. Kungchieff.

Interest and Dividends.

The Morris and Essex Railroad Company have declared a semi-annual dividend of three and one-half per cent., payable in stock, free from government tax, on and after the 20th inst. Transfer books will be closed until 21st inst.

The Central Ohio Railroad Company has declared a dividend of 6 per cent. on their preferred stock, payable the 1st of April next.

☞ The total liability of Idaho Territory on the last of December, 1866, was $87,957 08. The total valuation of real and personal property in the Territory is $4,158,157 88. The estimated ec eipts of the Territorial Treasurer for 1867 are $27,600; estimated expenditures, $96,555. The decrease of the voting population from 1864 to 1866 was over 2,000. The present population of Idaho is estimated at 17,000.

☞ The Savannah *News* says that the Charleston and Savannah Railroad, sold some time since, under foreclosure of mortgage, has been delivered to the purchases, who have obtained a most liberal charter, under the style of the Savannah and Charleston Railroad, and we are informed will immediately commence the work of rebuilding the road.

☞ The Sheboygan *Times* says that the Sheboygan and Fond du Lac Railroad Company are building a new pile-driver in that place, which they expect to have ready to commence piling the Sheboygan river at the western line of the county, some time next week. When that is done the track will be graded to Marshfield, in Fond du Lac county.

☞ The people in several counties of West Florida are moving in the matter of a railroad from St. Andrew's Bay, *via* Marianna, to connect with the Atlantic and Gulf Railroad at Bainbridge.

☞ The two street railroads of Scranton, Penn., are pushing their roads to completion and we think the time is not far distant when both lines will be in full operation.

NEW YORK
Belting and Packing Co.,
MANUFACTURERS OF
VULCANIZED RUBBER FABRICS,
Adapted to Mechanical Purposes.

Patent Smooth Belting, (Patented Nov. 22, 1859,) vulcanized between layers of a patent metallic alloy, by which the stretch is entirely taken out, the surface made perfectly smooth, and the substance thoroughly and evenly vulcanized. This is the only process that will make reliable Rubber Belting.

Hose never needs oiling, and warranted to stand any required pressure.

Steam Packing in every variety, and warranted to stand 300 degrees of heat.

Solid Emery Vulcanite.—Wheels made of this are solid, and resemble stone or iron; will wear out hundreds of the ordinary wheels.

Directions, Prices, etc., can be obtained by mail or otherwise.

JOHN H. CHEEVER, Treasurer.
Warehouse, 37 & 38 Park Row, N. Y.

To Engineers and Railway Contractors.

WANTED by a gentleman of 35 years' practical experience in constructing Railways and Harbors, a situation as Engineer or Superintendent of Works in all detail; having conducted many important Railway and other Works in Europe and Canada, offers his services to gentlemen connected in such operations, where energy and competent knowledge is required. Good references given as to character, qualifications, &c., to Engineers of first-class standing. Letters addressed as under will receive attention. A. B., Weaverton Post Office, Frederick County, Maryland.

Merchants Union Express
COMPANY,
GENERAL EXPRESS FORWARDERS
AND COLLECTION AGENTS,

By Special Trains and Messengers, over Leading Railroad Lines, from the Atlantic Seaboard to the

Fall River Iron Works Company's
NAILS, BANDS, HOOPS AND RODS.

Borden Mining Company's
CUMBERLAND COALS.

AMERICAN STEEL RAILS.

The undersigned are now ready to Contract for the delivery of rails made of **Bessemer** or **Pneumatic Steel**, wholly **American**, and of the best quality.

PENNSYLVANIA STEEL CO.,
424 Walnut Street,
Philadelphia.
CAMBRIA IRON CO.,
400 Chestnut Street,
Philadelphia.

RAILWAY ROLLING STOCK.
United States Patent, Dated 1866.

A new mode of retaining and sustaining the tires of railway wheels. The property in this invention, which is largely adopted by Railway Companies in England, is for sale as regards the United States. Apply to JOHN GEDGE & SON, Patent Agents, 11 Wellington Street, Strand, London. 1m7

SHIP FELT, CARPET FELT, BOILER FELT.

THE very superior Felt, manufactured by the Lowell Felting Mills, can now be furnished in quantities to suit purchasers, from the new and extensive mills now completed. Also, pipe, truss, upholstery and all other Felts. Apply to the branch office of the Company.

EDW. F. DAVISON, 128 Pearl St.

FOR SALE,

A SET OF BOILER PLATE BENDING ROLLS, six feet long, suitable for bending iron No. 4 in thickness, and under.

POOLE & HUNT,
4t7 **Baltimore, Md.**

RAILROAD TIES.

The undersigned are prepared to furnish Railroad Ties of **Hackmatack, Cedar, Pine, Hemlock** and **Spruce** in any quantity. Also every description of **Northern** and **Southern Pine, Oak** and **Spruce** for **Railroad Cars, Bridges, &c., &c.**

BRADFORD & RENICK,
3m50 **71 Broadway, New York.**

THE ATLANTIC BRIDGE WORKS,
Office, No. 157 Broadway,
NEW YORK.

POST, McCALLUM & CO.,
Bridge and Roof Builders,

Are prepared with all the necessary machinery and an experienced corps of assistants, to sink **Hollow Piles** and **Coffer Dams** by the **pneumatic process** for the foundations of Bridges, Docks, Sea Walls, Light Houses, or other marine constructions.

By the use of new patented machinery they are able to perform work of this character with much greater rapidity than has been possible heretofore, and at reduced cost.

Parties in the Western States may apply to Gen. Wm. S. Smith, care of Boomer, Boyington & Co., No. 14 Dearborn St., Chicago, Illinois.

Borden Mining Company's
CUMBERLAND COAL.

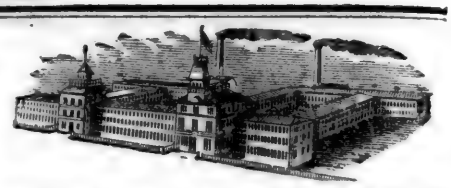
Orders from Railroad Companies, Manufacturers and others are respectfully solicited.

Pacific Mail Steamship Company's
THROUGH LINE TO
CALIFORNIA,
And Carrying the U. S. Mail,

VIA PANAMA RAILROAD.

LEAVE PIER NO. 42 NORTH RIVER FOOT OF Canal Street, at 12 o'clock noon, as follows:

March 1.—RISING STAR, Capt. W. G. Furber, connecting with GOLDEN CITY, Capt. Watkins.
March 11.—HENRY CHAUNCEY, Capt. A. G. Gray, connecting with MONTANA, Capt. Sutton.
March 21.—OCEAN QUEEN, Capt. T. A. Harris, connecting with CONSTITUTION, Capt Caverly.



All Departures touch at ACAPULCO; those of 1st and 21st connect at Panama with steamers for SOUTH PACIFIC PORTS, 1st and 11th for CENTRAL AMERICAN PORTS. Those of 1st touch at MANZANILLO.

Departure of 11th each month connects with the new steam line from Panama to Australia and New Zealand.

Steamer of March 1st, 1867, will connect with the Company's steamer COLORADO, to leave San Francisco for Yokohama and Hong Kong on April 3, 1867.

100 Pounds Baggage allowed each adult. Medicine and attendance free. For Passage Tickets and all further information apply at the office, on the wharf foot of Canal Street, North River, New York.

1m36 F. R. BABY, Agent.

ENGINEERS AND CONDUCTORS'
WATCHES.

THE AMERICAN WATCH COMPANY, of Waltham, Massachusetts, request us to publish the following letters, recently received, recommendatory of Waltham Watches for railway use. The Pennsylvania Railroad Company have for several years furnished to their employees watches specially made for them by the Waltham Company, and it is this class of watches the Superintendent, Mr. Williams, refers to. Similar watches (in strong silver or gold cases, with plate-glass crystals) we are prepared to supply, named and engraved to order; and of them, as being most suitable for the use of Engineers, Conductors, Station-Masters, of Expressmen and Messengers, the Company give the most ample guarantee. It is a remarkable fact that Railroad Companies using our watches suffer much less from collisions and similar accidents than any others.

Any of the grades of Waltham watches may be purchased of Watch Dealers generally throughout the country.

ROBBINS & APPLETON,
182 Broadway, New York.
ROBBINS, APPLETON & CO.,
153 Washington Street, Boston.

—o—

PENNSYLVANIA RAILROAD CO.
OFFICE OF THE GENERAL SUPERINTENDENT,
ALTOONA, Pa., 15th Dec., 1866.

GENTLEMEN,—The Watches manufactured by you have been in use on this Railroad for several years by our Enginemen, to whom we furnish watches as part of our equipment. There are now some three hundred of them carried on our line, and we consider them good and reliable timekeepers. Indeed, I have great satisfaction in saying your watches give us less trouble, and have worn and do wear much longer without repairs, than any watches we have ever had in use on this road. As you are aware, we formerly trusted to those of English manufacture, of acknowledged good reputation, but as a class they never kept time as correctly, nor have they done as good service as yours.

In these statements I am sustained by my predecessor, Mr. Lewis, whose experience extended over a series of years. Respectfully,

EDWARD H. WILLIAMS,
General Superintendent.
AMERICAN WATCH COMPANY, Waltham.

—o—

NEW YORK CENTRAL RAILROAD.
LOCOMOTIVE DEPARTMENT, WEST. DIVISION,
ROCHESTER, Dec. 24, 1866.

GENTLEMEN,—I have no hesitation in saying that I believe the great majority of Locomotive Engineers have found by experience that Waltham Watches are the most satisfactory of any for their uses. They run with the greatest accuracy and steadiness, notwithstanding the rough riding of an engine, and as I have never known one to wear out, they must be durable. I hope to see the time when Railway Companies will generally adopt your watches, and furnish them to all Engineers and Conductors. In my opinion it would greatly tend to promote regularity and safety.

Yours respectfully,

CHARLES WILSON, G. Chief Engineer,
Brotherhood of Locomotive Engineers.
AMERICAN WATCH CO., Waltham, Mass.

New York, Saturday, March 16, 1867.

The "Miller Improvements for Passenger Cars."

We have heretofore, on two or three occasions, called the attention of railroad companies to these improvements, as being of far more than ordinary importance and value; they are now used on some of our leading roads, and wherever seen, they are appreciated; their effect—causing steadiness and safety—is self-evident, and all who have ridden in cars equipped with them testify to their great value; these "improvements" consist of a new kind of *platform*, *coupler* and *buffer*; read the following notice of them from the *Express* of this city of the 6th instant:

THE PASSENGER EQUIPMENT OF THE ERIE RAILWAY.

This great and deservedly popular thoroughfare, regarded by all who have traveled over it to be one of the best managed and most carefully operated roads in the country, is now so complete in all its appointments, that we doubt whether ingenuity can devise, or experience suggest anything which will contribute to the better operation of the line, or secure to the traveler additional comforts to those now provided.

The Coaches of which its Day Express Trains are composed, are indeed a great desideratum. The artistic designs and decorations, the finely carved and mounted woodwork, the luxurious upholstering, the perfect construction of the seats with curved backs, and other desirable improvements, all combine to illustrate the enterprising and liberal spirit of the present efficient officers of the company.

The Sleeping Coaches of the Erie Railway are in themselves a wonder and marvel of beauty; being eleven feet wide by sixty-seven feet in length, and nine feet in height; perfectly ventilated and uniformly heated by registers, with state rooms, dressing rooms, and every convenience of a first class hotel. The furniture and fixtures in these Coaches are of the most approved patterns, and equal, if not excel, anything of the kind heretofore or at present in use on any other line of railway. They have been fitted up without regard to expense, and cannot fail to excite the admiration of the traveler, while contributing to the pleasure and comforts of the trip.

The Coaches of the Erie Railway are supported on six-wheeled trucks constructed of the most perfect springs. To add to their strength and durability, the company has adopted Miller's Improved Platform, with his patent Self-Coupler and Compression Buffer, which prevents all jerking at stopping or starting trains, and by being on a direct line with the sills of the Coaches and closely connected, affords a perfectly safe and smooth passage way from one car to another.

In addition to these advantages obtained by the use of the Improved Platform, a great degree of steadiness is attained while the train is in motion; and in cases of collision or running off the track, that frightful class of accidents known as telescoping, or the shutting up of one coach into another, is entirely obviated.

The economical and successful workings of this invention have been fully tested; and we venture the prediction that its introduction by the Erie Railway company, will be shortly followed by its adoption on all the leading lines of railway in the country.

La Crosse and Milwaukee Railroad.

The sale of the railroad formerly known as the Eastern Division of the La Crosse and Milwaukee R. R., which was sold by public auction at Milwaukee on the 2d inst., and bid off by the Milwaukee and St. Paul Railroad Company for the sum of $100,920 24, was made subject to the following liens and incumbrances, amounting to $2,893,105 22 and interest, to wit: A mortgage to Francis A. Palmer for $950,000, with interest thereon at 8 per cent. per annum since May 1, 1866; two mortgages to the city of Milwaukee for $314,000, with interest thereon from the first day of September, 1866; a mortgage to Greene C. Bronson and James T. Soutter for $1,000,000, with interest thereon at 8 per cent. per annum, from March 1, 1866, and a judgment rendered in favor of Selah Chamberlain, in the District Court of the United States for the District of Wisconsin, on the second day of October, 1877, for $629,105 22, and a certain lease given to said Chamberlain as security for the amount of said judgment.

Illinois Central Railroad.

The receipts from operations of this road for the years ending December 31, 1865 and 1866, have been as follows:

	1865.	1866.
Freight	$4,040,587 03	$3,945,865 20
Passengers	2,722,262 32	1,987,705 62

N. Y. office—profits from sundry sources	57,862 45	.....
Net amount as shown in General Balance Sheet	$2,954,601 95	$2,841,296 95

Compared with the year 1865, the gross income from traffic in 1866 shows a decrease of $634,466 90; with a decrease in operating expenses of $565,576 09—making the decrease of net earnings $68,890 81. Deducting the charter tax, the gain is $523,28. The balance to credit of Interest Fund account, being amount applicable to interest and dividends is $113,305 less than the previous year. The report says:

Finding early in the year, a diminution in income, it became necessary to economize outlays and curtail expenses. Prices for materials and labor remained unchanged. The most rigid economy consistent with the maintenance of the line in good condition has been resorted to, and only such new works as were necessary have been constructed.

During the past year we have laid 6,000 tons of new and re rolled iron in the track. Your equipment has been increased by the addition of two new locomotives, 7 passenger coaches and 150 stock cars, built in your work shops at Chicago, at a cost, with some addition to machinery and tools, of $225,473 53. The construction account has been increased $196,538 65 for new station buildings, sidings, water tanks and other permanent improvements, including new wharf boat at Cairo, and the completion of Scales Mound Cut. The grade, at this place, has been reduced, through rock, from 85 feet to 40 feet to the mile costing $56,374,22. Due regard has been had to the preservation of the company's property, and we think the line now in better condition than for several years. Looking for a reduction in prices we have bought sparingly of supplies, and deem it expedient to continue this policy during the present high tariff and unsettled condition of affairs. We have embarked in no new enterprises, and assumed no new obligations.

During the past year, in addition to the payment of interest on funded debt and State tax, amounting to $1,306,995 05, we have paid two dividends of five per cent. each, in February and August, amounting, with Government tax, to $2,459,678 96, and commenced the present year with a balance in hand of $2,029,319 67, out of which the dividend of February 1, 1867, has since been paid, leaving a balance of about $800,000. We think the payment of a five per cent. dividend, in August next, already assured.

The following general statement is condensed from the various reports, and exhibits the operations of the year:

Balance of net cash assets as shown in last Annual Report		$1,703,525 25
Gross earnings in 1866		6,546,741 47
Net receipts of land department		1,858,049 57
Decrease in working supplies		263,470 09
Cash received in payment of past due calls on shares		4,220 00
Amount of 6 per cent. sterling redemption bonds exchanged for 6 per cent. construction bonds		358,500 00
		$10,734,506 38
Permanent expenditures—		
Masonry, bridging, new station buildings, etc		$199,135 16
New engines, cars, machinery and tools		225,473 53
		$424,608 69
Operation expenses—		
Maintenance of road	$1,256,963 16	
Maintenance of mach'y	1,018,718 85	
Train expenses	729,722 85	
Station expenses	513,936 22	
General salaries	100,667 40	
General expenses	166,432 68	
Claims and damages, fencing, insurance, etc.	162,777 18	
		3,944,218 34
State tax of 7 per cent. on gross earnings for the year ending Oct. 31, 1866		427,075 75
Interest on funded debt		799,380 00
Sterling exchange on coupons payable in London		80,539 30
Dividends on shares 10 per cent. and Government tax		2,459,678 96
Increase in miscellaneous assets		4,485 77
Payment of optional right bonds		4,000 00
Reduction in Construction Bonds as follows:		
Exchanged for redemption bonds	$371,500 00	
Redeemed at 1.20	85,000 00	
Purchased at various rates	85,500 00	
	$542,000 00	
Premium paid	19,199 90	
		561,199 90
Balance, consisting of net cash assets in New York and Chicago, and exclusive of the working stock of supplies		2,029,319 67
		$10,734,506 38

The total amount of funded debt was, on the first of the year, $12,144,000; showing a reduction of $187,500 since our last report. From the collections of the land department $993,500 construction bonds were canceled. The amount of canceled bonds on hand, at the close of the year, applicable to deeds, was $3,084,334, of which $1,890,000 are in advance of collections.

The operations of the land department were quite satisfactory, the sales being 158,015.19 acres, to 2,218 purchasers, for $1,683,994 16, at an average of $10.65 per acre. The collections were $2,056,205 80; and the expenses, including salaries, collecting department, commissions on sales, advertising, legal expenses, &c., amounted to $106,616 90. The total number of acres remaining unsold was 868,841.47; and the amount of notes held by the company for land sold, and which will be paid, $8,356,256 32. By disposing of the company's lands the settlement of the country is accelerated and our traffic increased, the sales being made upon short time to actual settlers.

No arrangements have been made with any Fast Freight Expresses over this line. The only Express Companies doing business over this road are the American and Adams, for the carrying of money and packages.

From the report of the Superintendent we learn that the motive power and rolling stock have been thoroughly repaired during the year, and are in good condition to meet the requirements of heavy traffic.

The number of locomotives belonging to the company, is 150, being an increase of 2 over the number of the previous year. At the close of last year, 2 passenger engines were in course of construction, in the company's shops; these have been completed, and are working satisfactorily. Five engines have been altered to coal burners, leaving but 4 wood burners on the road.

The number of miles run by engines with passenger trains during the year was 977,801; with freight trains, 2,116,422; with construction trains, 103,276; with switching trains, 406,363—total, 3,603,862, an increase over the previous year of 96,396 miles. Average number of cars hauled, 12.44; pounds of waste used, 52,308; gallons of oil, 30,839; cords of wood, 6,341; tons of coal and coke used, 101,807.44. Cost of repairs $577,006 73. Cost of repairs per mile run, 16.01 cents. Cost of wages, 5.78 cents. Cost of cleaning, 1.16 cents. Cost of fuel, 8.42 cents. Cost of oil, waste and tallow, 1.39 cents. The entire cost per mile run by locomotives, including oil and waste, fuel, wages of enginemen and firemen, and repairing and cleaning engines, has been, 32.67 cents, against 37.44 cents in 1865, and 33.52 cents in 1864. The total cost being $1,177,708 23, $1,313,337 26, and $1,125,298 68 respectively.

The company have 76 passenger cars, 34 baggage, mail and express, 7 sleeping, 1 paymaster's, 1 officer's, 3,487 freight, 4 derrick, 3 tool, and 2 tank cars, and 14 snow-plows. There have been added to the rolling stock during the year, 7 new passenger and 150 stock cars. The Ruttan system of ventilation has been applied to 21 passenger cars. The cost of repairing passenger cars was 2.38 cents, and of freight cars, 0.73 cents per mile run; against 3.28 for passenger and 1.22 cents for freight cars in 1865.

The amount of expenditures in road department was for operation $1,899,101 39, and for permanent, $199,135 16. The items included in operation account are: repairs of road and bridges, amounting to $1,777 88 for each mile of road, and 34.87 cents per mile run by locomotives, being a decrease of $55.49 per mile of road, and 3.03 cents per mile run, as compared with 1865. There were used in repairs of road during the year 366,817 cross-ties, 488,389 lbs. spike, 31,445 common chairs, 47,892 fish-plates and bolts, and 4,135 Arthur chairs and bolts, 8,571 bars of new iron, 19,704 bars of re-rolled iron, 30,672 bars of repaired iron, and 12,852 bars of old iron re-placed in track. The average cost of repairing iron was 80.83 cents per bar—a decrease of 21.17 cents from the cost of 1865. The bridges, buildings, fences, etc., have received extensive repairs; 5¾ miles of track have been ballasted, and 2½ miles of side track laid at different points on the line.

The number of passengers carried was 1,034,530—a decrease in 1866, of 179,524. Number carried one mile 56,812,936—a decrease of 31 801,503. Average number of miles traveled by each passenger, 54.92. Revenue per mile of road, $2,811 46. Average fare of each passenger, 1.92.

Tons of freight transported, 1,153,175—an increase of 118,229. Tons carried one mile, 135,228,783—a decrease of 1,265,878. Average distance each ton was carried 117 miles. Revenue per ton per mile 3.19 cents. Average revenue per ton $3.74. Tons of freight carried one mile north, 52,381,087; do., south, 82,847,696. Tons of local freight carried 989,501; do., carried one mile 120,241,803; do., carried one mile north, 49,081,762; do., south, 71,160,041. Tons of through freight, 163,674; do., carried one mile, 14,986,980; do., carried one mile north, 3,299,325; do., south, 11,687,655.

The following is a statement of transactions of the Land Department for the year 1866, and general statement of accounts to December 31, 1866:

Land notes and contracts on hand as per report of 1865		$8,785,035 25
Received in 1866	$1,037,737 44	
Canceled in 1866	362,050 02	
		675,687 42
		$9,460,722 67
Payments in 1866		1,104,466 35

Construction Bonds Canceled.

Amount surrendered to the Trustees by the company as per report of 1865		$4,925,000 00
Surrendered in 1866		993,500 00
Making in all		$5,918,500 00
Applied on the issue of deeds as per report of 1865	$4,095,206 00	
Applied during 1866	628,960 00	
		4,724,166 00
Leaving canceled construction bonds in Trustees hands Jan. 1, 1867		$1,194,334 00
Brought forward		$1,194,334 00
To which add amount of bonds surrendered in advance of receipts on construction lands sold		1,890,000 00
Making the aggregate in Trustees' hands, Jan. 1, 1867		$3,084,334 00

Lehigh and Lackawanna Railroad.

The statement that the Lehigh and Lackawanna Railroad Company had sold their road to the Lehigh Coal and Navigation Company is cotradicted in the Easton *Times*. The facts are, that the Lehigh company have taken enough of the bonds of the Lehigh and Lackawanna company to complete the road to Bath—most of the track being graded and cross-ties secured.

The Lehigh company will furnish the rolling stock and will operate the road from Bethlehem to Bath. The friends of the road feel confident that this connection between the two companies will secure such results as will soon warrant all interested in completing the road to its connection with the Delaware, Lackawanna and Western Railroad, at Stroudsburg.

There is no such productive section anywhere in this coutry, as will be opened up by the construction of the Lehigh and Lackawanna road to the Wind Gap.

The policy which the Lehigh Coal and Navigation Company are pursuing, in providing feeders for their main line, is an evidence of the good judgment which controls their operations, and the future will demonstrate that in monopolizing the business of a road passing through the principle slate fields of Northampton county, they have secured for themselves a source of never failing and constantly increasing profit.

Lexington and Richmond Railroad.

The Cincinnati Chamber of Commerce has voted to subscribe $500,000 towards building a railroad from Lexington, Ky., by way of Richmond, to Mt. Vernon, a point on the Knoxville Extension of the Louisville and Frankfort Railroad. The proposed road will be about 55 miles in length, and will give Cincinnati a direct communication with the South. It is stated that no road can built in Kentucky at a smaller cost than the one proposed: running along a line which will, for the greater part, require but little grading. It will cross the Kentucky river at a point where, from the absence of cliffs, a drawbridge can be built at a very small cost.

Great Northern Texas Railroad.

A committee, of which Dr. C. G. Young is Chairman, have issued an address to the people of Texas upon the importance of the immediate construction of the Houston and Great Northern Railroad, connecting with Galveston and Houston on the one hand, and on the other with the Northern and Eastern cities, through the lines of road in progress of extension west of the Mississippi River from Vicksburg, Memphis, St. Louis and Kansas City. The company represented by this address was chartered by the last Legislature.

☞ The directors of the Camden and Amboy and New Jersey Railroad and Transportation Company,—recently consolidated—held their first meeting in Jersey City on the 11th inst. Ashbel Welch, Esq., was chosen President of the joint board; Hamilton Fish, Vice-President; and J. P. Bradley, Secretary.

Philadelphia and Reading Railroad.

In the AMERICAN RAILROAD JOURNAL, of January 26th, we gave the President's Report in full. In the present instance we select several important tables referring to the years ending Nov. 30, 1865, and 1866 respectively, and append a general statement of the cost, earnings and dividends since the completion of the road in 1842-'43.

ROADWAY.

Extent of road operated by the company in the years 1865 and 1866:

	Miles of Track.		M. of Sidings.		Total.	
	1865.	1866.	1865.	1866.	1865.	1866.

American Railroad Journal.

Saturday, March 16, 1867.

Stock Exchange and Money Market.

Money has been accumulating at this centre, through the week. The banks have been gaining rapidly in their currency reserve, and private lenders have been reporting growing balances from day to day. The Government office has been disbursing less freely, but it has not been making any fresh sales of bonds, and consequently has not been absorbing much of the floating supply of capital. Hence, the tendency of the market has been decidedly in favor of responsible borrowers, whose wants have increased somewhat, chiefly in the speculative line, because of the revival of speculative activity at the Stock Boards and in the Gold Room. These wants, however, have been promptly supplied on the basis of six per cent. on call, as the governing price, though exceptional negotiations have been reported at a point above and below the rate named. The Government houses have been amply accommodated at five, and, in some instances, as low as four per cent. There has been more inquiry for prime short-date commercial paper, which has been quoted at from seven to eight per cent. per annum, on a moderate offering. The last weekly statement of the city banks, showed a general increase, $2,264,613 in the deposits, $1,509,245 in the legal tender reserve, $1,975,022 in the loans, and $115,378 in the circulation. The only exception was in the specie reserve, which fell off $711,199, partly on account of the heavy customs drain, during the week. The specie reserve of the banks is now $10,868,182, against $16,563,237, same time last year. The city bank deposits are now $200,383,527, against $180,515,881 week ending March 10, 1866. The legal tender reserve amounts to $64,523,440, against $64,341,802 same time last year. The circulation now stands at $33,409,811, against $23,033,237 same time last year. The loans are now $262,141,458, against $232,068,274 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $90,695,542 a day, against a daily average of $77,689,089 the preceding week, and $73,929,014 the week ending with Feb. 9. The current week's exchanges average about $100,000,000 a day.

The main changes in the Philadelphia Bank footings, last week, were as follows: Decrease of loans, $127,710; increase of legal tender reserve, $625,952; increase of deposits, $2,052,716; decrease of specie, $5,782; and increase of circulation, $9,532.

National Bank notes to the amount of $57,650 were issued last week, making the total issue to 1,663 banks thus far $301,893,071, against $282,555,440 at the close of the last fiscal year, June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $3,012,387, leaving, with the existing 1,650 banks, an actual circulation at this date, of $298,880,684. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,554,450; and for the public deposits, $39,911,450—making a total of $379,465,900. The Treasury Department, last week, redeemed and destroyed over $230,000 of worn and mutilated fractional currency, and issued $130,989 worth of new.

The U. S. Sub-Treasury receipts, week ending with March 9, were $18,296,106, including $4,041,689 from customs duties; payments, $15,297,811; balance at the close of the week, $112,285,056, against $109,866,761 at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $3,480,023, and payments, $3,058,119; on Tuesday, receipts, $2,600,974; payments, $1,288,563. The balance at the close of business on Tuesday stood at $113,969,371, against $110,606,107 a week previous.

The cash balance in the hands of the Assistant Treasurer in Boston at the close of business March 9 was $11,031,751 20—$8,951,000 of which was in coin—showing an increase of $75,148 74 as compared with the close of the previous week. The amount received for customs during the week was $450,000.

Government revenues were decidedly liberal last week, more particularly from customs. The excises, last week, yielded over $4,190,628, against $4,650,000, the preceding week; customs at the port of New York, $4,041,689, and at the outports, about $1,300,000 (in coin) more, making

the grand total income for the week equal about $11,402,328 in currency, against disbursements of over $6,075,623 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $205,871,502.

The course of Gold has been gradually downward, since our last. The speculative demand has fallen off, and there has been a less urgent customs inquiry especially since Monday the 11th inst. The *bull* interest has been far less confident, while the *bear* element has been much bolder, and strongly inclined to put out *short* contracts against the market. The export movement has been quite limited in volume, while the imports and receipts from all sources have been on the increase. The extreme figures of the week were 133⅜ and 135⅝, and the latest quotations on Wednesday 134¼@134⅜ on a quiet market. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $292,439. The customs demand for Gold last week, averaged $673,615 a day; thus far, this week, it has been equal to $475,363 a day, or equal to a weekly aggregate of $2,842,178. The arrivals of specie from Europe, Havana and other foreign ports, during the past week reached $29,836, and from California, $244,888. The total customs revenue of the Government, in coin, at this port since July 1, 1866, has been $87,985,093, against $93,983,964 same time in the preceding fiscal year. The total receipts of California gold at this port since July 1, 1866, have been $30,458,213, against $19,220,077 same time last year, showing an increase this year, of $11,238,136. The exports of specie from this port, last week, were $478,613. The total outflow of specie from the port, thus far in the current fiscal year has been $22,517,387, against $17,045,760 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $811,000, making the total coin interest disbursements through the Government office, since July 1, 1866, $35,955,640, against $31,434,465 for the same time in the preceding fiscal year. The specie exports from San Francisco from Jan. 1, to Feb. 10, 1867, reached $5,160,000, against $4,210,090 same time last year.

The total amount of gold certificates issued and redeemed by the Sub-Treasury, together with the balance unredeemed on the 9th of March is thus stated:

	Issued.	Redeemed.	Outstanding.
20s...	$281,060	$175,400	$105,660
100s...	4,895,800	3,194,600	1,701,200
500s...	621,000	237,000	384,000
1,000s...	23,176,000	19,335,000	3,841,000
1,500s...	144,685,000	130,615,000	14,070,000
10,000s...	5,000,000	5,000,000	....
Total.....	$178,658,860	$128,557,000	$20,101,860

These has been rather more activity in the foreign exchange market, since our last. The demand for prime bills for the importing interest has been fair, and the leading drawers have advanced their quotations ⅛@⅝ of one per cent. on sterling drafts. Bankers' 60 day bills on London closed on Wednesday at 108⅝@108¾, and on Paris to 5.20@5.16¼; sight bills on London to 109⅜@109⅝; and on Paris to 5.16¼@5.13¾. The offerings of produce bills have been even more liberal since our last. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $5,041,946, making the total value of exports since July 1, 1866, $118,886,359, against $152,573,563 same time in the preceding fiscal year.

Government securities have been in good demand, through the week, chiefly for home investment purposes, and considering the depression in the gold market, prices have been very well supported. The last public debt statement, up to March 1, has tended to strengthen confidence in the present administration of the National finances, and in the credit of the Government. The Seven-thirty notes were reduced nearly thirty-one million dollars in February; and legal tender notes, compound interest notes, gold notes and debt free of interest, over nine millions, in the same month; while the funded debt was increased nearly forty-three millions. Deducting the cash in the Treasury, from the aggregate indebtedness at the close of February, the last statement showed a net liquidation during the month of over thirteen and a half million dollars. The gold bearing debt is now $1,464,855,192, including $514,780,500 of the Five-twenties of 1862, and $156,676,750 of the Five-twenties of 1865, consolidated issue. The currency interest portion of the debt is now down to $787,028,880, including $632,798,650 in the form of Seven-thirty notes, yet outstanding, or about two hundred millions less than the original issue of these notes. The plain legal tender circulation is now $376,235,626, and the compound interest notes outstanding are $141,308,830. The coin in the Treasury on the first inst., was up $107,271,031, including $18,376,180 on account of private depositors. U. S. sixes of 1867 closed here on Wednesday at 131; U. S. sixes of 1868, at 130; U. S. sixes of 1881, 109⅛@109⅜; U. S. Five-twenties of 1862 at 109⅜@109½; U. S. Five-twenties of 1865 at 107½@107⅝; U. S. Five-twenties of 1865, consolidated, 106⅝@106¾; U. S. Ten-forties at 97⅝@97¾, ex-coupon, and U. S. Seven-thirties at 105¼@105¾. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ¼@⅛ of 1 per cent. on these figures:

June, 1864.....117½	May, 1865 .....112¼
July, 1864.....117	August, 1865....111¼
August, 1864....116⅛	September, 1865..110¾
October, 1864....114½	October, 1865....110½
December, 1864..113⅛	

There has been much more animation in railway and miscellaneous stocks, since our last. The speculative demand has been decidedly brisker, fostered, in part, by the growing ease in money. The temper of the market has been generally firm and buoyant. Several of the speculative favorites have advanced materially; Erie shares showing the most notable rise, and the widest fluctuations. The closing dealings were of a less confident nature, though there was no marked yielding in values.

General business has improved, chiefly in the line of domestic produce, in which there has been much greater activity. Breadstuffs have been more eagerly sought after and have advanced, closing buoyantly. Provisions have been in better request, and early in the week firmer in price, but at the close, somewhat easier. The cotton market has been quite brisk, especially in the way of exports; the week's shipments from this port having been up to the unprecedented amount of 22,094 bales. The liberal receipts, and rather less encouraging foreign advices have made holders eager sellers, and prices have been depressed. Middling grades of cotton left off heavily at 29@31 cents per lb. as extremes. The stock of cotton now here is estimated at about 225,000 bales. The receipts at the port this week, have averaged nearly 3,000 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 436,000 bales, against exports of 238,102 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 1,405,000 bales against 1,480,665 bales same time last year; exports, 770,000 bales, against 869,500 bales same time last year; estimated stock at latest dates, 625,000 bales, against 521,000 bales same time last year. In the way of foreign merchandise, there has been an increase of trade, chiefly in the dry goods and grocery lines, but at prices more favorable to purchasers. The total imports of foreign dry goods, last week, were $2,506,131, and the total amount marketed $2,679,325. The value of foreign merchandise imported last week, was $2,999,972—making the grand total specie value of last week's imports of dry goods and merchandise, $4,806,103, and since July 1, 1866, $178,875,633, against $203,755,005 same time in the preceding fiscal year. The ocean freight market has been quite active, with 446 vessels of all classes in port. For Liverpool we quote flour at 2s.@2s. 3d. per bbl.; grain at 6@6½d. per bushel; cotton at $\frac{5}{16}$@$\frac{11}{16}$d. per lb.; and heavy goods at 20s.@30s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 27.	March 5.	March 18.
Consols	91	91	90¾
U. S. 5-20's of 1862....	73¼	73¾	74¼
U. S. 5-20's of 1865....	71¾	72	72½
Erie	36¾	36	39¾
Ill. Central.....	76¾	76½	78

The New York exports, exclusive of specie, for the week ending March 12, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week.....	$3,669,361	$5,041,946
Prev. reported.....	42,031,069	32,238,018
Since January 1.....	$45,700,430	$37,279,964

Included in the exports were 22,094 bales cotton, valued at $3,197,626.

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$3,898,261	$2,506,131
Gen. merchandise.....	4,535,644	2,299,972
Total for the week.....	$8,433,905	$4,806,103
Previously reported....	53,236,902	43,136,498
Since January 1.....	$61,670,807	$47,942,601

The commerce of New York from July 1st to date compares as follows:

	1865–'66.	1866–'67.
Imports merchandise.	$203,755,005	$178,875,633
Exports produce.....	152,578,566	118,886,359
Exports specie	17,045,760	22,517,387

The balance in the Sub-Treasury on Wednesday was $110,084,274 92.

Bridge over the Ohio at Louisville.

Proposals will be received by the "Louisville Bridge Co.," A. Fink, Esq., Chief Engineer, until the 10th of April, for the construction of about 22,000 yards of the masonry of the bridge over the Ohio River at Louisville. Plans and specifications are now ready for inspection. We are glad to see that this enterprise, so fraught with interest to the city of Louisville, is about to be commenced and pushed forward with energy. We understand that already $1,000,000 has been subscribed for the completion of this great work, which will unite Louisville with the North and East, and give her connection with all the great marts of America, without the delay and expense of crossing the river by means of the ferry.

☞ The Advertisement of the "Third National Bank," of which J. F. D. Lanier, Esq., is President, and Parker Handy, Esq., Vice President, will be found on our outside page. This Bank is the designated Depositary of the United States, and authorized agent of the Treasury.

☞ We invite attention to the Advertisements of Messrs. Hoy, Kennedy & Co., in another column. These gentlemen are importers of Railroad Iron and Dealers in Railroad Supplies. Agents for Owen's Patent Wheel, Tire and Axle Co.; also for the Earl of Dudley's Iron. Office and Warehouse 111 Liberty street, New York.

Pacific Railroad Surveys.

We have received from Hon. Jesse L. Williams, Government Director of the Union Pacific Railroad, an official copy of his report on the surveys over the Rocky Mountains—showing the advantages and disadvantages of the different routes—supplied, with the consent of the Secretary of the Interior, in advance of its publication by the Department. As these engineering facts respecting this hitherto unexplored region are of interest to railroad men, and especially to engineers, we have concluded to publish it entire. Mr. Williams says:

The preliminary surveys across the first range of the Rocky Mountains being nearly completed the Government Directors deemed it important that one of their number should personally examine such of the lines as appeared most feasible. Accordingly, at the request of my colleagues, and by invitation of Colonel S. Seymour, the Consulting Engineer of the company, I accompanied him to the mountains in September last.

At Omaha we were joined by General G. M. Dodge, Chief Engineer, and in passing over the several routes, were further aided by explanations, on the ground, by the Division Engineer, under whose immediate direction the survey had in each

case been made, with the advantage also of the maps and profiles. Under the requisitions of the thirteenth section of the act of Congress, approved July 2, 1864, I respectfully submit, for the information of the Secretary of the Interior, the following general results, premising that this report has been submitted to my colleagues and sanctioned by them:

This first mountain barrier, as it stretches north and south across the general course of the road, between the 105th and 106th meridian of longitude, may be described as extending from the canon of the South Platte, near the latitude of Pike's Peak, to the North Platte, a distance of near three hundred miles. Its more southerly and higher portion, called the Snowy Range or Rocky Mountains proper, forms part of the great divide of the Continent, separating the waters of the Platte from those flowing into the Colorado of the West. The northern section of this mountain barrier, being a part of the subordinate range known as the Black Hills, and only dividing the drainage of the two forks of the Platte, is, nevertheless, as to direction, the continuation of the main Rocky Mountain range northward, possessing the same mountain characteristics, though having less altitude and gentler slopes. The Cache-la Poudre River, the largest tributary of the South Platte, taking its rise in its most southerly branch, near the heights of Long's Peak, marks the point of division of the range into the two sections here described. The water shed of the Continent diverges here to the northwest forming first the southwestern boundary of the North Park, and thence continuing northwest, sinks into the depression known as Bridger's Pass, where it is 7,534 feet above the bed of the sea, and 3,892 feet lower than at Berthoud Pass in the snowy range west of Denver.

Up to the eastern base of this north and south mountain range, the broad and generally smooth plain of the Platte Valley opens favorable approaches, through its several tributaries, to any mountain crossing that may be selected. The point of crossing the mountain is, therefore, the first problem to be solved.

In the wide range of these surveys, continued now through three years, ten distinct points of crossing have been examined. They have been run with level and transit, in all cases affording reasonable hope of practicability; or, where less promising, they have been explored with care, availing, in such cases, of barometrical observations. The passes thus examined include, as I understand, all that have been suggested by mountaineers or others familiar with the country as *possibly* feasible. Enumerating from south to north, they may be briefly described as follows;

ROUTE NO. 1. OVER HOOSIER PASS AT HEAD OF THE SOUTH PLATTE.

Mr. F. M. Case, civil engineer, reports to the Vice President, Dec 15, 1864, that he made a survey of the governing sections of this route and submits profiles, first, of the mountain range at Hoosier Pass; secondly, of a line eighteen miles northwestward down Blue River, a tributary of the Colorado; and, thirdly, of a line run forty-eight miles southwestward from the pass, down the upper portion of the South Platte, through the South Park to the head of the Platte Canon. From the head of this canon, as he reports, the line would follow the river northwestward some forty miles through the mountains to the plains with, as estimated, an average descent of seventy feet per mile. Of this distance the engineer estimates that twenty miles would be close canon, both walls being washed by the stream, and the direction so circuitous as to require considerable tunnelling. His estimate of the height of this pass above the sea, from barometrical observations in the vicinity, is 11,500 feet. A tunnel two and a half miles through granite is required; grade line of tunnel upon the assumed level, 10,660 feet above the sea. The general alignment of this route is so unfavorable, considering Salt Lake as the point aimed at, as, in the judgment of the engineer, to render a more extended survey needless—145 miles of road being required between Denver and the mouth of the Blue River, only seventy-six miles west of the meridian of the former place.

ROUTE NO. 2, OVER TARRYALL PASS,

This route, it seems, did not so commend itself to the engineer as to require a survey. He estimates the pass to have about the same altitude as Hoosier Pass—11,500 feet above the sea. The approach to it from the plains on the east would be, first, through the canon of the South Platte for some twenty-five miles, and thence up Tarryall Creek, a branch of the Platte, to its source in the range a few miles northeast of Hoosier Pass. From the west the approach would be from the valley of the Blue River, above Breckinridge, through the Indiana Gulch. While the engineer does not assume to speak of this route advisedly he thinks the summit could not be reached from the east without exceeding the maximum grade of 116 feet per mile, and that the descent of the gulch on the west 150 to 200 feet per mile. Having made no definite survey he does not give the length of the tunnel.

ROUTE NO. 3, THROUGH THE NORTH FORK OF SOUTH PLATTE.

As in the case last described Mr. Case deemed a critical survey of this route unnecessary. He says in his report that it would enter the mountains at the mouth of the South Platte Canon, being thus coincident with the last two named lines for ten miles, and thence up the north fork of the Platte thirty-five miles, crossing the range still further north than the route last described, and connecting on the west with one of the head branches of Snake River, an affluent of Blue River. This pass was represented to the engineer, by a reliable explorer, as being a little below the line of Arborescena or "Timber line," and was assumed as about 11,500 feet above the sea. Upon this hypothesis, and with the aid of barometrical observations in the vicinity, the engineer estimates that on the eastern approach to the summit, some 2,-300 feet elevation must be overcome in twelve or fifteen miles, and on the western approach 2,700 in twenty miles. How far this could be alleviated by a tunnel, and what would be the length of the tunnel is not stated. The entire route from the plains on the east to the valley of the Blue River on the west, is reported as running through a narrow mountain valley, in many places tortuous.

It will be noticed that the two routes last described, entering the mountain as they do, far to the south, through the canon of the South Platte, are, like route No. 1, forced out of the proper direction.

ROUTE NO. 4. OVER BERTHOUD PASS.

From the beginning of these investigations this route has attracted much interest, as well from the general belief of mountaineers, that it was the most favorable pass through the Snowy Range, as from its locality, being in the direct course from Denver to Salt Lake City, the two chief points on the route, both of which it seemed desirable to pass. In the summer of 1862, prior to the first meeting of the corporators of the Union Pacific Railroad for the purpose of organization, Mr. F. M. Case, at the instance, and, I believe, at the expense of the friends of the work in Colorado, made what he called an instrumental reconnoisance of the route. His report, addressed to Hon. John Evans, then Governor of Colorado Territory, was embodied in his subsequent official report of December 15, 1864. Subsequently, in 1866, by direction of this Board, a second and more careful survey of this route was made by Mr. P. T. Brown one of their engineers. In the general topographical facts, the two surveys agree. I passed over this line as far as the summit of the range accompanied by Colonel Seymour and Mr. Brown.

The line from the South Platte at Denver to the summit of Berthoud Pass is sixty miles in length The survey was extended west into the Middle Park, seventy-eight miles from Denver, in the direction of Salt Lake. For general description it naturally divides as follows:

1 Denver to Golden City, fourteen and a half miles. This is over a rolling and rapidly rising plain, falling into Clear Creek Valley, six miles east of the mountain, and meeting the foot of the range twelve miles from Denver. Ruling grade, 116 feet per mile, of which there is about three miles. Construction not very expensive.

2 Golden City to upper end of Clear Creek Canon 15¾ miles. Golden City is at the transition point from the sedimentary to the granite formation. Here the line enters Clear Creek Canon, which extends 15¾ miles, rising in this distance 1,544 feet. Through a portion of the Canon the valley rises faster than the maximum grade, but with careful location and heavy cost, Mr. Brown thinks the grade need not exceed 116 feet per mile at any point. Two-thirds of the distance will be curved, much of it sharp. The greater part of the distance may be called close canon, and a part narrow open canon, with abrupt slopes.

3 From head of canon to east end of Berthoud Tunnel, 28½ miles, the line follows the narrow mountain valley of Clear Creek, through the midst of the gold mining developments, passing many quartz mills. Ruling grade, 116 feet per mile of which there will be about 13 miles. For seven or eight miles of the upper portion the fall of the valley greatly exceeds the maximum grade, reaching in places over 300 feet per mile. Using the maximum grade of 116 feet per mile from the tunnel eastward the line is necessarily thrown on the steep, rocky, and in places, precipitious mountain sides, at an elevation of 100 to 400 feet above the creek involving, of course, very heavy cost. In the whole distance from the base of the mountain to the tunnel, Clear Creek, as Mr. Brown supposes, would be bridged perhaps twenty times, with probably two or three miles of tunnelling through sharp points. To give greater length of line, for the purpose of reducing the grade to the maximum prescribed by law, the surveyed route, in ascending, turns up South Clear Creek for two and one-half miles, thence by a short tunnel through a ridge into Bard's Creek Valley, which it follows down, reaching the main valley at Empire City.

4 Berthoud Tunnel would be 3 1-10 miles long, and pierces the mountain 1,364 feet below the summit of the pass. The material to be excavated, the common granite of the mountain. Grade line of tunnel at highest point, 10,000 feet, and summit of pass, 11,426 feet above the sea.

5. West end of tunnel to end of survey, 16½ miles. Descending westward, the slope of the mountain is followed, for some distance until the valley of Moses' Creek is reached, which is a tributary of the Colorado, and thence with this valley to the Middle Park. Ruling grade, 116 feet per mile for first 11½ miles. I did not pass over this portion of the route.

ROUTE NO. 5, OVER BOULDER PASS.

While standing on the mountain peaks near Berthoud Pass, on the 18th of September, in the clear mountain atmosphere, I had a full view of the Boulder Pass, twelve miles further north. From its apparent height above the growth of timber, and from barometical observations before reported, I was fully convinced of its impracticability; yet, in deference to the views of gentlemen having mining interests on the Boulder, I fully intended visiting that pass. But a fall of eight inches of snow on the 19th, on the eastern slope, which I learned was two feet deep at the western base of the range, defeated this purpose. A few weeks later Mr. Brown made a survey of the Boulder Route. The Chief Engineer reports the results as follows: First, that the pass is 11,700 feet above the sea; second, a tunnel of six miles required; third, the approach is through either South Boulder or Middle Boulder Creek, on either of which the ascent is too rapid for the maximum grade; and, fourth, that on either of these streams expensive canons are encountered.

ROUTE NO. 6 UP THE CACHE-LA-POUDRE AND DALE CREEK AND OVER ANTELOPE PASS.

During the last week in September I made a reconnoisance on horseback over this route, from the eastern base of the mountain, at Laporte, to

the western base in the Laramie Plains, at the common point of junction with the Lodge Pole and Crow Creek route, in company with the Chief Engineer, the Consulting Engineer, and Mr. James A. Evans, Division Engineer, whose three years' service in directing these experimental surveys has made him familiar with the topography of this range.

Antelope Pass is a depression in the ridge separating the waters flowing into the Laramie River on the west, and those of Dale Creek, a tributary of the South Platte. Dale Creek, taking its rise near Cheyenne Pass, runs in its upper section on the western slope of the range, cutting the main range of the Black Hills in its southeasterly course, and joins the Cache-la-Poudre River some three miles above the eastern base of the mountain. Through the Dale Creek Valley a favorable route is found from the Cache-la-Poudre, near Laporte, to Laramie Plains, in a northwestern direction, finding its summit not in the main Black Hill Range, but in the subordinate divide between Dale Creek and Laramie River. This ridge or divide is crossed at Antelope Pass, which has 195 feet less elevation than the main range at Evans' Pass, in the direction of Crow Creek and the Lodge Pole.

The opening thus cut through the mountain range by Dale Creek, and which has heretofore been used as the Overland Stage Route, the railroad survey now occupies. The main features of this line are these: Total length of mountain section, from eastern to western base, 39¼ miles, of which 33 miles is in the ascent of the eastern slope, and 6½ miles on the western slope. The western slope, and also the first 7½ miles of the eastern ascent from the Plains, following up Pitchfork Creek, is chiefly in the secondary formation, and presents a comparatively favorable profile. On these two sections the line may be located, with a maximum grade of from 85 to 90 feet, without expensive work. The intermediate section of 25 miles, all in the Valley of Dale Creek, and in the granite formation, presents some expensive grading, especially near the crossing of Dale Creek, and also near the anon of Stonewall Creek, where the line of transition between the stratified and granite formations is crossed. Three bridges of some magnitude are required on this division, the chief of which is over Dale Creek, near four hundred feet long. The deepest part of tle narrow chasm here to be bridged is 108 feet below grade line. As the line now runs the maximum grade occurs frequently, with occasional undulations by which ascent is lost. With the time and care needful on a final location, the ruling grade may be reduced below the limit allowed by law, and probably to 105 or 110 feet per mile, and the undulations chiefly, if not altogether avoided. The grade line at Antelope Pass, without a tunnel, and with a cut of moderate depth, is 8,045 feet above the sea.

The approach to this passage of the Black Hills is up the Valley of the South Platte to the mouth of the Cache-la-Poudre River, and thence up that valley to Pitchfork Creek, some eight miles below Laporte, which latter tributary is followed to the entrance of the Black Hills. The whole route east of the mountain is of the most favorable character, permitting a grade uniformly ascending with the rise of the valley.

ROUTE NO. 7 FOLLOWING THE DIVIDE BETWEEN CROW CREEK AND LONE TREE CREEK TO EVANS' PASS.

Returning eastward from Fort John Buford, (now Fort Sanders,) on the Laramie River, to which point our party had extended their reconnoissance, in part to obtain a military escort, which General Dodge deemed a prudent precaution against Indian depredations on the Lodge Pole, we crossed the Black Hills by the new Lone Tree and Crow Creek divide route, which we followed to a point near the traveled road from Denver to Fort Laramie, and thence to Laporte, along or near the eastern base of the range.

As the route last described finds an easy ascent of the mountain, through the valley of Dale Creek, so this route, by following the smooth and gently ascending ridge dividing the drainage into Crow Creek on the north, and Lone Tree Creek on the south, which ridge extends far out into the plains, occupies a favorable locality for crossing the Black Hills, more exempt from obstructions by snow drift than ordinary line. This ridge can be approached from the valley of Crow Creek through a small east and west tributary rising at the rate of from thirty to sixty feet per mile. Reaching the divide seven miles east of what appears to be the general course of the base of the range, the line pursues it for twenty miles to the summit of the Black Hills at Evans' Pass. For the first seven miles this divide presents a smooth profile. Entering a little west of this the granite formation, the next five miles present a rough profile, on which the work will be heavy and the material in great part rock. The next eight miles to the Pass are generally on the summit, or on the adjoining slopes of the divide, with a favorable profile and alignment, and comparatively light work. Where excavation is required to any considerable depth on any part of the mountain, it will be rock. The experimental line up this eastern slope of the mountain is laid with a ruling gradient of 106 feet per mile. But the Chief Engineer is confident that this can be reduced, on the final location, to the maximum of 90 feet per mile, which is less than the grade of the Pennsylvania Central road, in the ascent from Altoona to the tunnel, with curvature very much easier than is there introduced.

The summit of the mountain presents here a broad and gently rounded surface, admitting of no reduction by any judicious tunneling. With an open cut of moderate depth through rock, the grade line is 8,242 feet above the sea.

Descending westward the prospect is less favorable. Dale Creek, heading a few miles north, near Cheyenne Pass, has worn a valley in the western slope, which can be crossed only by an embankment and bridge of considerable height. And, after reaching the secondary summit between this creek and the Laramie Plains, the descent thence to the common point of junction with the line over Antelope Pass at western base of mountain, is here more abrupt than on that route. A careful re-survey of this western slope, 10¼ miles distance, is proposed by the Chief Engineer, under the belief that he can, within reasonable limits of cost, establish a ruling grade not exceeding ninety feet per mile, as on the eastern slope, and at the same time, avoid any depression of grade in the intermediate valley below the summit west of Dale Creek. So important is it that in these mountain ascents, elevation once attained, be not lost by injudicious undulations, that I have not failed, as a member of the Committee on Location, to urge this view.

To reach this crossing of the Black Hills, the line would leave the South Platte at Julesburgh, following up the valley of Lodge Pole Creek, 106 miles, and thence bearing a little southward, through a southwestern tributary, cross the divide to Crow Creek Valley.

ROUTE NO. 8, VIA LODGE POLE, CAMP WALBACH AND CROW CREEK.

This route, like the Cheyenne Pass line, finds its approach to the Black Hills through the Lodge Pole Valley to Camp Walbach, at the base of the range, and its route thence up the mountain slope is coincident with the Cheyenne Pass line to the crossing of Lodge Pole Creek. Thence diverging to the south, it pursues generally the divide between the drainage to Lodge Pole on the north, and Crow Ceeek on the south. It crosses the summit of the range at Evans' Pass, there intersecting Route No. 7, and having, of course, the same gradient, to wit, 8,242 feet above the sea. But before reaching this pass, in traversing the uneven surface on the mountain tributaries of Crow Creek, this line encounters a higher country, over which the gradient reaches the height of 8,400 feet above the sea. The descent of the western slope is coincident with Route No. 7.

Previous to the surveys of 1866 this was considered the shortest practicable route over the Black Hills, and it is the route compared with the Cache-la-Poudre line in the report which I had the honor to make to the Department, dated 28th February last. But the investigations of the last season, under the direction of General Dodge, Chief Engineer, whose knowledge of this region, acquired during his command of this Military Department, has been of great service to the company, have resulted in the discovery of Route No. 7, which by leaving the Lodge Pole far out in the plains, finds a more direct alignment, and in all respects a better line.

ROUTE NO. 9, VIA LODGE POLE CREEK AND CHEYENNE PASS.

The Cheyenne Pass over the Black Hills, in connection with the Lodge Pole Valley as its eastern approach, has long been a thoroughfare for travel, and was thus from the beginning brought prominently to the notice of those seeking a route for the Pacific Railroad. In the fall of 1863 a line of levels was run over this pass by Mr. B. B. Brayton, Engineer. Again, in the summer of 1864, a more careful survey was made by Mr. James A. Evans. The general results of Mr. Evans' survey are: First, that the summit of the pass is 8,656 feet above the sea; second, that a tunnel, 1,500 feet long, through granite, on a grade line 8,540 feet above the sea, would be required; third, that this tunnel could be reached from the east by way of Camp Walback, with a maximum grade probably not exceeding 116 feet per mile; and, fourth, that on the western slope of the mountain the ruling grade could not be reduced below 132 feet per mile, unless by the objectionable expedient of increasing the length of the line by switching back.

ROUTE NO. 10—THROUGH LARAMIE CANON.

Knowing that this stream had cut its channel deep through the Black Hill Range, thus presenting by its immediate valley a more uniform ascent, and a total rise and fall between the Platte Valley and the Laramie Plains, materially less than by other routes crossing *over* the range, and further, that this route would occupy a good general direction, the character of its great canon has been an object of interest from the first. In 1864 Mr. Evans commenced the examination, but accomplished it only on the lower portion. In 1865 Mr. Case explored without instruments the upper portion. But until Mr. Evans, in his second attempt, in 1866, succeeded in running a line entirely through this canon, it is not probable that any human being, savage or civilized, ever passed through the whole length of this deep and rugged gorge. Its direct length is 14 miles; its length by the survey, 25 miles; its course in many places very tortuous, and its vertical walls of rock from 500 to 1,500 feet in height. The fall of the stream in places is from 150 to 200 feet per mile, and its current, of course, extremely rapid. The Chief Engineer reports it as wholly impracticable for railway purposes.

The route up the North Platte and through the South Pass has been followed by the travel from the earliest beginning of emigration across the Continent. The North Platte, like the Laramie, but with a still larger flood, has worn its channel through the range, presenting unquestionably, if it could be followed, an easier and more uniform grade from the plains to the divide of the Continent at the South Pass than any other route. Its greater length, however, caused by its northern circuit, its wider divergence from the important mining resources of Colorado, in which the nation has an interest, with the apprehension of deeper snows in the region drained by the Sweet Water, precipitated there through the directing influence of the Wind River mountain range, seem to have outweighed, in the judgment of the company and their engineers, any supposed advantage in grades. The survey of this route, though commenced in 1865, near Fort Bridger, and extended eastward through the South Pass and a short distance down the Sweet Water, by Mr. S. B. Reed, one of the company's engineers, was not continued through the Black Hills. The engineers, from their reconnoisance and information from others, report

narrow defiles and canons where the North Fork cuts the mountain range, so formidable as probably to force the line out of the valley and over mountain spurs. But the length of this difficult construction, as also the exact comparative length of the North Platte route, is unknown. The water shed at the South Pass is 7,470 feet above the sea. It is sixty-four feet lower than the same dividing ridge of the Continent at Bridger's Pass, one hundred miles to the southeast, and 4,000 feet lower than the Berthoud Pass, west of Denver.

COMPARISON OF ROUTES.

Grouping the ten routes thus briefly described into two classes, five of them cross the Snowy range, and five the Black Hill range.

Of those in the Snowy range, examinations indicate the Berthoud Pass, designated No. 4, as having most of the elements of a feasible line.

Contrasting the Berthoud Pass line with either of the two available lines over the Black Hills, the Lone Tree and Crow Creek line, over Evans' Pass, designated as Route No. 7, or the Cache-la-Poudre line No. 6, the comparison is greatly against the Berthoud, as follows:

8. At Berthoud Pass the gradient is 10,100 feet above the the sea; at Evans Pass, 8,242 feet.* Difference in the elevation to be overcome with the commerce of the country, 1,858 feet.

2. Tunnel at Berthoud Pass, three and one-tenth miles long. As the summit of the pass is 1,300 feet above the level of the tunnel, the material excavated would be chiefly passed out at the ends. Under these circumstances not less than three or four years, certainly, would be required for its construction, within which time, it is confidently believed, the track layers from Omaha, by a more favorable route, may meet those from Sacramento on the plains of the Humboldt River. No estimate has been made of its cost. Unquestionably the outlay of capital would be greater than is warranted at a single point, be it from national or individual means, when the same capital and labor would stretch out the road so far toward the Pacific, over the cheaper routes that offer. At either of the two Black Hill Passes no tunnelling is required.

3. Besides Berthoud Tunnel, there would be fifteen miles in the Clear Creek Canon, and ten miles in the upper section of Clear Creek, which would cost, perhaps, beyond all precedent in this country. Contrasting the aggregate of the tunnel and this twenty-five miles with same length of mountain work, on the Lone Tree and Crow Creek divide route over the Black Hills, and the difference would grade 100, perhaps 150 miles of average line between the Black Hills and Salt Lake.

This comparison, thus stated, in very general terms, is confined to the first mountain range, as if beyond that the extension of the two routes to Salt Lake were alike feasible. Such, however, seems not to be the case.

In June, 1865, Mr. Reed, under instructions from T. C. Durant, Esq., Vice President, and with a view to a line across the intermediate Green River Basin, made an extended reconnoisance of the country east of Utah Lake, to find, if possible a practicable route over the Wahsatch Mountains to Green River *via* Spanish Fork and the Uintah River. His report, dated April, 1866, represents that there is no route practicable for a railway from Utah Lake eastward to Green River, through the Uintah Valley. We have seen that the eastern rim of the Green River basin cannot be crossed without an expense and delay quite too great. And if the Snown Range could be crossed, the Chief Engineer expresses the belief that two subordinate north and south ranges would interpose further west.

The basin of the Green River, and especially its main valley, the White River, running from east to west, near the 40th parallel, has been represented as much more favorable to agriculture, with better supply of timber, than the country along the Bridger Pass route. Having less altitude by some two thousand feet, and lying two degrees further south, this claim is no doubt just, and it is to be regretted that access for the railroad seems forbidden by the great height of the mountains forming its eastern and western boundaries.

But were this route practicable, yet in the aspect of gradients, it would be less favorable than the Bridger Pass route, the mountain ranges being higher, and the intermediate valley lower. Green River, where this line would cross it, must be near 2,000 feet lower than on the Bridger Pass route, while the Snowy Range is, over the Berthoud Pass, 2,000 feet higher than the Black Hills, making a total difference of some 4,000 feet in the ascent to be overcome between Green River and the summit of this most easterly mountain range.

In whatever aspect this important question may be viewed, whether in the detail of actual surveys and levelling, or in a general grasp of the leading features of this part of the Continent, there can be no question that the Union Pacific Railroad Company, in deciding to locate over the Black Hills and through Bridger's Pass, have but conformed to the topographical shaping of the region to be traversed by the road.

Though the topography of this mountain region forbids the passage of this national thoroughfare directly through the mining region of Colorado, yet the tranverse valleys favor a connection by branch. The interests of the company of Colorado and of the Nation, seems alike to demand such connection. Adopting the Cache-laPoudre route, the proposed branch, as already surveyed, along the South Platte to Denver, would be fifty-three miles long; or by the Lodge Pole, the branch would be lengthened to 112 miles, but the main line shortened thirty-seven miles. The paramount claims of through commerce seemed to the Board to give preponderance, in the aspect of commercial considerations, to the short main line.

* A better comparative view of these mountain altitudes will be obtained by stating here the height of other well known points on the Continent above the sea, as follows: Lake Michigan, 578 feet; the Mississippi, at St. Louis, (high water), 452 feet; the Missouri, at Omaha, 968 feet; South Platte at Denver, 5,300 feet; general level of the Plains at eastern base of Rocky Mountains, about 5,000 feet; Salt Lake City, 4,286 feet. The grade line of Central Pacific Railroad on the summit of Sierra Nevada range, in California, is 7,042 feet, and that of the Pennsylvania Railroad on the summit of the Allegheny Mountains, 2,160 feet, above the sea level.

Journal of Railroad Law.

LIABILITY OF RAILROAD COMPANY FOR BAGGAGE OF PASSENGER BURNT IN DEPOT.

The case of Roth *vs.* The Buffalo and State Line Railroad lately decided by the Court of Appeals is important as deciding that common carriers of passengers, with their ordinary baggage, for hire, are liable for losses occurring from any accident to the baggage while it is in their keeping as carriers, except those arising from the act of God or public enemies.

This strict accountability as carriers terminates within a reasonable time after the arrival of the baggage at the place of destination where the carrier is ready to deliver the same to the passenger according to the terms of the contract.

Where the passenger did not call for his trunk, but left it in the hands of the company overnight, without any arrangement with them, and the same was destroyed by the burning of the depot before morning, held, that the company were not liable.

SMITH, J.—All extraneous circumstances stated by the witnesses being rejected, the case proved is briefly this: Dunn, the plaintiff's assignor, took passage, with his trunk, at Dunkirk, for Buffalo, on the defendants' cars. Immediately on the arrival of the cars at the place of destination, he went from the depot without looking for his trunk, or saying anything about it to the defendants' agents, and left it in their hands, as he himself testified, solely for his own accommodation. The agents of the company immediately proceeded to unload the baggage on the train, and without any unnecessary delay were ready to deliver it, and did deliver all that was called for at the platform by persons having checks. They carefully stored what remained, and during the night the depot and portions of the baggage were consumed by fire, without fault on the part of the defendants, and doubtless Dunn's trunk was among the baggage thus destroyed.

The irregularity of the trains and the consequent accumulation of baggage at the Buffalo station, the lateness of the hour and the state of the weather, the fact that Dunn's wife was under his charge, and that he saw no carriage at the door from which he made his exit, are circumstances of no moment. Since it is not shown that they rendered it unsafe or improper for him to receive his trunk on its arrival, and besides it distinctly appears that they did not influence his conduct. According to his own statements he left his trunk at the depot over night because "it was on his route the next morning."

What his route the next morning was, does not appear, and it is not important, for the fact is undisputed that he had reached the termination of his route on the road of the defendants, and their contract to transport him and his baggage was fully performed.

It is well settled in this State, that common carriers of passengers, with their ordinary baggage, for hire, are liable for losses occurring from any accident to the baggage while it is in their keeping as carriers, except those arising from the act of God or a public enemy. (Hollister *vs.* Nowlen, 19 Wend., 234; Cole *vs.* Goodwin, id., 251; Powell *vs.* Myers, 26 id., 591. This liability, once commenced, does not necessarily terminate with the transit, but *prima facie* continues until safe delivery of the baggage to its owner. (Id.) The case of Powell *vs.* Myers above cited, decided by the court for the correction of Errors, shows the extent to which these salutary rules have been enforced. There a passenger on a steamboat on the Hudson river, from West Point to New York, left the boat on its arrival at New York, at about ten o'clock; the owner leaving his trunk on board with the consent of the captain, and upon his assurance that it would be safe during the night. The next morning about eight o'clock the owner inquired for his trunk, and learned that it had been delivered to a negro on a forged order, the master of the boat pointing it out to him. The carrier was held liable.

But in that case Senator Verplanck remarked: "There may unquestionably be cases where, at some time after the arrival at the place of destination, the strict responsibility of the carrier, as such, for goods or baggage remaining in his possession undelivered, without fault or neglect of his own, should cease and he would then continue to hold them, not as a carrier, insuring against all except public and inevitable perils, but a mere bailee in deposit, gratuitously or otherwise, according to circumstances. Such a termination of the carrier's responsibility and change of character of the deposit would be regulated by usage, the course of business, sometimes by legal principles applied to the special facts, the acts of par-

ties and the common understanding of the transaction." The same learned jurist also suggested that the general rule governing such cases has not yet been distinctly and comprehensively laid down, either in the decisions or the text books, although the principle is to be found there.

The present case lacks the circumstances which controlled the decision in Powell *vs.* Myers, to wit, the consent of the carrier that the trunk should remain in his possession, and his delivery of it on a forged order.

We are, therefore to see whether there is any usage or legal rule applicable to the particular circumstance of this case, which terminated the strict responsiblity of the defendants as carriers, according to the principle suggested in Powell *vs.* Myers.

The usage relied upon by the defendants in respect to the delivery of baggage on the arrival of the cars was testified to by two persons only, and they were employees of the company. They did not state how long the usage had existed, or to what extent it was recognized by passengers; nor was any testimony given tending to show knowledge of it on the part of Dunn. It is true one of the witnesses stated that the usage was "uniform," and the other that it was "universal," but the fact that large amounts of baggage were lying in defendant's depot on the night in question, unclaimed by their owners, proved conclusively that the usage was neither universal nor uniform on the part of passengers. I think therefore, it cannot be held that the responsibility of the carrier was at an end on the ground of usage or of a known course of business, as was the case in Garside *vs.* The Proprietor of the Trent and Mersey Navigation Co. (4 Term, 581).

There are however, certain legal principles applicable to the special facts of the case, which, it seems to me, obviously determine it in favor of the defendants.

It must be conceded that in a case like the one before us, the owner ought not to be permitted to prolong the strict and vigorous liability of the carrier by refusing or neglecting to receive his baggage for an unreasonable length of time after the transit is ended. The obligations of both parties are to some extent reciprocal. The carrier is bound to deliver safely to each passenger his baggage at the place of its destination, in a reasonable time and manner; and when it is thus delivered or offered to be delivered, the passenger is bound to receive it and remove it in a reasonable time. If he refuses or neglect to do so, and the carrier thereafter retains it unclaimed by the owner, his liability is changed from that of an insurer to the responsibility of an ordinary bailee, liable only for losses occasioned by his own fault.

It is claimed, however, by the plaintiff, that the question of reasonable time is one of fact, and that the judgment of the justice is conclusive upon it. Ordinarily, it is a mixed question of fact and law. When the testimony is conflicting and the facts are unsettled, the jury are to decide, under the instructions of the court, as to the law. When there is no dispute as to the facts, the question is purely one of law, and the court should decide it. (11 Johns., 187; 3 Const., 272; 3 Seld., 266; 27 Barb., 221; Duer., 259; 1 Wend., 457. In this case, as has been already said, it was proved without contradiction that the carrier transported the passenger and his trunk to the place of destination, and was ready to deliver it on its arrival, but the passenger, who accompanied it and therefore had notice of its arrival, neglected to receive it, and left it in the carrier's possession—because he preferred to leave it at the depot over night rather than carry it to his lodgings. His conduct was unreasonable, and the justice should have so held as matter of law upon the undisputed facts. By his neglect to remove the trunk, the subsequent liability of the defendants became that of ordinary bailee, and they are not responsible for its loss, occasioned by an accidental fire, which did not occur from any negligence or fault on their part.

The rules alone stated in respect to the obligations of passengers are laid down strictly in view of the special facts of the case. They are not intended to apply to the case of merchandise transported as freight unaccompanied by its owner, nor to the case of the baggage of a passenger, who with the knowledge and consent of the agents of the railroad company, stops at an intermediate station on the route, over which he has contracted to be carried, intending to pursue his journey on a subsequent train, and leaving his baggage in the keeping of the carrier in the meantime.

The judgment of the Superior Court should be affirmed.

Judgment affirmed.

Railroad Earnings.--Weekly.

The earnings of the Grand Trunk Railway of Canada for the week ending Feb. 23rd, 1867, were $116,782 00
Corresponding week of previous year. 111,715 00

Increase $5,067 00

The earnings of the Detroit and Milwaukee Railroad for the week ending March 7th, 1867, were $27,547 00
Corresponding week of 1866. ..... 23,803 00

Increase $3,744 00

The earnings of the Chicago and Rock Island Railroad for the 1st week in March, 1867, were $64,718 00
Corresponding week of previous year .. 65,681 00

Decrease $963 00

The earnings of the Western Union Railroad for the first week in March, 1867 . ... $8,583 00
Corresponding week previous year 7,970 00

Increase $613 00

The earnings of the Chicago and Northwestern Railroad for 1st week in Mar., 1867 .. $159,873 30
Corresponding week previous year .. 138,965 78

Increase $20,907 52

The earnings of the Michigan Central Railroad for the 1st week in Mar., 1867, were.. $93,193 77
Corresponding week of previous year .. 75,924 16

Increase $17,269 61

The earnings of the Michigan Southern and Northern Indiana Road for the 1st week in Mar. 1867, were $85,884 00
Corresponding week of 1866 ..... 90,881 00

Decrease $4,997 00

☞ The Tennessee Legislature has authorized the City of Nashville to subscribe $500,000 to the capital stock of the Henderson and Nashville Railroad.

☞ A despatch from Topeka, Kansas, says that the iron has been purchased for the first twenty-four miles of the Lawrence and Galveston Railroad, south of Lawrence. New York capitalists promise to push the work vigorously.

ENGLISH RAILS

OF THE FOLLOWING BRANDS:

CRAWSHAY. LEVICK & CO.
GUEST & CO. RHYMNEY CO.
EBBW VALE CO. ABERDARE CO.
BAILEY, BROS. & CO.

Weighing 45, 50, 52, 54, 56, & 60 lbs. per lineal yard, Erie patterns, in port and to arrive, for cash, or a satisfactory credit.

If desired, parcels of Rails can be rolled to any required pattern, and shipped direct from England to any port in this country, at prices f. o. b., or ex-ship on arrival.

M. K. JESUP & COMP'Y,
84 Broadway.

TO CONTRACTORS.

PROPOSITIONS will be received for the construction of the masonry (about 22,000 yards) of the Bridge over the Ohio River at Louisville, until the 10th of April, 1867.

Plans and specifications will be ready for inspection after the 15th of March, at the Engineer's office of the Louisville and Nashville Railroad.

No bids will be considered if not made by responsible parties.

By order of the Board of Directors of the Louisville Bridge Company.

ALBERT FINK,
Chief Engineer.

COAL CUTTING MACHINERY.

THE COLLIERY PROPRIETORS OF SOUTH LANCASHIRE AND CHESHIRE, being anxious to encourage the development of **Coal Cutting by Machinery**, have determined to offer **THREE PRIZES**, namely, £500, £200, and £100, for the 1st, 2nd, 3rd **Best Machine** respectively, which, in the opinion of the Committee appointed for that purpose, shall be most suitable to the requirements of the trade, and the Inventor of which shall comply with the regulations laid down by the Committee.

A copy of the regulations, and further particulars, will be furnished on application to the undersigned.

All Competitors must furnish the Machines intended for Trial, in Lancashire, not later than the 1st November, 1867.

MASKELL WM. PEACE,
Wigan, Law Clerk to the Association.
11th February, 1867. 4t11

To Railway Engineers and Contractors.

EMPLOYMENT WANTED on the Construction of a Railway. The Advertiser (27) now in England, has been employed in an English Railway Engineer's Office eleven years. Apply, post-paid, to H. W. B. care of Mr. Algar, 11 Clements Lane, Lombard Street, London, England. 1t11

RAILROAD TIES.

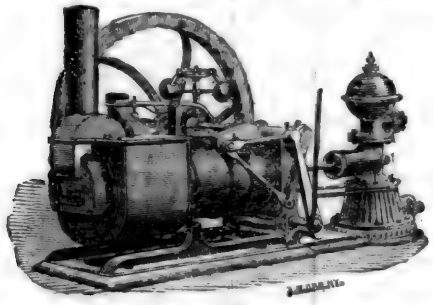
The undersigned are prepared to furnish Railroad Ties of **Hackmatack, Cedar, Pine, Hemlock** and **Spruce** in any quantity. Also every description of **Northern** and **Southern Pine, Oak** and **Spruce** for **Railroad Cars, Bridges, &c., &c.**

BRADFORD & RENICK,
3m50 **71 Broadway, New York.**

Merchants Union Express
COMPANY,
GENERAL EXPRESS FORWARDERS
AND COLLECTION AGENTS,

By Special Trains and Messengers, over Leading Rail road Lines, from the Atlantic Seaboard to the

WEST, NORTHWEST, AND SOUTHWEST,



Owned and Controlled by the Merchants and Manufacturers of the United States.

NEW YORK OFFICES.

General Office, 365 & 367 Broadway, cor. Franklin Street.
Branch Office, 180 Broadway, bet. John Street and Maiden Lane.
Western Freight Depot, cor. Hudson and Leonard Sts.
Eastern Freight Depot, 4th Ave. cor. 32d Street

NORMAN C. MILLER,
General Manager in New York.

ERICSSON
Caloric Pumping Engines.

FOR economy, durability, and efficiency unequalled. Have been in use on the Erie, Central, Hudson River, Harlem and other roads for eight years. Recommended by all Superintendents in the highest terms.

JAMES A. ROBINSON,
164 Duane St., cor. Hudson, New York.

BORDEN & LOVELL,
COMMISSION MERCHANTS.
70 and 71 West St., New York.
Fall River Iron Works Company's
NAILS, BANDS, HOOPS AND RODS.
Borden Mining Company's
CUMBERLAND COALS.

AMERICAN
STEEL RAILS.

The undersigned are now ready to Contract for the delivery of rails made of **Bessemer** or **Pneumatic Steel**, wholly **American**, and of the best quality.

PENNSYLVANIA STEEL CO.,
424 Walnut Street,
Philadelphia.
CAMBRIA IRON CO.,
400 Chestnut Street,
Philadelphia.

BORDEN & LOVELL,
70 and 71 West Street, New York
GENERAL AGENTS
Borden Mining Company's
CUMBERLAND COAL.

Orders from Railroad Companies, Manufacturers and others are respectfully solicited.

NEW YORK
Belting and Packing Co.,
MANUFACTURERS OF
VULCANIZED RUBBER FABRICS,
Adapted to Mechanical Purposes.

Patent Smooth Belting. (Patented Nov. 22, 1859,) vulcanized between layers of a patent metallic alloy, by which the stretch is entirely taken out, the surface made perfectly smooth, and the substance thoroughly and evenly vulcanized. This is the only process that will make reliable Rubber Belting.

Hose never needs oiling, and warranted to stand any required pressure.

Steam Packing in every variety, and warranted to stand 300 degrees of heat.

Solid Emery Vulcanite.—Wheels made of this are solid, and resemble stone or iron; will wear out hundreds of the ordinary wheels.

Directions, Prices, etc., can be obtained by mail or otherwise.

JOHN H. CHEEVER, Treasurer.
Warehouse, 37 & 38 Park Row, N. Y.

BURNSIDE & POTTER,
RAILROAD & COMMISSION OFFICE,
No. 26 Exchange Place,
NEW YORK.

AMBROSE E. BURNESIDE. ROBERT B. POTTER.

THE ATLANTIC BRIDGE WORKS,
Office, No. 157 Broadway,
NEW YORK.
POST, McCALLUM & CO.,
Bridge and Roof Builders,

Are prepared with all the necessary machinery and an experienced corps of assistants, to sink **Hollow Piles** and **Coffer Dams** by the **pneumatic process** for the foundations of Bridges, Docks, Sea Walls, Light Houses, or other marine constructions.

By the use of new patented machinery they are able to perform work of this character with much greater rapidity than has been possible heretofore, and at reduced cost.

Parties in the Western States may apply to Gen. Wm. S. Smith, care of Boomer, Boyington & Co., No. 14 Dearborn St., Chicago, Illinois.

RAILWAY ROLLING STOCK.
United States Patent, Dated 1866.

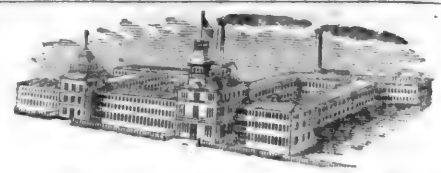
A new mode of retaining and sustaining the tires of railway wheels. The property in this invention, which is largely adopted by Railway Companies in England, is for sale as regards the United States. Apply to JOHN GEDGE & SON, Patent Agents, 11 Wellington Street, Strand, London. 1m7

Pacific Mail Steamship Company's
THROUGH LINE TO
CALIFORNIA,
And Carrying the U. S. Mail,

VIA PANAMA RAILROAD.

LEAVE PIER NO. 42 NORTH RIVER FOOT OF Canal Street, at 12 o'clock noon, as follows:

March 1.—RISING STAR, Capt. W. G. Furber, connecting with GOLDEN CITY, Capt. Watkins.
March 11.—HENRY CHAUNCEY, Capt. A. G. Gray, connecting with MONTANA, Capt. Sutton.
March 21.—OCEAN QUEEN, Capt. T. A. Harris, connecting with CONSTITUTION, Capt. Caverly.



All Departures touch at ACAPULCO; those of 1st and 21st connect at Panama with steamers for SOUTH PACIFIC PORTS, 1st and 11th for CENTRAL AMERICAN PORTS. Those of 1st touch at MANZANILLO.

Departure of 11th each month connects with the new steam line from Panama to Australia and New Zealand.

Steamer of March 1st, 1867, will connect with the Company's steamer COLORADO, to leave San Francisco for Yokohama and Hong Kong on April 3, 1867.

100 Pounds Baggage allowed each adult. Medicine and attendance free. For Passage Tickets and all further information apply at the office, on the wharf foot of Canal Street, North River, New York.

?m35 F. R. BABY, Agent.

ENGINEERS AND CONDUCTORS' WATCHES.

THE AMERICAN WATCH COMPANY, of Waltham, Massachusetts, request us to publish the following letters, recently received, recommendatory of Waltham Watches for railway use. The Pennsylvania Railroad Company have for several years furnished to their employees watches specially made for them by the Waltham Company, and it is this class of watches the Superintendent, Mr. Williams, refers to. Similar watches (in strong silver or gold cases, with plate-glass crystals) we are prepared to supply, named and engraved to order; and of them, as being most suitable for the use of Engineers, Conductors, Station-Masters, of Expressmen and Messengers, the Company give the most ample guarantee. It is a remarkable fact that Railroad Companies using our watches suffer much less from collisions and similar accidents than any others.

Any of the grades of Waltham watches may be purchased of Watch Dealers generally throughout the country.

ROBBINS & APPLETON,
182 Broadway, New York.
ROBBINS, APPLETON & CO.,
158 Washington Street, Boston.

PENNSYLVANIA RAILROAD CO.

OFFICE OF THE GENERAL SUPERINTENDENT,
ALTOONA, Pa., 15th Dec., 1866.

GENTLEMEN,—The Watches manufactured by you have been in use on this Railroad for several years by our Enginemen, to whom we furnish watches as part of our equipment. There are now some three hundred of them carried on our line, and we consider them good and reliable timekeepers. Indeed, I have great satisfaction in saying your watches give us less trouble, and have worn and do wear much longer without repairs, than any watches we have ever had in use on this road. As you are aware, we formerly trusted to those of English manufacture, of acknowledged good reputation, but as a class they never kept time as correctly, nor have they done as good service as yours.

In these statements I am sustained by my predecessor, Mr. Lewis, whose experience extended over a series of years. Respectfully,

EDWARD H. WILLIAMS,
General Superintendent.
AMERICAN WATCH COMPANY, Waltham.

NEW YORK CENTRAL RAILROAD.

LOCOMOTIVE DEPARTMENT, WEST. DIVISION,
ROCHESTER, Dec. 24, 1866.

GENTLEMEN,—I have no hesitation in saying that I believe the great majority of Locomotive Engineers have found by experience that Waltham Watches are the most satisfactory of any for their uses. They run with the greatest accuracy and steadiness, notwithstanding the rough riding of an engine, and as I have never known one to wear out, they must be durable. I hope to see the time when Railway Companies will generally adopt your watches, and furnish them to all Engineers and Conductors. In my opinion it would greatly tend to promote regularity and safety.

Yours respectfully,
CHARLES WILSON, G. Chief Engineer,
Brotherhood of Locomotive Engineers.

American Railroad Journal.

New York, Saturday, March 23, 1867.

The Car Wheel Manufacture.

Within the last few months we have clipped from the dailies, no less than four accounts of accidents from the breaking of wheels, one on the Hudson River Railroad where the breaking of a wheel threw the sleeping car on to the ice in the river and injured nearly twenty passengers; one on the Pennsylvania road by which a sleeping car was thrown down a forty feet embankment with various injuries to passengers; one on the Lake Shore road, under a baggage car, and one on the Hannibal and St. Joseph Railroad by which two cars were thrown off a bridge, killing one passenger and wounding quite a number seriously.

When we consider the caution used by railroad companies to prevent publicity being given to these cases, can we doubt that but a small proportion of the accidents that occur through defects in rails, axles and wheels, come prominently before the public eye.

Probably not less than 10,000 *broken* wheels are taken out from under cars and engines on our roads in a year, most of them discovered to be defective in time to prevent accident.

The responsibility of purchasing a car wheel to whose perfection of make human life is intrusted, is a grave one; and we think the fact that some thirty car wheel establishments, most of them manufacturing nothing else but wheels, are supported by the incessant demand for wheels arising largely from the failure of wheels in use is of itself an indication that perfection is far from being attained in this difficult and delicate branch of manufacture.

We propose to go into this particular department of manufacturing and see how much light can be thrown upon this point. We believe that the subject is susceptible of illumination, and we have gathered up a few items of information which will interest almost any man who has given thought to the modern improvements and necessities for improvement, and we think point out a remedy for this serious defect in railway equipment. We propose to discuss first the *requisites of a safe car wheel*.

They are these: just two points being desired; 1st long wear and 2d safety, requiring 1st a deep chill and 2d a tough centre. The methods in use to attain these points are: the selection of strong irons, usually we believe warm blast charcoal irons; the casting of these irons properly mixed with a proportion of high hard numbers of pig into a single piece; so that the iron forming the disc or tread of the wheel where the friction from rail and brake comes, is chilled by cooling in contact with iron; while the rest of the wheel is cooled or moulded in sand. The result is an enamelled tread harder than steel, and a gray iron plate and hub *which needs the element of toughness to make it safe* against fracture in cooling and in use.

TREATMENT AFTER CASTING.

After casting, ordinarily, the wheels are placed in pits where they are covered up to cool gradually, three or four day's time being allowed for cooling. In cooling, as in casting, many of them chill crack *i. e.* they contract unequally and fracture in the process. No doubt many wheels that do not show a fracture or any signs of it until in use, have a strain in their texture quite near the cracking point. A. Whitney & Sons of Philadelphia, re-heat their wheels with an anthracite fire. This re-heating they claim enables particles to so adjust themselves as to relieve the casting of its strain. How far this is accomplished the experience of many years on many roads must determine. If these wheel *do not break*, the manufacturers may congratulate themselves, and their customers will certainly appreciate the advantage of a process which consists in prolonging the heat with an anthracite fire. To our minds we are not able to discover any chemical principles involved in this process, which essentially change the character of the iron unless the small proportion of sulphur which anthracite coal contains, does so obviously not however for the better.

Some other car wheel makers use charcoal, throwing a portion of charcoal upon the wheels while the wheels are hot. One manufacturer has gone so far as to patent the process of roasting his wheels with a considerable quantity of charcoal, not daring however to carry his re-heating to a very high point for fear of destroying his chill.

To our mind none of these processes, (viz: cooling in sand, cooling in a close pit, re-heating with anthracite fires, dashing on more or less charcoal) are scientific and practically successful. Not one of these manufacturers but has every year to re-place many broken wheels or at least to hear of breakages and accidents, which he shudders at one little moment and puts out of his mind as soon as possible, powerless seemingly to prevent their recurrence.

We say it unhesitatingly that the number of breakages of wheels on our railways is very great compared to what it should be.

The difficulty is just this: Use what irons one may, even the strongest known, and if a wheel is cast so as to secure a soft, tough, safe, centre; the tread has to be cheated of its chill; on the other hand, give a deep chill ½ to ¾ of an inch, and the plate must needs be hard and brittle and dangerous. No car wheel maker has ever succeeded in so mixing irons as to secure a *deep* chill and a *soft* centre, in the same casting.

Now

WHAT IS NEEDED

is this. To have a chill so deep that it will not scale off or drive back into the gray iron. Three fourths the wheels that fail, fail on the tread. The chill is only ¼ to ½ an inch, at some points less. At some point in the periphery a porous place exists just underneath the chill. The chill

drives down into this porous cell and the wheel is useless at once. Deepen the chill, mix hard irons, put in a ½ to ¾ inch chill, and the liability to scale off or crush down is reduced to the lowest possible point.

In giving this depth of chill, however, we find our wheel so hard it cannot be bored, and if bored it would be very liable to crack with the first sharp concussion.

What is needed is some method of protecting the deep chilled tread while the centre of the wheel is malleableized.

The carbon existing in the casting must be to some degree extracted if possible from all points except the tread. Decarbonization is well understood by all who have examined the process of making malleable iron. The process consists in raising the iron to be malleablized to a certain point of heat at which point it releases its carbon. At that point animal carbon in various forms red oxide of iron and other chemical agents being applied, act as a sponge to draw to the surface the carbon in the iron. This result can be attained in a large casting though not of course to so great an extent as in small pieces of iron. The result of decarbonization is a softening of the iron, rendering it malleable. We have seen pieces of wheel drawn out in a forge after annealing by this process until the piece was reduced to one-fourth its original thickness without cracking any more than an inferior kind of wrought iron.

The same wheel was chilled on the tread ¾ of an inch. Nothing can be more absolutely certain than that a deep chilled wheel will wear many years nor that a malleable or semi-wrought iron plate is vastly stronger than a cast iron unannealed plate.

We cannot of course aver that these two requisites can be so uniformly blended in one casting of strong pig irons as to produce uniformly superior results, but it is not difficult for any one to believe who is at all conversant with iron working, that a malleable plate is comparatively proof against fracture, nor that a deep chill will wear longer than a light chill.

Experience, the actual use of decarbonized wheels must determine the question of their superiority. Considering the great need that exists for something better than the best now in use, we think it strange, if when a decarbonized wheel is offered to the purchasing officer of any railroad company, with evidence that the wheel is a deep chill and soft plate combined, investigation and trial should be refused. A trial of 100 of these wheels distributed under engines, coaches and freight cars will injure no one certainly, for the only question can possibly be one of comparative merit; whether the new wheel is stronger and wears better than the old one.

The Union Car Wheel Company, in the business for the past 15 years, with nearly 10,000 of their old make on the Erie Railway, commenced malleablizing their wheels in May 1866. During the summer and fall they put in use on 46 different roads nearly 5,000 of the new wheels.

The reports they are receiving after a winter's trial, seem to establish the perfect success of their improvement.

On the Central New Jersey Railroad, out of between five and six hundred wheels not one has been as yet condemned, while in the same period every other make has shown the usual amount of failure.

On the Morris and Essex Railroad out of 644 wheels but five have failed from an imperfection in the process of annealing which was remedied immediately after these (which were the first) wheels were made.

On the Pennsylvania Railroad 250 are running without a failure. On the Cleveland and Toledo, on the Michigan Southern, on the Boston and Lowell and many other Northern roads, and on several Southern roads not one failure is as yet discovered. *Not one wheel has as yet broken in the plate.* The failures out of 5,000 wheels from chipping off pieces of the tread in the frogs, and from all causes does not amount to one per cent. of the whole number in use.

On the Chicago and Rock Island, under the extraordinary weight of the Palace Sleeping Coaches, eight wheels to a coach, the wheels, weighing 70 lbs. less than the unannealed old style wheels, are standing through the severe winter without a failure, and they are the first wheels that have stood under those cars.

The officers of several of the most important Northern roads formerly purchasing from the Union Car Wheel Company, and who have for nearly a year withheld their orders for the new wheel, preferring to let others test it, have now become fully satisfied of the value of the improvement and have recommended large purchases.

So that at last we seem to have a car wheel in actual use that is a safe wheel.

We believe fully from an examination into its merits and from the record thus far made, that our railroad managers would do well to order a quantity of these wheels, sufficient to give them a full and fair trial, and that it will be found that they can be run with a total failure of less than five per cent. in the first years running, and from the depth of the chill ten years will prove to be not too high an estimate for their wear under freight trains.

Quincy Mining Company.

The product of this mine for 1866, as prepared for shipment, was 138 tons of mineral, which yielded 83.50 per cent., or 2,114,220 lbs. of copper, valued at $661,107 11. The running expenses at the mine, building and construction account, were $610,883 25—leaving the profits of the year's business $50,223 86. The balance of cash assets on hand over liabilities amounts to $200,554 67. In addition to which there is the special reserved fund of $50,000 set apart as endowment of insurance and repairs account, and secured by mining supplies and materials, worth to the company, at a fair appraisement, $113,000. The running expenses at the mine include the cost of all work done on the side hill adit during the year, amounting to $13,356 97. It is proposed to drive this adit through, with the view of eventually reaching the Pewabic lode, as the best and most economical mode of fully proving the value of this portion of the company's property, as it can be done at small cost.

A main engine, working from the surface to the ninety fathom level, has been built during the year at a cost of $17,448 39, and affords easy access to the bottom of the mine.

The average force employed during the year is 598 and the directors state that with the same amount of labor the average production can easily be maintained the present year, and it is hoped at a still further reduction in cost.

Dubuque and Sioux City Railroad.

The earnings of this road for the year ending December 31st, 1866, were:

From passengers		$228,542 67
" freight		560,322 63
" express		9,568 10
" mail		6,322 69
" miscellaneous		515 10
		$805,271 19
Expenses, viz:		
Repairs of road	$129,455 88	
" bridges	15,536 44	
" buildings	6,026 39	
" engines	51,140 36	
" cars	44,208 95

Stores for stations and trains	4,880 01	
Train hands	16,604 24	
Locomotive running	79,792 94	
Loss and damage	4,935 27	
Elevation of grain	15,997 35	
Telegraph supplies and repairs	1,649 95	
Insurance	2,853 35	
U. S. tax on gross receipts	12,804 65	
State tax on do	8,148 56	
General management	17,829 05	
Miscellaneous	13,693 43	
	$459,123 80	
Less received for operating C. F. & M. R. R., sale of old material, &c.	9,379 53	
		449,743 77
Earnings less expenses		$355,527 42
Permanent improvements	$31,346 48	
Interest account	101,426 40	
Taxes on lands, etc.	16,015 66	
New equipment	70,304 55	
		293,019 09
Balance		$136,484 33
Add balance from previous year		16,689 76
Amount subject to dividend		$153,124 09

The second division of the road, from Cedar Falls to Iowa Falls, was opened for business on the 15th of April last, but was not fully completed until the 1st of June. That part of the road is in excellent order, and is really the best part of the road. The cost of the second division, exclusive of rolling stock, has been $935,136 05, an average per mile of $21,497 38.

The total cost of the 142½ miles already built, and equipped, is $5,412,194 98, or $37,980 82 per mile, viz:

Dubuque and Pacific bonds outstanding	$4,000 00
Preferred stock	1,988,170 65
Common stock	1,673,952 66
Bonds on the 100 miles	300,000 00
First mortgage construction bonds.	660,000 00
Land notes	150,000 00
Floating debt	198,813 36
Dividend scrip	310,142 76
Scrip to be issued for dividend of 1866	132,115 55
	$5,412,194 98

The population of the eight counties intersected by the road, was in 1865, 82,891; the total estimated area of these counties is 2,904,000 acres, of which 526,101 acres, or 18 per cent., was cultivated land. The report says:

There yet remains to be acquired of the land

granted by Congress 607,900 acres. These lands will revert to the United States unless the road shall be completed to the Missouri River by the 15th of May, 1868, or an extension of time be allowed by Congress for the completion. I think there will be little difficulty in obtaining such extension of time provided that Congress shall be satisfied that the parties who undertake it will push the road to completion without further delay or extension of time; but it is now too late to get an act passed at this session of Congress.

The Sioux City and Pacific Railroad from Sioux City down the left bank of the Missouri River to Desoto, a distance of 68 miles, thence crossing the Missouri 32 miles to Fremont, at which point it connects with the Union Pacific Railroad, has been put under contract and sufficient stock subscribed and means provided to build the road during this year. Your road when completed to the Missouri River will connect with that road at Onawa. If the parties controling the two roads can act in concert so as to secure a through route from Dubuque to Fremont it will very largely add to the ultimate value of your road. The distance from Iowa Falls to Onawa is about 150 miles.

Since the last annual report this company have leased the Cedar Falls and Minnesota Railroad, constructed a distance of 14 miles from the junction to Waverly, and to be constructed 62 miles from Waverly to the State line, for forty years from the first of January, 1867, at the rent of $1,500 per mile, and the further rent of 35 per cent. of all gross earnings exceeding $3,500 and not exceeding $7,000 per mile per annum, and 30 per cent. of all gross earnings exceeding said sum of $7,000 per mile per annum.

This road has already been a valuable contributor in bringing business upon your road. Waverly receives and forwards more freight than any other station west of Dubuque.

The Eldorado Railroad and Coal Co., has been organized for the purpose of constructing a branch road from Ackley station to Eldora, a distance of 15½ miles.

During the past year there have been put into the road bed, 47,355 new cross ties, 15,532 feet of new iron, and 1,863 repaired rails; 13,442 feet of side track have been built, and the road bed drained by good ditches on either side. The entire road is now in good condition from Dubuque to Iowa Falls. The rolling stock, bridges and other structures have been maintained in good repair.

INCOME ACCOUNT.

Balance, January 1, 1866	$153,222 87
C. F. & M. R. R., for operating road in 1865	4,602 91
Balance to credit earnings 2d Division Jan. 1, 1866	4,426 75
Gross earnings for year 1866	805,271 19
	$967,523 72
State tax for year 1865	$6,409 77
Dividend declared on earnings of 1865	139,153 00
Expenses for year 1866	598,532 31
New engines paid for in 1866	44,423 10
" cars " 1866	25,881 45
Balance to credit	153,124 09
	$967,523 72

The company have received during the past year 3 new first class locomotives and 50 new freight cars, also 10 partially new freight cars from the C. F. & M. R. R. Co., making the present equipment as follows: 14 first class and 2 second class locomotives, 9 passenger, 3 baggage, 2 mail and express, 141 box, 20 stock, 38 platform and 7 way cars.

No additional equipment will be required until the business is largely increased.

The number of miles run by passenger, freight and construction trains, was 319,880. Number of passengers carried, 106,058; do., carried one mile, 4,874,691. Tons transported, 132,729.

President.—M. K. JESUP.

Directors.—Isaac H. Knox, Platte Smith, M. K. Jesup, L. P. Morton, D. Willis James, Charles L. Frost, James Robb, H. L. Stout and Theodore Roosevelt.

Vice President.—PLATTE SMITH.

Secretary and Treasurer.—LOUIS BOISOT.

Baltimore and Ohio Railroad.

The regular monthly meeting of this Company was held in Baltimore on the 14th inst. The Committee on Transportation reported a resolution reducing the rate of transportation on coal from Cumberland and Piedmont to Baltimore 30 cents per ton, and on gas coal, and from Newburg, Fairmont and Clarksburg 50 cents per ton; also a corresponding reduction of way rates for coal upon the road and branches, all of which to take effect on the 18th inst.

The President stated, in connection with this subject, that, contrary to general expectation, during the last season the necessaries of life had continued at high prices, and consequently there had been no decline in the price of labor.

The cost of materials and labor, and of the working expenses of the road generally, was still very high, and such as did not justify any reduction in the present moderate tariff. But as the prospect for a reduction in the cost of living had improved, and it was the earnest desire of the Company to aid the manufacturing, steamship, and all the great interests which would be benefited by a reduction in the price of coal, he was prepared to advise the adoption of the report of the committee. He hoped the Company would, at an early day, be enabled to reduce its expenses, and with its largely improved facilities, by its increased double track, and with its immense equipment, accomplish a large increase in this highly important traffic.

The rates from Cumberland to Locust Point shipping wharves will be reduced under the resolution from $3 to $2.70 per ton, and from Piedmont to the same point from $3.35 to $3.05 per ton.

It will be noticed that these rates reduce the transportation to the low figure of 1½ cents per ton per mile.

After some further discussion the report of the committee was adopted.

Montpelier and St. Johnsbury R. R.

We learn that the projectors of this new enterprise are meeting with considerable encouragement, and that a corps of engineers have been for some time in the field surveying the route. Several spirited meetings have been held in the towns along the line and able addresses made. The meetings were largely attended, and to that extent, at least, there is evidence of a lively interest among the people upon the subject. That the leaders in the enterprise mean success cannot be doubted. They have subscribed heavily to the stock and all their movements are characterized by such candor and zeal as to give the impression that they are in earnest. The construction of this road would open a section of country, between central and eastern Vermont, to railway facilities, which, without it, must forever depend upon the stage-coach and the two or four horse teams for carrying the mails and the merchandise. Should the people respond liberally to the call to be made upon them, the work of construction will soon be commenced.

Dubuque and Sioux City Railroad.

The result of the conference in New York between the representatives of the Illinois Central and Dubuque and Sioux City Railroad Companies, in regard to the leasing of the latter road, have been waited for with intense interest by our citizens and the people west of us, who have been well informed by us of the condition of the negotiations from time to time. A few weeks ago the negotiations were dropped, and the public mind rested for a week or so, when the matter was again taken up by the New York parties, who have been considering it ever since. But the question, it is understood by railroad men here, is settled at last for at least several months, if not forever.

Yesterday letters were received here from New York, which more than intimated that the Central folks have at last given up all notion of leasing our road at least for the present. We learn that at the New York Conference the points of objection raised by the Central men were "explained away," and the lease was considered a sure thing, when the Attorney for the Central raised one point which could not be thus disposed of. He said that he had carefully examined the Constitution of the State of Iowa, and consulted the authorities on the subject, and that he had come to the conclusion that the Legislature of the State has the power to regulate railroad tariffs within its limits. This being so, in view of the strong movement being made in Dubuque and elsewhere to secure legislative interference, there was nothing to be gained at present by leasing the Sioux City road.

This was a ghost that "would not down," and negotiations were abandoned.—*Dubuque Herald.*

Bridging the Mississippi.

We learn from the Chicago *Republican* that it is the intention of the corporators of the Illinois and St. Louis Bridge Company, chartered at the late session of the Legislature, to commence operations as soon as practicable. The bridge will be one of the grandest works of engineering on the continent. It will cost not less than five million dollars; will be built of iron after the latest and most approved designs, and will be placed at a sufficient altitude to allow the largest steamers to pass under it at high water. Mr. L. B. Boomer, of Chicago, will have supervision of the work. Several other bridges across the Mississippi were chartered by the late Legislature—among them, one at Hannibal and one at Alton—besides legalizing the company already formed to bridge the river at Quincy. Additional time was also given for the erection of the bridge at Dunleith.

Coal Carrying Water Lines in Pennsylvania.

The following statement from the *U. S. R. R. & Mining Register*, exhibits the relative coal tonnage of the six great Artificial Water Lines of Pennsylvania for the last two years:

	1865.	1866.
Monongahela Navigation	1,411,421	1,521,617
Delaware and Hudson Canal	812,094	1,391,674
Schuylkill Navigation	1,022,740	1,296,357
Lehigh Canal	888,784	1,066,303
Pennsylvania Railroad Company's Canal, main division	422,805	603,975
Wyoming Canal	329,124	463,642
Total by six lines	4,886,968	6,343,568

Some of the canals are already open; and in a few days more all the water lines leading into the state will again be in operation. Meantime, the depression in the coal trade continues. The rates for transportation are lower than the rates of last year, and the drawbacks are also greater, from which causes the profits of the carrying lines will of course be diminished. In some of the mining districts, too, the production is much below the production for corresponding time last year, whereas, on the other hand, the Delaware, Lackawana and Western Railroad exhibits an increase to date, over 1866. Altogether, the condition and the prospect of the coal market, for the spring months at least, are especially unsatisfactory.

☞ Nearly 35 miles of the Delhi (India) Railway had been completed on the 31st of December last. The total plate laying required for the main line covers 304 miles, 59 chains, and 41 links, and that for station yards and sidings 41 miles and 71 chains, forming a total of 346 miles, 50 chains, and 41 links to be constructed.

New Orleans, Opelousas and Great Western Railroad.

This road, which had been held possession of by the United States during the war, was returned to the company on the 1st February 1866. The report of the company for the year ending December 31, 1866, therefore covers only eleven months.

The gross earnings for this period compared with the gross earnings for the whole year 1860 were as follows:

	1860.	1866.
Local passenger earn'gs.	$115,601 69	$143,915 95
Local freight	221,907 44	222,164 70
Texas passengers and freight	123,412 74	43,856 61
U. S. mail service	16,000 00	4,804 15
Total gross earnings	$481,921 87	$414,741 41

The operating expenses were as follows:

Machinery department	$73,670 40	
Maintenance of way	75,263 61	
Transportation	65,767 56	
		214,701 57
Earnings less ordinary expenses		$200,039 84
Or deducting items not chargeable to current expenses		45,572 57
There remains to credit only		$154,466 27

The Texas business was for only about 4½ months, the steamship connection not having been established until about the middle of August; and the earnings have been adversely affected by the opposition steamship lines running by the river. The agreement for conveying the mails commenced only on the 26th May, and then at half rates paid in 1860 for similar service.

The miles run by passenger and freight trains in 1860 was 108,204, and in 1866, 105,960, and the gross earnings per mile were in 1860 $2.67, and in 1866 $3.91. In the passenger traffic there were carried in 1860, local passengers 44,679, and Texas 28,783, while in 1866 the respective numbers were only 38,103 and 6,831. The principal articles freighted were as follows:—sugar 2,574 hhds., molasses 4,849 bbls., cotton 7,108 bales, cotton seed 4,121 and seed cotton 2,789 sacks, moss 2,840 bales, hides 4,532, barrels 4,802, wood 2,211 cords, lumber 2,032,570 feet, beeves 14,595, yearlings 5,773 calves 11,059, sundries 18,304 barrels, &c.

The following table gives the inventories of locomotives and cars on the road July 1, 1862, when the property was seized by the United States, of February 1, 1866, when the property was returned, and on the 31 December, the close of the financial term:

	July 1, 1862.	Feb. 1, 1866.	Dec. 31, 1866.
Locomotive	12	9	10
Passenger cars	14	5	7
Baggage "	5	..	2
Express "	2	..	..
Box "	95	9	37
Platform "	76	32	55
Stock "	28	1	24
Wood "	..	..	8

Beside the above, under date Feb. 1, a considerable amount of truck-irons, &c., were returned. The whole of the rolling stock was found to be in bad order or broken, except 16 platform cars. The rolling stock at the close of 1866 is reported "all in good order."

The receipts and expenditures of the company on all accounts for the 11 months ending December 31, 1866, were as shown in the following statement:

Cash received from former Secretary.		$129 38
Stock		921 77
Gross earnings from passengers and freight		366,080 65
Gross earnings Texas business		43,866 61
Mail service		2,804 15
Gretna property		2,142 94
First mortgage construction bonds		301,600 00
Southwestern Telegraph Co.		8,000 00
Raceland station		396 10
Charges, new account		2,628 26
Bond No. 137 city of N. O		800 00
Bills payable, new series		31,014 94
G. W. R. Bayley		750 00
Texas business		43,866 61
Pay rolls		21,049 91
Total receipts		$782,174 71
The disbursements were as follows:		
Interest		$30,691 69
Discount on Construction Bonds	$37,440 40	
Interest on Construction Bonds	134,824 13	
		172,264 53
Maintenance of way		119,009 01
Expenses		36,547 06
Operating accounts		199,378 41
Bills receivable, new series		1,429 47
Bills payable		86,573 06
Sundries		1,055 57
Atchafalaya obstructions		9,022 95
Interest coupons in suspense		24,560 00
Wm. T. Steiger		4,992 00
U. S. Government		58,562 80
Balance (including $8,715 38 freight dues)		38,085 16
Total disbursements		$782,174 71

The total balance on hand as per treasurer's report of December 31, 1866, was $208,209 91

The financial condition of the company at the close of the year, as exhibited on the Balance Sheet, is shown in the following statement:

Capital stock		$4,093,425 00
First mortgage construction bonds.		1,730,600 00
Passengers	$922,986 50	
Freight	1,607,941 59	
Texas business	43,856 61	
Mail service	69,845 51	
Do., new account.	2,804 15	
Express account	5,285 37	
		2,652,719 73
Pay rolls		21,049 91
Bills payable, old account		86,573 06
" new series		31,014 94
Southwestern telegraph		8,000 00
Sundry accounts		5,410 90
Total		$8,628,793 54
Against which are charged:		
Construction 1st grand division		$2,355,884 39
" 2d 3d and 4th division.		343,512 46
Rolling stock		551,217 97
Machinery department.	$66,360 22	
Maintenance of way	797,935 90	
Depots and stations	287,902 67	
Bridges	116,490 80	
		1,268,689 59
Expenses		297,252 91
Transportation		1,066,221 66
Discount on State bonds.	$25,300 26

Cash, incl. $54,207 63 in Conf. notes.		62,381 63
Total		$8,628,793 54

New Orleans, Jackson and Great Northern Railroad.

The earnings and expense account of this company for the year ending November 30, 1866, as shown in the annual report, just received at this office, gives the following results:

Passenger earnings		$426,760 49
Freight "		1,090,953 02
Mail " (on account)		15,329 02
Total earnings on all accounts.		$1,533,042 53
From which must be deducted—		
Maintenance of way	$510,020 35	
Conducting transp	260,473 79	
Motive power	249,815 92	
Maintenance of cars	81,247 69	
Stock damages	7,628 92	
Repairs of depots and station buildings, &c.	22,325 77	
Judgments and cost, for personal injuries.	15,262 20	
		1,146,774 64
Balance—net earnings		$386,267 89

The railroad owned by this company extends north from New Orleans to Canton, Miss., a distance of 206 miles. It was one of those southern railroads which suffered largely during the late war both on account of direct destruction and the decay incident to time and neglect. Since the close of hostilities, however, the company have steadily and persistently labored in restoring and restocking the road, and have succeeded in placing it in a satisfactory condition. The rolling stock is also much enlarged since the close of the year 1865, 11 engines, 12 passenger cars, 6 baggage cars and 164 freight cars having been added thereto, and since Jan. 1, 1866, the company have made further additions of 4 passenger and 30 flat

cars. Most of these necessary repairs and renewals have been paid for from earnings.

The receipts and expenditures on all accounts for the year named above were as follows:

Cash balance on hand Dec. 1, 1865.		$120,287 97
Capital stock—County subscriptions (cash)		30,552 93
Bills receivable for Miss. stock subscriptions	$8,789 11	
Second series mortgage bonds	241,000 00	
Proceeds of cotton sold	26,894 79	
		278,683 90
Foreign railroad balanc's.	$39,296 49	
Real estate	76,171 45	
Pay rolls	13,254 88	
		128,722 82
U. S. Government—purchases		100,150 26
Railroad earnings for year 1865–'66		1,533,042 53
Receipts from all sources		$2,191,440 41
Against which have been charged—		
Construction	$84,160 44	
Less graduation—credit.	1,907 96	
		82,254 48
Bills payable, coupons, interest, discounts, commissions, taxes, &c.		462,212 97
Current accounts		142,978 25
Engines, cars, machinery, tools, &c.		325,979 04
Operating expenses		1,146,774 64
Cash on hand, November 30, 1866		31,243 03
Total disbursements for 1865–'66		$2,191,440 41

The financial condition of the company, as exhibited on the general balance sheet, will be seen in the following statement:

Capital stock		$4,697,457 38
First mortgage bonds.	$2,741,000 00	
Bills payable	153,668 63	
Small notes payable (less $81,989 15 redeemed)	127,488 20	
Chickasaw school fund	200,000 00	
Miss. 3 per cent. fund.	20,000 00	
Second series mortgage bonds	241,000 00	
Foreign road balances, &c	42,067 35	
Due U. S. Government purchases	100,144 01	
Pay roll account	4,552 10	
		3,629,920 29
Railroad net earnings since organization		3,479,419 36
Coupons on City and State bonds collected		264,480 00
Sundry balances		18,355 80
Total		$13,387,230 03
Against which the following are charged—		
Construction		$6,184,172 12
Rolling stock and tools		1,386,874 57
Discount on city and State bonds	$456,992 62	
Discount on 1st and 2d mortgage bonds	452,307 72	
		909,300 34
Coupons and interest accounts (debt charges)		1,643,008 49
Expense, advertising, printing, commissions		283,149 11
Taxes, contingencies & law expenses		177,931 47
Slaves $8,597 10, and reduction of stock $26,093 22		34,692 32
Foreign railroad balances (old)		48,716 76
U. S. Post Office department		31,515 00
Cotton purchases		28,486 89
Confederate States' obligations		983,602 52
Sundries		31,259 75
Current accounts		315,682 41
Cash on hand, November 30, 1866		31,243 03
Total		$13,387,230 03

The following statement shows what disposition has been made of 3,000 bonds of each series named in the above account:

	1st Mortgage.	2d Mortgage.	Total.
Bonds sold and outstanding	$2,741,000	$241,000	$2,982,000
Pledged to State of Miss	200,000	.....	200,000
Canceled by sinking fund	59,000	.....	59,000
Pledged as security for notes	.....	68,000	68,000
Remaining on hand	.....	1,191,000	1,191,000
Canceled and destroyed	.....	1,500,000	1,500,000
Total accounted for	$3,000,000	$3,000,000	$6,000,000

From these accounts it appears that the total outstanding bonded debt, not including the amounts hypothecated to the State of Mississippi and as security for notes amounted on the 30th November, 1866, to $2,982,000 00

To this amount, however, must be added accrued interest on first mortgage bonds, in course of being funded in the second mortgage bonds, the sum of 1,017,160 00

Making the total bond debt	$3,999,160 00
Add floating debt (described below)	724,390 13
Total debt and liabilities	$4,723,550 13

At the date of the report $100,000 of the first mortgage bond coupons had been funded in New Orleans, and the signatures of bondholders to the amount of over $460,000 additional had been obtained for funding in London, leaving actually outstanding of the above total accrued interest the sum of $457,160, which there is no doubt of being taken up during the current year.

The floating debt of the company on the 30th November, 1866, was constituted of the following accounts against the company:

Bills payable, exclusive of interest		$153,668 63
Loans from State of Mississippi		220,000 00
Accrued interest on ditto to Oct. 1, 1866		64,000 00
Small issue (bills payable)		127,488 20
U. S. Government—balance for purchases		100,144 01
Foreign railroad balances.	$42,060 75	
Less drafts on foreign railroads	13,908 53	
		28,152 22
Pay rolls account	4,237 39	
Less amount in hands of paymaster	2,545 14	
		1,692 25
Personal accounts		29,244 82
Total floating debt Dec. 1, 1866.		$724,390 13
But since date there has been paid on account of matured bills payable, and interest on the same to date of report		28,714 61
Leaving the then outstanding floating debt		$695,675 52

The President of the company, closes his review of the condition of the company in the following remarks:

"The debt due to the State of Mississippi $220,000, and interest on the same $64,000, we hope to be able to fund or arrange in a satisfactory manner at the coming session of the Legislature of Mississippi. Nothing has as yet been done towards the settlement of the small note issue of the company $127,488 20, but we trust our receipts during this season and the next will warrant its gradual redemption.

"The total indebtedness of the company, (floating and bonded,) including all estimated interests on personal accounts and matured bills payable, cannot exceed $4,750,000, and there can be no doubt that with receipts moderately estimated at $1,500,000 per annum, we can devote a large sum towards the ultimate liquidation of the entire amount, after paying running expenses and a liberal interest on the debt, besides gradually increasing the rolling stock of the road.

"The company has a claim against the United States Government for railroad iron and other materials taken during the war, properly receipted for by the Government officers in taking possession of the same; it is hoped that the amount will be accepted by the Government in part payment of the sum—$100,141 01—due by the company to the Government, for rolling stock bought at Nashville and New Orleans since the war.

"By the above statements, it will be seen, that the monetary condition of the company is most encouraging, and that with continued watchfulness over its affairs, and economy in the expenditures of its constantly increasing receipts, the obligations of the company towards its bondholders and other creditors will certainly be met at maturity, and that, ere long, this road will become a source of profit to the States of Louisiana and Mississippi, the City of New Orleans and the other stockholders."

Patent Office Report.

The Report of the Commissioners of the Patent Office for the year 1866 state that the number of applications was 15,269; patents issued, including reissues and designs, 9,450; caveats filed, 2,723; applications for extension of patents, 67; patents extended, 58; patents expired, 1,042. Of the patents granted there were: To citizens of the United States, 9,210; subjects of Great Britain, 127; subjects of the French empire, 48; subjects of other foreign governments, 65. The receipts were: On applications for patents, re issues, &c. $460,798; for copies and recording assignments, &c., $34,867; total amount, $495,665. The amount to the credit of the fund, January, 1866 was $130,184; receipts during the year, $495,665; total, $625,850. From which deduct amount of expenditures—namely, $361,724—and there is left to the credit of the patent fund, January 1, 1867, $264,125. The surplus of receipts over expenditures during the year is $139,941.

☞ The dividend of 3½ per cent recently declared by the Morris and Essex R. R. Co., payable at their office in Newark after the 20th inst., except for amounts less than $25, will be paid in stock at par. All dividends less in amount than $25 will be paid in cash. Scrip will be issued for fractional parts of a share, which may be converted into stock by paying the difference in cash. The certificates of indebtedness issued last August in lieu of a cash dividend are also made payable in stock at par.

☞ The double track of the Delaware, Lackawanna and Western Railroad has been completed to Forks. It will be completed to the Junction at Hampton, N. J., at the earliest practicable moment.

American Railroad Journal.

Saturday, March 23, 1867.

Stock Exchange and Money Market.

The Money Market has been devoid of any features of novel interest, since our last. The supply of capital, especially with private lenders, has been steadily gaining on the demand for accommodation; though the city banks have been losing currency chiefly through the temporary withdrawal of country bank balances, preparatory to the making up of the required official exhibit of the condition of the latter institutions; and have been losing specie mainly through the customs drain. Not only have the city banks had this experience, but similar influences have been operating on the currency reserve of the Philadelphia, and we believe, of the Boston Banks. The loss, however, is likely to be repaired in the course of the next few weeks, and the local banks feel confident that, in the meantime, there can be no serious, indeed no perceptible disturbance of the prevailing ease in money, which is available in round sums on call to the Government houses at five, and to the leading Stock Exchange firms at six per cent. Prime short date commercial paper has been less freely offered through the discount brokers, and has met with more favor at bank and through private channels, at 6½@7 per cent. per annum. The Government has been disbursing currency pretty freely through the week, partly in redemption of the outstanding Seven-thirty notes of the first, or August issue, which will mature in less than five months, and which the Treasury officials are sturdily withdrawing, either by direct purchase, or more generally, by the conversion process; to which most of the Government banking houses throughout the country are now giving every possible aid. The changes in the city bank statement as compared with the preceding exhibit have been as follows: Increase of loans, $931,514; decrease of specie, $899,460; increase of circulation, $80,875; decrease of deposits, $2,234,723; decrease of legal tender notes, $1,710,401. The specie reserve of the banks is now $9,968,722, against $15,015,242, same time last year. The city bank deposits are now $197,958,804, against $185,438,707 week ending March 17, 1866. The legal tender reserve amounts to $62,813,099, against $68,402,764 same time last year. The circulation now stands at $33,490,686, against $23,303,051 same time last year. The loans are now $263,072,976, against $232,517,378 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $82,423,135 a day, against a daily average of $90,695,542 the preceding week, and $77,689,080 the week ending with March 2d. The current week's exchanges average about $78,569,372 a day.

The main changes in the Philadelphia Bank footings, last week, were as follows: Decrease of loans, $1,313,169; decrease of legal tender reserve, $569,062; decrease of deposits, $2,488,671; increase of specie, $25,867; and increase of circulation, $8,853.

National Bank notes to the amount of $283,150 were issued last week, making the total issue to 1,663 banks thus far $302,176,150, against $282,555,440 at the close of the last fiscal year, June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $3,272,437, leaving, with the existing 1,648 banks, an actual circulation at this date, of $298,903,784. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,532,450; and for the public deposits, $39,911,450—making a total of $379,543,900. The Treasury Department, last week, redeemed and destroyed over $380,000 of worn and mutilated fractional currency, and issued $819,411 worth of new.

The U. S. Sub-Treasury receipts, week ending with March 16, were $16,772,354, including $2,877,563 from customs duties; payments, $17,346,144; balance at the close of the week, $111,661,266, against $112,235,056 at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $7,147,843, and payments, $7,152,781; on Tuesday, receipts, $2,777,742; payments, $2,357,915. The balance at the close of business on Tuesday stood at $111,576,156, against $113,969,371 a week previous.

The cash balance in the hands of the Assistant Treasurer in Boston at the close of business March

16, was $10,864,991—$9,195,281 of which was in coin—showing a decrease of $166,760 as compared with the close of the previous week. The amount received for customs during the week was $347,000.

Government revenues were on a somewhat contracted scale, last week. The excises, last week, yielded over $2,316,436, against $4,190,628, the preceding week; customs at the port of New York, $2,877,563, and at the outports, about $950,000 (in coin) more, making the grand total income for the week equal about $7,484,000 in currency, against disbursements of $4,608,284 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $210,000,000.

The internal revenue of the Government in each of the last two years was as follows:

	1865.	1866.
Manufactures and productions	$104,379,609 56	$178,366,691 37
Slaught'd animals	1,261,357 09	1,291,570 51
Various gross receipts	8 891,874 14	10,092,707 59
Sales	4,062,243 54	4,002,282 91
Licenses	12,613,478 67	18,038,097 71
Income	20,740,451 33	61,071,932 25
Legacies and Successions	546,703 01	1,170,978 85
Carriages, plate, etc	780,266 58	1,693,122 73
Passports, etc.	29,538 29	31,759 00
Special income tax	28,929,312 02	.....
Penalties	517,627 41	932,618 82
Banks, railroad companies, etc.	14,385,606 63	13,279,142 46
Salaries	2,826,333 37	3,717,394 69
Stamps	11,162,392 14	15,044,373 18
U. S. Marshals	2,735 29	210,234 38
Spec'l Treas. Agts.	.....	1,974,101 72

The gold movement of the week has been a very sluggish one, as a rule. The speculative demand has been, by no means, confident. The customs inquiry has been fair, but much less urgent. There has been no export call of moment. The extreme rates of the week have been 133¾@134¾, showing a remarkably steady market. At the ruling figures, each day's business in the Gold Room has been unusually limited. The closing prices on Wednesday was 134¼@134⅜, on a comparatively firm, though inactive market. Wednesday's specie exports from this port were confined to $4,536 by the *Cuba*. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $370,093. The customs demand for Gold last week, averaged $479,594 a day; thus far, this week, it has been equal to $125,443 a day, or equal to a weekly aggregate of $2,552,658. The arrivals of specie from Europe, Havana and other foreign ports, during the past week reached $77,854, and from California, none. The total customs revenue of the Government, in coin, at this port since July 1, 1866, has been $90,978,093, against $96,448,614 same time in the preceding fiscal year. The total receipts of California gold at this port since July 1, 1866, have been $30,458,213, against $20,645,630 same time last year, showing an increase this year, of $9,812,583. The exports of specie from this port, last week, were $244,888. The total outflow of specie from the port, thus far in the current fiscal year has been $22,765,131, against $17,282,431 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $177,700, making the total coin interest disbursements through the Government office, since July 1, 1866, $36,133,340, against $31,763,058 for the same time in the preceding fiscal year. The specie exports from San Francisco from Jan. 1, to Feb. 10, 1867, reached $5,160,000, against $4,210,090 same time last year.

The total amount of gold certificates issued and redeemed by the Sub-Treasury, together with the balance unredeemed on the 16th of March is thus stated:

	Issued.	Redeemed.	Outstanding.
20s	$285,440	$178,790	$106,740
100s	4,922,600	3,261,300	1,661,300
500s	653,500	259,000	394,500
1,000s	23,424,000	19,656,000	3,768,000
1,500s	144,875,000	121,605,000	13,270,000
10,000s	5,000,000	5,000,000	.....
Total	$179,160,540	$159,960,000	$19,200,540

There has been rather more movement in the foreign exchange, on an increase call from importers, and rates have been quite firm, and inclined to buoyancy. Bankers' 60 day bills on London closed on Wednesday at 108¾@109, and on Paris to 5.18¾@5.15; sight bills on London to 109½@109¾; and on Paris to 5.16¼@5.13¾. The offerings of produce bills have been quite extensive since our last. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $4,315,398, making the total value of exports since July 1, 1866, $123,201,757, against $157,669,853 same time in the preceding fiscal year.

Government securities have held their own, as to price quite tenaciously, through the week, despite the general dullness in the stock business, and the adverse influence of the depression and inactivity in gold. The demand has been, chiefly from home investors, especially for the later, or 1865 issues of the Five-Twenty six per cent. coin-bearing bonds, which have been on the advance. The Seven-Thirty Notes have also been buoyant in price, having been favorably by the steady progress of the retirement of the first series, through conversions into the consolidated Five-Twenties. U. S. sixes of 1867 closed here on Wednesday at 130; U. S. sixes of 1868, at 128½; U. S. sixes of 1881, 109@109¼; U. S. Five-twenties of 1862 at 109@109¼; U. S. Five-twenties of 1865 at 107¾@108; U. S. Five-twenties of 1865, consolidated, 107@107⅛; U. S. Ten-forties at 97¾@98, ex-coupon, and U. S. Seven-thirties at 105½@106⅛. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ¼@⅛ of 1 per cent. on these figures:

June, 1864 117¾	May, 1865 112¼
July, 1864 117¼	August, 1865 111¼
August, 1864 116¾	September, 1865 110¾
October, 1864 114¾	October, 1865 110½
December, 1864 113¾	

The railway and miscellaneous Stock Market has been fitfully active through the week, but the aggregate business has been by no means heavy, and prices have been quite variable for all the speculative favorites. Toward the close, though transactions in most of the share properties were on a comparatively moderate scale, the market exhibited some symptoms of firmness and buoyancy, favored as it was by the remarkably even and easy movement in money.

General business has been moderately active. Domestic produce opened very buoyantly in price, on a decidedly livelier inquiry, partly from regular home and export buyers, and partly from speculative sources, stimulated by more favorable foreign news; but at the close, transactions diminished in volume, and prices became irregular and less firm. Middling grades of cotton left off less buoyantly at 31½@33 cents per lb. as extremes. The stock of cotton now here is estimated at about 225,000 bales. The receipts at the port this week, have averaged nearly 2,500 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 453,000 bales, against exports of 251,628 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 1,423,000 bales against 1,545,830 bales same time last year; exports, 803,225 bales, against 913,835 bales same time last year; estimated stock at latest dates, 610,000 bales, against 523,000 bales same time last year. In foreign merchandise, the main business was transacted in dry goods and groceries, which, as a whole, were pretty freely offered on terms more advantageous to purchasers. An unusually active marketing movement was reported in the foreign dry goods line. The total imports of foreign dry goods, last week, were $2,272,278, and the total amount marketed $4,972,344. The value of foreign merchandise imported last week, was $2,329,422—making the grand total specie value of last week's imports of dry goods and merchandise, $4,601,700, and since July 1, 1866, $183,477,333, against $209,564,883 same time in the preceding fiscal year. The ocean freight market has been less active, with 448 vessels of all classes in port. For Liverpool we quote flour at 2s.@2s. 3d. per bbl.; grain at 5½@6d. per bushel; cotton at $\frac{5}{16}$@$\frac{11}{16}$d. per lb.; and heavy goods at 17s.6d.@30s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	March 5.	March 13.	March 20.
Consols	91	90¾	91
U. S. 5-20's of 1862	73¾	74¼	74½
U. S. 5-20's of 1865	72	72½	72¾
Erie	36	39¾	40¼
Ill. Central	76½	78	78½

The New York exports, exclusive of specie, for the week ending March 19, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$5,091,287	$4,835,398
Prev. reported	45,700,430	37,279,964
Since January 1	$50,791,717	$41,595,362

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$3,183,369	$2,272,278
Gen. merchandise	2,226,509	2,329,422
Total for the week	$5,809,878	$4,601,700
Previously reported	61,670,807	47,942,601
Since January 1	$67,480,685	$52,544,301

The commerce of New York from July 1st to date compares as follows:

	1865–'66.	1866–'67.
Imports merchandise	$209,564,883	$183,477,333
Exports produce	157,669,853	123,201,757
Exports specie	17,282,431	22,765,131

The balance in the Sub-Treasury on Wednesday was $112,409,069 43.

Missouri State Debt.

We give elsewhere a copy of the act recently passed by the Legislature of Missouri to provide for the payment of the interest upon the State Debt. After reserving for certain specified purposes, $2,000,000 of the money appropriated by Congress to reimburse the State for war expenses, the remainder, $4,000,000, and upwards, is appropriated to the payment of overdue outstanding coupons in the order of their maturity. The overdue coupons not thus provided for will be taken up, and six per cent. interest bearing bonds given therefor. Six hundred thousand dollars is appropriated to pay the interest falling due on the 1st of July, 1867, and a tax of four mills on the dollar levied to meet the semi-annually accruing interest thereafter. Provision is made that in case the money should not be in the Treasury to meet this interest as it falls due, temporary loans to raise the money may be effected therefor by the interest fund commissioners. Thus it will be seen that every possible means for the restoration of the State's credit has been employed and incorporated in the bill.

Genesee Valley Canal.

The Mc Kean *Miner*, published in the heart of Mc Kean County, Penn., and in the mining region, says that "if New York will make the Genesee Valley canal what it should be then private Pennsylvania enterprise would extend this great improvement into the heart of Mc Kean, Elk, and Cameron Counties, and during the canal season, despite all the railroads, the Valley canal would become the carrier of the coal of that region of Central and Western New York, the lakes and Canada. It argues that the transportation from that region of lumber and iron is greatly to increase, and that the Valley Canal would undoubtedly be one of the chief means of conveyance."

☞ The time for building the Philadelphia and Baltimore Central Railroad has been extended by the Maryland Legislature to 1873. The bill requires the road to be commenced at Stemmer's Run within a year, and six miles to be built each year thereafter. The road is to pass not more than one mile from Belair, and to cross the Susquehanna river at or near the former mouth of Deer Creek.

☞ The following gentlemen have been elected directors of the Pittsburg and Connellsville Railroad for the ensuing year: President, John A. Wright; Directors, Thomas A. Scott, Josiah Bacon, John M. L. Kennedy, Wistar Morris, Edw. C. Knight, J. L. Russell, G. W. Cass, D. R. Davidson, D. C. Small, John D. Reddy, Ashbel Green, A. K. M'Clure.

Railroad Earnings.--Weekly.

The earnings of the Grand Trunk Railway of Canada for the week ending Mar. 2d, 1867, were $128,901 00
Corresponding week of previous year. 126,026 00

Increase $2,875 00

The earnings of the Detroit and Milwaukee Railroad for the second in week March, 1867, were $30,071 00
Corresponding week of 1866..... 27,250 00

Increase..... $2,821 00

The earnings of the Chicago and Rock Island Railroad for the 2d week in March, 1867, were $57,865 00
Corresponding week of previous year.. 58,400 00

Decrease $535 00

The earnings of the Western Union Railroad for the week ending March 14, 1867. . $8,146 80
Corresponding week previous year.... 9,661 34

Decrease..... $1,514 54

The earnings of the Chicago and Northwestern Railroad for 2d week in Mar., 1867 .. $167,140 48
Corresponding week previous year .. 142,821 11

Increase..... $24,319 37

The earnings of the Michigan Central Railroad for the 2d week in Mar., 1867, were... $93,633 00
Corresponding week of previous year.. 76,889 00

Increase..... $16,744 00

The earnings of the Michigan Southern and Northern Indiana Road for the 2d week in Mar. 1867, were..... $86,895 00
Corresponding week of 1866 ..... 89,390 00

Decrease $2,495 00

The earnings of the Marietta and Cincinnat Railroad the 1st week in Mar., 1867... $19,918 00
Corresponding week previous year.... 19,073 00

Increase..... $845 00

Journal of Railroad Law.

LIABILITY OF COMMON CARRIER WHERE GOODS PASS OVER SEVERAL ROUTES.

The case of McDonald *vs.* Western Railroad Company, lately decided in the Court of Appeals of this State, will be found of great interest as holding that where goods are shipped and must pass through the hands of several intermediate carriers before arriving at the place of their destination, the duty of each intermediate carrier is to transport the goods safely to the end of his route, and deliver them to the next carrier on the route beyond.

The case also decides that an intermediate carrier, in such case does not relieve himself from liability by simply unloading the goods at the end of his route, and storing them in his warehouse, without delivery or notice to, or any attempt to deliver to the next carrier.

The facts of the case appear in the opinion of the Court by

HUNT, J.—On the 20th day of June, 1861, the plaintiff's assignor shipped two boxes of marble monument, from a station on the Harlem Railroad directed to "Elijah W. Brigham, Binghamton, New York, Harlem Railroad to Albany, Erie and Chenango Canal to Binghamton." The plaintiff did not accompany the stone, and gave no other directions than those mentioned upon the boxes. The goods were received by the defendants' from the Harlem Railroad, transported to East Albany, which is the terminus of the defendants road, and deposited in their warehouse. This was on the 22d of June, 1861, and on the 5th of July, 1861, the defendants' warehouse, with a large amount of property contained in it, the property in question among the rest, was destroyed by fire. The plaintiff sues the defendants for the value of the marble thus destroyed, claiming that the liability of a common carrier remained upon them at the time of the loss. The defendants, on the other hand, contend that the carrier's liability had ceased, and they were under no greater liability than that of warehouseman, which is that of care and diligence merely.

In receiving the goods in question from the Harlem road, in transporting them upon their road to East Albany, and into their warehouse in that place, all agree that the defendants acted as common carriers, and were subject to the responsibilities of bailees of that character. When or by what act was their character as such ended, and that of warehousemen or forwarders substituted? Was it when the property was removed from the cars and placed in safe deposit in their warehouse? The cases of Thomas *vs.* Boston Railroad Co., (10 Metc., 472,) and Norway Plains Co. *vs.* Boston and Maine Railroad Co., (1 Gray, 268,) afford apparent countenance to this idea. In both of these cases, however, this important fact existed, that the place of delivery was at the termination of the carrier's road. The goods were to be delivered in Boston, and Boston was the termination of the carrying road. What would have been the duty of the carrier if the goods had required further transportaion, was therefore not in question, and not alluded to by the Court in either of those cases.

That the removal from the cars and deposit in their own warehouse did not, of itself, change the character of the defendants' liability, is established by the cases of Goold *vs.* Chapin, (20 N.Y., 259,) and Van Santvoord *vs.* St. John, (6 Hill, 167.)

Those cases hold that the carrier must perform some act, distinctly indicating his intention, to end his liability as carrier, and calculated to accomplish that result before he can cease to be a carrier, and become a forwarder or warehouseman. In the last case referred to, the defendants received the box of goods addressed to "J. Petrie, Little Falls, Herkimer Co.," with no other direction, transported it by their barges to Albany, and thence shipped it by a responsible line of canal boats on the Erie Canal, to be delivered to the consignee at Little Falls. Before reaching that place, the box was rifled of its contents. The Court held that it was not the duty of the defendants themselves to transport the property to Little Falls; that a compliance with their custom to deliver the same on board of a boat going to that place, was a performance of their duty as carriers.

In the case of Goold *vs.* Chapin, the goods were also received at New York by the defendants, a barge company, and to be transported to a place on the Erie Canal, West of Albany. The direction was to the plaintiffs, "to the care of Field & Co., Brockport, N. Y., per Atlantic line." The goods arrived at Albany on the morning of the 14th of August, 1848, and during the day following were discharged into a float belonging to the defendants, and which was used as a place for storing and delivering goods to the canal boats going West. The defendants had at the time two warehouses at Albany, one on the dock, another on the pier. On Tuesday the 15th, the defendants gave notice to the agent of the Atlantic line, requesting him to take them away. This notice was repeated on Wednesday morning and on Thursday morning. On the afternoon of Thursday, the goods were consumed while on board the float, by a fire which commenced on shore and spread among the shipping. This Court held that the defendants were liable as carriers; that the notice to the Atlantic line, and their unreasonable neglect to take the goods, did not exempt them; that to exempt themselves, the carriers must store the goods in a warehouse, or in some other way clearly indicate a renunciation of the relation of carrier. The Court held that, as there was neither a deposit in a warehouse, which would have indicated clearly a renunciation of the carrier's liability, or a delivery to the carrier by canal, which would have fulfilled the duty of the first carrier, the defendants were liable.

The defendants in the present case did no act indicating that they had renounced the liability of a carrier. They simply unloaded and deposited the goods in their warehouse. Had this deposit been made in the warehouse of a company engaged in canal transportation westwardly, it would have been an act of great significance. But here the fact is expressly found that it was the custom of the further carrier to take the goods from the defendants' depot. The liability of the further carrier did not commence until he removed the goods from the defendants' warehouse. The deposit, therefore, by the defendants, in their own warehouse, did not afford any evidence of a renunciation of the carrier's liability. The case of Ladue *vs.* Griffiths, (25 N. Y., 364,) is somewhat similar. There the defendant was a warehouseman of Buffalo, and a carrier on the Erie Canal, and used to receive freight from the West and forward it to the East by the first boat going, whether his own or that of other carriers. He received goods from Detroit, addressed to his care at Buffalo, and marked to go from "Buffalo to East Albany, at 30 cts. per 100 lbs." The presumption, the Court say, from these facts alone is, that the goods came to his possession as carrier, and having been burned while in his warehouse awaiting transportation, he is liable for their value. The goods might have gone by some other line, in which case, Griffiths would never have been a carrier at all. But they might, at his pleasure, have been placed upon his own boats, and hence he was held as a carrier. In the present case, the goods came to, and remained in the defendants' warehouse by their own act, awaiting transportation, and as a part of the contract of carriage. The goods were placed in the defendants' warehouse for their own convenience, for the purpose of, and until they should be delivered to the further carrier for transportation by canal. (Aug. on carriers, § § 131, 140; Story on railroads, 536; cited in Ladue *vs.* Griffiths, Supra.) I think the deposit in the defendants' warehouse was a mere accessory to the defendants' carriage, in which case the carrier's liability still remains. (Blossom *vs.* Griffin, 3 Kern., 569, 572,) East Albany is upon the left bank of the Hudson River,

a stream flowing down from many miles above Albany, and continues one hundred and fifty miles farther down. It was a boundary, impassible to the railroad, as no bridge then existed, and when reached, goods, whether they were to be at once shipped to the West, or whether that was their final destination, must necessarily have been unloaded in the warehouse, and left there until a barge or a canal boat should come to receive them, or they should be demanded by the owners. The defendants' liability as carrier was unbroken.

No claim is made by the defendants upon the argument and their liability is discharged by notice to the further carrier that the goods were ready for his transportation. There was no sufficient notice in the present case, and in Goold *vs.* Chapin (Supra,) the notice repeatedly given and unreasonably neglected by the further carrier was held to constitute no defense.

I am for affirmance of the judgment.

Judgment affirmed.

The Cincinnati, Hamilton and Dayton and Dayton and Eastern Railroads.

We learn from the Cincinnati *Gazette* that a contract ordered by the directors of these two companies has been executed, and needs but the assent of their stockholders to perfect it. The latter is the corporation recently organized to build what is known as the Short Line road to Dayton, and has a perpetual lease of the Sandusky and Cincinnati (formerly the Mad River and Lake Erie) Railroad. By this contract, the former company grants to the latter the perpetual right to the use of the narrow gauge tracks of the former, including side tracks, switches, water and wood stations, and depots at Dayton, Middletown and Hamilton, for as many trains, both passengers and freight, as may be necessary for the convenient transaction of its business, between Dayton and a southern terminus in Cincinnati, not further east than 600 feet east of the point of connection with the Marietta and Cincinnati Railroad, near Millcreek—the Cincinnati, Dayton and Eastern providing its own depot grounds and depot—for which an annual compensation is to be paid of $130,000, to be increased to a maximum of $150,000, in the event of a contemplated increase of business from connecting roads, and also a certain proportion of the cost of repairs of the tracks, bridges and structures used in common, according to the wheelage and mileage of each company. The use of the tracks granted to the Dayton and Eastern Railroad Company, is limited and restricted by certain conditions, of which the following are the most material:

1. The passage fare from Cincinnati to Dayton, and *vice versa*, is to be fixed by mutual agreement, and to be the same on all trains. The local fare to and from intermediate points to be fixed by the Cincinnati, Hamilton and Dayton Co. The Dayton and Eastern Company not to receive passengers at any local points, except Hamilton and Middletown, and then only upon two daily trains each way, and any local fares otherwise collected to pay over in full, and not to sell any commutation tickets to any local stations.

2. The Dayton and Eastern Company are prohibited from carrying to or receiving from, any point between Cincinnati and Dayton, any freights, but may deliver freights to such intermediate points brought from beyond Dayton, upon a pro rata division according to distance, with an allowance for mileage.

3. Each party is prohibited from competing with the other, to points local to them respectively, or reached over other roads with which they have established connections, and the rates of freight from Cincinnati or Dayton to Toledo and Sandusky, and *vice versa*, to be the same.

4. The trains of the Dayton and Eastern Company to run on such time as it may fix, subject to a limited variation by the Cincinnati, Hamilton and Dayton Company for general safety, and the speed to be limited to the usual rate on first-class roads. A Train Dispatcher, jointly appointed, directs their movements, on the prescribed regulations.

5. The Dayton and Eastern Company have the right to carry express and mail matter brought from or over the Sandusky road to all points between Dayton and Cincinnati.

6. The Cincinnati, Hamilton and Dayton Company furnishes fuel and water at actual cost.

7. The salaries of all joint employes to be paid jointly, in the same proportion, as repairs.

8. Each party to be responsible to third persons for damages occasioned by or on its own trains, and to each other, for the neglect or default of its own employes, but not for the neglect or default of joint employes.

9. The second track of the Cincinnati, Hamilton and Dayton Company, when extended, to be done of its own cost

Provision is made for a forfeiture of the right to run trains, in the event of non-payment of rent or repairs, which are payable monthly, and for a reference to arbitration of all questions that may arise under the contract or in reference to its construction.

The Dayton and Eastern Company binds itself not to construct or operate any railroad between Cincinnati and Dayton, and the Sandusky and Cincinnati Company are to become a party to its provisions. The contract takes effect upon its due ratification by the stockholders of the respective companies, and the rents to begin to accrue on January 1, 1868, or from the date when the use of the tracks contemplated shall commence, if it sooner commences.

This contract, we are advised, has been executed upon the unanimous approval of the directors of the two companies, and will doubtless receive the like assent of both bodies of stockholders. Its importance to their interests cannot be over estimated, as it must be regarded as mutually beneficial. It secures two great objects: 1st, To the Sandusky road and its connections, now or hereafter formed, the benefits of an independent entrance to Cincinnati, with all the advantages that secures for it a through line to the North and East, free to compete with all its rivals for public favor without the enormous and unremunerating outlay that would be required to construct a separate road from Dayton to Cincinnati. 2d. To the Cincinnati, Hamilton and Dayton Railroad Company, a more full and active employment of its capital, fixed in its road bed and structures, with a handsome return for its use, amounting to about seven per cent. per annum upon one-half of the cost of its construction, exclusive of the Broad Gauge track, not used by the Cincinnati, Dayton and Eastern Company, and a full and complete protection in its purely local business.

The only disappointment to be expected at this consummation, which has any appearance of being legitimate, will be on the part of those residing on the line of the proposed route, which by this arrangement is abandoned, principally the inhabitants of Middletown, Franklin, and others, east of the Miam iriver. But it is evident that the public interests do not demand the accommodation of a second road between Dayton and Cincinnati. When they do, the capital to meet the demand will be attracted by the certainty of remuneration. Any experiment in that direction now might promote certain local interests, but it would be at the expense of those who invested in a road that could pay no dividend, with great injury to the interests of others in existing investments, that might and would be greatly injured by the unnecessary competition.

The Cincinnati, Dayton and Eastern Railroad Co., to facilitate their business over the Cincinnati, Hamilton and Dayton Railroad, has contracted with the Indianapolis and Cincinnati Railroad Co. for the use of the depot and depot grounds of the latter company, in Cincinnati, at an annual rent of $85,000.

Railroad over the Hoosac Mountains.

The Hampshire *Gazette* says that the survey of the proposed road over the mountains from Williamsburg to Adams has been completed. "The highest grade is not over 70 feet per mile. The route runs up the reservoir valley toward Ashfield, then turns toward Goshen, and runs through Cummington and Savoy. The grade on each side of the mountain is about the same. It thus appears that a railroad over this route is perfectly feasible, and it needs but little discernment to see that it would be a money-making operation for the Commonwealth to relinquish the tunnel project even. and build this road. It could be done in one or two years, at about the cost of the expenses on the tunnel during that time. The subject is well worthy the serious consideration of the Legislature."

New Railroad Project.

A meeting of the citizens of Albany, Greene and Schoharie counties was held at Rensselaerville on the 15th inst., to take into consideration the building of a railroad from Catskill through the counties mentioned to Central Bridge, on the Albany and Susquehanna Railroad. It was stated that the citizens and capitalists of Catskill had pledged themselves to raise $500,000 in that village toward the construction of the proposed road, and that the other towns in Greene county would do equally well. The necessity of taking immediate steps towards locating and building a road was strongly urged, and a committee appointed to solicit subscriptions to the capital stock. The meeting adjourned to meet ot Oak Hill, Greene Co., on the 25th of April to elect officers and organize a company.

Interest and Dividends.

The Chicago, Rock Island and Pacific Railroad Company have declared a dividend of five per cent. and the U. S. Government Tax on the same, payable on the 10th day of April next.

The Cleveland and Pittsburg Railroad Company has declared a cash dividend of four per cent, payable on the 20th of April.

The Philadelphia, Germantown and Norristown Railroad Company will pay a semi-annual dividend of 5 per cent. on the first day of April next, free of tax.

☞ The Central Pacific Railroad Company of California has filed in the office of the Secretary of State an article extending the road from Sacramento to Goat Island. The surveying will commence immediately.

Commerce of Boston.

The following is a detailed statement of the Values of Imports and Exports at the Port of Boston for each month of the year 1866, together with a comparative statement of the monthly totals with those of the two preceding years:

IMPORTS.

February	17,195,507	15,452,506
Total exports 8 mos.	$145,003,623	$113,491,790

Western Maryland R. R.

We learn from the Hagerstown *Mail* that the grading on the section of this road from Union Bridge to the Monocacy, a distance of eight miles has been progressing satisfactorily. About three-fourths of the work of this distance, including difficult cuts of rocky material, has been done, at a cost of nearly one hundred thousand dollars, which amount less the percentage reserved under the contract by the company, has been paid to the contractors.

☞ It is expected that the Pennsylvania canal will be opened about the 15th of April.

Missouri State Debt.

The following is a copy of the "Act to Provide for the Payment of the Interest upon the State Debt," as it finally passed the Legislature on the 13th inst.:

Be it enacted by the General Assembly of the State of Missouri, as follows:

SECTION 1. That in pursuance of the requirements of the sixth section of the ordinance of the Convention, adopted April 8, 1865, there is hereby levied, and shall be assessed and collected for the years 1867 and 1868, a tax of four-tenths of one per cent. on the assessed value of all the real and other property subject to taxation in this State, and when so collected shall be paid into the State Treasury, and placed to the credit of the "State Interest Fund," to be applied to the payment of the interest on the State debt.

SEC. 2. That all moneys that may be received by the State of Missouri from the United States Government under the provisions of the act of Congress entitled, "An Act to reimburse the State of Missouri for moneys expended for the United States in enrolling, equipping and provisioning the militia forces to aid in suppressing the rebellion," approved April 17, 1866, after deducting $2,000,000 to be reserved for the State school fund, the seminary fund, and to pay outstanding Union military bonds, shall, by order of the Governor, be placed, as fast as received from the United States, on deposit in the National Bank of Commerce, in New York, to the credit of the State of Missouri, and the Commissioners of the State Interest Fund shall direct said money to be paid out by said bank upon the overdue coupons of the bonds issued or guaranteed by the State in aid of railroads (the Hannibal and St. Joseph Railroad excepted,) as fast as received, which coupons shall be paid in the order in which they matured, commencing with those that matured on the 1st day of July, 1861; but whenever there is money enough received from the source aforesaid, to pay more than one series of coupons, then payment shall be made of other coupons in the order in which they matured, to the extent of the money so received.

SEC. 3. After all the money to be applied to the payment of the overdue coupons has been received from the United States, and has been paid out for that purpose, the Commissioners of the State Interest Fund shall report to the Governor the amount of outstanding over-due coupons unprovided for, and the Governor shall cause bonds of the State to be prepared to an amount equal to the amount of said outstanding overdue coupons. Said bonds shall be signed by the Governor and attested by the Secretary of State, with the seal of the State attached, and shall be numbered and registered by the Secretary of State, and delivered to the Auditor, who shall also register the same. The bonds shall be each for the sum of $1,000, and the coupons on the same shall be numbered to correspond with the bonds, and shall have upon their face the engraved signature of the Treasurer. The bonds shall bear date the first day of January, 1868, and shall be payable at the National Bank of Commerce, in New York, in twenty years after date, with six per cent. interest, payable semi-annually, at the same place, on presentation of the interest coupon. Said bonds, when executed and registered, shall be placed by the Commissioners of the "State interest fund" in the National Bank of Commerce, in New York, and said bank, as agent of the State, may issue said bonds in exchange for such unpaid coupons, when presented in sums of $1,000, but for no other purpose; and no bond shall be deemed issued or binding on the State unless there is written or stamped on the face of such bond the words "issued by the National Bank of Commerce in New York, as agent of the State of Missouri, in liquidation of overdue coupons," and signed by the Cashier or President of said bank. A quarterly report shall be made by said bank to the Commissioners of the State Interest Fund, of the number of bonds so issued, and the coupons redeemed shall be delivered to said Commissioners to be stamped, as hereinafter provided.

SEC. 4. There is hereby appropriated out of any money in the Treasury not otherwise appropriated, the sum of $600,000 to the credit of the State Interest Fund, to be applied to the payment of the interest maturing on the first day of July, 1867, upon the outstanding State and guaranteed bonds issued or guaranteed in aid of the railroads; which money shall be deposited by the Commissioners of the State interest fund in the National Bank of Commerce, in New York, for that purpose, at least thirty days before said coupons mature; and the interest due on said bonds on the first day of July, 1867, shall be paid out of the same, according to the provisions of the law applicable to the case.

SEC. 5. That out of the "State Interest Fund," arising from the taxes herein ordered to be levied and assessed, and from other sources heretofore or hereinafter provided by law, the Commissioners of the State Interest Fund shall pay the interest coupons upon all the State or guaranteed bonds of this State, which coupons become due and payable on the 1st day of January, 1868, and shall continue to pay from said funds, and such other as may be provided by law, the accruing semi-annual interest upon the State and guaranteed bonds, as such interest becomes due. Said interest shall be paid in New York, at the bank where the funds above named are deposited.

SEC. 6. If not enough money shall have been received from the tax provided in the first section of this act to meet the semi-annual interest which will become due on the State bonds, on the 1st day of January, 1868, then any other money in the Treasury, not otherwise appropriated, may be transferred to the "State Interest Fund," and used in the payment of said interest; or the Commissioners of the State Interest Fund may make a temporary loan, upon the faith and credit of the State, and upon such terms as they see fit, sufficient to supply the sum necessary to meet said interest, said loan to be repaid out of the first money received by the State into said interest fund.

SEC. 7. The Commissioners of the "State Interest Fund," shall keep as full and true accounts of all money that may be received from the United States under the provisions of the act of Congress mentioned in the second section of this act, and of the condition of the same, and how invested, and all payments out of the same, as are required to be kept of the "State Interest Fund," by the provisions of the 14th chapter, title 6, of the General Statutes of 1865, and the provisions of said chapter shall apply, as far as practicable, to all payments of interest and other proceedings under this act; and all interest coupons paid by the State shall be forthwith registered by the Auditor and stamped upon the face with the words "Paid by the State."

SEC. 8. This act shall be in force and take effect from and after its passage.

Monongahela Navigation Co.

The quantity of coal carried by this Company during the past two years has been as follows:

	1865.	1866.
Coal in Boats	33,012,702	34,716,500
Coal in Flats	6,507,090	7,888,800
Total Bushels	30,519,722	42,605,300
Net Tolls on Coal	$69,608.48	$77,811.26
Coal in tons	1,411,421	1,521,617

The coal tonnage of this Company in 1866 was surpassed by only two companies in the State—the Lehigh Valley, and Philadelphia and Reading Railroad Companies. The total receipts of this Company for 1866 were $206,122.30. The company was organized February 10, 1837. The charter requires the completion of the navigation to the Virginia State line, seven miles above the present terminus of the improvement. The time of completion, by an act of the Legislature approved April 8, 1857, was made to depend upon the extension of navigation from the State line to Morgantown. Efforts are now making at Morgantown to secure the construction of the necessary works for that purpose, and if successful, it will be incumbent on this company to construct lock and dam No. 7, which will complete the navigation to the State line.

Pork Packing in Cincinnati.

The following statement, compiled from an article under the above heading in the Cincinnati *Price Current*, will show the number of hogs packed in that city, the average weight in pounds, the yield of lard, and the average price per cental net for each of the last eight seasons:

	Number of hogs.	Average weight.	Yield of lard.	Price per cental.
1859–'60	434,499	189	23	6 21⅓
1860–'61	433,799	221 5-35	28 9-16	5 97
1861–'62	474,467	224 23-34	29 5-18	3 28 2-5
1862–'63	608,457	209	25 21-23	4 35
1863–'64	370,623	188 11-12	23 1-8	7 00½
1864–'65	350,600	201 1-8	24 1-5	14 62½
1865–'66	354,079	238 18-31	82 13-25	11 96⅝
1866–'67	462,610	232 2-7	30 1-12	7 52⅔

Powerful Locomotive.

The largest and most powerful locomotive yet owned by the Camden and Amboy railroad is now being built at the company's machine works in Bordentown. It is a ten-wheel engine, having six drivers four and a half feet in diameter, with a stroke of twenty-four inches. It will be finished in a short time. It is intended that it shall have sufficient strength to draw one hundred cars laden with coal in one train.

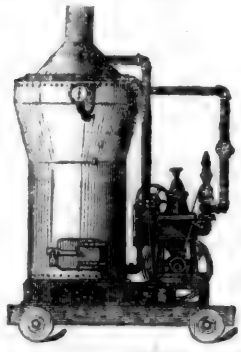
☞ At a meeting of the stockholders of the Kennebec and Wiscasset Railroad Company, held at Wiscasset, Me., on the 2d inst., it was voted to commence the construction of the road as soon as the available subscriptions amounted to ninety per cent. of the estimated cost. The amount then on the books, and subscriptions since added, render it certain that operations will be commenced as soon as the Spring opens. The Western terminus of this road, on the Kennebec, will be at Bowdoinham or Richmond.

☞ The Wisconsin Legislature having refused to grant permission for the construction of a bridge across the Mississippi at Winona, the Legislature of Minnesota has retaliated by refusing to grant permission for the construction of a bridge across the river at La Crosse.

☞ The Rutland and Washington Railroad Company have reorganized under the name of the Salem and Rutland Company, with the following board of officers:—President, George F. Edmunds; Vice-President, Peter Butler; Treasurer, Thomas H. Canfield; Clerk, R. S. Peabody.

☞ The Susquehanna and Tide Water Canal will be ready for navigation between the 25th inst., and the 1st of next month.

Dismal Swamp Canal.



It is stated that the Dismal Swamp canal, which penetrates and passes through the inmost recesses of the great Dismal Swamp and connects the harbors of Norfolk and Portsmouth, Va., with the sounds and inland waters of North Carolina, is in the process of great improvements. Colonel Walton the engineer, with a number of assistants, is engaged in surveying the canal and staking out the line. The whole course of the canal is to be

dredged and deepened, and the width is to be increased twenty feet, making the canal sixty feet broad. The locks are also to be removed and extended twenty-five feet. The excavation will commence next month, and when finished will place the canal in a condition to accommodate ten times the amount of business it is capable of doing at present.

Portable Trunk Engines,

ROOT'S PATENT,

Of 5, 10, 20, and 40 Horse-power.

Larger Sizes when Ordered.

Of the most Compact and Approved Construction, at low prices, for sale by the

ROOT STEAM ENGINE COMPANY,

Salesroom, 155 Duane St., New York.
Works, 504 3d Ave., New York.

AND DEALERS IN

RAILROAD SUPPLIES.

Office 111 Liberty Street,

NEW YORK.

WE OFFER FOR SALE

ENGLISH RAILS

OF THE FOLLOWING BRANDS:

CRAWSHAY.	LEVICK & CO.
GUEST & CO.	RHYMNEY CO.
EBBW VALE CO.	ABERDARE CO.

BAILEY, BROS. & CO.

Weighing 45, 50, 52, 54, 56, & 60 lbs. per lineal yard, Erie patterns, in port and to arrive, for cash, or a satisfactory credit.

If desired, parcels of Rails can be rolled to any required pattern, and shipped direct from England to any port in this country, at prices f. o. b., or ex-ship on arrival.

M. K. JESUP & COMP'Y,
84 Broadway.

TO CONTRACTORS.

PROPOSITIONS will be received for the construction of the masonry (about 22,000 yards) of the Bridge over the Ohio River at Louisville, until the 10th of April, 1867.

Plans and specifications will be ready for inspection after the 15th of March, at the Engineer's office of the Louisville and Nashville Railroad.

No bids will be considered if not made by responsible parties.

By order of the Board of Directors of the Louisville Bridge Company.

ALBERT FINK,
Chief Engineer

4t11

WATER & SEWERAGE PIPES,

KNIGHT-BAILEY PATENTS.

The Water Pipes are made of Wrought Iron, lined and coated with Hydraulic Cement, with Socket Joints, and connections for service pipes already inserted. Entirely free from oxidation they are absolutely indestructible. They can be laid and guaranteed for much less than cast iron Pipes.

The Sewerage Pipes are made of Hydraulic Cement. They stand the most severe tests of acids, increase in strength with age, are perfect in interior finish, and cheaper than any other pipes made.

We will contract for the water supply and drainage of cities and villages.

AMERICAN WATER & GAS PIPE CO.,
N. W. cor. Green & Bay Streets,

Pacific Mail Steamship Company's

THROUGH LINE TO

CALIFORNIA,

And Carrying the U. S. Mail,

VIA PANAMA RAILROAD.

LEAVE PIER NO. 42 NORTH RIVER FOOT OF Canal Street, at 12 o'clock noon, as follows:

April 1.—NEW YORK, Capt. Maury, connecting with CONSTITUTION, Capt. Lapidge

April 11—HENRY CHAUNCEY, Capt. A. G. Gray, connecting with GOLDEN AGE, Capt. Watkins.

April 20.—OCEAN QUEEN, Capt. T. A. Harris, connecting with MONTANA, Capt. Sutton.

All Departures touch at ACAPULCO; those of 1st and 21st connect at Panama with steamers for SOUTH PACIFIC PORTS, 1st and 11th for CENTRAL AMERICAN PORTS. Those of 1st touch at MANZANILLO.

Departure of 11th each month connects with the new steam line from Panama to Australia and New Zealand.

Steamer of March 1st, 1867, will connect with the Company's steamer COLORADO, to leave San Francisco for Yokohama and Hong Kong on April 3, 1867.

100 Pounds Baggage allowed each adult. Medicine and attendance free. For Passage Tickets and all further information apply at the office, on the wharf foot of Canal Street, North River, New York.

F. R. BABY, Agent.

PROPOSALS FOR THE CONSTRUCTION OF THE SUMMIT DIVISION OF THE ILLINOIS AND MICHIGAN CANAL.

OFFICE OF THE BOARD OF PUBLIC WORKS,
CHICAGO, March 18th, 1867.

Sealed Proposals will be received by the Board of Public Works, at their office, until 11 a. m. Wednesday, May 1st, 1867, for the excavation necessary to deepen the Illinois and Michigan Canal, according to the plan adopted, from Chicago River to Summit Lock, No. two (2) a distance of twenty-six (26) miles.

Maps, profiles, specifications, &c., will be exhibited at the office of the Board of Public Works in Chicago on and after April 15th until the day of letting.

There will be some two millions (2,000,000) cubic yards of earth excavation—some of it quite hard and embracing considerable detached rock—and about four hundred seventy thousand (470,000) cubic yards of stratified limestone.

The work must be prosecuted so as not to interfere with the use of the Canal during the season of navigation.

It is believed, however, that the most of the excavation, except the stratified rock, can be done with steam dredges without interfering with the navigation of the Canal, but the rock excavation will all have to be done between the close of navigation in the fall and the opening in the spring.

If a new line be adopted for any portion of the distance, operations thereon may be continued the whole year; and the navigation of the Canal will be suspended at least five months in each year unless otherwise mutually agreed by the Board and Contractors.

The whole of the work must be done on or before the end of the third season of the suspension of navigation.

A large amount of machinery will be required to excavate the work within the time required, consisting mainly of steam dredges, scows and cranes for the earth work, and drilling machines, pumping machinery and cranes for the rock.

Contractors will be required to commence work on the earth excavation within thirty days of the time of letting, and upon rock excavation by the first of November next.

The dredges, cranes and scows now in the Canal can be had at an appraised value which will be made known to bidders prior to the letting.

Parties contracting for the work will be required to provide all machinery, and to put up and remove all dams and all works of protection, and at their own expense to do all pumping, or whatever may be necessary to secure their work from water.

Proposals must be addressed to the Board of Public Works, endorsed "Proposal for Deepening Illinois and Michigan Canal," and be accompanied with the usual two hundred dollar ($200) bond, with surities, to be approved by the Board.

Contractors will bid, stating the price for which the work will be done on each of the different sections, and the work will be let as a whole or in part, and in such quantities as the Board shall determine.

The Board reserve the right to reject any and all bids, and no proposal will be accepted unless the party offering it shall give evidence satisfactory to the Board that he has the necessary skill, experience, energy, and ability for doing the work, is trustworthy, and has sufficient pecuniary resources.

The Board will require such security, as according to their judgment, will secure the doing of the work according to the contract.

J. G. GINDELE,
FRED. LETZ,
O. J. ROSE,
WILLIAM GOODING,

New York, Saturday, March 30, 1867.

Maryland and Delaware Railroad.

We have received a copy of the report of this company for the fiscal year ending December 12, 1866. From this we learn that the road was completed and formally opened for travel from the junction of the Delaware Railroad to Greensborough, a distance of 24 miles on the 3d of December. The various parts of the road were opened as follows: to Slaughter's, 10 miles, on the 23d of April, 1866; to Halltown, 14 miles, on the 9th of July; to Goldsborough, 19 miles, on the 15th of October; and to Greensborough, its present terminus, 24 miles, on the 3d of December. During the year, 18½ miles of track were laid and ballasted; four depots erected, an engine house and water tank. Side lines had been put in at every station 1,000 feet long. A new depot had been established, and a building was soon to be erected at Henderson, a point on the line between Halltown and Goldsborough, and where a side line had been built by private subscription. Granaries to be used for storing grain had been erected at Halltown and other places on the line. A turn-table had been put in at Clayton, and a Y constructed at Greensborough. The work had been done in a substantial manner, and the track was in good line and well surfaced up.

Iron and fastenings sufficient to lay the track to a point six miles below Greensborough had been received, and arrangements made for the speedy delivery of the cross ties necessary to its completion. Arrangements had also been made for completing the bridging and grading from Greensborough to Hillsborough, of which but little remained to be done preparatory to the laying of the track, as soon as the means were provided for the prosecution of the work. The weather permitting, it was in contemplation to have the track put down to Hillsborough, a further distance of 8⅓ miles, by early spring, preparatory to a vigorous prosecution of the work into Talbot Co. during the coming season.

The receipts into the Treasury, on account of stock and loans, during the year (including $1,247 97 from the previous year,) were $194,893 23; and the expenditures (including $174,066 23 paid to contractors,) $183,383 99—leaving a balance in the Treasury of $11,509 24; to which add stock in retained percentage, $10,946 26—making the total balance $22,455 50.

Upwards of 87,500 bushels of grain had been carried during the year; 75,375 feet of lumber, 36,000 brick, 51,604 bushels of lime, 500,000 lbs. general merchandise, and 2,192 passengers.

No statement is given of the earnings and operating expenses of the road, as by the terms of the contract, each section of the road is to be operated by the contractor until its completion to Hillsborough and Oxford respectively. On reaching these points it is to be delivered over to the company, previous to which time the expenses of every kind are borne by the contractor, including repairs, rolling stock, interest on bonds, and salary of Superintendent. These obligations have thus far been complied with in a manner satisfactory to the board.

Attention is called to the fact that the revenues of the road had mostly been derived from the first 14 miles. At the date of the report, however, it was running nearly twice that distance, and had just reached a point which has long been one of the largest grain markets on the Peninsula. The business of the road will thus be greatly increased, and also the distance over which it is carried. From the present terminus of the track at Greensborough to the final terminus of the road at Oxford, a distance of 30 miles, there is a steady improvement in the productiveness of the country. The combined effect produced by the increase of business and distance will therefore continue to the end of the road, where there will be an accession of business from the Chesapeake Bay which may afford a revenue as large as that from the entire local business of the road. "When," says the Report, "it is considered that the net revenue from local business alone on the Delaware Railroad, with which this road connects, has paid the interest on its entire cost; that the local revenue of this road has proved considerably larger per mile than that of the Delaware road at the same period; and that the accession to its resources from through business will probably commence before the payment of the November interest on the bonds, we feel warranted in asserting that it will be able to continue from its revenues alone the present prompt payment of interest on its bonds, and also presents an encouraging prospect for the payment of dividends on its stock."

Besides the materials acquired for the construction of the road to Hillsborough, as stated above, the means required to use them had also been provided, with the exception of $20,000, which was being raised by the citizens of that neighborhood, and which, when raised, would ensure the early completion of the road to that point.

The additional amount required by the contract for the portion of the road lying in Talbot County is $50,000, a sum less than the annual benefit to be derived by the county from the road. The report alludes to the limited subscriptions in Talbot County, and says that the amount to be expended upon the part of the road lying within that county will be more than the entire amount subscribed by its citizens. It then adds: "We have thus far referred entirely to the means required by the contract on the part of the company. The stockholders are aware that these constitute a very small part of the cost of a railroad, and the greatest difficulty to be overcome in all such undertakings is, to raise the large sums which are to be provided by those who take the bonds of the company, and to do this before the bonds acquire a

market value. We are authorized by the gentleman who now occupies the position of the contractor, and whose standing among the railroad men of the country is a sufficient guaranty of success, to say, that the arrangements for this purpose have all been matured; and that, as soon as the company is prepared to comply with its engagements on the second section of the road, the work will be prosecuted from both ends, and pushed through to a speedy completion. The parties in New York with whom these engagements have been made, are personally known to the Board, who are thus enabled to vouch for their responsibility. This assurance constitutes an additional reason for providing for our own share of the requirements, before the occurrence of a financial crisis, or some other national calamity, which may again postpone indefinitely the completion of our work."

The Adams Express Co. had already established several stations on the line of the finished portion, which was soon to be followed by the establishment of a mail route, and the construction of a telegraph line.

The report, in conclusion, alludes to the defectiveness of the connection by railroad with Baltimore as compared with that with Philadelphia. By the construction of 15 miles of new road from the station at Middletown on the Delaware Railroad to the station at Elkton on the Philadelphia, Wilmington and Baltimore Railroad, a saving in distance will be effected of 30 miles over the present traveled route *via* New Castle and Wilmington. It is hoped that the latter company, or the citizens of Baltimore will take early action in the premises.

☞ The Luzerne *Union* says that the work upon the Lehigh Valley Railroad is now being pushed forward most energetically, and that the cars will be running through to that place in June next, and within the next year over the entire length of the projected extension to the New York State line.

Chicago and Alton Railroad.

The earnings of this road for the years ending December 31, 1865 and 1866, were:

	1865.	1866.
From passengers	$1,604,188 01	$1,246,295 88
" freight	2,155,151 85	2,309,498 59

Add surplus from previous year		1,291,397 87
Total surplus January 1, 1867		$1,497,955 12
This surplus is represented by—		
Alton and St. Louis R. R. Co. stock		$675,000 00
Bonds held by trustees on renewal account		50,000 00
Joliet and Chicago R. R. Co.'s bonds		7,000 00
Chicago and Mississippi R. R. Co.'s bonds		2,500 00
St. L., J. & C. R. R. Co.'s bonds		15,800 00
Interest in Union Stock depot		50,000 00
Sums due to the company		165,477 46
Cash on hand, general fund		439,455 41
Supplies on hand		436,139 29
		$1,840,872 16
Less sums due to others		342,917 04
Total, as above		$1,497,955 12

During the past year there have been expended for renewals and improvements, $241,021 16; and for maintenance of way, works and buildings, $698,846 23. The report says:

Important improvements have been made in the condition of the railway and its equipments, the cost of which is embraced in the account of operating expenses. This account amounts to 59.8 per cent. of gross earnings, and includes the cost of new engines and cars built to take the place of those worn out, or otherwise rendered unfit for service, and also one new engine charged in that account to compensate for any general depreciation in engines, not otherwise provided for.

The amount of gross earnings is less than during the preceding year by $144,938 96, or 3¾ per cent. This is due to the reduction in passenger traffic, the earnings from that source being less than in 1865 by $357,892 13, or 22.3 per cent.

This reduction may be ascribed, in part, to the prevalence of cholera in St. Louis and Chicago, which, for a considerable period, diminished largely both the passenger and freight traffic of the line, but is mainly in consequence of the absence of military traffic and travel incident to army operations, which increased the passenger traffic of the preceding year.

The aggregate tonnage of freight transported shows an increase of nearly 25 per cent.; but the increase in the amount of earnings from that source is only equal to about 7½ per cent. This difference between the ratio of increased traffic and cash receipts, is due mainly to a reduction of rates and the development of our coal traffic, which has increased largely during the year, and is likely to increase rapidly until it becomes a very important source of revenue, but, in proportion to tonnage, it does not command rates of freight corresponding with many other articles transported.

Additional rolling stock, depot buildings, depot grounds, and side tracks have been built, or otherwise acquired, during the year, at a cost of $339,217 82, which has been charged to the special fund provided for that purpose by the sale of stock in February last. The remainder of that fund, unexpended at the close of the year, is $158,082 68. Of the special fund derived from the same source for the purchase of the Alton and St. Louis Road, the remainder unexpended is $135,614 50, which is invested in U. S. 7 3-10 bonds. That road is represented by $800,000 capital stock, of which this company now owns $675,000—leaving $125,000 of stock to be purchased in order to vest the title to the road in this company. It is believed that the remainder of the fund will be more than will be required to accomplish that object.

During the year six important bridges have been re-built in a permanent manner.

Six new station buildings, including a large and substantial freight building at Chicago, have been constructed.

Sixty-one and one-half miles of track have been re-laid with new and re-rolled rails, and forty-nine miles with repaired rails; also, a corresponding number of new cross-ties. From this it will appear that about 40 per cent. of the track upon the entire line has been rebuilt with new and repaired rail during the year.

Two hundred and eighty-seven cars have been built in shops of the company during the year, fifty six of which have been designated to take the place of those worn out, and the remainder (231) have been added to the number on hand at the close of the preceding year.

The whole number of cars owned by this company, at the close of the year, is 1,359, as follows: Passenger cars, 37; baggage and express cars, 15; house freight cars, 723; stock cars, 238; platform cars, 344; wrecking and tool cars, 2; freight cars, of all descriptions, 1,305.

The company now has 67 locomotives, which have been maintained in an efficient condition during the year, and at its close nearly all of them are in good condition for service.

The large expenditures heretofore made have rendered the condition of your road and its equipment such as to compare favorably with the best Western Railways; but a proper regard for economy will render it necessary to make still further improvements and additions, which, in the opinion of the Directors should be continued by annual appropriations, moderate in amount, until your road shall not only have been rendered complete in all its necessary appointments to meet the demands of its traffic, but shall be in such condition as to render it possible to reduce its operating expenses to the lowest practicable limit.

The St. Louis, Jacksonville and Chicago Railroad, which was completed to a connection with your line at a point about thirty miles from St. Louis, on the 1st day of January, 1866, is developing a large traffic; but the principal advantage to be derived by this company from traffic originating on that line, will be through its northern connection, which will be much further from the terminus of your line, at Chicago, than the present connection is from St. Louis. The traffic of that line is now almost exclusively with St. Louis, and passes but a short distance over your road; but, with the northern connection made, the traffic will be mainly with Chicago, and will be a source of much greater profit to your company, by reason of the greater distance which it will pass over your line.

The construction of that line is now in progress, and it is confidently expected that the connection referred to will be made during the present year.

The Union Stock Depot at Chicago, is now the largest stock market in the country, and has the effect of increasing the transportation of live stock over your line, by inducing shipments to that market, which, under other circumstances, would be made by other lines to Eastern markets. The results have fully realized the anticipations of its projectors.

The number of miles run by locomotives during the year was as follows: With passenger trains, 445,612; with freight trains, 839,985; with wood

trains, 80,048; with construction trains, 110,524; switching trains, 215,946—total 1,634,115.

The number of passengers carried was 516,543, of which 259,767 went North, and 256,776, South of the whole number carried, 477,578 were way, and 38,965 through passengers.

Tons of freight moved North, 265,489; do., South, 370,870—total, 636,359.

GENERAL BALANCES, Dec. 31st, 1866.

Cost of road and equipments	$10,118,521 82

Gen'l Superintendent.—ROBERT HALE.

New Orleans, Mobile and Chattanooga R. R.

We learn from the Mobile papers that the last of the many difficulties experienced in securing the right of way and location along the entire route of this road has been successfully overcome. A contract has been closed for the purchase of the Wills Valley Railroad, a line eighty-four miles in length, having its present terminus at Gadsden, and forming a necessary link in the direct and great trunk road from Mobile to Chattanooga. This road will be put in hand at once for reconstruction, and it is designed to complete it by the first of July, 1868. This purchase avoids a difficulty interposed by the Governor of Georgia, in refusing right of way through a small corner of, the Georgia Territory to Chattanooga. All the legislative, judicial and titular difficulties being now conquered it is the purpose of the company to go vigorously on with the work. Ground was to have been broken on the New Orleans connection during the past week.

Boston and Providence Railroad.

A special meeting of the stockholders of this corporation was held in Boston on the 25th inst. to consider a communication from the directors respecting the through business of the road, and to take such action as might be deemed expedient in the premises. The President of the company, Hon. Chas. H. Warren, presented a communication from the directors of which the following is an abstract:

When the Providence road was originally built, it was with primary reference to business between Boston and New York, and during most of its history, the profits of the business has been an important element in its success. Recently this branch of its business has been gradually but rapidly diminishing, and is threatened with final extinction. About two years ago, in connection with the Bristol road, a contract was entered into with certain parties to establish a New York line *via* Bristol, those parties agreeing to furnish boats. The two corporations have complied with their part of the contract, but the other parties have unfortunately been unable to go on with the enterprise, and been obliged to part with their property. The parties purchasing this property, having no wish to deprive the corporation of the advantage to be derived from their use, have refused flattering offerings from other parties, believing that a Bristol line to New York would be more productive and popular than any which could be established, and are desirous, if possible, to carry out the original plan. But the expenditures have been exceedingly large, and without wishing to increase their capital stock, or part with their property, they desire to borrow money to a limited amount and for a limited time, and ask the Providence road to assist them, not by the loan of money, but by the aid of its credit. Upon full and anxious consideration the directors are unanimously of opinion that it could be done without in the slightest degree exposing the corporation to loss, as security is offered which is abundantly ample to protect them against any eventual liability; and that by doing it the road can secure to itself a vast and lucrative business, which may otherwise go into the hands of competing corporations, and carry with it the slight remains of our New York business.

The communication concludes with the following recommendation of the directors:

Voted, That the directors are hereby authorised to enter into arrangements with the Bristol road and the boats to run to Bristol for the establishment of a line to run between Boston and New York *via* Bristol, and, if it be necessary in order to secure that object, they are authorized on behalf of this corporation to guaranty the bonds of the owners of the boats referred to.

Provided, That no such guarantee shall be given unless such security is given for the payment of such bonds as will, in the opinion of the Directors, be amply sufficient to protect the corporation, in any event, against pecuniary loss, and provided further that the Bristol road assume their share of any engagements which this corporation may enter into.

Gov. Burnside, of Rhode Island, explained the position of the Bristol road. He said it was a well built and well managed road, and its financial condition was, in his opinion, perfectly satisfactory, and the directors were prepared to lay out $150,000 in improving their depot and grounds for the proposed connection. He considered the proposed measure would be of great benefit to the Bristol road, as well as to the general business of Rhode Island, and of course would tend to benefit the business of the Boston and Providence road.

On motion of Mr. Grinnell the proposition of the Directors was amended so as to provide that the whole amount shall not exceed $750,000.

A stock vote was then taken on the communication of the directors, which resulted in its acceptance by a vote of 10,176 against 5,547.

Louisville and Cincinnati Branch R. R.

The work of construction upon the Cincinnati branch of the Louisville and Frankfort Railroad was to have been commenced this week at the Cincinnati end of the line. The new road will branch off from the main line at Lagrange, a point about 27 miles northeast from Louisville, and run thence through Campbellsburg down Mill creek to the Kentucky river, across that and thence up along the north bank of Eagle creek, thence up Ten Mile creek to Verona, and thence through Sparta and Walton, and down Bank Lick creek, and thence to Covington—passing through Oldham, Henry, Carroll, Gallatin, Boone and Kenton counties—eighty miles of new road. There will be a great deal of heavy grading on this road, as it includes five tunnels and many deep cuts. Four of these tunnels are between Lagrange and Verona, and the fifth is between Verona and Covington.

Memphis and Little Rock and El Paso R. R.

We learn from the Memphis *Post* that the El Paso and Pacific Railroad, of which General Fremont is President, has been consolidated with the Memphis and Little Rock Railroad. The former line runs from Little Rock, Ark, to Fulton, and thence through Northern Texas to El Paso, on the Rio Grande. As some time since announced, the Little Rock and Fort Smith Railroad will cooperate with the Memphis and Little Rock Railroad. Arrangements have also been perfected to obtain money and iron for the completion of the Little Rock Railroad. General Forrest is pushing the work through on his section with the greatest rapidity. He has about ten miles of the road from St. Francis river to the Lainguille ready for the track, and that portion of the road has been considered the very worst and most difficult to work.

Colebrookdale Railroad.

There is but little doubt that this important railroad, which is to run from Pottstown to Boyertown, Penn., and thence beyond so as to connect ultimately with the East Pennsylvania Railroad, will be built at an early day. A movement is now being made by parties interested in the project, which will insure its success. Additional surveys are being made preparatory to the commencement of the work. The road will run through a rich and populous country, and the trade from the iron mines along the route will alone be a source of heavy revenue to the line. The road will probably be put under contract this summer. Joseph L. Bailey, of Douglass Township, Berks County, Penn., is President of the company.

☞ At a meeting held at Bennington, Vt., on the 20th inst., a committee previously appointed reported that they had obtained subscriptions to the amount of $500,000 for the proposed new road from Bennington to Chatham, a distance of 54 miles, and title to the work already accomplished.

Foreign Trade of the United States.

The Directors of the new Bureau of Statistics has prepared the following returns of the Foreign Trade of the United States for the first half of the current Fiscal Year:

IMPORTS (GOLD VALUES) INTO UNITED STATES.

	Dutiable Direct.	Dutiable Bonded.	Total of Dutiable.

Jefferson Railroad.

The people of Honesdale and Hawley, Penna., appear to be near a realization of their project, so long talked of, of being more closely connected by means of a railroad between the two places. The Jefferson Railroad, when completed, will greatly benefit the business interests of both. The managers of the company are now prepared to receive sealed proposals for laying their track, &c., at their office in Honesdale.

☞ The Pennsylvania Legislature has refused to restore to the Pittsburg and Connellsville Railroad Company the right to complete its line from Pittsburg into Maryland.

Pork and Beef Packing at Milwaukee.

The following from the Milwaukee *Sentinel* will show the number of hogs and cattle packed in that city during the season of 1866–'67, in comparison with other years:

	Number of hogs.	Av. Weight. net.	Average lbs. Lard per hog.	Cattle head.
1866–'67	133,370	218 3–5	31 1/2	7,044
1865–'66	87,853	232 1/2	32 3–5	10,716
1864–'65	107,229	196 7/8	23 5/8	18,978
1863–'64	141,019	202	27 1/8	18,224
1862–'63	182,465	219	33	12,876

The product manufactured was as follows:

	1866–'67.	1865–'66.
Clear pork, brls	4,304	1,350
Mess pork, brls	49,125	37,893
Prime mess, brls	9,003	1,170
Extra prime, brls	14,723	5,348
Rumps	628	198
Sweet pickled hams, brls.	1,605	1,205
Sweet pickled hams, tcs.	12,360	8,128
D. S. shoulders, lbs	1,356,673	2,049,622
Cumb. middles, bxs	1,231	1,516
S. R. middles, bxs	392	363
Long cut hams, bxs	533	.....
Lard, lbs	4,203,423	2,868,878

The stock of pork now held there is estimated at 3,429 brls., and of lard 2,420,543 lbs.

This stock includes all kinds of barrel pork. The stock of lard is equal to 8,068 tierces of 300 lbs. each.

The number of hogs packed in Milwaukee, Chicago and Cincinnati for eight seasons have been as follows:

	Milwaukee.	Chicago.	Cincinnati.
1859–'60	51,687	167,918	434,499
1860–'61	60,129	231,335	483,799
1861–'62	99,461	544,118	474,167
1862–'63	182,364	970,264	608,457
1863–'64	141,091	904,658	370,623
1864–'65	107,229	750,147	350,600
1865–'66	87,853	501,462	354,079
1866–'67	133,370	635,732	462,610

Canadian Railways.

The following is an official statement of the Traffic Returns of the Canadian Railways, as far as reported for the month of February, 1867:

	1867.	1866.	Miles in operation.
Great Western	$263,426	$251,131	345
Grand Trunk	427,287	441,409	1,377
London & Port Stanley	2,417	1,820	25
Northern	32,856	29,751	94
Welland	3,546	1,485	25
Port Hope, Lindsay & Beaverton*	6,024	7,831	56
Port Hope and Peterborough	.....	.....	.....
Brockville and Ottawa	6,703	5,429	86
Prescott and Ottawa	7,781	6,539	54
Total	$750,040	$745,385	2,062

* The Port Hope L. B. and the Port Hope and Peterboro' Railroads are now united.

☞ The New Orleans, Jackson and Great Northern Railroad Company will receive proposals until the 1st of April for the lease (for a term not exceeding thirty years) of that part of this road north of Canton, Miss., to the Tennessee river, a distance of 203 miles, including all the surveys, grading, masonry and other work already done; with all the unpaid subscriptions of stock on that portion of the road. The contractors or lessees to build, equip and run the same in conformity with the regulations and tariff of the New Orleans, Jackson and Great Northern Railroad.

Port Jervis and Rondout Railroad.

The prospect of this road is more encouraging than ever. Already ten per cent. of the capital stock has been subscribed, and ten per cent. of that paid in. In the Assembly a bill has been introduced which provides that the Delaware and Hudson Canal Company may construct, own and maintain railroads within this State, or contract with any company for the use of their road for the transportation of coal; also, to subscribe for and take stock or bonds of any railroad subject to the rights, restrictions, &c., as other stockholders and bondholders. This looks very much like business, and if the canal company will push this matter (and, under the present status of the road, no doubt they will,) we shall have this thoroughfare within a year and a half.—*Port Jervis Union.*

Washington County Railroad.

The Hagerstown *Herald* states that the president and directors of the Washington County Railroad, having purchased the iron for the entire line, will commence with the opening of the spring, laying the track on the line as far as Keedysville, and it is supposed that the road to that point will be in running order by the first of July next, and the balance by the first of September, so that the entire line to Hagerstown will be completed by the first of September next.

☞ A convention of the friends of the Belfast and Moosehead Lake Railroad was held at Belfast, Me., on the 23d inst. Delegates were in attendance from nearly all the towns upon the route. Great enthusiasm prevailed, and there was a unanimous expression in favor of loaning the credit of each town. The proposed railroad will open communication with a portion of Maine larger in area than the State of Massachusetts, rich in mineral wealth and timber. There is no doubt but that the road will be built at once.

☞ The following gentlemen have been elected directors of the Central Ohio Railroad Company, under the new Baltimore and Ohio Railroad management: Hugh J. Jewett, Jos. R. Swan, William Dennison, Walter B. Brooks, John H. Heaton, Daniel Applegate, John King, Jr., Joseph H. Rieman, Joseph W. Jenkins, Jas. Harvey, Simon Gebhart, William H. Clement and Joseph B. Ford.

☞ The Memphis *Bulletin* advocates a project of a new railroad starting from New Orleans and passing through Selma northward. It thinks that, apart from the commercial advantages, the construction of this road will have a good effect upon politics. Among those who are pushing the project are Generals Joseph E. Johnston and Hardee.

☞ The Clearfield Extension of the Tyrone and Clearfield Railroad is under contract to Messrs. Thomas Collins & Brother. The Extension is 16 miles long.

☞ There is to be a new railroad from Forrester, on the Illinois Central Railroad, to Aurora, on the Chicago, Burlington and Quincy Railroad, a distance of sixty-five miles.

☞ The Governor has signed the bill appropriating $250,000 in aid of the Whitehall and Plattsburgh Railroad.

☞ The number of hogs packed in Cleveland during the season of 1866–'67, which is now closed, was 35,085.

American Railroad Journal.

Saturday, March 30, 1867.

Stock Exchange and Money Market.

Money has been in more active request at the principal business centres, since our last, chiefly on call, and for speculative purposes. The National banks have been preparing for their approaching quarterly exhibit early in April, and have been concentrating their available means, so as to enable them to make as creditable a showing as practicable. These efforts, leading to a rather extensive shifting of loans, together with the Treasury negotiations, have tended to impart an appearance of increased activity to the market. The needier class of street operators have been forced to employ considerable industry to secure the necessary aid, while lenders have been rather liberal of accommodation. The local bank balances have been cut down materially, chiefly through the temporary withdrawal of country bank accounts. On the other hand, the supply of loanable funds in private hands has been steadily increasing. The foreign houses have unusually large sums placed under their control, and awaiting lucrative employment here, on European account, owing to the extraordinary dullness and depression in the Money markets of the Old World. This is particularly true of parties having continental connections. The effect on the price of money here has been favorable to an easy market, preventing any very sudden or very serious rise in the ruling rates, which on call loans are now six per cent. on Government securities, and seven per cent. on railway and miscellaneous stock collaterals. Prime short date commercial paper passes at 7@7½ per cent., and really good at 8@8½ per cent. per annum, to a moderate extent. As has been anticipated, in part from the extensive negotiations through private channels of the Treasury representatives in this city during the past week, chiefly in the way of Seven-Thirty purchases, redemptions, or conversions, and coin reserve sales, the last city bank statement shows a general and decided reduction in all the footings, as compared with the preceding weekly exhibit, thus: Decrease of deposits, $5,583,189; decrease of loans, $3,672,657; decrease of legal tender, $1,908,081; decrease of specie, $824,657; decrease of circulation, $28,615. The specie reserve of the banks is now $9,143,913, against $13,945,651, same time last year. The city bank deposits are now $192,375,615, against $185,868,245 week ending March 17, 1866. The legal tender reserve amounts to $60,904,958, against $69,496,033 same time last year. The circulation now stands at $33,519,401, against $23,243,406 same time last year. The loans are now $259,400,315, against $234,500,518 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $78,700,396 a day, against a daily average of $82,423,135 the preceding week, and $90,695,542 the week ending with March 9th. The current week's exchanges average $77,222,960 a day.

The main changes in the Philadelphia Bank footings, last week, were as follows: Increase of loans, $204,496; decrease of legal tender reserve, $383,913; decrease of deposits, $244,456; decrease of specie, $50,589; and increase of circulation, $31,076.

National Bank notes to the amount of $129,960 were issued last week, making the total issue to 1,663 banks thus far $302,176,150, against $282,555,440 at the close of the last fiscal year, June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $3,776,036, leaving, with the existing 1,647 banks, an actual circulation at this date, of $298,530,074. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,532,450; and for the public deposits, $39,911,450—making a total of $379,543,900. The Treasury Department, last week, redeemed and destroyed $350,000 of worn and mutilated fractional currency, and issued $268,000 worth of new.

The U. S. Sub-Treasury receipts, week ending with March 23, were $18,828,438, including $1,985,874 from customs duties; payments, $19,599,299; balance at the close of the week, $110,890,405, against $111,661,266 at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $5,073,910, and payments,

$5,197,855; on Tuesday, receipts, $2,268,188; payments, $2,269,890. The balance at the close of business on Tuesday stood at $110,760,258, against $111,576,156 a week previous.

The cash balance in the hands of the Assistant Treasurer in Boston at the close of business March 23, was $9,066,030—$7,517,917 of which was in coin—showing a decrease of $1,858,961 as compared with the close of the previous week. The amount received for customs during the week was $315,500. Two millions, in gold, were transferred from Boston to New York, which circumstance explains the apparent decrease in the cash reserve.

Government revenues have been on a moderate scale, since our last. The excises, last week, yielded over $2,500,000, against $2,316,346, the preceding week; customs at the port of New York, $1,935,874, and at the outports, about $700,000 (in coin) more, making the grand total income for the week equal about $6,060,000 in currency, against disbursements of $2,219,559 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $212,500,000. This income shows a weekly average excise revenue, thus far in the current fiscal year, of about $5,600,000, or equal to a yearly aggregate of $291,200,000, which sum is considerably in excess of the anticipations of the Treasury officials, notwithstanding the universal dullness in business, producing and manufacturing, all over the country. The showing is, all things considered, a very encouraging one, and one likely to foster confidence in the actual administration of the National finances. In the event of a revival in trade and industry, such as is now generally looked for, through the last quarter of the fiscal year, from April to June, inclusive, the excises cannot fail to yield more prolifically, thus augmenting the aggregate income of the Treasury Department from this source, for the whole of the year.

The fluctuations in Gold, since our last, have been unimportant. Speculation has been on a restricted scale, and the customs demand, which has been moderate, has been fairly met by the marketing of a portion of the coin reserve of the Treasury. In a few weeks, the May interest on the Five-Twenty loan will begin to flow out of the Treasury vaults, thus adding heavily to the available supply in the open market. Hence, operators for a rise have been, by no means confident of their ability to influence values, decidedly. The extreme rates of the week have been 134⅞ and 133¾, and the closing price on Wednesday was 134¼, or about the same as on the preceding Wednesday. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $393,154. The customs demand for Gold last week, averaged $322,646 a day; thus far, this week, it has been equal to $447,162 a day, or equal to a weekly aggregate of $2,682,972. The arrivals of specie from Europe, Havana and other foreign ports, during the past week reached $23,061, and from California, $840,573. The total customs revenue of the Government, in coin, at this port since July 1, 1866, has been $92,970,093, against $99,958,032 same time in the preceding fiscal year. The total receipts of California gold at this port since July 1, 1866, have been $31,298,786, against $21,035,467 same time last year, showing an increase this year, of $10,263,319. The exports of specie from this port, last week, were $74,742. The total outflow of specie from the port, thus far in the current fiscal year has been $28,007,068, against $17,485,789 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $109,000, making the total coin interest disbursements through the Government office, since July 1, 1866, $36,242,340, against $31,937,969 for the same time in the preceding fiscal year. The specie exports from San Francisco from Jan. 1, to Feb. 28, 1867, reached $6,268,077, against $5,613,993 same time last year.

The total amount of gold certificates issued and redeemed by the Sub-Treasury, together with the balance unredeemed on the 23d of March is thus stated:

	Issued.	Redeemed.	Outstanding.
20s ...	$289,340	$181,900	$107,440
100s ...	4,949,900	3,319,100	1,630,800
500s ...	713,500	292,000	421,500
1,000s ...	23,656,000	19,964,000	3,692,000
1,500s ...	146,030,000	132,405,000	13,625,000
10,000s ...	5,000,000	5,000,000	.....
Total	$180,638,740	$161,162,000	$19,476,740

There has been rather more active movement in foreign exchange, accompanied by somewhat increased firmness in the market rates for prime bills on both London and Paris. The supply has been fair, but not in excess of the requirements of buyers, and the leading drawers have evinced much more confidence. Bankers' 60 day bills on London closed on Wednesday at 108¾@109, and on Paris to 5.18¾@5.16¼; sight bills on London to 109½@109¾; and on Paris to 5.15@5.13⅛. The offerings of produce bills have been again on a liberal scale, since our last. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $4,836,282, making the total value of exports since July 1, 1866, $128,038,039, against $163,797,111 same time in the preceding fiscal year.

Government securities have been in moderate demand throughout the week. Early in the week, the offerings for sale were rather in excess of the calls of buyers, and prices yielded slightly. Within the last two days there was a decided increase of orders from investment sources; the execution of which, in part, led to a rally in quotations; the market closing buoyantly. U. S. sixes of 1867 closed here on Wednesday at 130½@131; U. S. sixes of 1868, at 129@129½; U. S. sixes of 1881, 108¾@109; U. S. Five-twenties of 1862 at 109@109⅛; U. S. Five-twenties of 1865 at 107¾@107⅞; U. S. Five-twenties of 1865, consolidated, 107⅛@107¼; U. S. Ten-forties at 97⅝@97¾, ex-coupon, and U. S. Seven-thirties at 105⅜@106⅛. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ¼@½ of 1 per cent. on these figures:

June, 1864.....1177/8	May, 1865 .....1121/2
July, 1864.....1173/8	August, 1865....1111/2
August, 1864....1167/8	September, 1865..111
October, 1864....1147/8	October, 1865....1103/4
December, 1864..1137/8	

Secretary McCulloch, in a note of the 19th inst., to Mr. Alexander Hamilton, of this city, referring to the alleged over-issue of Government bonds, says that the allegations referred to originated with parties who are operating in gold, and concludes as follows: "We have instituted the most thorough and searching examination of the Currency Bureau by the most competent men, and are satisfied that *the report is utterly without foundation. We have no reason to believe, nor do we believe, that there has been an over-issue of a single dollar.*"

The railway and miscellaneous stock dealings of the week have been indicative of a dull, spiritless, and through most of the week, a yielding market; but toward the close, with the promise of a more free and easy monetary movement, the speculative demand improved, and the tendency of values was upward.

In general business, there has been less activity, and less firmness has been apparent in price. Breadstuffs and provisions closed in favor of buyers. According to the annual report of hog packing season just closed, it appears that the total number of hogs packed at the West is 2,425,254, against 1,705,955 last season. The general average weight is 232½ pounds against 231 3-10 pounds last season. The yield of leaf lard is 29¾ pounds against 31 1-7 pounds last season. Middling grades of cotton left off here quite heavily at 30½@32½ cents per lb. as extremes. The stock of cotton now here is estimated at about 225,000 bales. The receipts at the port this week, have averaged nearly 1,800 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 471,000 bales, against exports of 278,728 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 1,485,000 bales against 1,586,641 bales same time last year; exports, 875,681 bales, against 977,219 bales same time last year; estimated stock at latest dates, 520,000 bales, against 497,000 bales same time last year. At the auction sale of Scranton Coal on Wednesday, there was an unusually good attendance leading to a lively competition for the offering. Some 68,000 tons were sold at slightly advanced prices, ranging from $4@$4.12½ for Chestnut, to $5@$5.25 for grate, stove and steamboat sizes per ton of 2,240 lbs., delivered at Elizabethport, N. J. In foreign merchandise, business has been moderate, and generally on the basis of declining prices. The total imports of foreign dry goods, last week, were $2,517,763, and the total amount marketed $2,631,359. The value of foreign merchandise imported last week, was $3,810,100—making the grand total specie value of last week's imports of dry goods and merchandise, $6,327,863, and since July 1, 1866, $189,805,196, against $215,880,957 same time in the preceding fiscal year. The ocean freight market has been quiet and heavy with 454 vessels of all classes in port. For Liverpool we quote flour at 2s.@2s. 3d. per bbl.; grain at 4@5d. per bushel; cotton at $\frac{5}{32}$@$\frac{5}{16}$d. per lb.; and heavy goods at 15s.@30s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	March 13.	March 20.	March 27.
Consols	903/4	91	911/4
U. S. 5-20's of 1862....	741/4	741/2	741/2
U. S. 5-20's of 1865....	721/2	723/4	723/4
Erie	393/4	401/4	883/4
Ill. Central	78	781/2	781/2

The New York exports, exclusive of specie, for the week ending March 26, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week.....	$6,127,258	$4,886,282
Prev. reported.....	50,791,717	41,595,362
Since January 1.....	$56,918,975	$46,431,644

The commerce of New York from July 1st to date compares as follows:

	1865–'66.	1866–'67.
Imports merchandise	$215,880,957	$189,805,196
Exports produce.....	163,797,111	128,038,039
Exports specie	17,452,728	22,839,873

The balance in the Sub-Treasury on Wednesday was $113,111,982 40.

Quincy and Palmyra Railroad.

The Missouri Legislature has passed an act authorizing the Hannibal and St. Joseph Railroad Company to purchase and own all the capital stock of the Quincy and Palmyra Railroad Company. The consolidated companies are to be worked under the charter of the Hannibal and St. Joseph Railroad, and the latter is also compelled by the terms of the act to maintain the present road from St. Joseph to Hannibal, by way of Palmyra; to run through passengers and freight from Hannibal to St. Joseph without changing cars or breaking bulk at Palmyra; to charge for fares and freights to or from Hannibal the same as for fares and freights to and from West Quincy; and to charge for the same to or from West Quincy as much less than the amounts charged for fares or freights to or from Quincy, Illinois, as the tolls or charges shall amount to for passing the bridge to be built across the Mississippi at that point.

Toledo, Logansport and Northern Indiana Railroad.

The Butler (Ind.) *Herald* says the prospect of the early completion of the Toldo, Logansport and Northern Indiana Railroad, as shown by their annual statement, is very flattering. The bonds are now upon the market, for the purchase of the iron, and every effort on the part of the officers of this road are being made to commence active operations. The work is said to be two-thirds done, and it is thought $1,000,000 will complete and stock the road, which amount, it is expected, will be realized out of the bonds now on the market, together with the local stock, taken along the line of the road.

Railroad Bridge at St. Louis.

The stockholders in the proposed Bridge Company met at St. Louis on the 23d inst., and formally organized by the election of Charles K. Dickson president, James Blackman vice-president, James C. Abbott secretary, Amos Cutting treasurer, James B. Eads engineer. Several railroad companies and Eastern capitalists are interested in the project. An abundance of money is guaranteed, and surveys have commenced.

Railroad Earnings.—Weekly.

The earnings of the Grand Trunk Railway of Canada for the week ending Mar. 9th, 1867, were $119,668 00
Corresponding week of previous year. 123,940 00

Decrease $4,272 00

The earnings of the Detroit and Milwaukee Railroad for the weekending March 21, 1867, were $30,069 00
Corresponding week of 1866..... 30,388 00

Decrease $219 00

The earnings of the Chicago and Rock Island Railroad for the 3d week in March, 1867, were $73,165 00
Corresponding week of previous year.. 68,710 00

Increase..... $4,455 00

The earnings of the Western Union Railroad for the week ending March 21, 1867. . $9,119 88
Corresponding week previous year.... 8,118 31

Increase..... $1,001 57

The earnings of the Chicago and Northwestern Railroad for 3d week in Mar., 1867 ..$180,580 00
Corresponding week previous year .. 134,482 00

Increase..... $46,098 00

The earnings of the Michigan Central Railroad for the 3d week in Mar., 1867, were... $77,598 28
Corresponding week of previous year.. 68,854 25

Increase..... $8,744 03

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in Mar. 1867, were..... $86,895 00
Corresponding week of 1866 ..... 89,390 00

Decrease $2,495 00

The earnings of the Marietta and Cincinnati Railroad the 2d week in Mar., 1867...$19,636 00
Corresponding week previous year.... 18,624 00

Increase..... $1,012 00

Platte City and Des Moines Railroad.

A direct all-rail line between Chicago and Leavenworth is projected. The object in view is the construction of a railroad from Leavenworth east to intersect the Hannibal and St. Joseph Railroad at Cameron, a distance of fifty miles. At present there is no direct railroad between Chicago and Leavenworth over which freight can be transported without breaking bulk. Freight shipped from one point to the other must go *via* St. Joseph and Weston, at each of which places transhipment is necessary, while between the latter town and Leavenworth it is conveyed by boats. The Platte City and Fort Des Moines Railroad Company is about to commence the construction of a railroad that will obviate these disadvantages and afford a direct and an unbroken line of rail between Leavenworth and Chicago. The distance from Cameron to St. Joseph is thirty-seven miles; from the latter city to Weston, thirty-five miles, and from that point to Leavenworth seven miles, making a total of seventy-nine miles over the present route from Cameron to Leavenworth. By the construction of the contemplated road twenty-nine miles of distance will be saved between Cameron and Leavenworth, besides making a direct all-rail line between Chicago and the commercial capital of Kansas. The Platte City and Des Moines Railroad will run through the Counties of Platte, Clay and Clinton, Missouri. The City of Leavenworth has subscribed $300,000 and Platte County $200,000 to the enterprise, making $500,000 in all. The bonds have already been placed in the hands of the company. Simultaneously with the building of the railroad a substantial bridge will be erected over the Missouri River at Leavenworth, so that the connections may be perfect.

Journal of Railroad Law.

NEGLIGENCE OF PASSENGER'S IN STANDING ON PLATFORM.

The question whether a passenger, who is injured while standing on the platform of the cars against the warning of the company, is to be deemed guilty of negligence, seems to be determined by the fact whether or not the passenger could have obtained a seat inside the car. By the late case of Charles Willis *vs.* The Long Island R. R. Co., in the Court of Appeals of this State it is decided that passengers are not to be deemed guilty of negligence for standing on the platform of cars in motion, when there are no vacant seats for them within the cars. It is no part of the duty of passengers to enforce the regulations of the company, involving interference with passengers; that duty devolves on the conductor, agents or employes of the company.

It is not the duty of passengers to pass from one car to another, in search of seats, while the cars are in rapid motion. The passenger owes no duty to a railroad company to select for himself the safer seat on the train. It is the duty of the company to the passenger to make all seats safe. The plaintiff was injured by an accident to the cars while in motion, while he was standing on the platform of the car, being unable to find a seat within the cars. Held, that the defendants were liable.

It appears from the case that the plaintiff was a farmer residing at Hempstead, and on the 3d of September, 1857, he took passage at Hempstead Branch for Brooklyn, in company with his son, who was on his way to Schenectady for the purpose of entering Union College. They had been waiting some time at the station when the cars arrived. There was no one there to receive their trunk and put it on board, and they had to carry it themselves and hand it to the baggage master in the cars. The plaintiff received his check, and as the train was by that time in motion, they got on the front platform of the passenger coach next in rear of the baggage car. The plaintiff had on other occasions seen the usual printed notice not to stand on the platform. They passed into the coach and were unable to find a single seat unoccupied. The train was then in rapid motion. They returned to the front part of the car along the passage way, in which several others were standing unable to find seats, when three ladies advanced from the other end of the car, who were also in quest of seats, and the plaintiff and his son made way for them by stepping back on the front platform. The conductor came out from the baggage car, and in answer to the inquiry of the ladies for seats, told them that was the baggage car, and they stepped back from the platform into the car. The conductor then received the plaintiff's fare, and the son after standing with him a few moments returned into the car, and being still unable to find a seat, stood inside in the passage way and was there at the time of the collision, the plaintiff remaining in his former position.

The cars were moving at a very rapid rate of speed, and much faster than usual. The rails were in good condition. It was between three and four o'clock in the afternoon. The track was straight, and there was a clear and open view in front of the engine for two miles. There were two pieces of wood, from five to eight inches in thickness, each twelve feet in length, one of hickory and one of oak, lying on and across the rails directly in view, a mile and three-quarters or thereabouts from Hempstead Branch.

Upon these the engineer drove the train with such velocity, that the baggage car was crushed between the tender and forward coach and the front of the latter broken in by the collision. The father who was on the platform, and the son who was standing on the inside of the car, were both severely injured. The son, though badly hurt at the time, recovered in three or four weeks so as to be able to dismiss his crutches; but the father was permanently crippled. The opinion of the Court was written by PORTER, J.—This cause was well tried. The questions of fact were properly submitted to the jury; and both parties had the benefit of a clear and accurate exposition of the law in its application to the various issues involved. There is a full and able discussion of all the material questions in the opinion delivered by Judge Emot in the Court below, and in the views then expressed we entirely concur. (32 Barb., 398.) It will be sufficient, therefore, to state briefly our general conclusions.

That the defendant was guilty of negligence is obvious. The engineer, charged with the safety of some hundreds of human lives, drove a train of cars, in broad daylight, at the rate of ten or fifteen miles an hour, against obstructions lying directly across the track, and visible as he concedes, for a distance of more than a quarter of a mile before he reached them. His excuse for the act, given immediately after the collision, was that though he saw the obstructions in season to stop, he thought he could knock them out of the way. If he was in a condition to be indifferent and reckless in regard to his own safety, he had no warrant for exposing the lives of others to the hazard of an experiment so foolhardy and perilous.

There was no negligence on the part of the plaintiff which contributed to the injury. It is claimed, in behalf of the appellant, that, irrespective of the statute, it is negligence *per se* on the part of a passenger to stand on the platform of a moving car; and that he thereby forfeits all claim to redress against the carrier for injury by culpable negligence; and this, though his act in no manner contributes to such injury. In respect to each branch of the proposition, the law is otherwise.

There is no rule of the common law which makes it the duty of the passenger to the carrier to select a position in the vehicle least exposed to danger through the wrongful act of the proprietor. A seat on the outside of a stage coach may be more hazardous than an inside seat if the driver negligently overturns it on a pavement or a hill side; but the selection of that position is neither negligence *per se* nor tributary in a legal sense to the injury.

In the present case, it is manifest that the plaintiff was not in fault. Through the absence of the usual employes he and his son were compelled to

put their own baggage on the cars. The train started immediately, and they had no choice but to take the nearest coach. They paid the conductor for seats, but found, on examination, that all were occupied. They and others were, for that reason compelled to stand; and the conductor neither rendered them any aid, nor informed them that there were vacant places in the rear cars.

The speed of the train was such as to render it hazardous to pass from car to car, and the gangways being occupied by ladies and others in quest of seats, the plaintiff and his son took such standing places as were least inconvenient and nearest at hand.

Both were injured by the collision, one being inside the cars and the other on the platform at the time it occurred. It may well be said that, if they had been furnished with the accommodations for which they were required to pay, both would have escaped unharmed; but they were clearly guilty, in this regard, of no breach of duty to the defendant.

Their position, whether judiciously or injudiciously selected, so far as they were concerned, was lawful under these circumstances as between them and the company; and, in legal contemplation, it neither caused nor contributed to the injury. The law on this subject was settled in the leading case of Carroll *vs.* The New Haven Railroad Company, in which the question was directly involved; and the judgment of the Superior Court in that case was subsequently affirmed in this court. (2 Duer., 571; 6 id., 415, 416.) It was very properly held in the case of Colegrove *vs.* The New Haven and Harlem Companies, that it did not necessarily follow that no fault of the plaintiff could excuse the defendants from liability, unless it had the effect to produce the collision that caused the injury; but in that case, as in the other, the court affirmed the judgment and sustained the plaintiff's recovery, the jury having been instructed that "if the company undertake to carry in any one car more than they can accommodate with seats, so that some are of necessity forced to stand upon the platform, and have no opportunity before the train is under way to find seats in other cars, such persons are there by permission of the company, and are lawfully there; and the company can claim no exemption under the statute, no matter how conspicuously their notices may be posted in the interior of the cars." (20 N. Y., 492; 6 Duer., 382.) The rule as settled in the case of Carroll *vs.* The New Haven Railroad Company, has recently been reaffimed unanimous decision of this court. (Haley *vs.* Earle, 30 N. Y., 208.)

The Supreme Court was also right in holding, that under the statute the defendant was not absolved from liability; if the jury found from the evidence as matter of fact, that the plaintiff had neither time nor opportunity to proceed to the rear cars in search of a seat, without exposure to hazard in passing from platform to platform while the train was in rapid motion; that there was no seat unoccupied in the coach on which he was riding; and that he was guilty of no actual want of care in the selection of a position in which to stand, until he could obtain the accommodation to which he was entitled.

The statute, under which the defendant claims absolution, provides that "in case any passenger shall be injured while on the platform of any car in violation of the printed regulations of the company posted up at the time in a conspicuous place, inside of its passenger cars then in the train, such company shall not be liable for the injury, provided the said company at the time furnished room inside its passenger cars sufficient for the proper accommodation of its passengers." (Laws of 1850, 234, sec. 46.) When the company fails to comply with this condition, it must find other grounds of immunity, if it would avoid responsibility for its wrongs. It is not sufficient that there may have been proper accommodations in other cars not accessible to the passenger; nor that he might possibly have procured for himself the accommodations which the defendant failed to furnish, by displacing the person of one and the property of another in the exercise of an authority which appropriately belonged to the conductor. He owed no such duty to the defendant, and he forfeited none of his rights by submitting to a temporary inconvenience, to which he was subjected against his wish and through no fault of his own.

The judgment should be affirmed.

Interest and Dividends.

The Pittsburg, Ft. Wayne and Chicago Railway Co., have declared a quarterly dividend of 2½ per cent., free of Government tax, payable April 15th.

The Panama Railroad Co. have declared a quarterly dividend of six per cent., payable April 5th.

The Chemung Railroad Co. have declared a dividend of two per cent., free of Government tax, payable April 1.

The Hartford and New Haven Railroad Co. have declared a quarterly dividend of Three Dollars per share, free of Government tax, payable April 1.

The Philadelphia, Germantown and Norristown Railroad Co. have declared a dividend of five per cent., payable, clear of taxes, on the 1st of April.

Coupon No. 5 of the first mortgage bonds of the Vermont Valley Railroad, due October 1, 1862, will, on and after April 1, 1867, be paid by the Treasurer, at his office in Bellows Falls, Vt. The same coupon will be paid for the space of thirty days from said April 1, 1867, at the National Park Bank in the city of New York.

Philadelphia and Baltimore Central R. R.

A committee of the Philadelphia and Baltimore Central Railroad Company have agreed to contract with Stern, Quigley & Co., of Wilmington, to complete our railroad to the river within a year; thus insuring us a southern connection with the Columbia and Port Deposit Railroad, and also by the Wilmington and Baltimore road a connection with Baltimore, giving us coal and lumber at a much cheaper rate, and a southern market for our grain and produce, which will add materially to the prosperity of Oxford.—*Oxford (Pa.) Press.*

☞ The Legislature of Vermont was convened in extra session on the 27th inst. The object is to afford relief to the southwestern portion of the State, where people have been cut off from railroad outlet south and west by the action of the Troy and Boston, and Rensselaer and Saratoga Railroad Companies. The remedy proposed is chartering a company to build a road from Bennington to connect with the Harlem Railroad at Chatham.

Virginia State Debt.

The following is a copy of the Bill recently passed by the Legislature of Virginia to provide for the payment of a portion of the interest on the State debt:

Whereas from the universal loss of property sustained by the State in the late war, it is found impossible, under present circumstances, to pay full interest on the public debt; and whereas it is the desire and purpose of the General Assembly to make provision for paying the same as fully as the resources of the State will warrant; therefore

Be it enacted by the General Assembly, That the accounting officers of the treasury pay, on the 1st day of July, 1867, and January, 1868, two per cent. interest upon the principal of the public debt of the State, excluding therefrom the bonds given for interest on said debt under the act of the General Assembly passed March 2d, 1866, that being the interest which this State feels obliged to pay until there is a settlement of accounts between this State and West Virginia.

2. Nothing in this act shall be construed as intending to affect the constitutional requirement providing for an adjustment with the State of West Virginia of the proportion of the public debt of Virginia proper to be borne by the States of Virginia and West Virginia.

3. All necessary expenses incurred in carrying out the provisions of this act shall be paid upon the warrant of the auditor of public accounts drawn upon the public treasury, out of any money therein not otherwise appropriated.

4. This act shall be in force from its passage.

The Richmond papers quote Virginia coupon bonds (old) at 56@60; new do., nominal. Virginia registered bonds (old), 38; new, do., no quotation. These new bonds are not included in the bill which passed the Legislature on which 4 per cent interest is to be paid the present year, and the *Times* says it is uncertain when interest on them will be paid. It is an important fact, which should not be overlooked, that no tax bill has yet been passed by the Legislature to raise the money which will be required to pay the 4 per cent interest on the bonds authorized. It is expected that such an act will be passed on the reassembling of that body.

Perkiomen Railroad.

This road is now definitively located, except at the north end, it being undetermined, we believe, whether to connect it with the East Pennsylvania Railroad, or extend it direct to Allentown, to a more eligible and convenient terminus in that thriving Lehigh city. A connection will also be made with the Catasauqua and Foglesville Railroad, which is a road twenty miles long, and which traverses an iron ore region.

The Perkiomen Valley is good ground for a connecting link between the valleys of the Lehigh and Schuylkill, and also for a direct road from Allentown to Philadelphia. The Perkiomen Railroad will be operated by the Philadelphia and Reading Railroad Company, and will enjoy that company's unequalled terminal facilities and accommodations. Thus Lehigh coal can be delivered at the Richmond shipping piers or distributed throughout the city; and the Lehigh iron can be delivered at Willow street, *in the centre of the port*, or on Broad street, Market street, or Washington avenue. Lehigh iron, from the works at Allentown, Catasauqua and Hokendaugua, can be carried with convenience and economy, *via* the Perkiomen route, to tide water at Philadelphia, and be forwarded thence to New York and vicinity *via* the Delaware and Raritan Canal, and southward *via* the Chesapeake and Delaware Canal. Allentown city and its neighbors will find it their interest to avail themselves of the Perkiomen route. —*U. S. R. R. & Mining Register.*

☞ The Delaware and Raritan Canal was opened to Navigation on Monday the 25th inst,

The Colleges of New England—Students and Libraries.

The *Yale Courant* gives some statistics in regard to the number of students in the various colleges of New-England. They are distributed as follows:

Bowdoin College, 232; Colby University, Waterville, Me., 54; Dartmouth College, 298; University of Vermont, 127; Middlebury, (Vt.) College, 52; Norwich (Vt.) University, 40; Brown University, 190; Amherst College, 225; Harvard College, 961, Tufts College, 54; Williams College, 186; Trinity College, Hartford, 59; Wesleyan University, 131; Yale College, 709; Holy Cross College, Worcester, 70; Boston College, 70.

Taken by States the number is as follows:

Maine	286	Rhode Island	190
New-Hampshire	298	Connecticut	899
Vermont	219		
Massachusetts	1,616	Total in New-Eng.	3,508

The number of volumes in each of the college libraries is given approximately as follows:

	Vols.		Vols.
Amherst	30,000	Middlebury	10,000
Harvard	168,000	Norwich Univ.	2,000
Tufts	9,000	Brown Univ.	33,000
Bowdoin	32,300	Trinity	15,000
Holy Cross	5,000	Wesleyan	14,000
Boston	2,000	Yale	77,500
Williams	22,000	Colby Univ.	10,000
Dartmouth	40,000		
University of Vt.	12,000	Total	489,800

Large additions have been made to several of these libraries since reports of their condition have been made to the public.

☞ The Alexandria Canal will be opened for navigation on the 1st of April, and boats will pass directly from Cumberland to Alexandria. The tolls on the canal have been reduced from 92 cents to 70 cents.

Mobile and Ohio Railroad.

The eleventh annual report of the officers of this company, laid before the stockholders at their meeting at Mobile, April 17, 1866, has only just reached us, but though late for review is well worthy of being carefully studied in each of its departments. It brings the accounts down to December 31, 1865.

The year 1865 is divided by May 15, the date when Confederate money ceased to be current, into two fiscal periods each represented by different values. The gross earnings of the year are stated in the following summary:

	Jan. 1, to May 15.	May 15, to Dec. 31.	Total.
Earnings from—			
Passengers	$224,966 74	$435,306 93	$660,273 67
Freight	279,506 31	894,541 38	1,174,047 69
Express	10,356 26	89,127 99	99,484 25
Unpaid C. S. acc'nts	668,391 11	.....	668,391 11
Total	$1,183,220 42	1,418,976 30	2,602,196 72

In addition to the foregoing amounts there were unadjusted claims between Sept. 1, 1864, and May 30, 1865, which would have been paid if the Confederate Government had succeeded, amounting to $2,615,811 82; and the following amounts were also earned within the period from May 15, to December 31, 1865, viz: from express $13,699 51, U. S. Government transportation (not adjusted at date,) $75,000, and U. S. mail (estimated) $17,000—total, $105,699 51.

The ordinary expenses of the company for repairs, transportation, &c., were as follows:

	Jan. 1, to May 15.	May 15, to Dec. 31.	Total.
Road	$315,813 10	$216,247 22	$532,060 32
Machinery	200,616 55	196,039 70	396,656 25
Transportation	390,254 19	287,611 22	677,865 41
Total	$906,683 84	$699,898 14	$1,606,581 98

Leaving the net receipts for each division and of the whole year as follows:

Net	$276,536 58	$719,078 16	$995,614 74
Add unadjusted acc'ts	105,699 51		105,699 51
Total net revenue	$824,777 67		$1,101,314 25

Between May 1, 1865, and Jan. 1, 1866, the following rolling stock was purchased, and expenditures made for supplies on hand at the latter date:

21 locomotives	$313,300 00
263 freight cars	185,600 00
10 passenger cars (new)	50,641 00
6 " " (2d hand)	17,800 00
4 sleeping cars	25,000 00
Transportation of rolling stock	22,651 39
Supplies	9,697 00
Cross ties and lumber	58,324 30
Stores and provisions	26,941 63
Making a total of	$709,955 32

When the late war broke out this road was scarcely completed. The last rail was laid April 22, 1861, and on the same day the federal forces arrived at and occupied Cairo. From that date trains were run regularly through, and the through business on the road would no doubt have been large, but the embarrassment resulting from the examination of passengers' baggage and freight for contraband articles, gradually reduced it until it was entirely stopped on the occupation of Columbus by the Confederate forces. From that time to the close of the war the road was virtually operated under the direction of the Confederate authorities, and as a necessary consequence of neglect and wear and tear, the property of the company was much damaged, and all movables wasted or destroyed.

The damage to the roadway consisted in the destruction and decay of the bridges, trestle work and cross ties from Okolona to Union City, a distance of 184 miles; the burning of nineteen warehouses and station buildings; the destruction of the tools and stationary engine in the Whistler Repair Shops, and the wearing out and burning of about 37 miles of rails. In addition to this damage there were 21 miles of rails burnt by Gen. Sherman's raiders in February, 1864, besides the destruction of the warehouses, water stations, bridges and trestle work on 48 miles of road, &c.

The destruction which resulted to the rolling stock, accelerated by the impossibility of obtaining the materials and supplies necessary for repairs, is well illustrated in the following comparison of its amount and condition in 1860 and 1865. A third column is added which shows how far restoration had progressed up to April 1, 1866:

	Jan. 1, '60.	May 1, '65.	Apr. 1, '66.
Locomotives—in running order	59	15	40
" under repairs	8	4	13
" out of order but good	..	38	33
" condemned	1	8	8
Passeng'r cars—in running order	26	11	30
" under repairs	1	7	4
Baggage cars—in running order	11	3	..
" under repairs	..	2	..
Freight cars—in running order	721	231	471
" under repairs	62	88	15

The stock designated as in running order on May 1, would not have been used before the war, but the pressure of business forced its use notwithstanding its bad condition. At the close of the war the road was in fair running condition from Mobile to Okolona 261 miles, and passable for trains to Corinth, but there were only fifteen locomotives, 231 freight and 11 passenger cars to operate it; and the tools of the only repair shops for keeping the rolling stock in order were unfit for use. That part of it within Gen. Canby's department, which had been operated by the military authorities, was returned to the company's possession May 6, 1865, with the condition that the Government business should have the precedence, all military orders be obeyed, and that nothing therein contained should be construed as releasing the company from the pains and penalties imposed by the act of confiscation. Subsequently that portion of it within Gen. Thomas' department was released upon the same conditions, but the road north of Corinth could not be brought into operation until September 9, when tri-weekly trains were put on it. Although these orders nominally placed the road in the company's possession, it was really run almost exclusively according to military orders, until all the property, including cotton captured from the Confederates was transported. Little or no aid was extended to the company by the Government, and the conditions and terms of the release were a cloud upon its credit, and effectually prevented the purchase of supplies except upon payments in advance. On every hand, indeed, the company's agents were met by a want of confidence in their ability to meet engagements, until the Government had decided upon the course to be pursued with southern railroads.

The first and most important object was to obtain additional rolling stock at the earliest moment. During the war no rolling stock had been constructed adapted to the southern gauge except for the Government, and the business of the northern and western roads had increased to such an extent that manufacturers had cash orders for months ahead. The Government, however, had a large stock at Nashville and small lots in the hands of manufacturers, and they decided to dispose of the latter at public auction for cash. Sales commenced Sept. 17, and on Oct. 3, a purchase was made in Richmond of 5 locomotives and 100 freight cars. The locomotives were not received until December and January, 1866, and it was beyond the middle of March before the cars could be placed on the road. At the October sale at Nashville 15 locomotives and 110 cars were purchased, also 20 cars at Memphis, Tenn., and 83 cars at Columbus, Ky. In addition there were purchased all the new passenger cars (10 in number,) which could be found, and 4 sleeping cars, and as these were not sufficient to run daily passenger trains, 6 second hand first class cars were also bought. Subsequently, 3 new Taunton and 13 Philadelphia locomotives, and 2 baggage cars were purchased, and 5 of the locomotives received. The list of the stock on the 1st April, 1866, has been already given.

Materials had also been ordered for 100 platform and 50 box cars, and their construction been commenced at the Whistler Repair Shops.

The amount of rolling stock then on the road

was ample for the prompt transportation of western products from Columbus, Ky., not only for consumption on the line of the road, but for supplying the City of Mobile.

The total damages to the road on account of the war are estimated in money at the sum of $1,810,937, and the loss by failure of the Confederate Government at $5,228,561 41—making a grand total of $7,039,398 41, as the aggregate loss to the company. The estimate for the repairs of war damages is as follows:

Rolling stock and supplies purchased	$709,955	
Rails received	42,189	
Re-construction to Jan. 1, 1866	169,000	
" to May 1, '67, (estimate)	150,000	
Expenditures required (as below)	1,235,000	
		$2,306,937
Less permanent expenditures during the war	$125,000	
Assets, locomotives, sleeping cars and materials	371,000	
		496,000
Estimated damages to the road by the war		$1,810,937

The following are the expenditures, in addition to the liabilities already incurred for rolling stock, &c., which will be required to place the road and appurtenances in as good condition as when it was finished:

3,500 tons rails and fastenings, the payments for which have been provided	$360,000 00
Repairing locomotives	250,000 00
" cars and construction of new ones to make rolling stock equal to 1861	300,000 00
Reconstruction of warehouses	75,000 00
Repairs of bridges, renewal of cross ties and drainage	250,000 00
Making a total of	$1,235,000 00

When these expenditures shall have been made the road and appurtenances will be in as good condition as at completion, and the company will have the following property:

Warehouse at Mobile, filling up station grounds and store at Whistler constructed during the war	$125,000	
19 locomotives (above the stock before the war) out of order, but can be repaired, worth	181,000	
Old materials	160,000	
Sleeping cars and furniture	30,000	
Making a total of	$496,000	

In addition to the above named expenditures, there will be required for:

Construction and equipment of Macon shops	250,000 00
Addition to shops at Whistler and Jackson	150,000 00
Making a total of expenditures required	$1,635,000 00

The loss by the failure of the Confederate Government is thus accounted for:

Ledger balances for Conf. transp.	$1,367,278 88	
Conf. S. bonds & securities on hand	899,821 56	
Conf. S. currency	100,958 97	
Alabama State bonds	125,000 00	
Unadjusted claims against C. S. Government for transportation	2,615,811 00	
Making a total of		$5,228,561 41

The financial condition of the company as shown in the general account made up to May 1, 1865, was as follows:

Capital stock		$3,588,299 85
Bonds & State loans	$7,661,861 01	
" paid off	2,323,984 82	
		5,337,846 19
Sales of lots and donated lands		275,952 38
Transportation	$15,860,896 83	
Less expenses	8,448,107 60	
		7,412,789 23
Requisitions		63,419 42
Bills payable and change notes		642,656 89
Cars, iron, contracts, &c., balances		87,900 79
Local balances		226,456 90
Total		$17,652,454 71

Against which are charged as follows, viz:

Construction		$11,247,563 83
Donated lands, surveys, maps, &c.		27,427 50
Interest on bonds & general acc'nt		2,433,974 74
Paducah Branch: superstructure		114,894 08
C. S. bonds & securities	$899,821 56	
Ala. State bonds	125,000 00	
Due from C. S. Gov.	1,367,278 88	
		2,392,100 44
Divid'd, State tax, &c., paid or due		176,785 84
Cotton purchased		739,829 02
Miss., Gainesville and Tuscal. R. R. bonds		30,000 00
Negroes for road repairs		119,691 00
Due from other roads		45,665 74
Bills receivable		2,937 65
Conf. State taxes		206,493 04
Cash on hand		100,958 97
Total		$17,652,454 71

The following is a supplemental statement of the receipts and expenditures from May 1st, to December 31, 1865:

Capital stock: amount consolidated		$27,100 00
Transportat'n receipts	$1,324,846 83	
Less expenses	682,318 19	
		642,528 64
Sales of cotton		61,176 43
Machinery: balance due on account of rolling stock, &c., purchased		529,227 58
Interest scrip		716 64
Local balances		38,018 57
Total		$1,298,767 86

Against which are charged—

Reconstruction of railroad	$169,793 82
" of depots	15,379 80
Purchases of rolling stock	619,282 63
Interest on bonds	57,101 76
Cotton—expended on	65,638 60
Change notes redeemed	31,503 20
Interest dividend	16,306 37
Tennessee instalments	9,657 70
Mississippi "	1,100 00
City taxes	702 00
Kentucky instalments	50 57
Cash on hand	253,927 11
Total	$1,298,767 86

The following statement shows the condition of the bonded debt at the close of the fiscal year 1865:

Income bonds of 1861, 8 per cent.		$146,200 00
" 1862, 8 "		91,000 00
" 1865, 8 "		305,800 00
" 1867, 8 "		228,900 00
" 10 yrs. 8 "		75,342 74
Sterling (1st mort.) bonds 1882	8 "	4,187,000 00
	6 "	
Tenn. State bonds '82, 6 "		1,099,000 00
Total outstanding		$6,133,242 74

The report is silent as to the actual amount of interest coupons due on the above debt, nor, is there any lengthened reference to it. The President, however, closes his report with the following notice of the funding system adopted for taking up the over due principal and interest:

"Our 8 per cent. income bonds secured by collaterals having matured, we proposed to the holders to exchange sterling bonds for them *at par*. This proposition has been readily accepted and a large portion of these bonds have been taken up by exchange, and the remainder are coming in rapidly.

"The coupons on our sterling bonds held in this country not having been paid during the war, because the holders were unwilling to receive the only currency that could be had, we proposed to them to fund the matured coupons, including the two coupons that will fall due this year (1866,) giving them 8 per cent. ten year bonds called "Interest Bonds," counting each coupon taken off sterling bonds at $40—said interest bonds to be secured by collaterals, making them perfectly safe, the first coupon to be payable 1st of May, 1867.

"The financial plan here intimated is the funding of coupons now matured and that will mature in 1866, and the resumption of payment of interest on the 1st of May, 1867. The coupons are coming in rapidly, and this proposition also seems to give general satisfaction."

The officers of the company elected May 19, 1866, are as follows:

President.—Milton Brown.

Directors.—Milton Brown, W. B. Hamilton, J. Emanuel, C. K. Foote, P. Hamilton and C. P. Gage, of Alabama; C. E. Rushing, J. J. McRae, C. W. Williams, Eli Abbott and A. Murdock, of Mississippi; J. A. McDearman and Wm. Cook, of Tennessee.

Chief Engineer & Gen'l Sup't.—L. J. Fleming.

Secretary.—A. L. Willoughby.

Debt of Philadelphia.

The following statement from the Report of the City Comptroller, will show the amount of the five and six per cent. loans, with the years at which they come to maturity.

	5 per cent.	6 per cent.	Total.
1867	$133,700 00	$58,518 46	$192,218 46
1868	111,180 04	98,845 76	210,025 80

☞ A bill has passed the Maryland Legislature, and is now a law, directing the board of public works to vote for the president and directors of the Chesapeake and Ohio Canal Company, upon the nomination of the preferred bondholders.

COAL CUTTING MACHINERY.

THE COLLIERY PROPRIETORS OF SOUTH LANCASHIRE AND CHESHIRE, being anxious to encourage the development of **Coal Cutting by Machinery**, have determined to offer **THREE PRIZES**, namely, £500, £200, and £100, for the 1st, 2nd, 3rd **Best Machine** respectively, which, in the opinion of the Committee appointed for that purpose, shall be most suitable to the requirements of the trade, and the Inventor of which shall comply with the regulations laid down by the Committee.

A copy of the regulations, and further particulars, will be furnished on application to the undersigned.

All Competitors must furnish the Machines intended for Trial, in Lancashire, not later than the 1st November, 1867.

MASKELL WM. PEACE,
Wigan, Law Clerk to the Association.

WATER & SEWERAGE PIPES,

KNIGHT-BAILEY PATENTS.

The Water Pipes are made of Wrought Iron, lined and coated with Hydraulic Cement, with Socket Joints, and connections for service pipes already inserted. Entirely free from oxidation they are absolutely indestructible. They can be laid and guaranteed for much less than cast iron Pipes.

The Sewerage Pipes are made of Hydraulic Cement. They stand the most severe tests of acids, increase in strength with age, are perfect in interior finish, and cheaper than any other pipes made.

We will contract for the water supply and drainage of cities and villages.

And Carrying the U. S. Mail,

VIA PANAMA RAILROAD.

LEAVE PIER NO. 42 NORTH RIVER FOOT OF Canal Street, at 12 o'clock noon, as follows:

April 1.—NEW YORK, Capt. Maury, connecting with CONSTITUTION, Capt. Lapidge

April 11.—HENRY CHAUNCEY, Capt. A. G. Gray, connecting with GOLDEN AGE, Capt. Watkins.

April 20.—OCEAN QUEEN, Capt. T. A. Harris, connecting with MONTANA, Capt. Sutton.

All Departures touch at ACAPULCO; those of 1st and 21st connect at Panama with steamers for SOUTH PACIFIC PORTS, 1st and 11th for CENTRAL AMERICAN PORTS. Those of 1st touch at MANZANILLO.

Departure of 11th each month connects with the new steam line from Panama to Australia and New Zealand.

Steamer of March 1st, 1867, will connect with the Company's steamer COLORADO, to leave San Francisco for Yokohama and Hong Kong on April 3, 1867.

100 Pounds Baggage allowed each adult. Medicine and attendance free. For Passage Tickets and all further information apply at the office, on the wharf foot of Canal Street North River, New York.

9m35 F. R. BABY, Agent.

PROPOSALS FOR THE CONSTRUCTION OF THE SUMMIT DIVISION OF THE ILLINOIS AND MICHIGAN CANAL.

OFFICE OF THE BOARD OF PUBLIC WORKS,
CHICAGO, March 18th, 1867.

Sealed Proposals will be received by the Board of Public Works, at their office, until 11 a. m. Wednesday, May 1st, 1867, for the excavation necessary to deepen the Illinois and Michigan Canal, according to the plan adopted, from Chicago River to Summit Lock, No. two (2) a distance of twenty-six (26) miles.

Maps, profiles, specifications, &c., will be exhibited the office of the Board of Public Works in Chicago on and after April 15th until the day of letting.

There will be some two millions (2,000,000) cubic yards of earth excavation—some of it quite hard and embracing considerable detached rock—and about four hundred seventy thousand (470,000) cubic yards of stratified limestone.

The work must be prosecuted so as not to interfere with the use of the Canal during the season of navigation.

It is believed, however, that the most of the excavation, except the stratified rock, can be done with steam dredges without interfering with the navigation of the Canal, but the rock excavation will all have to be done between the close of navigation in the fall and the opening in the spring.

If a new line be adopted for any portion of the distance, operations thereon may be continued the whole year; and the navigation of the Canal will be suspended at least five months in each year unless otherwise mutually agreed by the Board and Contractors.

The whole of the work must be done on or before the end of the third season of the suspension of navigation.

A large amount of machinery will be required to excavate the work within the time required, consisting mainly of steam dredges, scows and cranes for the earth work, and drilling machines, pumping machinery and cranes for the rock.

Contractors will be required to commence work on the earth excavation within thirty days of the time of letting, and upon rock excavation by the first of November next.

The dredges, cranes and scows now in the Canal can be had at an appraised value which will be made known to bidders prior to the letting.

Parties contracting for the work will be required to provide all machinery, and to put up and remove all dams and all works of protection, and at their own expense to do all pumping, or whatever may be necessary to secure their work from water.

Proposals must be addressed to the Board of Public Works, endorsed "Proposal for Deepening Illinois and Michigan Canal," and be accompanied with the usual two hundred dollar ($200) bond, with surities, to be approved by the Board.

Contractors will bid, stating the price for which the work will be done on each of the different sections, and the work will be let as a whole or in part, and in such quantities as the Board shall determine.

The Board reserve the right to reject any and all bids, and no proposal will be accepted unless the party offering it shall give evidence satisfactory to the Board that he has the necessary skill, experience, energy, and ability for doing the work, is trustworthy, and has sufficient pecuniary resources.

The Board will require such security, as according to their judgment, will secure the doing of the work according to the contract.

American Railroad Journal.

New York, Saturday, April 6, 1867.

Southern Railroads.

The Southern States are rapidly repairing the work of destruction incident to the war, and also projecting entirely new lines. The Augusta and Macon Railroad, passing through Milledgeville, is surveyed and partially graded. This will form a diagonal to the Georgia Railroad and Central Railroad, and in connection with the Columbia and Augusta Road, which only wants the rails to be completed, will shorten the route to the Southwest. The Mobile and Girard Railroad Co. are prosecuting their work with energy to Pollard, Alabama, and the Montgomery and West Point are making a branch from Montgomery to intersect the former at Union Springs. The Alabama and Tennessee River Railroad Co. are extending their road from Jacksonville to Rome, making connections with the Rome Railroad. This link completed, and connection made with the Alabama and Mississippi Railroad, a very short route will be formed to Selma, Alabama, Meridian and Vicksburg, Mississippi *via* Washington, D. C., and Dalton. A road has been projected and surveys are being made from Atlanta, Georgia, to Charlotte, South Carolina, passing through Belton and Greenville. The Charlotte and South Carolina Railroad Co. are extending their road from Columbia, South Carolina, to Augusta, and the South Carolina Railroad Co. are surveying from Branchville to Millen. These two cut-offs will save the detour from Kingsville to Augusta *via* Branchville, and shorten the two routes to Montgomery and Mobile. Subscriptions are being obtained for the construction of a railroad from Lynchburg to Danville, there to connect with the old Piedmont Road. A road is being constructed from Winchester to Salem, on the Virginia and Tennessee, through the Shenandoah Valley. A new route has been lately opened from Wilmington, Del., to Chrisfield, there connecting with a line of steamers to Portsmouth and Norfolk. The route much shortens the time to these points, and in connection with the Seaboard and Roanoke Railroad forms close connections to all points South and Southwest.

Vermont Railroad Legislation.

As stated by us in our last issue, the Legislature of this State was convened in extra session on the 27th ult.; the object being to afford relief to the Southwestern portion of the State where the people had been cut off from railroad outlet South and West by the action of the Troy and Boston and Rensselaer and Saratoga Railroads, in suddenly with holding those facilities for travel and the conveyance of freight which had been maintained for the preceding fifteen years. The Governor, in his message, going over the whole history of railroads and railroad operations in the Southwestern part of the State, showed how seriously and extensively the people and the business interests of Bennington and Rutland Counties had been affected by these hostile acts. The members of the Legislature very readily entertained and appreciated the facts in the case, and immediately proceeded, under a suspension of the rules, to grant those methods of relief which had been asked, viz.: a law authorizing certain towns to subscribe for stock, and the mortgaging of the Rutland and Bennington road to aid in the construction of a road to connect Bennington with Chatham Four Corners, N.Y. These bills passed the House on the first day of the session and the Senate on the second. The Legislature was not more summary and thorough in its part of the work touching this matter than will be those people whose interests are so intimately connected with the building of this proposed road. Heavy private subscriptions have been made for it, and the towns will make theirs as soon as they can legally call meetings and vote the money. Col. Lindsey, the Civil Engineer of Vermont, has been retained for service in the survey and construction of the road, and will proceed at once to the field of operations.

Northern Railway of Canada.

The annual meeting of the Northern Railway Company took place at Toronto on the 13th ult. The annual report of the directors for the past year, represents the amount of earnings from all sources to be $512,874 66, and the expenditure $337,012 42, leaving a net result of $175,862 24, which has been applied towards the payment of interest on the 1st and 2nd preference bonds, consisting of the usual half-yearly dividends of 3 per cent. each, besides an additional dividend of 1½ per cent. on account of arrears of interest due on the second preference bonds, which now leaves the company only one half-year in arrears on that class of bonds.

The gross earnings of the year, compared with those of 1865, show an increase of $6,126 08, but if the amount for arrears of postal service, included in last year's earnings, and which properly belongs to former years, be deducted, the increase of 1866 over that of 1865 amounts to no less than $19,094 16, or 3·87 per cent., whilst the gross expenditure of this year exhibits an increase of $9,651 47, and is accounted for by the addition of new rolling-stock and by the erection of new works and buildings. The report was adopted.

The following directors were elected:—Hon. J. B. Robinson, Henry Wheeler, F. W. Cumberland, Lewis Moffatt, R. J. Reekie, John A. Chawne, H. M. Jackson.

At a subsequent meeting Hon. J. B. Robinson was re-elected President, Mr. Henry Wheeler Vice-President and Chairman of the English Board, and Mr. F. W. Cumberland Managing Director.

☞ The question whether the street cars shall be allowed to run on Sunday in Baltimore is to be decided by the votes of the people on the 10th inst.

Pittsburg, Ft. Wayne & Chicago Railway.

The annual meeting of the stock and bondholders of this company was held at Pittsburg on the 21st ult., at which the Report of the Directors for the year ending December 31, 1866, was presented and read. From this we learn that the earnings of the road were:

From passenger travel		$2,441,895 70
" freight traffic		4,707,582 12
" transportation U. S. mail		93,900 00
" " of express matter		100,298 43
" Cleveland and Pittsburg R. R. Co. for joint use of track between Pittsburg & Rochester		85,000 00
" rent of buildings and grounds		2,869 00
" miscellaneous sources		35,672 31
		$7,467,217 56

Expenses, viz:

Maintenance of way	$1,270,533 01	
" cars	552,910 50	
" motive power	1,568,196 04	
Conducting transp.	1,280,472 24	
General expenses, including all taxes	475,574 55	
		5,147,686 54
Which leaves a balance of		$2,319,531 02

To the credit of income account, out of the operations of the road for the year.

The last annual report exhibted a credit over all payments and liabilities on the first day of January, 1866, of	$550,150 33
To this add as follows for the current year:	
Net income from the railway in 1866	2,319,531 02
Net income from lease of the New Castle and Beaver Valley Railroad in 1866	55,460 56
Amount received for sale of 6,251.56 shares of capital stock	625,156 17
Total amount available for the year	$3,550,298 08

Out of this sum the payments and liabilities for the year have been as follows:

Interest on mort. debt	$870,361 93	
Dividend of 10 per cent. on capital stock	984,300 00	
Federal income tax on same	51,015 79	
Expended for construction and equipment	1,116,975 70	
Sinking fund	118,678 67	
Amount paid Cleveland and Pittsburg R. R. Co. under contract for 1866, and balance due for 1864	209,048 06	
		3,350,380 15
Total above all expenses and liabilities, January 1, 1867		$199,917 93

The following statement will show the principal operations of the Treasury, in its application of moneys, during the year:

Interest	$870,361 93
Sinking fund	118,678 67
Dividends and income tax on same	1,035,315 79
Construction and equipment	1,116,975 70
Due Cleveland and Pittsburg R.R. Co.	209,048 06
Reduction of indebtedness on account current operations of the road	280,388 98
Reduction of amount due other R.R. Co.'s	144,049 83
Reduction of miscellaneous liabilities	49,434 08
Reduction of amount due J. F. D. Lanier, Trustee	27,092 34
Applied to minor objects	9,899 78
	$3,860,735 16

The sources from whence means were derived to make above payments, were as follows:

Net income of the railway		$2,319,531 02
Income from N. C. and B. V. R.R.		55,460 56
Sale of capital stock		628,545 95
Reduction of supplies on hand		337,135 11
Reduction of amount due from other companies		30,994 11
Reduction of miscellaneous assets		147,985 15
Reduction of cash in Treasury		341,083 26
		$3,860,735 16

This statement shows an improved condition of the Treasury and accounts, as compared with last year.

Statement of net income, and the proper charges on the same:

Net income from Main Line		$2,319,531 02
And from operating N. C. & B. V. B.		55,460 56
Total income from road		$2,374,991 58
From which deduct—		
Interest on mort. debt	$870,361 93	
Sinking fund	118,678 67	
Amount due C. & P. R. R. Co.	209,048 06	
		1,198,088 66
Balance for dividend account		$1,176,902 92

Which is equal to a dividend of 11¾ per cent., with a surplus sufficient to pay the income tax on the same.

In the summary, showing the earnings and expenses for the year, of the transportation business of the railway, the first noticeable feature is a decline in the gross income of $1,021,845, as compared with the previous year, of which decline $31,485 76 was in the freight traffic department and $949,825 76 in the passenger department of the business.

A reference to the details of the freight traffic will show that the falling off of receipts from that source for the first five months of the year, was $348,362 37, while there was an actual increase in the last eight months of the year, of $316,886 61, leaving a deficiency for the year, of $31,485 76, as stated above.

The second noticeable feature is, that while the gross income fell off over one million of dollars, the operating expenses were only diminished $57,-829 04, and this diminution in the operating expenses is even less than the reduction in taxes caused by the abrogation of the 2½ per cent. federal tax on freight earnings, so that the expenses incurred in earning $7,467,217 56, in the past year, were practically the same as the expenses of earning $8,489,062 56, in 1865.

While the earnings of the road for transporting freight, in the years 1865 and 1866, were very nearly equal, the quantity of freight transported, and the conditions of movement varied materially in these years, as will be seen by the following comparison:

	1865.	1866.
Tonnage	882,615	1,025,778
Mileage, per ton	193,789,901	233,274,794
Average haul, per ton	238 miles.	227 miles.
Mileage of loaded fr't cars	24,284,877	28,543,369
" empty "	8,695,113	8,286,126
Av. load of car, westward	7.111 tons.	7.244 tons.
" " eastward.	8.502 "	8.802 "
" " both ways	7.980 "	8.178 "

This shows an increase of the freight tonnage of the road 23.2 per cent., and what is still more gratifying, it is all from the increased local traffic of the road; and more, for, as the foreign tonnage fell off 19,564 tons, the local tonnage increased 212,727 tons, or nearly 60 per cent. This increase of the local tonnage, and decrease of the foreign, explains the reason of the shortened average haul, per ton, of the freight in 1866, as compared with 1865.

With a view of ascertaining the proper rates to charge for transportation, as a remuneration for service, and to ascertain the minimum which might prudently be submitted to in seeking freight under strong competition, the following table has been carefully made up from the statistics of the freighting business of this company. It will be both interesting and instructive to all who seek to conduct railway business on correct principles and well-established data.*

	1865.	1866.
Average cost, including dead weight of car, and of empty cars, per ton per mile, cents	1.592	1.383
Average cost of moving cars, loaded and empty, per ton per mile, cents	0.575	0.505
Average cost of moving freight, not including cost of moving car, per ton per mile, cents	0.808	0.745
Average cost of hauling 10 tons of freight, weight of car not included, from Pittsburg to Chicago, 468 miles	$33.69	$32.95
Average cost transporting a car (8 tons weight) whole length of road	21.53	18.91
Average cost of transporting a car, with load, (10 tons) whole length of road	55.22	51.86
Average cost of transporting a car a round trip, and only loaded one way	76.75	70.77
Actual cost of car with 10 tons through freight, whole length of road		45.12
Actual cost of car, round trip, but only loaded one way		61.57

These last two results are deduced from the two previous ones, by deducting in each case, *thirteen per cent.* as being the difference between the cost of the *averags* movement of the whole freight traffic, and of the cost of moving freight in full car loads and trains, between the terminal stations.

As the number of tons of freight moved in 1866 exceeded the number in 1865, by 23.8 per cent. and as the number of miles which said freight was moved exceeded the movement of 1865 by 20.4 per cent., and as the aggregate cost, in both instances, did not materially vary, it will be seen that there has been a great reduction in the working expenses per ton, on the tonnage movement. A close analysis of the accounts show that in 1866 the freight expenses were 73.75 per cent. of the gross freight earnings, and the expenses of the entire business of the road 68.6 per cent. of the whole earnings.

The revenue from transportation of passengers fell off $949,325 76 from the previous year. Of this diminished income, more than one-half, or $480,000, was on account of military transportation; the whole income from this source for the year having been but $66,000. About two-thirds of the diminished income from this source was on the through or foreign travel, and one-third from the local travel. Of the loss of foreign travel, nearly 52 per cent. was on the Eastern Division, and rather more than 48 per cent. on the Western Division. Of the loss in the local travel the result on the two divisions is very different from the above. On the Eastern Division the loss was 27 per cent. of the whole, and on the Western Division 73 per cent. The only increase in the passenger travel was on the accommodation trains, on which the increase was 10 per cent. in number carried, 7 per cent. in mileage and 4⅕ per cent. in revenue received. These results in the passenger business for the year do not vary, materially, it is believed, from those obtained by nearly all the leading railways of the country.

The earnings from transportation of express matter in 1865, were	$149,658 02
The earnings from same source in 1866, were	100,298 43
Loss	$49,459 59

Being a loss of about 33 per cent. The large express business of 1865 was exceptional, and

* In making up this table of cost, the item of "General Expenses," as shown in the accounts of this company, is excluded, which if proper to add, would increase the cost about 3 per cent.

caused by the inability of the lines occupied by the Adams Express Company to accommodate the large southwest business of that company during the closing period of the war; the overflow seeking the route *via* Crestline over the road of this company from Pittsburg.

The number of locomotives in the service of the company remains as at date of last report, being 189 in number. They are in good order, and by the officers of the road considered in better condition at the close than at the beginning of the year. The whole number of miles run by the engines was 4,945,413, being an average 26,166 miles per engine, and the amount earned by each engine (by average) was $40,000.

The passenger equipment was not increased during the year. Out of the new passenger equipment put on to the road just at the close of the preceding year, $18,675 of its cost came into the accounts of 1866. It consists of 93 first class coaches, 8 second class coaches, 18 emigrant, 22 baggage, 7 mail, 19 express, 1 pay car, 1 director's car.

The freight equipment has been increased during the year by building at the company's shops at Fort Wayne, 150 new box cars, and the whole of this class of equipment at the close of the year is as follows: 1,057 box cars, 442 stock cars, 776 flat cars, 93 caboose cars for freight and gravel trains, 8 wrecking cars, and 5 market cars, making a total of 2,381 of all classes, of which 90 per cent. are in good order, and the balance need rebuilding or extensive repairs.

The track has been kept in excellent order, throughout the year, and is now fully equal to that of the best roads of the West. Twenty-four per cent. of the main track has been relaid with re-rolled rails, during the year as follows:

	Eastern Division. Tons.	Western Division. Tons.	Total.
Re-rolled iron	3,462	6,346	9,808
Repaired rails	...	663	663
Tons			10,471

Three-fourths of the entire main line, of 468 miles, has been re-laid with new, re-rolled and repaired rails, in three years, (1864, 1865 and 1866,) and paid for as repairs out of current earnings.

The renewals of cross ties has been even greater than that of iron, having been 27 per cent. of the number in the entire main track, of which number 90,451 was laid in the Eastern Division, and 191,870 in the Western Division. To supply the deficiency of gravel in the original construction of track, new gravel was put into the same, to the amount of $50,000, and paid for as repairs, out of the current earnings.

The increased tonnage of the year has made necessary an increase of sidings, for the prompt passing of trains, and which have been made to the extent of 6.9 miles, so that the whole length of sidings is now 105 miles and 627 feet, or 22 miles of siding for each 100 miles of main track. In addition to this, there is 33 miles of double track, 26 miles from Pittsburg, west, to Rochester, and 7 miles from Chicago, east, to the crossing of the Rock Island Railroad.

The construction and equipment has been continued through the year, to a larger extent than was expected at the date of the last Annual Report. The urgent demands of the increased and increasing traffic of this line have been so pressing, that it seemed impossible to restrict the expenditure below the point reached without doing injustice to the business offering, and a damage to the property. The expenditure on account of construction and equipment, for year ending December 31st, 1866, was:

Eastern Division	$580,926 80
Western Division	536,048 90
Total	$1,116,975 70

The Cleveland, Zanesville and Cincinnati R. R., (Hudson to Millersburg,) has been continued, under the superintendence of Col. Simon Perkins, who manages it with great economy, and acceptably to the patrons of the line. The accounts are kept distinct from those of this company, and the surplus earnings, after paying interest on the mortgage, have been devoted to purchasing the debt, which has thus been reduced to $175,000, from the original amount of $200,000.

The large bituminous coal fields, which reach within three or four miles of the present southern terminus of the road, at Millersburg, are now being opened, and coal mined for market. The survey extending the road four miles further south, to these mines has been completed, the right of way purchased and paid for, and an acceptable proposition from a good contractor has been made, to grade the line. It will require about four months after the work shall be commenced, to have the track ready for use.

The business of and from the New Castle and Beaver Valley R. R., (Homewood to New Castle,) has been very satisfactory for the year, and at the time of writing this report is very large. The delay in the completion of the road from Jamestown to Franklin, so as to give a more direct communication between Pittsburg and the Oil Regions, has deprived us of a source of business that was expected at the date of the last report. The track of this road is now down, and will be brought into use in a few weeks.

The gross earnings of the N. C. and B. V. R.R. for the year, was $151,999 49.

This company's proportion 60 per ct.	$91,200 06
From which deduct operating expenses	35,739 50
Profit in operating this 15 miles of road under the lease	$55,460 56

In operating the N. C. and B. V. R.R., this company furnishes all the equipment, and pays all the operating expense, including repairs. All new capital for extension of the property, to meet a growing business—such as double track, siding, station houses and grounds, water stations, &c., is to be furnished by the lessee. The only capital invested, then, by this company, is in the cost of the rolling stock necessary to operate the road, which is estimated to be about $130,000. On this estimate, the profit derived by this company, from operating the road, was 42.66 per cent. on the capital thus employed.

The Lawrence R. R. Co. has completed its road to a connection with the Cleveland and Mahoning road, two miles east of Youngstown, and passenger and freight trains are now running on regular schedule time, between Pittsburg and Youngstown. The station and track accommodations, in Youngstown, not being sufficient for both roads, further expenditures and additional time will be required before we shall be in a condition to accommodate the large business offering to this new line. The Lawrence R.R. Co. has the means provided to make these necessary improvements. An agreement between this company and the Atlantic and Great Western Railway Co., lessee of the Cleveland and Mahoning R. R., for an interchange of the local business of the roads respectively operated by them, and for forming a through line between Pittsburg and Cleveland, has been concluded, to go into operation as soon as the improvements in Youngstown, above referred to, shall have been completed by the Lawrence R. R. Co. To the city of Pittsburg, and the citizens of the whole Mahoning Valley, and even beyond, the opening of this new line is of great importance, as it is also, to this company, whose road will, thereby, receive a largely increased business on the forty-eight miles owned and leased between Pittsburg and Mahoningtown. A lease of the Lawrence R. R. has not yet been agreed upon, but will soon be, upon the general terms of the lease of the New Castle and Beaver Valley R. R.

Under the modified contract for the division of joint earnings with the Cleveland and Pittsburg R. R. Co., there was paid that company, out of the earnings of this company, $163,914 94 for the past year, and also an additional sum of $45,133 42 on account of military earnings of 1864, not then adjusted. While the operations of this contract has been to take from the revenues of this company $400,000 in four years, yet this inequality of the contract is greater in appearance than in reality. The effect of executing the contract in its letter and spirit was to withdraw from the Cleveland and Pittsburg R. R. some business, which it would, but for this contract have enjoyed; and this company has gained, as well as the Cleveland and Pittsburg Co., in avoiding undue competition; leaving business to take its natural channels, and saving the expenses incident to efforts to divert it into other routes. Thus far the amendments of Feb. 16, 1866, to the original agreements of Dec. 15, 1862, have proven to be salutary, and of a character to render the agreement more satisfactory and permanent.

The Grand Rapids and Indiana R. R. Co., having obtained from the State of Michigan an extension of time in which to complete its road, and thus giving value to its large land grant of over a million acres of land, will no doubt be placed upon such a safe financial basis as to secure the early completion of its line from Fort Wayne to the Straits of Mackinaw, 350 miles in length. The completion of this road would very greatly enhance the value of your property by making tributary to it the business of an extensive portion of the best part of the State of Michigan.

The American Central Railway Co. did but little last year towards the building of that line of road, but within two months active operations have been commenced, and several thousand tons of rails are now on the way from Europe, to be laid in the track this summer. When completed, this road will give the shortest line from your road to Omaha, the eastern terminus of the Union Pacific R. R., with a single ownership, unembarrassed by the complications of leases or business contracts, and may thus be operated with the greatest efficiency.

The extension of the line of road across Iowa to the Missouri River at Council Bluffs, opposite Omaha, has just been accomplished, and will this spring be worked in connection with the Northwestern Railway Co. of Illinois, as a single line from Chicago to the Eastern terminus of the Union Pacific Railway, a length of 496 miles The opening of this line cannot be regarded in any other light than that of a marked epoch in the history of the city of Chicago, and must have great influence in assisting to make that city one of the largest inland on the continent. As your road is one of the great arteries of that city, its quickened life-blood must give new strength and growth to your interest.

As important as these and other connecting and auxiliary lines are to your road, its strength is inherent. Its largest business will ever be by its way-side, and fortunately for the owners, that fountain is not only inexhaustive but accumulative.

GENERAL ACCOUNT. December 31, 1866.

Cost of railway, equipment, structures, &c.	$24,253,746 81	
Stock of supplies for current operations	631,918 82	
Due from other companies	386,954 73	
Miscellaneous assets	708,333 63	
Sinking fund first and second mortgage bonds	275,910 03	
Cash in hand	670,675 59	
	$26,927,539 61	
Capital stock	$9,940,987 95	
Funded debt	12,568,500 00	
Due to other companies	40,822 02	
Miscellaneous liabilities	364,295 75	
Due for current expenditures in December and prior	568,987 14	
Due J. F. D. Lanier, Trustee	88,238 79	
Balance to credit of income acc'unt	3,355,707 98	
	$26,927,539 61	

☞ The Alexandria Canal, between Georgetown and Alexandria, is now full of water and in excellent repair.

Railroads and Canals of New Jersey.

Abstract showing the condition of the capital and property and results of operations during the year ending December 31, 1866.

(Compiled from the Official Report presented to the State Legislature.)

Railroad Bridge at Davenport.

The Bridge to be built over the Mississippi at Davenport, Iowa, is to cost not less than $1,000,000. The $850,000 appropriated by the Government is to be expended solely in putting down the foundations, building piers and abutments, and otherwise making ready for the superstructure. This done, the Government and railroad company will put up the balance of the million in equal amounts, which is to be expended upon the superstructure.

☞ The contractors for the construction of the Baltimore and Potomac Railroad propose to complete the Main Stem to the village of Upper Marlborough, Md., by the 1st of October, and the branch road into the District of Columbia.

American Railroad Journal.

Saturday, April 6, 1867.

Stock Exchange and Money Market.

The activity in money, noticed in our last, has been maintained through the week. The main inquiry has been for call loans, which have been uniformly firm at six to seven per cent. In some instances, needy borrowers have had to pay a commission, in addition to the legal rate. The discount business of the week has been quite light, as lenders have not been partial to making permanent loans, while temporary and controlable employment has been available at the full legal rate. Prime short date commercial paper has been quoted at from 7½@8½ per cent. per annum. The banks of the country have as a rule safely passed by quarterly statement day, for which they had been so energetically concentrating their resources, to enable them to make as creditable an exhibit as practicable. A failure or two in the oil regions of Pennsylvania transpired during the week, but did not make any perceptible impression on the current movement. Now that quarter has passed, a return flow of money to the great business centres is confidently looked for, which must lead to renewed ease in the various money markets. Government has been making liberal currency disbursements, especially in redemption of the outstanding notes of the first Seven-thirty loan issue, which will mature next August; as also of the compound interest notes of the various 1864 issues, all of which mature during the current year. These disbursements have tended to check, if not relieve, the pressure in the open market, and to restore confidence in general credit. Much encouragement has also been derived from the preliminary announcement of the purport of the April statement of the National indebtedness, which was to have been given to the public in detail on Thursday. It has been advised that the new statement will be a most favorable exhibit of the finances of the Government, showing a reduction of from $17,000,000 to $20,000,000 in the public debt. It will also show that there are about $107,000,000 gold in the Treasury. No reduction in the volume of currency has been reported. The city banks, in their last exhibit, showed an increase of $1,554,853 in their legal tender reserve, with a decrease of $4,117,951 in loans and discounts, $3,895,365 in deposits, $621,304 in specie, and $149,794 in circulation, as compared with the footings of the preceding weekly returns. The specie reserve of the banks is now $8,522,609, against $11,930,392, same time last year. The city bank deposits are now $188,480,250, against $188,554,592 week ending March 31, 1866. The legal tender reserve amounts to $62,450,811, against $72,158,099 same time last year. The circulation now stands at $33,669,195, against $23,736,534 same time last year. The loans are now $255,282,364, against $237,356,099 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $76,641,767 a day, against a daily average of $78,700,396 the preceding week, and $82,423,135 the week ending with March 16th. The current week's exchanges average $93,848,629 a day.

The main changes in the Philadelphia Bank footings, last week, were as follows: Increase of loans, $37,816; decrease of legal tender reserve, $214,782; decrease of deposits, $431,260; decrease of specie, $4,285; and increase of circulation, $19,545.

National Bank notes to the amount of $39,520 were issued last week, making the total issue to 1,664 banks thus far $302,308,706, against $282,555,440 at the close of the last fiscal year, June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $3,441,882, leaving, with the existing 1,647 banks, an actual circulation at this date, of $298,866,824. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,582,450; and for the public deposits, $39,911,450—making a total of $379,543,900. The Treasury Department, last week, redeemed and destroyed $218,000 of worn and mutilated fractional currency, and issued $312,000 worth of new.

The U. S. Sub-Treasury receipts, week ending with March 30, were $22,834,253, including $2,499,596 from customs duties; payments, $33,090,533; balance at the close of the week, $100,634,126, against $110,890,405, at the close of the preceding week. The business of the Office during the first

two days of the current week, was as follows: Receipts on Monday, $2,832,966, and payments, $1,259,888; on Tuesday, receipts, $1,873,953; payments, $2,365,293. The balance at the close of business on Tuesday stood at $101,715,869, against $110,760,258 a week previous.

Government revenues were quite up to a fair average, last week. In the line of customs, they were unusually liberal in March, having exceeded sixteen million dollars in coin, including $12,198,039 through the port of New York exclusively, against $11,153,954 through the same port, same month last year, showing the satisfactory gain of $1,044,085 during the month just closed, an unusually dull one in general business. The internal revenue in March was over fifteen million dollars, in currency. The excises, last week, yielded $3,155,538, against $2,500,000, the preceding week; customs at the port of New York, $2,499,596, and at the outports, about $850,000 (in coin) more, making the grand total income for the week equal about $7,678,000 in currency, against disbursements of $4,874,047 (making a total of $19,321,999 for all March,) on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $217,500,000.

The customs revenue of the Government through the port of San Francisco, from Jan. 1, to March 8, 1867, was $1,191,293.

A statement has been published on the authority of one of the officers of the Bank of England, that "in all its dealings with the United States the bank has never lost a dollar by an American." The largest note ever discounted by this bank was a "piece of paper" for £800,000, about $4,000,000 in gold.

The gold speculation has been very tame, during most of the week, and the fluctuations in prices have been of no special importance. The *bull* interest is seemingly apprehensive of the adverse influence of the pending coin interest disbursements of the National Treasury, and of hoard of coin under the control of the eminently conservative Secretary of the Treasury. It is known that there are now about $107,000,000 of coin in the Treasury vaults, including only some $15,000,000 to the credit of private depositors. The customs and export calls have not been of sufficient magnitude to influence the market. The extremes of the week have been 134⅝@133⅜, and the closing price on Wednesday was 133¾. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $408,139. The customs demand for Gold last week, averaged $416,599 a day; thus far, this week, it has been equal to $375,086 a day, or equal to a weekly aggregate of $2,250,516. The arrivals of specie from Europe, Havana and other foreign ports, during the past week reached $14,985, and from California, $898,281. The total customs revenue of the Government, in coin, at this port since July 1, 1866, has been $95,482,132, against $101,359,975 same time in the preceding fiscal year. The total receipts of California gold at this port since July 1, 1866, have been $32,197,065, against $21,718,344 same time last year, showing an increase this year, of $9,580,440. The exports of specie from this port, last week, were $445,038. The total outflow of specie from the port, thus far in the current fiscal year has been $23,284,911, against $17,456,228 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $183,424, making the total coin interest disbursements through the Government office, since July 1, 1866, $36,425,764, against $32,026,736 for the same time in the preceding fiscal year. The specie exports from San Francisco from Jan. 1, to March 9, 1867, reached $7,361,582, against $6,644,340 same time last year.

The total amount of gold certificates issued and redeemed by the Sub-Treasury, together with the balance unredeemed on the 30th of March is thus stated:

	Issued.	Redeemed.	Outstanding.
20s ...	$289,340	$181,900	$107,440
100s ...	4,949,900	3,319,100	1,630,800
500s ...	713,500	292,000	421,500
1,000s ...	23,656,000	19,964,000	3,692,000
1,500s ...	146,030,000	132,405,000	13,625,000
10,000s ...	5,000,000	5,000,000	.....
Total	$180,638,740	$161,162,000	$19,476,740

The foreign exchange market has been less active since our last, and with a better supply of bills available, there has been some depression in rates especially for sterling drafts. Bankers' 60 day bills on London closed on Wednesday at 108¾@109, and on Paris to 5.22½@5.17½; sight bills on London to 109¼@109⅝; and on Paris to 5.17½@5.15. The offerings of produce bills have been quite extensive, since our last. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $4,650,390, making the total value of exports since July 1, 1866, $132,688,429, against $167,750,567 same time in the preceding fiscal year.

Government securities have improved in price, despite the stringency in money, and the depression in gold. The investment demand has been good, especially for the Five-Twenties of 1862, 1864, and the consolidated issue of 1865; as also for the compound-interest notes. The variable London reports have had more or less influence on the current values of the 1862 Five-Twenties which continue the favorite security with foreign purchasers. The very latest dealings on Wednesday indicated a little heaviness in the older issues of the coin-bearing bonds, in sympathy with the downward tendency in the Gold Market. The registered sales of Government bonds at the Stock Exchange in March amounted to $6,363,000. At the first session of the Stock Exchange on Monday, a resolution was passed providing for a continuous call of government securities. This call is to be held in a separate room in the Stock Exchange Building. A committee was appointed to set the new plan in operation with as little delay as possible. In regard to the terms of admission it is proposed to apply the principle adopted in the Lower Hall, and to admit to dealings in this new government room various responsible firms which are unconnected with the Stock Exchange. U. S. sixes of 1867 closed here on Wednesday at 132; U. S. sixes of 1868, at 129½; U. S. sixes of 1881, 108⅞@109⅛; U. S. Five-twenties of 1862 at 109⅛@109¼; U. S. Five-twenties of 1865 at 108⅛@108⅜; U. S. Five-twenties of 1865, consolidated, 107¼@107⅜; U. S. Ten-forties at 98@98⅛, ex-coupon, and U. S. Seven-thirties at 105⅜@106⅛. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ¼@½ of 1 per cent. on these figures:

June, 1864..... 118⅛	May, 1865 ..... 112½
July, 1864..... 117⅝	August, 1865.... 111½
August, 1864.... 117⅛	September, 1865.. 111
October, 1864.... 115⅛	October, 1865.... 110¾
December, 1864.. 114⅛	

Messrs. Belding, Keith & Co., an American banking firm in London, have just issued a very important little pamphlet, giving the history of United States bonds and securities, what they are, their cost and the interest they pay, with the amount stated in English as well as American money. The pamphlet will be distributed broadcast throughout England; and as it proves conclusively that the interest from our bonds is twice as large in gold as that from English consols, it can scarcely fail to encourage investments.

Railway and miscellaneous share property has been quite lightly dealt in since our last, and prices have been, as a whole, favorable to buyers. The stringency in money has had an adverse influence on the market. The brokers have been carrying unusually heavy loads of stocks, mainly on margins. The aggregate sales of railway and miscellaneous stocks at the various Stock Boards in March were 1,793,823 shares, against 1,452,804 in February; and of city bank stocks, 3,495 shares in March, against 2,879 shares in February.

General business has been moderately active, since our last, chiefly in the lines of domestic produce. Breadstuffs have been firmer, on an improved export demand. Provisions have been depressed. Cotton has been more freely offered and has been in less request at declining prices. The foreign reports have been unfavorable. Middling grades of cotton left off here very heavily at 29@30½ cents per lb. as extremes. The stock of cotton now here is estimated at about 197,000 bales. The receipts at the port this week, have averaged nearly 5,000 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 495,000 bales, against exports of 357,977 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 1,545,000 bales against 1,629 bales same time last year; exports, 941,000 bales, against 1,033,400 bales same time last year; estimated stock at latest dates, 575,000 bales, against 481,556 bales same time last year. In foreign merchandise there has been a moderate movement, chiefly in dry goods, groceries, and kindred lines, but at prices generally more advantageous to buyers, who have not been eager to purchase beyond the limits of immediate wants. The total imports of foreign dry goods, last week, were $1,217,022, and the total amount marketed $1,483,552. The value of foreign merchandise imported last week, was $3,025,178—making the grand total specie value of last week's imports of dry goods and merchandise, $4,242,200, and since July 1, 1866, $194,047,396, against $221,854,260 same time in the preceding fiscal year. The ocean freight market has been more active but less firm with 487 vessels of all classes in port. For Liverpool we quote flour at 2s. per bbl.; grain at 3@3½d. per bushel; cotton at $\frac{9}{32}$@$\frac{5}{16}$d. per lb.; and heavy goods at 15s.@25s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	March 20.	March 27.	April 3.
Consols	91	91¼	91
U. S. 5-20's of 1862	74½	74½	75
U. S. 5-20's of 1865	72¾	72¾	73
Erie	40¼	38¾	39
Ill. Central	78½	78½	78¾

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$2,549,331	$1,217,022
Gen. merchandise	3,423,972	3,025,178
Total for the week	$5,973,303	$4,242,200
Previously reported	73,796,759	58,872,164
Since January 1	$79,770,062	$63,114,364

The New York exports, exclusive of specie, for the week ending March 26, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$3,953,456	$4,650,390
Prev. reported	56,918,975	46,431,644
Since January 1	$60,872,431	$51,082,034

The commerce of New York from July 1st to date compares as follows:

	1865-'66.	1866-'67.
Imports merchandise	$221,854,260	$194,047,396
Exports produce	167,750,567	132,688,429
Exports specie	17,456,228	23,284,911

The balance in the Sub-Treasury on Wednesday was $104,360,221 31.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

5-20 Bonds in London.

Messrs. Belding, Keith & Co.'s Weekly *Circular* of March 16, 1867, say: "We notice with much satisfaction and pleasure, the growing confidence evinced by investors in 5-20 Bonds. Small capitalists have now begun to use them in preference to risking their money in undertakings which promise inordinately high rates of interest, and we have every reason to believe that when the character and security of these bonds become really known, and the above average rate of interest they pay, they will rank foremost among the first-class investments of our markets. Illinois Central and Erie both show an improvement, the latter as much 3¼ per cent, with a fair demand for both. Atlantic and Great Western Railway Debentures, close 32 to 33; ditto, Consolidated Mortgage Bonds, 24¾ to 25."

Railroad Earnings.--Weekly.

The earnings of the Grand Trunk Railway of Canada for the week ending Mar. 16th, 1867, were $126,575 00
Corresponding week of previous year. 123,814 00

Increase..... $2,761 00

The earnings of the Detroit and Milwaukee Railroad for the week ending March 28, 1867, were $30,257 00
Corresponding week of 1866..... 32,202 00

Decrease $1,945 00

The earnings of the Chicago and Northwestern Railroad for 4th week in Mar., 1867..$239,797 38
Corresponding week previous year .. 193,363 88

Increase..... $46,433 50

The earnings of the Michigan Southern and Northern Indiana Road for the 4th week in Mar. 1867, were $116,459 00
Corresponding week of 1866 ..... 141,275 00

Decrease $24,816 00

The earnings of the Marietta and Cincinnati Railroad the 3d week in Mar., 1867...$17,798 00
Corresponding week previous year..... 15,862 00

Increase..... $1,936 00

Journal of Railroad Law.

NEGLIGENCE IN RUNNING OVER CATTLE—WHAT IS.

The case of Brown *vs.* N. Y. Central R. R. Co., lately tried in the Court of Appeals of this State, decides that a railroad company, in the construction and running of its road, is bound to exercise all the care and skill which human prudence and foresight can suggest, so far as regards its passengers.

And this care extends to all measures necessary and proper to secure the safety of the train and passengers, as well as to the care and management of the train itself.

Although the statute has imperatively required certain things to be done, such requirements are not necessarily the full measure of the care, &c., required on the part of the road in the discharge of its duties to the public.

It is gross negligence for the servants of the defendant to run over any part of their road known to be frequented by cattle, at full speed, unless that part of the track is properly guarded from that invasion.

The facts of the case are these:

On the 15th of May, 1859, plaintiff was a passenger on defendant's express train of cars from Buffalo to Syracuse, which train ran off the track about 10 o'clock in the forenoon, near Jordan station, in Cayuga County, and injured plaintiff, for which cause this action is prosecuted.

The Justice ordered a non-suit on the ground that there was no evidence of negligence against defendant, and refused to submit that question to the jury, to which ruling the plaintiff excepted.

Among the facts relied on to prove the defendant liable, are the following: In constructing the railroad where the injury occurred, the defendant laid the railroad across a highway running north and south, at a point where another highway came into it from the west, and then used the bed of said west highway as the track of the railroad, for twenty-four rods, longitudinally, by raising an embankment over three feet high on that highway, and moving back the highway fences over three rods on each side of the track, and excavated the earth of the west highway north of the track, and making an open space, subject to the intrusion of cattle from these highways, without any fences or cattle guards to protect the track.

The defendant turned the west highway across the railway embankment at a point two chains and seventy-one links west of the north and south highway, and constructed a new highway entirely south of the boundaries of the old highway, from the new crossing thus made to the north and south highway, as shown on the map. It was proved that the track of defendant's road thus on the old east and west highway, was not and could not easily be traveled upon.

Having thus, as the plaintiffs insists, discontinued the old west highway from the new crossing made by them, to where it formerly entered the north and south highway, being a distance of about twelve rods, they omitted to fence the railroad between these two crossings.

At the time of the accident, the defendant had a continuous pile of ties for about four rods between the west crossing and the east crossing, on the north side of the iron rails of the track, and about four or five feet therefrom. Like piles of wood were on the south side of the track, but not quite so near. Cattle were in the habit of coming on to the track at this place to feed on the grass there growing. The railway track is straight and level for the distance of two miles west of the north and south highway.

At 10 o'clock A. M., the express train in which plaintiff was seated came to this point from the west, "running very swift," and struck a cow which stood feeding on the track, or just by it, opposite the piles of ties between the two crossings, threw the cars off the track and injured the plaintiff. The cow was feeding along the track, her head to the east, and as the cars came up to her from the west, she raised her head and immediately started to cross to the south of the track, but was struck. Five or six other cattle were near the track at the same time.

The piles of ties on the north side where the cow was hit, were deranged, and the south ends turned round to the east, and one of the ties thrown off and driven along the ground to the east. The end of this tie was bloody, and a hole was made in the side of the cow.

It was proved that the defendant had kept a watchman at different times at these crossings to drive away cattle, but that at this time he was absent. Afterwards he came back.

The defendant removed the wood and ties from the road soon after the accident.

The plaintiff offered to prove that previous to this accident, on other occasions, the defendant's cars had run over and killed cattle at the same place where the accident occurred. The defendant objected to this evidence, and the Court excluded it, and the plaintiff excepted.

The cow was struck at about the centre of the old west highway. The opinion of the Court was written by PECKHAM, J.—A clearer illustration of defendant's duty cannot well be presented than this case affords. It appears that cattle had been in the habit of pasturing upon the track at this point. The cars, on this occasion, were on a straight plain for some two miles directly before they reached this place. It was in the open day; the cow, of course, plainly visible to those upon the engine; yet the train rushes with undiminished speed until the injury occurs. The engineer, of course, saw or might have seen her. The result to the defendant is the same in either case. If her being there was a surprise to him, he should have seen her in the exertion of that extreme care he was bound to exhibit at such a place, and then the defendant would have been liable, if the accident might have been avoided "by the most skilful and prompt use of all the means in its power."

But he could not say it was a surprise. Cattle, it was proved, had been frequently seen there feeding. A man in defendant's employ had been there at different times engaged in driving them off the track, until a fortnight prior to this injury.

The plaintiff offered to show that other cattle had been killed there by defendant on other occasions. The fact of their having been killed was perhaps not important; but the fact that they had been there—was clearly pertinent. It put the defendant and its officers and agents on their guard. It bade them prepare for such perils. It gave them full notice. If, then, they rushed on with undiminished speed, they were guilty of gross carelessness. It is said the cattle were trespassers, and the road was not bound to expect that such trespasses would be repeated.

But the trespasses were repeated, and the defendant's agents and employees knew it. At such an open, morting place, they should have expected it, too, and used the proper precautions to prevent a collision. Is it any, the slightest, excuse that the road is filled with trespassing cattle? Has the engineer a right to rush on to them, because they are trespassers? The peril to the passengers is precisely the same, whether trespassers or otherwise, and their lives he must guard. It is also urged, that though the engineer saw this cow, he could not have known with any certainty, that she would turn upon the track and cause this injury. The defendant's agent knew the position of things at that point. He passed daily. It was as clear as any proposition in Euclid, that this cow would not be quiet while this train ran within a foot of her, with its tremendous force and noise. He knew she could not go through the ties. The only other path lay across the track. But suppose he was entirely uncertain whether she would go on to the track or not, had he a right to speculate as to the result, at the peril of the lives of his passengers? Clearly not. The result might have been the same, whether the ties had been there or not. The cow might have gone the other way; and no right minded man would have dared to run the chance of her crossing the track and imperiling the lives of his passengers. If he did, it would have been negligence, plain, clear and palpable; and injury following, the defendant would have been liable.

Enough has been said, it seems to me, to show that a proper case was made for the jury, and that the non-suit was erroneous.

But it is insisted that, if the defendant be held responsible for such accidents, it will be compelled to keep a watchman at road crossings, and that such an expense the defendant could not afford. The plain answer to such a position is that the law requires of defendant the exercise of the highest care that human prudence and foresight can suggest for the safety of its passengers

If such a measure be necessary, it must be adopted, or defendant must answer the consequences. If this road, running through a rich and populous country, cannot afford to adopt the measures necessary to the safety of its passengers, what road can?

But the rate of fare will not change the rule of law governing the road, either as a carrier of goods or of passengers. The defendant might run its train very slowly at such points, and thus secure its passengers.

In some States the law requires a train, crossing another track where cars are frequently passing, to come to a stop as it approaches the other track; also to stop as it comes to a bridge where there is a draw. This is the measure of caution which some Legislatures have deemed necessary and proper, in such cases, to prevent accidents. Yet the chances of an accident would plainly be greater, by more than five to one, at a place like this, where cattle are commonly found, than at either of these places.

Again railroads have the power, by law, to avoid these perils. They may generally avoid running on the same surface with a public highway as they cross it, and at comparatively trifling expense. They may go above or below the surface in laying their track.

Less regard in this respect is here paid to the safety of passengers and of the public than in any country in Europe. Is human life of less consequence here? It should not be so regarded. If a change be necessary, it should not be a change in the Courts to relax the rigor of the rule requiring the highest care from the defendant as well as other roads. If higher rates be necessary to their proper running, let the Legislature be less economical in the fare, and more so in the lives of its citizens.

Wherever questions of this nature have arisen in other States, the Courts have expressed views similar to the above, as to the rules that should govern railroads. (Bowen *vs.* N. Y. Central R. R. Co., 18 N. Y., 408; Messerno *vs.* Nashville R. R., 1 Sneed (Tenn.,) 220; Cornwall *vs.* Sullivan R.R., 28 N. H., 161; Streck *vs.* Mil. R. R., 7 Am. Law Reg., 722; Sullivan *vs.* Philadelphia and Reading R. R., 30 Penn., 234. Most of these are quite analogous cases.

In the case at bar, it is not necessary to resort to any rigorous rules. Here was a cow directly by the track, and in a position difficult of escape except upon the track. She was in plain sight of the engineer in open daylight. Besides she was where he had been warned to expect cattle. He pays not the slightest heed to this danger, but he rushes on in seeming entire disregard of it and of the consequences. It seems to me his conduct would have been inexcusably careless if his train had been freighted with dry goods instead of human beings. At least, there was sufficient evidence of negligence to go to the jury.

The judgment should be reversed and a new trial ordered; costs to abide the event.

Judgment accordingly.

Railroad Bridge at St. Louis.

We learn that the subscriptions required for the organization of this company have been made in St. Louis, and the surveys for the structure have commenced. The bridge has been finally located at Washington avenue on the St. Louis side, and the dike on the opposite shore. It will be a truss bridge, built of iron and stone, and made as strong as these materials can make it.

Pork and Beef Packing at Chicago.

The following from the Chicago *Tribune*, will show the number of hogs and cattle packed in that city in 1866-'67, in comparison with previous years:

	Cattle.	Hogs.
1859-'60	51,899	167,918
1860-'61	25,209	231,335
1861-'62	55,212	544,118
1862-'63	42,163	970,264
1863-'64	70,086	904,658
1864-'65	92,459	750,147
1865-'66	23,728	501,462
1866-'67	26,998	635,732

The average weight of the hogs is 227⅜ lbs. this season, against 226.73 last season, and the yield of lard 38 lbs., against 34⅛ lbs. last season.

The receipts and shipments of hogs at Chicago during the past eight seasons have been as follows:

	Received.	Shipped.
1859-'60	255,384	71,266
1860-'61	354,684	119,886
1861-'62	746,697	228,682
1862-'63	1,236,545	316,881
1863-'64	1,377,652	471,000
1864-'65	1,065,392	306,121
1865-'66	801,821	248,158
1866-'67	875,251	267,651

The Trade of Toledo.

From the annual trade report of the Toledo *Blade* we extract the following items of interest. The supply of flour and grain, including receipts and stocks on hand January 1, 1866, and the shipments and stocks on hand January 1, 1867, are shown by the annexed table:

	Supply.	Shipped.	Stock Jan. 1, '67.
Flour, brls.	800,580	754,813	7,767
Wheat, bush.	2,185,885	1,794,894	150,991
Corn, bush.	4,535,473	4,413,066	47,407
Oats, bush.	1,316,249	1,230,989	21,260
Rye, bush.	122,737	102,100	3,418
Barley, bush.	501,160	257,014	113,928
Total flour to wheat, bush.	12,664,404	11,572,128	375,839

The receipts of wool for the year were 9,024,818 lbs., against 6,420,517 lbs. for 1865, showing an increase of 2,604,301 lbs.

The receipts for the year of Cattle were 132,256 head; hogs, 181,320; sheep, 178,200. The shipments of live stock in 1866 and four preceding years were:

	Cattle, cars.	Hogs, cars.	Sheep, cars.
Total, 1866	9,194	4,012	678
" 1865	7,195	2,405	251
" 1864	5,281	3,494	679
" 1863	8,621	14,149	298
" 1862	5,591	5,926	120

The following table shows the total value of imports and exports for a number of years:

	Imports.	Exports.
Total value, 1866	$161,652,597	$181,329,496
" 1865	158,967,000	177,547,671
" 1864	81,180,366	95,905,758
" 1860	46,727,754	52,243,627
" 1858	31,700,085	35,460,031

The receipts of black walnut lumber show an increase over the previous year of 20,000,000 feet.

The receipts of lath for the year were 22,996,264, against 16,128,000 for the year previous; and of shingles, 33,625,500, against 31,745,000, showing in each an immense increase.

London Metal Market.

From the weekly *Circular* of Messrs. Belding, Keith & Co., London, we learn that the general tenor of the metal trade is more satisfactory, and in a few articles considerable business is reported at former prices. English Tin is firm at official rates and orders are not readily taken. Sales of Banca at £23 cash to £94, prompt. Tin Plates continue in moderate demand, and prices are not firm. Tin Plates (per box of 225 sheets) IC Coke, 24s. 6d. to 27s. 6d.; do., 30s. 6d. to 33s. 6d; IC Charcoal, 30s. to 32s.; IX do., 36s. to 38s. Spelter—A fair business has been done at some advance on last week's quotations. English Sheet, £27 to £28; Copper, Best British, £81 to £82; Burra, £84; Chili Slab, £73; Scotch Pig Iron, £2 12s. 6d. cash; Single Sheets, £10; Lead, £19 to £19 5s.; Quicksilver, £6 17s. 6d. per bottle. Petroleum has been dull throughout the week, and the market is less buoyant. For forward delivery prices are also lower, and we close flat on the spot at 1s. 5s. to 1s. 5½d. June delivery 1s. 6d.; Sept., 1s. 8d.; Dec., 1s. 9d. Tonnage for the United States is not so much inquired after. A large number of vessels have been taken up for railway iron for all the principal ports.

Interest and Dividends.

The Hudson River Railroad Company have declared a dividend of four per cent. free of government tax, payable April 15.

The Lehigh Valley Railroad Company have declared a quarterly dividend of 2½ per cent., payable April 15th.

James River and Kanawha Canal.

At a meeting of the stockholders of this company recently held in Richmond, the committee appointed at a previous meeting to examine the accounts of the office, reported the total debt of the company to be $629,480, of which $140,000 are due on the bonds of the North River Navigation Company, and $42,000 interest on the same; bills payable, $165,000, interest $29,700; open accounts $108,500, interest $19 530; debt contracted during the present year and interest $30,000, and $87,750 on the debt of $180 000 (with interest of $54,000 for which the company is held held responsible by act of Assembly of March 1st, 1867, the State bonds in which the debt is made payable being held at 37½ cents. The committee recommended the adoption of resolutions authorizing the issue of bonds to the amount of $750,000, secure by a mortgage on the property and net revenues of the company; the bonds to be payable within twenty years, and to bear six per cent. interest yer annum, payable semi-annually. These bonds are to be used in payment of the debts of thh company, but not to be disposed of at less than their par value, the remainder of the bonds to be used only for the permanent repair or improvements of the works of the company. The report of the committee was adopted.

☞ A meeting was held in Bangor, Me., on the 30th ult., in aid of the Bangor and Piscataquis railroad to Milo, Dover, and Moosehead Lake, *via* European and North American Railroad, to Milford. Bangor it is said, will loan its credit for half a million of dollars, and subscriptions of $200,000 or $300,000 will probably be made in a short time there, and on the line of the proposed road.

Pewabic Mining Co.

The report of the directors for the year 1866 says: "Our product in mineral, the past year, was 1,791,181 pounds, yielding 75.15 per cent., or 1,346,140 pounds ingot, against 1,731,418 pounds the previous year, a difference of 385,278 ponnds. We stamped last year 12,000 tons rock more than the previous year while the cost has been reduced nearly 50 cents per ton, or 70 per cent. On the 1st of January, 1867, we had of smelted copper at the Lake 228,030 pounds against 289,901 pounds at the same date the year previous. On the 26th of March last year we had smelted 421,100 pounds; the same date this year, 454,759 pounds, a gain of 95,530 pounds, and our expenses are, at least, $8,000 per month less. If our product and expenses continue in the same ratio, we shall stand in a much better position at the close of the year than at the date of this report."

Baltimore and Ohio Railroad.

The only reports published by this company since the outbreak of the rebellion are those for the fiscal years ending September 30, 1861, 1862, 1863 and 1864; and these were not presented to the stockholders until the annual meetings in November, 1863, 1864, 1865 and 1866—in each instance two years later than usual. The cause of the delay in making these annual statements is attributed "to the protracted difficulties connected with the war, and the great delays in the adjustment of the accounts with the Government."

The President's reports, being a general resume of the year's business, have been published in the JOURNAL—that for 1861, in the number for Nov. 21, 1863, that for 1862, in the number for Dec. 3, 1864, and that for 1863 in the number for Dec. 9, 1865. A brief abstract of the report for 1864 was given in our issue of March 9, 1867. A comparative statement of the business of the years 1861 and 1862 was also published in the JOURNAL for March 11, 1865, and a similar statement for the years 1862 and 1863, on the 13th of January, 1866.

We have recently received the report of this company for the year 1864, containing the tabular statements of the Treasury, Transportation, Road and Machinery Departments. These reports embrace much matter of peculiar and marked interest, showing, in addition to the usual statistics, the continued and immense destruction of the tracks, bridges and equipment, stations and other property of the company, with particulars of the reconstruction, as far as accomplished, and of the working operations of the road.

The road operated by this company comprises three distinct parts: the Main Stem, the Washington Branch, (two-thirds of the stock of which is owned by the Baltimore and Ohio Railroad Company,) and the Northwestern Virginia Railroad, which at the date of the report was under lease to the Baltimore and Ohio Company, and in which it possessed large financial interests. The length of these several lines is as follows:

Baltimore and Ohio Railroad	379.6 miles.
Washington Branch	30.0 "
Northwestern Virginia Railroad	103.5 "
Total length of road	513.1 miles.

The stock of engines on hand at the close of the fiscal year 1864, numbered 221, of which 168 were first class; 30 second class; and 23 third class. Of these, 36 were passenger engines, and 175 coal, tonnage, ballasting, etc. Ten were out of use. During the year eight new engines were added to the equipment, which took the places of those out of use; and a large number were repaired.

Eleven new passenger, one mail, and 505 freight, truck, box, and hand cars were added to the equipment, and a number of freight cars rebuilt and repaired; 80 were broken up. No detailed statement of cars in service is given, for the reason that no reliable date could be arrived at "in consequence of the irregularities resulting from the repeated burning and destruction by the enemy."

The mileage of engines in 1863 and 1864, on the lines severally was as follows:

	1863.	1864.
Main Stem	2,938,010	3,493,376
Washington Branch	494.213	435,144
Northwestern Va. R. R.	298,035	416,837
Total	3,730,258	4,345,357

No returns are given of the number of passengers carried, and very incomplete reports of the tonnage. The through tonnage, which in 1863 amounted to 120,848, was in 1864, 166,118, showing an increase of 45,270 tons.

In 1863, the entire road was in the company's possession for only about 6 months, while in 1864 it was in use for some 9 months of the year as a through line.

The aggregate quantity of coal paying freight was in 1863, 307,547; in 1864 it was 359,561—showing an improvement of 52,014 tons.

The tonnage of live stock in 1863 was 24,151; in 1864 it was 25,433—an increase of 1,282.

The quantity of flour brought to Baltimore in 1864 over the Main Stem and Washington Branch was 616,917 lbs., against 474,168 in 1863. And the lumber trade which in 1863 amounted to 7,466 tons, was in 1864, 9,868 tons.

The following table gives the receipts of the last five years, those for 1860, 1861, 1862 and 1863 being inserted as a measure for comparison:

	Passenger.	Tonnage.	Total.
Main Stem—			
1860..	$967,735 44	$3,224,467 50	$3,922,202 94
1861..	889,159 05	2,324,266 65	3,211,425 70
1862..	1,769,497 13	2,712,361 85	4,481,858 98
1863..	2,332,806 37	4,177,138 69	6,509,945 06
1864..	3,250,307 42	5,327,384 83	8,577,692 25
Washington Branch—			
1860..	$361,026 57	$101,853 87	$462,880 44
1861..	327,897 03	110,260 66	438,139 69
1862..	444,262 30	334,154 37	778,416 67
1863..	500,117 08	203,006 51	703,123 59
1864..	688,643 92	175,836 87	864,480 79
N. W. Va. R. R.—			
1860..	$111,357 20	$227,845 92	$269,203 12
1861..	134,386 14	216,145 59	350,531 73
1862..	125,780 09	238,242 10	364,022 19
1863..	147,874 97	298,345 89	446,220 86
1864..	236,814 99	459,888 00	696,702 99
Aggregate—			
1860..	$1,100,119 11	$3,554,167 29	$4,654,286 50
1861..	1,349,424 22	2,650,672 90	4,000,097 12
1862..	2,339,539 52	3,284,758 32	5,624,297 84
1863..	2,980,798 42	4,678,491 09	7,659,289 51
1864..	4,175,766 33	5,963,109 70	10,138,876 03

The aggregate gross earnings of the lines separately for the last two years, gives the following amounts:

	1863.	1864.
Main Stem	$6,509,945 06	$8,577,692 25
N. W. Virginia R. R.	446,220 86	696,702 99
Washington Branch	703,123 59	864,480 79
Total	$7,659,289 51	$10,138,876 03

The expenses of operating and repairs were as follows:

	1863.	1864.
Main Stem	$1,965,847 41	$3,270,509 05
N. W. Virginia R. R.	404,095 07	569,667 83
Washington Branch	273,233 32	606,018 40
	$2,643,175 80	$4,446,195 28

And the revenue, after deducting the cost of operating and repairs, as follows:

	1863.	1864.
Main Stem	$4,544,097 65	$5,307,183 20
N. W. Virginia R. R.	42,125 79	127,035 16
Washington Branch	429,890 27	258,462 39
	$5,016,113 71	$5,692,680 75

The earnings and expenses of the Main Stem proper for the years ending September 30, 1863 and 1864, have been as follows:

☞ During the recent called session of the Vermont Legislature, a bill was passed and received the executive approval, to incorporate the second mortgage and part of the first mortgage bondholders of the Rutland and Burlington railroad into a new company, under the title of the Rutland Railroad Co. A bill was also passed, authorizing towns to subscribe to the stock of the Montpelier and St. Johnsbury Railroad Company.

Debt of Baltimore.

The Commissioners of Finance, in their Report to the City Council of Baltimore state that the entire stock debt of the city on the 1st of January last was $19,728,656 47, included in which is $435,033 71 of six per cent. water stock of 1876; $210,668 98 of six per cent. consolidated loan of 1893, and $38,700 87 of six per cent. almshouse loan of 1890. During the year 1866 the commissioners of finance have purchased $100,000 of the guaranteed bonds of the Northwestern Virginia Railroad Company, at a cost of $97,254, which have been placed to the credit of the sinking fund for the redemption of said bonds, as will be seen in the report of that fund.

They also extended the time for payment of five and six per cent. stocks to the amount of $176,284 30.

The stock debt of the city on the first day of January, 1866, amounted to $18,929,550 57 and was composed of the following issues:

Six per cent. stock, redeemable after July, 1890	$2,937,093 65
Six per cent. stock, redeemable after the year 1890	301,568 82
Six per cent. stock, redeemable after the year 1870	854,940 89
Six per cent. stock, redeemable at pleasure, unredeemed	4,662 70
Six per cent. Baltimore and Ohio Railroad loan, redeemable 1890.	5,000,000 00
Six per cent. Pittsburg and Connellsville Railroad loan, redeemable in 1866	1,000,000 00
Six per cent. water stock, redeemable in 1875	3,900,000 00
Six per cent. jail stock, redeemable in 1873	250,000 00
Six per cent. park stock, redeemable in 1890	553,966 25
Six per cent. park improvement stock, redeemable in 1895	170,000 00
Six per cent. consolidated loan, redeemable in 1893	1,981,499 07
Six per cent. exempt loan, redeemable in 1893	319,967 77
Six per cent. almshouse loan, redeemable in 1890	400,015 24
Six per cent. floating debt and defense loan, redeemable in 1882	225,000 00
Five per cent. consolidated loan, redeemable in 1885	893,421 84
Five per cent. court-house loan, reable at pleasure	137,414 84
Stock debt January 1st, 1866	$18,929,550 57
And there has been redeemed of the above during the year, pleasure stock	2,866 66
	$18,926,683 91

The above amount has been increased during the year 1866 by the following issues:

Six per cent. water stock of 1875		$435,033 71
Six per cent. consolidated loan of 1893		210,668 98
Six per cent. almshouse l'n of 1890.	$49,984 76	
Less amount cancelled per Ord. 88, of 1866	11,283 89	
		38,700 87
Six per cent. exempt loans of 1893		77,569 00
Six per cent. loan of July, 1890		40,000 00
		801,972 56
Total stock debt Jan. 1, 1867		$19,728,656 47

JAMES CLAYTON'S Patent Steam Pump and Steam Engine Combined. These Pumps contain every desirable quality in a Steam Pump, they are made of the best materials and in the best manner, and are the most reliable and cheapest Steam Pumps in the market and are especially suitable for railroad stations, &c. Please send for Circular.

JAMES CLAYTON,
3m13 **102 Front Street, Brooklyn, N. Y.**

TO CONTRACTORS.

PROPOSITIONS will be received for the construction of the masonry (about 22,000 yards) of the Bridge over the Ohio River at Louisville, until the 10th of April, 1867.

Plans and specifications will be ready for inspection after the 15th of March, at the Engineer's office of the Louisville and Nashville Railroad.

No bids will be considered if not made by responsible parties.

By order of the Board of Directors of the Louisville Bridge Company.

ALBERT FINK,
4t11 Chief Engineer

Collins Iron Company,

MANUFACTURERS OF

CHARCOAL PIG IRON,

At MARQUETTE, Michigan.

Numbers one and two are a soft "Gray Iron," strong in the Pig, and when "puddled" for Boiler Plate, Sheet Iron, or Merchant Bar, is equal to Swedes, Russia or Norway Irons

Number Three, a fine close grain Iron, particularly adapted for "Malleable Castings." Numbers four and five, "Mottled" and "White," when mixed with the "Gray Iron," make superior Car Wheels.

TENSILE STRENGTH,
As Compared with other Irons.

FOSTER & WHITNEY, in their Geological Report, published in the United States Senate Documents, Special Session, March, 1851. page 80, say: "To show the comparative quality of this Iron, we give the results of the various experiments of Professor Walter R. Johnson, on the tensity of Bar Iron, from localities both at home and abroad.

	Strength per lb Square Inch.

WATER & SEWERAGE PIPES,

KNIGHT-BAILEY PATENTS.

The Water Pipes are made of Wrought Iron, lined and coated with Hydraulic Cement, with Socket Joints, and connections for service pipes already inserted. Entirely free from oxidation they are absolutely indestructible They can be laid and guaranteed for much less than cast iron Pipes.

The Sewerage Pipes are made of Hydraulic Cement. They stand the most severe tests of acids, increase in strength with age, are perfect in interior finish, and cheaper than any other pipes made.

We will contract for the water supply and drainage of cities and villages.

PROPOSALS FOR THE CONSTRUCTION OF THE SUMMIT DIVISION OF THE ILLINOIS AND MICHIGAN CANAL.

OFFICE OF THE BOARD OF PUBLIC WORKS,
CHICAGO, March 18th, 1867.

Sealed Proposals will be received by the Board of Public Works, at their office, until 11 a. m. Wednesday, May 1st, 1867, for the excavation necessary to deepen the Illinois and Michigan Canal, according to the plan adopted, from Chicago River to Summit Lock, No. two (2) a distance of twenty-six (26) miles.

Maps, profiles, specifications, &c., will be exhibited the office of the Board of Public Works in Chicago on and after April 15th until the day of letting.

There will be some two millions (2,000,000) cubic yards of earth excavation—some of it quite hard and embracing considerable detached rock—and about four hundred seventy thousand (470,000) cubic yards of stratified limestone.

The work must be prosecuted so as not to interfere with the use of the Canal during the season of navigation.

It is believed, however, that the most of the excavation, except the stratified rock, can be done with steam dredges without interfering with the navigation of the Canal, but the rock excavation will all have to be done between the close of navigation in the fall and the opening in the spring.

If a new line be adopted for any portion of the distance, operations thereon may be continued the whole year; and the navigation of the Canal will be suspended at least five months in each year unless otherwise mutually agreed by the Board and Contractors.

The whole of the work must be done on or before the end of the third season of the suspension of navigation.

A large amount of machinery will be required to excavate the work within the time required, consisting mainly of steam dredges, scows and cranes for the earth work, and drilling machines, pumping machinery and cranes for the rock.

Contractors will be required to commence work on the earth excavation within thirty days of the time of letting, and upon rock excavation by the first of November next.

The dredges, cranes and scows now in the Canal can be had at an appraised value which will be made known to bidders prior to the letting.

Parties contracting for the work will be required to provide all machinery, and to put up and remove all dams and all works of protection, and at their own expense to do all pumping, or whatever may be necessary to secure their work from water.

Proposals must be addressed to the Board of Public Works, endorsed "Proposal for Deepening Illinois and Michigan Canal," and be accompanied with the usual two hundred dollar ($200) bond, with surities, to be approved by the Board.

Contractors will bid, stating the price for which the work will be done on each of the different sections, and the work will be let as a whole or in part, and in such quantities as the Board shall determine.

The Board reserve the right to reject any and all bids, and no proposal will be accepted unless the party offering it shall give evidence satisfactory to the Board that he has the necessary skill, experience, energy, and ability for doing the work, is trustworthy, and has sufficient pecuniary resources.

The Board will require such security, as according to their judgment, will secure the doing of the work according to the contract.

Detroit and Howell Railroad.

This organization now extends from Detroit to Lansing. Thirty miles of the heaviest work, between Plymouth and Howell, are under contract, at $6,111 per mile, and the work commenced—the road to be prepared for the iron on or before June, 1868; and arrangements are in progress looking to the prompt extension of the work. The right of way for 25 miles has been given free, and is worth $15,400. The subscribed and other stock is as follows: Subscription of stock between Plymouth and Howell, $161,000; votes of towns, $140,000; value of land, $15,400—making a total raised for Detroit and Howell of $316,000. Subscriptions of stock from Howell to Lansing, $34,000—making a total of $350,000. We have before us a statement setting forth the condition and prospects of the road. In this it is estimated that the earnings of the road from transportation of freight alone in 1869, will amount to $268,037; of passengers, $140,850; and of mails, etc., $6,000—making a total of $414,887. The operating expenses are estimated at $163,941—leaving a balance of $250,946. The estimated cost of the road is as follows: Grading, etc., 81½ miles, $498,049; iron, and laying, 91 miles, including side tracks, $730,775; rolling stock, land and stations, engineering, etc., $360,000—making a total of $1,588,821, or $19,495 per mile. Included in the estimated traffic given above, we find 2,057,111 bushels of wheat, corn, potatoes, etc., 273,130 lbs. of wool, 1,045,744 lbs. of butter, 332,526 lbs. cheese, 13,824 hogs, 141,472 sheep, 143,982 bbls. apples, 15,000 head of cattle, horses, etc., and 25,456 tons of other articles, including beef, coal, flour, lumber, etc. The statement concludes as follows:

Independent of paying a large interest on stock, this road will benefit upwards of 700,000 acres of land by increased value, from one to ten dollars per acre. Take only three dollars per acre and it amounts to $2,100,000, which is more than the cost of the whole road. The value in the transport of produce alone saved will annually reach three hundred thousand dollars, going into the pockets of the farmers and consumers, and saving their time and horses for other work.

The foregoing estimate of traffic does not include the trade that will reach us at Lansing from the three railroads projected to that city from the southwest, west, and northwest. The road from Lansing to Battle Creek is under contract, grading with a large force, and has resulted in the discovery of large beds of fine building stone and lime, while in and around Williamston and Lansing miles of the country is underlaid with coal of the finest quality. The northwest road to Ionia, Greenville and Pere Marquette abounds in fine lumber, and it is reasonable to suppose when these roads are joined as intended at Lansing, the Detroit, Howell and Lansing Railroad, with its small cost, will be the best paying road in the State of Michigan.

Belfast and Moosehead Lake Railroad.

Belfast, Maine, has voted to pledge its credit for $360,000 in aid of the Belfast and Moosehead Lake Railroad. The Legislature has exempted the capital of the proposed road from taxation for ten years, and authorized the issue of preferred stock, bearing interest at six per cent. for thirty years. The road will run from Belfast to Moosehead Lake, *via* Newport, having its terminus as the former place. It will pass northwardly through Waldo County intersecting the Maine Central at Newport, joining the Dexter and Newport road and continuing on to the foot of the lake, near or at Greenville, a distance of about eighty-one miles, to wit: thirty to Newport; fourteen from thence to Dexter, and thirty-seven from Dexter to the foot of the lake. The distance from Newport to Dexter will be built by a separate company, who are nearly ready to commence work, leaving sixty-seven miles, the first section of which—thirty miles—it is proposed to construct as soon as the stock is taken up.

The action of the city guarantees the success of the project, as other wealthy towns on and near the route only waited such a result to subscribe liberally to the non-preferred stock. The cost of this section, inside of the rolling stock, is estimated at from $25,000 to $30,000 per mile, or about $900,000 for the road from Belfast to Newport. Of this, Belfast takes over a third, leaving a third for the other towns and about $300,000 of preferred stock. This road will pass through the great valley of the Piscataquis lying between the Penobscot and Kennebec Rivers, and rich in lumber, mineral and agricultural productions and resources, which have heretofore remained locked up for want of facilities for transportation.

Newark and New York Railroad.

We understand that this company are about making contracts for two iron draw-bridges for the Passaic and Hackensack Rivers, the one over the Passaic to have two openings of the width of 90 feet each. The contractors for the construction of the road have already opened the deep cut through Bergen Hill for a distance of 2,000 feet, from Bergen Avenue, west to Back-lane, and about half a mile of embankment has been constructed from this point to the canal, across which a temporary bridge has been thrown, to enable the laborers to continue their work toward Newark. The contractors are using a somewhat novel steam excavator, which removes the earth in the deep cut with great facility, and deposits it in cars for removal to various points along the track where it is required. More of these excavators are to be put at work in a few days, and the contractors advertise for 200 additional laborers. On the east or New York side of Bergen Hill considerable excavation has also been made, and more laborers are at once to be put upon this portion of the work. It is thought the whole route will be completed and in running order by the coming Autumn.

Milwaukee and St. Paul Railway.

The earnings of this road for the years ending December 31, 1865 and 1866, were as follows:

	1865.	1866.
From freight	$1,680,235 96	$1,643,167 08
" passengers	706,741 31	694,423 77
" mails, rents, etc.	148,024 16	201,209 11
	$2,535,001 43	$2,538,799 96
Expenses, viz:		
Repairs of road	$210,694 59	$389,880 56
" locomotives	128,945 34	123,890 07

Add dividends on Milwaukee and Prairie du Chein Railway Company's stock held by this company		168,388 00
Leaving the net earnings of 1866		$664,991 47

Compared with the previous year, the gross earnings of 1866 show an increase of $3,798 53; with an increase in expenses of $185,454 88—making the decrease of net earnings $181,655 85. The report says:

These increased expenses, are mainly owing to the heavy rains and freshets in the spring and summer months, which greatly impaired the road-bed, bridges and culverts, and to the destruction by fire of the bridge across the Wisconsin River at Kilbourn City. The rebuilding of this bridge and two other bridges across Rock River, repairing other bridges, road-bed and culverts, injured by these freshets, have been charged to operating expenses, as well as $73,913 99 paid to the State of Wisconsin for taxes. These accidents by water and fire, besides the expense incurred, deranged for a time the traffic, and seriously affected the earnings of the road.

While the past year, has been unusually disastrous to railroads generally, throughout the country, in the unprecedented number of accidents and in the loss of life and injuries to passengers, we are happy to be able to state, that the road for the year, conveyed 249,240 passengers without injury to a single person. The year previous, we conveyed 249,444 passengers, with the like fortunate result, showing the good condition of the road-bed and equipments, and the care and skill of those engaged on the management and operating of the road.

The floating debt of the company at the close of the year, including pay rolls and supply bills up to that time, was $311,103, while at the close of the year previous it was $817,373.

During the year, the company has paid $437,500 of annual interest, upon their funded debt, and $12,000 sinking fund on the second mortgage.

In the same period, we have expended in the purchase and building of additional equipments $300,291 54, and expended $11,583 77 in the erection of new building and structures. The value of supplies on hand at the close of the year 1864, was $198,682; 1865, $227,457; and 1866, $260,326.

While the protracted litigation with the Milwaukee and Minnesota Railroad Company involving the title to a portion of our rolling stock and ownership of the Eastern Division of the old La Crosse and Milwaukee Railroad, from Milwaukee to Portage, 95 miles, is not yet finally determined, yet such decisions have been made, as lead us to believe that in the course of a few weeks we will be in full possession of that line of road.

The State of Minnesota, on which this road is largely dependent for its earnings, is increasing in wealth and population, with a rapidity unexampled in the history of the settlement of new States. It contains an area of more than 52,000,000 of acres, but a small portion of which is yet under cultivation. The healthfulness of the country, the fertility of the soil, the cheapness of land, the ease with which farms are opened, render Minnesota one of the most attractive of the new States, to those seeking homes in the West. It is admirably adapted to the growth of wheat, yielding more to the acre, and giving more certain crops, than any of the grain growing States of the Union. While in 1858, Minnesota imported wheat for its home consumption, "in 1865—from 400,000 acres of wheat, there was harvested 10,000,000 of bushels, an average yield of 25 bushels to the acre." In 1859 there were in the State only 125,000 acres under cultivation, in 1866, it is estimated there were over 500,000, and it is believed that there will be more than 600,000 in 1867. In 1860 the population of the State was 172,000. It is now estimated at 360,000, of which large increase, about 100,000 entered the State the past year. So late as 1864, there was no railroad in operation in Minnesota. In the latter part of 1866, there were in full operation, 285 miles, which will be increased the present year to 400 miles.

Minnesota has received from the General Government, 4,500,000 acres of land, to aid in the construction of railroads, through different parts of the State; all of which are in progress of construction, and will be pushed on as rapidly as the necessities of the country may require. Extending through a region peculiarly adapted to the growth of wheat, and easily prepared for cultivation, they will rapidly hasten the settlement of the country, and in return its products will furnish a profitable traffic to these roads and largely increase the earnings of those extending from Lake Michigan to Minnesota. We have thus briefly referred to the past and present condition of Minnesota, as her growth and prosperity are intimately connected with the prosperity of this company. Our confidence in the rapid increase in the population, wealth and production of that great State, has had much to do, in shaping the policy of this company during the last year.

In the month of April last, an arrangement was entered into, between this company and the Milwaukee and Prairie du Chien Railway Company, whereby the earnings of the two roads were to be stocked and divided mile per mile, in proportion to the length of their respective lines. This arrangement took effect on the 1st of May last, and has resulted in this company owing the Prairie du Chien Company a balance of $15,865, from that day till the close of the year.

After perfecting this arrangement, we became satisfied that it was for the interest of both roads as well as that of the public, that a closer connection should be formed between the two companies.

Fortunately, as we conceive, for the interest of both companies, and of the public, a large portion of the stock of the Prairie du Chien Company was owned by parties who reciprocated our views, and apprreciated the advantage of uniting the two lines on a fair and equitable basis.

A successful negotiation was opened, resulting in an arrangement by which a majority of the Prairie du Chien stock has been transferred to the Trustees of this company, in exchange for our own stock, on terms mutually beneficial and satisfactory. At the annual election of directors of the Prairie du Chien Company we were enabled to vote on about two-thirds of the shares represented, and thus elect a management identified with our views and friendly to the objects of the union now so successfully accomplished.

To all who are familiar with the relative position and practical working of the two lines, the importance of thus combining their strength and harmonizing their administration, has long been manifest. Indeed, it was so evident at the time of forming the organization of the St. Paul Company, that ample provisions and authority were embodied in our articles of incorporation, with a view to the ultimate purchase of the capital stock of the Prairie du Chien Company. Experience has fully demonstrated the wisdom and necessity of making our corporate powers thus ample and comprehensive. The two lines have the same starting point in Milwaukee; their business centres in a common depot, connecting with the Milwaukee and Chicago Railroad; and each has its western terminus on the Mississippi River at points less than one hundred miles distant from each other. By placing both under a common administration at Milwaukee, the immense freight business can be more conveniently and economically managed; the grain elevators can be made available for both lines; the western traffic will follow its natural and legitimate direction without collision; many expensive and useless agencies, commissions and drawbacks will be discontinued, and we are enabled, without sacrifice, to serve the public with more liberality, cheapness and efficiency.

Since the last election of Directors of the Milwaukee and Prairie du Chien Company, this company has had the virtual control of that road, both having the same general offices as far as was possible so to do. In acquiring possession of that road, we also acquired the control of the Mc Gregor Western Railroad, which had been previously leased to the Prairie du Chien Company. Subsequently the McGregor Western Railroad acquired the control and possession of the Minnesota Central Railroad. This company is therefore in the control of the entire line from Milwaukee by way of Praire du Chien and McGregor to Minneapolis and St. Paul. The former line is now completed and in operation from McGregor to Cresco, 66 miles, and the latter from Minneapolis to Owatonna 71 miles. The entire line between these two points, about 90 miles, is under contract, with a fair prospect of being completed in October, 1867. The construction of this additional 90 miles, requires no cash payment on the part of this company, the contractors receiving $2,000,000 of mortgage bonds upon the line to be constructed and $1,000,000 of the stock of this company, one half preferred, and one half common.

This company has also agreed, whenever authorized by the legislature of Wisconsin, to guarantee jointly, with the Winona and St. Peters Railroad, the first mortgage bonds of the La Crosse, Trempeleau and Prescott Railroad Company to an amount, not exceeding $1,000,000, to aid in building a road from La Crosse to a point opposite to Winona, 28 miles, and at that point a bridge across the Mississippi River. In giving the present and prospective condition of this company any liability for this guarantee is omitted, as we deem the road and bridge, ample security, for the amount of our proposed guarantee.

The McGregor Western Railroad in 1864 received from the Government of the United States, a valuable land grant of twenty sections or 12,800 acres per mile to aid in extending the road to O'Brien County, Iowa, about 200 miles. It is not the intention of this company, to undertake the construction of the land grant line at this time, but to wait until the cost of labor and material is reduced sufficiently low to justify the undertaking. It is believed that whenever this company shall undertake the construction of this line, that the land and a small mortgage upon the road, will

be sufficient to complete the same, without requiring the advance of any stock or money on the part of this company.

These two additions completed, we believe this company will have one of the best railway properties in the United States, and at the least cost of any in the country, its whole cost, including stock dividends, it is believed will not much exceed $37,000 per mile.

The Milwaukee and St. Paul Railway Company, January 1st, 1867, is represented as follows:

Length of road—	Miles.
Milwaukee to La Crosse *via* Watertown	196
Horicon to Berlin and Omro	53
Watertown to Sun Prairie	26
	275
Milwaukee to Prairie du Chien	200
Milton to Monroe	35
	235
McGregor to Cresco	66
St. Paul and Minneapolis to Owatonna	71
	137
Total length of finished road	647

With materials and supplies on hand valued as follows:

Milwaukee and St. Paul, 275 miles	$260,325 93
Milwaukee and Prairie du Chien	242,607 18
McGregor Western	39,875 50
Minnesota Central	37,520 98
	$580,329 59

Total Milwaukee and St. Paul Railway Company property, January 1st, 1867, represented as follows:

Milwaukee & St. Paul, preferred stock	$7,370,900
" " common stock.	3,627,800
" " 1st mort. bonds	4,592,000
" " 2d mort. bonds.	1,488,000
" " real estate b'ds.	135,000
Total Milwaukee and St. Paul securities issued	$17,213,700

Portions of the lines above named are subject to the following incumbrances, not represented by shares issued by the St. Paul Company:

On Prairie du Chien Line—

First preferred stock	$3,204,296
Second "	841,400
Common stock	99,000
Mortgage bonds	390,500
	$4,535,196

On McGregor and Minnesota Line—

Common stock reduced as per agreement	$138,500	
Mortgage bond	2,109,000	
		2,247,500
		$6,782,696
Add St. Paul securities, as above		17,213,700
Total cost of 647 miles		$23,906,396

Equal to $37,000 per mile.

Gross earnings on above property for 1866:

Milwaukee & St. Paul Line,	275 miles		$2,538,799
Prairie du Chien	" 235	"	2,013,749
McGregor Western	" 66	"	263,754
Minnesota Central	" 71	"	281,350
Total	647 miles		$5,097,652

The McGregor Western Line had but 50 miles in operation for most of the year.

The Minnesota Central Line was opened to Owatonna, where it gets an outlet, or connection with the railroad world, East and South, in September, 1866.

Some of our Shareholders have expressed a desire to know what our position will be after completing all of the proposed and contemplated extensions and consolidations, so far as we can tell, and as we believe, it will be about as follows:

Length of road when all completed—

	Miles.
Milwaukee to La Crosse *via* Watertown	196
Horicon to Berlin and Omro	53
Watertown to Sun Prairie	26
	275
Milwaukee to Portage, *via* Horicon	95
Milwaukee to Prairie du Chien	200
Milton to Monroe	35
	235
Prairie du Chien to St. Paul	212
Fort Snelling to Minneapolis	8
	220
	825

Represented in cost as follows:

Milwaukee and St. Paul common stock	$5,400,000
Milwaukee and St. Paul preferred stock	8,100,000
Milwaukee and St. Paul 2d mort. bonds	1,488,000
Milwaukee and St. Paul 1st mort. bonds	4,592,000
Milwaukee and St. Paul real estate bonds	135,000
Total St. Paul securities	$19,715,000

Portions of the line of road will be subject to the following incumbrances not represented in the above amount:

On 95 miles Eastern Division La Crosse Railroad—

First mortgage	$875,000
Milwaukee city bonds	314,000
Soutter, or 2d mortgage	1,080,000
	$2,269,000

On Prairie du Chien Line—

Common stock	$99,000	
2d preferred stock	841,400	
1st preferred stock	3,204,296	
Mortgage bonds	290,500	
		4,535,196

M'Gregor to Minneapolis—

Mortgage bonds	4,000,000
Add amount of St. Paul securities	19,715,000
Total cost of 825 miles	$30,519,196

Equal to $37,000 per mile.

Gross earnings	$5,102,855
Add Eastern Division of La Crosse, estimated	400,000
Total gross earnings of 1866	$5,502,855

From the foregoing it will be seen that the amount of unproductive capital locked up by the St. Paul Company, for the year 1866, and part of 1867, in the extensions, and in said Eastern Division, is very large, and that the gross earnings of that year are not a fair criterion of the real value of the property, nor will the present year be so, although nearer than the year 1866. It is obvious to the most casual observer of the map of the country, that with our proposed connections made close and complete, with the four hundred miles of railroad in Minnesota, that our earnings will be largely increased. To see the full development of the value of this property, the Shareholders must wait patiently until the line is completed from Prairie du Chien to Minneapolis, which we hope will be during 1867, and until the link is built from La Crosse to Winona, which we hope will be during 1868.

The equipment of the road consists of 58 locomotives, 25 first-class and 4 second-class passenger cars, 3 sleeping cars, 21 baggage, mail and express cars, 977 box cars, and 160 flat cars. Miles run by passenger trains, 283,496; by freight trains, 591,103; by wood and gravel trains, 112,128—total miles run, 986,727. Number of through passengers carried, 51,025; do., way, 198,215—total, 249,240, of which 114,366 went eastward, and 134,874, westward. Total passengers carried one mile, 17,350,885. Tons of freight carried eastward, 254,141; do., westward, 107,546—total 361,687, of which 173,781 was through and 187,906 way. Tons of freight carried one mile, 43,674,502.

General Account, Dec. 31st, 1866.

Secretary and Treasurer.—Alanson Cary.

Superintendent.—Andrew Reasoner.

Northern (Ogdensburg) Railroad.

In reference to the suit of certain parties, claiming to be the Northern Railroad Company of New York, against the Ogdensburg and Lake Champlain Railroad Company, the Boston *Journal* is informed that the present organization hold the property under certain decrees of the Supreme Court of the State of New York, having reference to the foreclosure of the mortgage, sale under the same, and final transfer to the new corporation; to all of which the Northern Railroad Company were made parties, and to none of which did they appear, or make opposition. The constitutionality of all these proceedings has been confirmed by the Supreme Court, and the legality of the same has been recognized by three separate acts of the New York Legislature, and by virtue of an act of the Supreme Court the Northern Railroad Company has been dissolved. The *Journal* is assured that the Directors of the Ogdensburg and Lake Champlain Railroad view these proceedings as altogether harmless, and entertain no apprehensions as to the result.

☞ About two hundred and fifty men are at work on the Hudson River Railroad, at Rhinebeck, building the double track, one hundred at Tivoli, and fifty at Barrytown. The track will be finished from New York to Albany in ample time for next winter's traffic.

Rates of Railroad Travel in Europe.

The following statement of prices on the railroads of Europe, per one hundred miles, in first, second and third class carriages, and on express trains, may be interesting to Americans who are about to visit Europe, or to those who would contrast the expense of traveling here and there:

Russia—First class, 14s. 5d.; second class, 10s. 10d.; third class, 8s.

Prussia—First class, 12s. 6d.; second class, 10s.; third class, 8s. 2d. Express train—First class, 14s.; second class, 12s.

The Rhine—First class, 11s. 10d.; second class, 8s.; third class, 3s. 10d.

Norway—First class, 13s.; second class, 9s.; third class, 4s. 6d.

Sweden—First class, 11s.; second class, 7s. 6d.; third class, 4s. 9d. Express trains—First class, 13s.; second class, 10s.

Bavaria—First class, 10s.; second class, 7s.; third class, 4s. 10d.

Belgium—First class, 10s. 3d.; second class, 7s. 6d.; third class, 5s.

Wurtemburg—First class, 10s. 3d.; second class, 6s. 8d.; third class, 5s. 1d.

Denmark—First class, 12s.; second class, 9s.; third class, 6s.

Spain—First class, 14s. 7d.; second class, 10s. 5d.; third class, 6s. 3d.

Austria—First class, 13s.; second class, 10s. 3d.; third class, 6s. 6d.

Saxony—First class, 11s.; second class, 8s. 3d.; third class, 6s. 8d.

Switzerland—First class, 12s; second class, 9s.; third class, 6s. 8d.

Italy—First class, 14s.; second class, 10s. 6d.; third class, 7s. Express trains—First class, 16s.; second class, 12s.

Portugal—First class, 13s, 3d.; second class, 10s.; third class, 7s.

Holland—First class, 14s.; second class, 10s.; third class, 7s.

France—First class, 14s. 6d.; second class, 11s.; third class, 7s. 6d.

Great Britain and Ireland—First class, 18s. 6d.; second class, 13s. 4d.; third class, 8s. Express trains—First class, 24s.; second class, 16s. 8d.

From this table it will be seen that on the express trains on European roads there are no third class carriages. It will also be seen that Russia and Prussia accommodate the working classes at the cheapest rate, while the tariff of Great Britain and Ireland is the highest of all for first, second, and third class carriages and express trains. It must, however, be borne in mind that in those foreign countries where the railways do not belong to the State, the shareholders receive considerable Government assistance in consideration of their being obliged to adopt a low tariff. The rates per mile on these roads, reduced to our currency, will not bring travel to as low a standard as in this country, unless we take their third class carriages.

On their first class and express trains the average is from four cents per mile to six and a half cents per mile; on the second and third from two and a quarter to three and three-quarter cents per mile.

Milford and Woonsocket Railroad.

A meeting of the citizens of Milford, Mass., was held on the 8th inst., to promote the construction of the Milford and Woonsocket Railroad. This road is designed to connect Milford with towns and cities to the northward, and was chartered several years ago, but its construction has been delayed by the war and other causes. Several addresses were made, and the meeting voted to instruct the selectmen to insert an article in the warrant for the next town meeting to see if the town will subscribe $50,000 towards building the road, and a strong disposition was manifested to carry out the enterprise.

Commerce of New York.

The foreign imports at New York for the month of March are officially stated as follows:

	1866.	1867.
Entered for consumpt'n.	$15,200,809	$11,373,974
Entered for warehous'ng	9,539,100	9,069,756
Free goods	1,179,177	923,377
Specie and bullion	285,854	145,867
Total entered at port	$26,204,940	$21,512,974
Withdrawn fr. warehouse	7,844,644	13,318,411

The foreign imports at New York for three months from January 1st, were:

	1866.	1867.
Entered for consumpt'n.	$51,147,040	$35,785,742
Do. for warehousing	31,407,353	29,368,472
Free goods	3,922,187	2,559,551
Specie and bullion	530,747	409,077
Total entered at port	$87,007,327	$68,122,842
Withdrawn fr. wareh'se.	22,935,572	34,493,051

The foreign imports at New York for nine months ending March 31, were:

	1866.	1867.
Six months	$142,730,367	$143,210,153
January	30,109,830	20,979,087
February	30,692,557	25,630,781
March	26,204,940	21,512,974
Total for 9 months	$229,737,694	$211,332,995
Deduct specie	1,602,205	8,806,920
Total merchandise	$228,135,489	$202,526,075

The duties received at New York for nine months ending March 31, were:

	1866.	1867.
Six months	$65,077,328 87	$60,531,571 82
January	12,437,474 16	9,472,248 48
February	12,008,273 74	11,466,418 42
March	11,173,154 62	11,977,418 19
Total 9 months	$100,696,231 39	$83,447,656 91

The exports from New York to foreign ports in the month of March, were:

	1866.	1867.
Domestic produce	$23,291,485	$19,679,955
Foreign free goods	57,167	31,133
Do. dutiable	320,165	764,138
Specie and bullion	1,045,039	1,891,141
Total exports	$24,713,856	$22,366,367
Do. exclusive of specie	23,668,817	20,475,226

The exports from New York to foreign ports for three months from January 1st, were:

	1866.	1867.
Domestic produce	$59,844,602	$47,206,684
Foreign mdse., free	122,073	182,143
Do. dutiable	1,005,856	1,987,552
Specie and bullion	5,558,405	6,566,953
Total exports	$66,530.936	$55,843,332

Stock Exchange and Money Market.

Money has not varied much in price, since our last. Any changes that have occurred have been favorable to responsible borrowers. The Treasury negotiations have been on an extensive scale, here, drawing heavily on the deposit and legal tender resources of the local banks, the first in the form of transfers of public deposits from the bank vaults to the Sub-Treasury and the latter, in part, through the marketing of Treasury coin. The increase of $4,500,000 in the balances of the Sub-Treasury was nearly all in currency, and cost the local banks from three to four millions in greenbacks, owing to the scarcity of National Bank notes, which the Treasury would quite as willingly receive in all payments from or through the banks—whether for 5-20s, of which a considerable sum was delivered on previous engagements on and after Monday, or for Gold sold in the open market, amounting, it may be, to four-fifths of the Customs receipts of the week, or for transfers of the current Internal Revenues originally deposited in the Country National Banks and paid into the Treasury here, by their city correspondents. These three sources of accumulation are being now relieved by the purchase of United States 7.30 per cents, and by the ordinary disbursements of the Treasury at Washington by draft on New York, which chanced to be lighter than usual last week. The purchases of 7.30 per cents and 1864 Compound Interest Notes were large, and the money market has already partially felt relief from these disbursements, and has become comparatively easy at 6@7 per cent. on call, and 7@ 8½ per cent. per annum on strictly prime to good short date commercial paper. On Wednesday, the offering of capital to the leading borrowers were decidedly more liberal, and the tendency of the market was increased ease with far less pressure for accommodation. The city banks, in their last weekly exhibit, showed a decrease of $812 337 in loans and discounts, $383,796 in specie, $3,438,036 in legal tenders, $4,618,981 in net deposits, and an increase of $105,378 in circulation. This result was not as favorable as had been generally anticipated. It was explained by a statement that the checks from the Sub-Treasury receiving and paying debts, for the settlement of the purchases of maturing interest-bearing unfunded obligations, in place of having been drawn out at once in currency, at the close of the week, were deposited by the great dealers in the Public Funds in bank, and were not all drawn out when the bank averages of the week were made up last Saturday. The specie reserve of the banks is now $8,138,813, against $11,436.295, same time last year. The city bank deposits are now $183,861,269, against $189,094,961 week ending April 7, 1866. The legal tender reserve amounts to $59,021,775, against $71,445,065 same time last year. The circulation now stands at $33,774,573, against $24,127,061 same time last year. The loans are now $254,470,027, against $242,643,753 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $88,639,197 a day, against a daily average of $76,641,767 the preceding week, and $78,700,396 the week ending with March 23d. The current week's exchanges average $86,642,303 a day.

The main changes in the Philadelphia Bank footings, last week, were as follows: Increase of loans, $117,925; increase of legal tender reserve, $25,797; decrease of deposits, $353,690; decrease of specie, $173,429; and increase of circulation, $29,083.

National Bank notes to the amount of $27,550 were issued last week, making the total issue to 1,664 banks thus far $302,336,256, against $282,555,440 at the close of the last fiscal year, June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $3,447,582, leaving, with the existing 1,647 banks, an actual circulation at this date, of $298,888,674. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,610,956; and for the public deposits, $38,890,950—making a total of $379,491,900. The Treasury Department, last week, redeemed and destroyed $338,800 of worn and mutilated fractional currency, and issued $209,200 worth of new.

The U. S. Sub-Treasury receipts, week ending with April 7, were $13,889,357, including $2,406,-

907 from customs duties; payments, $9,342,692; balance at the close of the week, $105,180,790, against $100,634,126, at the close of the preceding week. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $2,725,717, and payments, $5,551,161; on Tuesday, receipts, $5,464,274; payments, $2,194,205. The balance at the close of business on Tuesday stood at $105,625,416, against $101,715,869 a week previous.

Government revenues have been quite liberal, in both forms of excises and customs, since our last, giving promise of a satisfactory yield for the closing quarter of the current fiscal year. The excises begin to feel the favorable influence of the payment of annual taxes, which this year, are levied a couple of months earlier than has been customary, in conformity with the requirements of the amended internal revenue act. The excises, last week, yielded $5,888,886, against $3,155,538, the preceding week; customs at the port of New York, $2,406,207, and at the outports, about $800,000 (in coin) more, making the grand total income for the week equal about $10,298,500 in currency, against disbursements of $3,245,956 on account of the three leading executive departments. The total receipts of the National Treasury, from excises, since July 1, 1866, have been about $221,000,000, or equal to a weekly average of fully $5,525,000, which would give a yearly aggregate of over $287,000,000. We feel confident that the aggregate, for the whole of the fiscal year, ending with June 30th 1867, will exceed $300,000,000.

The Gold Market has started from its moorings, this week, and gone adrift with the current of speculation, which has been greatly stimulated by the warlike reports from the continent of Europe. Of these reports, the *bulls* in the Gold Room have made the utmost use, without the aid of anything like an active demand for coin for legitimate purposes. The customs inquiry has been very moderate for some days past. The tendency of the price, which, through the first half of the week, was downward, has since Monday, been decidedly upward, though characterized by frequent fluctuations. The extremes of the week were 132⅝ on Saturday, and 138⅛ on Wednesday following, and the closing price was 138 on an active and excited market. These figures indicate a rise, during the week, of fully four per cent. The total imports of specie from Europe, and other foreign ports since Jan. 1, 1867, have been $438,000. The customs demand for Gold last week, averaged $401,151 a day; thus far, this week, it has been equal to $258,593 a day, or equal to a weekly aggregate of $1,551,558. The arrivals of specie from Europe, Havana and other foreign ports, during the past week were $30,000, and from California, none. The total customs revenue of the Government, in coin, at this port since July 1, 1866, has been $97,900,132, against $104,212,985 same time in the preceding fiscal year. The total receipts of California gold at this port since July 1, 1866, have been $32,197,065, against $21,718,344 same time last year, showing an increase this year, of $10,478,721. The exports of specie from this port, last week, were $500,618. The total outflow of specie from the port, thus far in the current fiscal year has been $23,785,529, against $17,663,070 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $56,200, making the total coin interest disbursements through the Government office, since July 1, 1866, $36,481,964, against $32,089,870 for the same time in the preceding fiscal year. The specie exports from San Francisco from Jan. 1, to March 9, 1867, reached $7,361,582, against $6,644,340 same time last year.

Foreign exchange has been in more active demand, and has advanced materially. The rates for sterling bills are now close up to the rate, at which exports of specie become profitable, and a renewed outflow of the precious metals is now considered quite imminent, in view of the squally complexion of recent financial and commercial advices from Great Britain and the Continent. Bankers' 60 day bills on London closed buoyantly on Wednesday at 109⅛@109⅜, and on Paris to 5.20@5.15; sight bills on London to 109⅝@110; and on Paris to 5.15@5.12½. The offerings of produce bills have been again quite liberal, since our last. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $4,392,123, making the total value of exports since July 1, 1866, $137,080,552, against $173,820,077 same time in the preceding fiscal year.

The public funds have been comparatively firm in price, all through the week, on a fair investment business, sustained in good measure, by the favorable interpretation of the first of April exhibit of the National indebtedness. The unfavorable foreign advices have been counterbalanced by the sudden rise, and decided buoyancy, in the Gold Market. The increase of four and a half millions in the Treasury coin reserve, during March, has been considered as a strong point for the public credit, in view of the dullness of the season, in general business. Over fifty millions of Seven-thirties, chiefly of the first, or August issue, were redeemed during the past month; two and a quarter millions of compound interest notes were bought in and canceled, and over one and three quarter millions of past due indebtedness were liquidated. The outstanding legal tender circulation was diminished to the amount of less than a million dollars, as Secretary McCulloch preferred employing his currency in reducing the interest bearing debt, rather than enforce contraction at present. The net indebtedness of the Government was reduced over seven million dollars; bringing the net aggregate down to $2,523,428,070. It is confidently anticipated that by the close of the current fiscal year, the net aggregate will not exceed two thousand five hundred millions. U. S. sixes of 1867 closed here on Wednesday at 132; U. S. sixes of 1868, at 129½; U. S. sixes of 1881, 108⅞@109⅛; U. S. Five-twenties of 1862 at 108⅛@109; U. S. Five-twenties of 1865 at 108; U. S. Five-twenties of 1865, consolidated, 107⅛@107¼; U. S. Ten-forties at 97⅞@98, ex-coupon, and U. S. Seven-thirties at 105⅜@106⅛. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ¼@½ of 1 per cent. on these figures:

June, 1864	118½	May, 1865	112¾
July, 1864	118	August, 1865	111¾
August, 1864	117½	September, 1865	111¼
October, 1864	115⅛	October, 1865	111
December, 1864	114½		

Railway and miscellaneous stocks have been quite variable in price through the week. The drift of the dealings has been adverse to buoyancy in values. This has been particularly true of the closing transactions, which indicated a rather panicky, and decidedly *bearish* market, under a pressure to realize, on speculative account, in view of the disturbing news from abroad. The business of the week has been of less than average magnitude.

Domestic produce has been more freely dealt in, since our last. Breadstuffs and provisions have been in very good request, the former at much higher prices, and the latter at irregular figures. The cotton market has been seriously depressed by the adverse news from Liverpool. Middling grades of cotton left off here very tamely and heavily at 26½@28 cents per lb. as extremes. The stock of cotton now here is estimated at about 195,000 bales. The receipts at the port this week, have averaged nearly 3,000 bales a day. The receipts since the commencement of the current cotton year, Sept. 1, have been 504,459 bales, against exports of 372,993 bales. The receipts at all the shipping ports from September 1, to latest mail dates have been 1,581,000 bales against 1,675,487 bales same time last year; exports, 1,031,500 bales, against 1,100,441 bales same time last year; estimated stock at latest dates, 560,000 bales, against 455,000 bales same time last year. Foreign merchandise has been in fair request. Groceries have been on the advance. Dry goods have been heavy in price. The total imports of foreign dry goods, last week, were $1,714,385, and the total amount marketed $1,604,521. The value of foreign merchandise imported last week, was $3,045,022—making the grand total specie value of last week's imports of dry goods and merchandise, $4,750,411, and since July 1, 1866, $198,806,803, against $229,438,510 same time in the preceding fiscal year. The ocean freight market has been moderately active and rather firmer with 530 vessels of all classes in port. For Liverpool we quote flour at 2s. per bbl.; grain at 2¾@3½d. per bushel; cotton at ¼@$\frac{7}{32}$d. per lb.; and heavy goods at 15s.@25s. per ton, all by sailing vessel.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	March 27.	April 3.	April 10.
Consols	91¼	91	90½
U. S. 5-20's of 1862	74½	75	73¾
U.S. 5-20's of 1865	72¾	73	71¾
Erie	38¾	39	37½
Ill. Central	78½	78¾	77¼

The New York exports, exclusive of specie, for the week ending April 9, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week	$6,069,510	$4,392,123
Prev. reported	60,872,431	51,082,034
Since January 1	$66,941,941	$55,474,157

The New York imports for the week compare as follows:

	1866.	1867.
Dry goods	$2,918,981	$1,714,385
Gen. merchandise	4,665,269	3,045,022
Total for the week	$7,584,250	$4,759,407
Previously reported	79,770,062	63,114,364
Since January 1	$87,354,312	$67,873,771

The commerce of New York from July 1st to date compares as follows:

	1865–'66.	1866–'67.
Imports merchandise.	$229,438,510	$198,006,403
Exports produce.	173,820,077	137,080,552
Exports specie	17,663,070	23,785,529

The balance in the Sub-Treasury on Wednesday was $106,564,495 29.

The Harrison Boiler.

We invite attention to the Advertisement of J. B. Hyde, Esq., Agent in this city for the Harrison Boiler. Having had a practical test for more than two years past among nearly every class of enterprise or work employing steam, and to an extent of power varying from 10 to 300 horses, this boiler is presented as embracing the following advantages: It is absolutely free from destructive explosion. It has no superior in saving fuel. It is a rapid steam generator, and if required is made its own super-heater without extra apparatus. It is easily transportable, and may be passed in sections through an ordinary doorway. It may be enlarged to any required size without disturbing parts already erected. It is safe from all incrustation, or any of the evils arising therefrom. It is compact, neat and cleanly, and easily managed.

Circulars may be procured, a model seen, and all information respecting it obtained, at the Branch Office in this city, Rooms 9 and 10, No. 119 Broadway. Nearly 300 of these boilers are now in practical rise.

Lindsay's Improved Screw Wrench.

The attention of Master Mechanics, and Railroad Supply Houses in general, is respectfully called to the Advertisement of the Lindsay Screw Wrench on last page. This wrench has the following advantages over all others. The rib on the back of the bar (see cut,) is forged with the bar and prevents the same from bending or breaking. The workmanship is perfect. The parts are interchangeable and subjected to rigid inspection, the same as in gun work. The material is warranted of the best quality.

These wrenches are manufactured at the rate of five hundred per day, and are for sale at all the hardware and railroad supply houses in the United States.

☞ It is expected that the Welland Canal will open about the middle of April.

Railroad Earnings.--Weekly.

The earnings of the Grand Trunk Railway of Canada for the week ending Mar. 23rd, 1867, were.... ....$119,159 00
Corresponding week of previous year. 124,123 00

Decrease.. .... $4,964 00

The earnings of the Detroit and Milwaukee Railroad for the week ending April 4th, 1867, were $30,127 00
Corresponding week of 1866..... ..... 29,515 00

Increase.. .... $612 00

The earnings of the Chicago and Northwestern Railroad for week ending Apr. 4, 1867..$187,355 00
Corresponding week previous year .. 140,789 00

Increase.... .... $46,566 00

The earnings of the Michigan Southern and Northern Indiana Road for the 1st week in April 1867, were.... .... $81,455 00
Corresponding week of 1866 .... 93,714 00

Decrease $12,259 00

The earnings of the Marietta and Cincinnati Railroad the 4th week in Mar.,1867...$27,300 00
Corresponding week previous year.... 29,351 00

Decrease... .... $2,051 00

The earnings of the Chicago and Rock Island Railroad for the 4th week in March, 1867, were.... .... $57,759 00
Corresponding week of previous year.. 83,389 00

Decrease..... ....$25,630 00

The earnings of the Western Union Railroad for the week ending March 31, 1867. .$10,541 47
Corresponding week previous year.... 13,550 33

Decrease.... .... $3,008 86

Journal of Railroad Law.

NEGLIGENCE OF ENGINEERS IN CROSSING STREET, WITHOUT SIGNAL.

By the case of Beisiegel *vs.* N. Y. Central R. R. Co. it is decided that a plaintiff, who was injured by a locomotive crossing a street, without signals, in violation of law, where his omission to discover its approach was due to the neglect to give the usual warning, was entitled to recover.

A foot passenger on the public highway, who is not aware of the vicinity of a moving train, is at liberty to assume that none is approaching, when no flag is displayed and no whistle or bell is sounded.

As between him and the railroad company, he is not bound to be on the alert for danger, when he has the assurance of the company that the crossing is safe.

The facts of the case are these:

The plaintiff sued the railroad company for damages for negligently running a steam engine against him while crossing the track on St. Joseph street, in the city of Rochester. The evidence shows that the plaintiff was passing on the east side of South St. Joseph street, from North to South, when he saw a long train coming up from the West, and he waited until it had passed. He stood on the second track on the sidewalk. There were five tracks, and the two north tracks were on the east side, and near to the sidewalk. When the long train had passed, making a good deal of noise, the plaintiff started on, looking to the east as far as he could see. He then turned his head to the West as he started to go across the tracks, and, while crossing, an engine coming from the east struck him on the shoulder and caused the injury. He did not hear the bell ring except on the long train, and no flagman was there at the time.

The plaintiff had crossed the track often before this. He was standing on the second track when the long train passed, and remained there a minute and a half or two minutes. The empty cars which were standing on the first and second tracks were so near him that he could touch them with his hand. The first step he took he looked east, but did not look eastward again after he got over the South rail of the second track. He was looking west all the while after that, until he was struck by an engine backing down from the east. He could see down the third track about eight or ten feet when he looked east, which was before he stepped over the South rail of the second track. It was conceded that the tracks are straight at this point.

The empty cars that stood near the crossing were box freight cars, eight feet high.

The engine that struck him was running very fast toward the Rochester depot, and the evidence tended to prove that the bell on the engine was not rung until after the accident.

The engine that struck the plaintiff was on the third track, and the engine fender projected over the track eighteen inches. The freight cars projected over the same distance. It also appeared that St. Joseph street is in a populous and thickly settled part of the city. By the map it appears that the five tracks at this point cross St. Joseph street at an obtuse angle, so that a person crossing from the North to the South side of St. Joseph street could not see an engine approaching on the third track from the east, standing where the plaintiff did, on the second track, with freight cars on the first and second tracks to intercept his view.

The court non-suited the plaintiff, upon the ground that it was his duty to have looked and ascertained, before attempting to cross the railroad, that he could safely pass the same, and that it was negligence in him not to do so.

PORTER, J.—The nonsuit seems to have been granted on the theory that a citizen, who crosses a railway track at its intersection with a public highway, is an absolute insurer of his own safety against the criminal negligence of a wrong-doer. It was sustained at the General Term on the equally untenable theory that the plaintiff, who looked in each direction before crossing and saw no engine approaching, was guilty of culpable negligence in not continuing to look both ways simultaneously. In either aspect the decision was plainly erroneous.

The plaintiff owed no duty to the defendant beyond the exercise of ordinary care. The proof is clear, not only that he was free from negligence, but that he exercised more circumspection and care than most men would, under similar circumstances. He was on the east side of St. Joseph street, proceeding in a southerly direction, and on arriving at the crossing, he observed the approach of a train of cars from the West on the fifth or Southern track. He stopped at a safe distance and waited until the entire train had passed. He stood at the point where the second track crossed the sidewalk. This and the first or Northern track, through some unexplained neglect of the company, were used a place of deposit for empty freight cars, eight feet in height, extending up to within three feet of the sidewalk, and thus obstructing, in a considerable degree, the eastern view of the tracks used by the trains. No other cars were in view, and there was no signal from any quarter of approaching danger. The flagman whose duty it was to be at his post and display his flag when an engine was drawing near, or when from any cause the crossing was unsafe, did not appear to give the customary warning.

It turned out, however, that, at the moment the plaintiff resumed his way, an engine unincumbered with cars was running rapidly backward from the east on the track next to that on which he had been standing. Its approach was so sudden and noiseless, that although four of the witnesses stood on South side of the crossing, looking toward the North, and with nothing to obstruct their view, neither of them saw it until an instant before the accident. The plaintiff knew nothing of this, and his first step brought him within some four feet of the point where he was struck by the projecting fender of the engine, which though vailed from view, must then have been within forty feet of him.

At the first step he looked East, at the second West, and he was prostrated at the third. The whole affair was so instantaneous that he did not get to the track, but was knocked down before he reached it. After he started, less than two seconds intervened before his leg was crushed. All the witnesses swear that the engine was moving at a rapid rate of speed. All agree that the bell was not rung until after the accident.

Upon this state of facts, it is obvious that the gross negligence of the defendant's agents was the sole cause of the injury. The omission of the customary signals was an assurance by the company to the plaintiff that no engine was approaching within a quarter of a mile on either side of the crossing. On this he was entitled to rely, and to the defendant he owed no duty of further inquiry. He was not bound to be on the look-out for danger when assured by the company that the crossing was safe. The view expressed in the case of Ernst *vs.* The Hudson River Railroad Company, decided at the present term, are equally controlling in this case.

The judgment should be reversed and a new trial ordered.

All the judges concurred, except Davies, Ch. J., who expressed no opinion.

Judgment accordingly.

Railroads in Peru.

A very important concession has recently been made in Peru to an American company represented by Col. Ferand, Brown & Braisted, to build a tram road between Lima and Callao; also the privilege of laying a railroad through the principal streets of Lima. The capital of the company is 2,000,000 soles. The privilege is for 28 years. Shares are to be placed on the market during the present year, and one-third to be reserved for sale in Peru. The Government concedes any lands they may possess that are required for the use of the road, and all private lands are to be valued by assessors. The company will place their toll-gates upon the road at such places as they may deem fit, and the Government binds itself to enforce their tariff. There is not the least doubt but the projectors of

the road will make a splendid profit from the speculation.

☞ A meeting was held in Hamilton, Ca., recently, to advance what is called the "Northwestern Railroad" project, a proposed line from Guelph to Owen Sound, or about parallel with the existing road from Toronto to Collingwood. Another similar project, further removed westward from the existing competition, was recently agitated, being the proposal of a line from Stratford to some point on Georgian Bay or on Lake Huron, in that vicinity.

Orange and Alexandria Railroad.

In consequence of some difficulties in the settlement of accounts between the company and the agents of the Board of Public Works, the possession of the railroad and equipment was retained in the hands of the latter until April 6, 1866, when the company was re-instated. The financial period closing Sept. 30, 1866, therefore covers somewhat less than one-half of the year thus ending.

The gross earnings from the 6th April to the end of September, were as follows:

Revenue from passengers	$274,823 37
" from freight	87,808 07
" from expresses	28,629 20
" from U. S. mail	8,498 65
" sundries	342 48
Total gross revenue	$300,101 77
Expenses of working road	197,450 31
Earnings less operating cost	$102,651 46

For the operations of the six months, the earnings for April were least, having been only $37,998 62, and those for September the largest, being for that month $72,553 67. "This result," the President says, "cannot be regarded as unfavorable under existing circumstances. Much of the immediate country (and that heretofore the most productive part,) through which the line of the railroad extends, having been devastated by the ravages of war, and the usual production of crops curtailed, and its population greatly restricted in their present means necessary for travel and locomotion. As the country regains its capacity for production and can realize from sales of its crops hereafter, it is fair to assume that the local business of the road will largely increase. The through business both passenger and freight, must also improve as communications are perfected with other railroads, and an additional daily train already a necessity, put on the great direct through line from Washington to New Orleans of which your railroad forms a part."

The total financial operations of the company for the same six months is shown in the general account to have been as follows:

RECEIPTS.

Revenue from operations		$300,101 77
" cotton investment in Georgia		16,698 22
Balances due to sundries		24,253 87
Bills payable (current business)		68,353 59
Balances due U. S. on purchases of machinery and materials		77,704 09
September pay rolls not paid till Oct.		19,063 98
In bank per last report	$1,644 61	
In Virginia registered bonds (old issue)	3,500 00	
		5,144 61
Total		$511,320 13

Against which the following disbursements are exhibited—

Expenses of operating road		$197,450 31
Paid for buildings on depot grounds	$825 00	
Paid for interest to U.S. &c.	12,483 23	
Paid for loss on Va. stock sold	2,082 75	
Paid for old claims and balances	22,568 31	
Paid on bills payable	20,327 42	
Paid for accidents & losses.	52 00	
		58,338 71
Due by U. S. for transp	$3,390 25	
Due by express companies.	28,629 20	
		32,019 45
Materials on hand		61,829 04
Balances in banks		1,200 84
Total		$511,320 13

The property of the company consists of the original road from Alexandria to Gordonsville 88.3 miles, or, including the Warrenton Branch, 97.2 miles, and the extension from Charlottesville to Lynchburg 59.5 miles—total length of road 156.7 miles. The distance between Gordonsville and Charlottesville, about 22 miles, is made on the Virginia Central Railroad. This makes the route between Alexandria and Lynchburg a total of 169.8 miles.

The rolling stock of the company consists of 16 locomotives; 16 passenger cars, 4 baggage cars, 3 mail cars, 1 pay car, 1 conductor's car, and 114 freight cars.

The business of the road from April 6, to Sept. 30, consisted chiefly in the transportation of 19,075 tons of freight, of which 11,250 tons were carried southward, and 7,825 tons northward, of 62,258 passengers of which 31,437 were carried south, and 30,821 north.

The expenses for working and maintaining the road for the same period were as before stated $197,450 31, viz., for maintenance of road $58,552 17, of motive power $69,658 47, and of cars $10,801 32—total $139,011 96, for transportation expenses $38,401 65, and for salaries, rent, taxes, &c., $19,946 59.

From the General Superintendent's Report we learn that arrangements have been made with the Baltimore and Ohio, (Washington Branch,) and Philadelphia, Wilmington and Baltimore Railroads by which freight is received in Baltimore and Philadelphia, and delivered in Lynchburg without breaking bulk, and *vice versa*. Arrangements have also been made with the Camden and Amboy Railroad leading out of New York for the same purposes.

The Report contains no General Balance Sheet. We learn from the Report of the President all that is material to know of the financial condition of the company. In the form of funded debt secured by mortgage there is due and outstanding as follows:

1st issue of bonds due 1st Nov., 1866		$400,000 00
2d " " " "		1,110,500 00
3d " " " "		570,500 00
4th " " " "		56,400 00
Total mortgage debt		$2,137,400 00
There is also due of loan made by the State of Virginia		249,962 27
And interest on the same		26,246 00
The company also stood indebted on the 1st July last, for overdue and matured coupons (inclusive of those on 1st mortgage due Nov. 1, 1866,) at that date in the sum of.		509,396 00
Making a total funded debt of.		$2,923,004 27

The following was the amount of temporary or floating debt outstanding Sept. 30, 1866, viz:

Bills payable & other debt due 1861.	$149,176 06
Estimated interest on same	50,000 00
Interest due on preferred stock	11,104 00
" on dividend scrip	5,000 00
Indebtedness of present year	165,497 21
Total indebtedness	$380,780 27

Against which the company held the following resources:

Mortgage bonds, 1st issue on hand	$89,500 00
" 2d "	29,500 00
" 3d "	643,600 00
Preferred stock	55,800 00
Total resources	$818,400 00

Of the above bonds, the report continues, $130,000 have been hypothecated to secure certain temporary loans. In addition to the bonds referred to, there remains of the capital stock authorized by the charter not subscribed or issued, shares to the amount of $858,350. There is also a balance, held on stock subscriptions of former contractors forfeited to the company of $13,715. The sum of $23,084 10 is also due from delinquent stockholders, from which something may be realized hereafter by collections and sales.

The National Debt.

The following is a comparative statement of the Public Debt of the United States:

	March 1, 1867.	April 1, 1867.
Debt bearing int. in coin.	$1,464,855,191 80	$1,499,381,591 80
Debt bearing interest in currency	787,028,880 00	734,280,780 00
Matured debt not presented	14,576,689 07	12,825,658 42
Debt bearing no interest.	424,126,528 32	417,225,343 96
Total	$2,690,587,289 19	$2,663,713,374 18
Coin in Treasury	$107,271,031 12	$105,956,477 22
Currency	52,552,368 27	34,328,826 52
	$159,823,399 39	$140,285,303 74
Debt less cash in the Treasury	$2,530,763,889 80	$2,523,428,070 44

The total debt shows a decrease since the 1st of March of $26,873,915 01. The balance in the Treasury shows a decrease, as compared with March 1st, of $19,538,095 65. Deducting the amount on hand from the aggregate debt, both on the 1st of March, and the 1st of April, the decrease of debt would be $7,335,819 36. The total debt on the 31st of August, 1865, stood at $2,845,907,626 56. The balance in the Treasury at that date amounted to $88,218,055 13. Deducting the cash in the Treasury from the aggregate debt both on the 31st of August, 1865, and 1st of April, 1867, and the actual decrease in the Public Debt since that period has been $234,261,500 59.

☞ Messrs. KASSON, & Co., 58 Beaver street, this city, have for sale 3 Locomotives of the ordinary gauge, a full description of which will be found in our advertising columns. They are also agents for the sale of a superior article of Woolen Waste, the advantages of the use of which are fully set forth by them in their advertisement.

Steep Gradients--Sharp Curves.

The paper read at the Institution of Civil Engineers, London, on 5th March, was "On the Working of Steep Gradients and Sharp Curves," by Captain H. W. Tyler, Assoc. Inst. C. E.

It was remarked that the comparative terms, steep and sharp, had acquired at the present day a signification very different from what they conveyed to engineers a few years since. The locomotive engine had been gradually trained and adapted to gradients of 1 in 100, 1 in 50, 1 in 25, and 1 in 12, combined with curves of from 30 chains down to 15, 10, 5, and even 2 chains radius; and during all this progress, the result of so much labor and ingenuity, the system of bite, or adhesion, by plain surfaces, had steadily triumphed as a means of converting steam power into tractive force. The co-efficient of adhesion was always in the first instance under-estimated; and the central rail system, first patented by Mr. Vignoles (M. Inst. C. E.) and Mr. Ericsson, on 7th September, 1830, was intended to provide extra adhesion on what were now considered moderate gradients, in place, apparently, of the well-known rack-rail of Blenkinsop.

In conveying heavy loads up gradients much less steep than several which had been worked, for a greater or less number of years, with engines of ordinary construction, a want of extra adhesion had been seriously felt, and various expedients had been resorted to for obtaining it. M. Flachat proposed, in constructing railways over the Alps, to utilise the adhesion not only of all the wheels of the engine and tender, but also, by the use of additional cylinders, &c., to them, of all the vehicles composing a train. Mr. Sturrock had added cylinders and the necessary apparatus to the tenders, and employed them for some time as assistant engines on certain parts of the Great Northern. M. Thouvenot, on the Continent, and Mr. Fairlie, in this country, combined two tank engines in one, placed, as it were, back to back, and united as to their boilers and fire-boxes.

In the ordinary system of obtaining adhesion by bearing wheels only, whether of an engine and tender, or of a double engine, or of two engines coupled together, the weight of the motive power required to be increased for a given amount of adhesion, in proportion to the load or to the steepness of the gradient. The limit of the gradient up which such an engine could take a load might roughly be defined by the co-efficient allowed for adhesion. Supposing this to be one-tenth, then 1 in 10 was (omitting friction) the gradient on which an engine might move itself, but on which no load could be taken. As on the railway over Mont Cenis, the adhesion might vary from one-sixth to one-twelfth, and as gradients were required of 1 in 12, it was necessary to adopt some other method than that of trusting to adhesion by bearing wheels; and having a high summit to surmount, it was of great importance, with reference to cost of working, to save weight in the engine as well as in the trains. By adopting the principle of horizontal wheels and a central rail, Mr. Fell (Assoc. Inst. C. E.) found the means of doubling the adhesion, at the same time that, by the use of steel, the engine was made lighter than it could otherwise have been. This principle was first tested, experimentally, on the Cromford and High Peak; and subsequently on a line, 1¼ mile in length, laid on the road over Mont Cenis, with an average gradient of 1 in 13, containing curves with radii varying from 4 to 2 chains. The gauge was 5 feet 7⅜ inches (1.10 metre,) and the middle rail was laid on its side horizontally, at an elevation (to its centre) of 7½ inches above the bearing rails. The engine constructed specially for the Mont Cenis was partly of steel. Its weight was now 14 tons, and its mean weight, when fully loaded with fuel and water, 17 tons, of which 2 tons 13 cwt. was for the machinery connected with the horizontal wheels. There were only two cylinders, each 15 inches in diameter with a length of stroke of 16 inches, which worked both the four coupled horizontal, and the four coupled vertical, wheels, all 27 inches in diameter. The wheel base of the vertical wheels was 6 feet 10 inches, and that of the horizontal wheels was 2 feet 4 inches. The pressure upon the horizontal wheels could be regulated by the engine driver at pleasure from the foot-plate. This pressure was applied through an iron shaft, connected by means of right and left-handed screws with a beam on each side of the middle rail, and these beams acted upon volute springs, which pressed the horizontal wheels against that rail. The pressure employed during the experiments was from 2½ to 3 tons on each horizontal wheel, or 10 tons altogether; but the pressure actually provided for, and which might, when necessary, be employed, was 6 tons upon each, or 24 tons upon the four horizontal wheels. The vertical wheels were worked indirectly by piston rods from the front, and the horizontal wheels directly by piston rods from the back of the cylinders. The results of the different experiments on the Mont Cenis Experimental Railway were given in several tables, which showed that considerably more could be accomplished than had been proposed in the programme handed to the French and Italian Governments. During the official trials, in the month of July, 1865, before the French, Italian and Russian Government commissioners and others, with a load of 24 tons, exclusive of the engine, the distance run in fifteen trips was 51.040 kilometres (31¾ miles nearly) at an average speed in ascending of 10.704 kilometres (6.65 miles) per hour; while with a load of 16 tons, the distance run in eight trips was 29.12 kilometres (18.09 miles,) at a speed of 15.6 kilometres (10 miles nearly) per hour. During these twenty-three trips the pressure of the steam increased 500 lb., or 21 lb. on the average for each run. In the month of November, 1865, when some other trials were made, a maximum speed was attained of 12 kilometres (7.46 miles) per hour, with a load of 24 tons, and of 17 kilometres (11.2 miles) per hour, with a load of 16 tons. As evidence of the power of the breaks, it was stated that when the ordinary and the central rail breaks were combined, with a gross load of 41 tons, descending a gradient of 1 in 12, at a speed of about 6 kilometres per hour, the train was stopped within 20 metres; while, under similar circumstances, a gross load of 33 tons, at a speed of about 12 kilometres per hour, was stopped in 20 metres. It was remarked during the later trials that the engine and train gained speed on the sharpest curves. This effect, so contrary to general practice, was produced, partly by the action of the horizontal guide-wheels, which kept the engine and the wagons in their proper positions with respect to the rails, and partly by the fact that the gradients on the curves had been slightly eased, while the gradients on the straighter portions had been made proportionally steeper, with the intention of as nearly as possible balancing the resistances.

Another system for working steep inclines—that of Signor Agudio—had found support in Italy. In it two stationary engines were employed, one at the summit and the other at the bottom of an inclined plane, which acted upon the same double endless rope, kept stretched by a tension wagon hanging upon it at each extremity. This rope ran between the rails, and over two sets of wheels worked by the stationary engines, from which it received its movement by friction. It did not act directly upon the train, but was connected with an engine, called the "locomoteur funiculaire," supported on a bogie frame at each end, and carrying a system of drums and wheels, by the action of which the required motive power was obtained indirectly by the moving rope. Experiments tried with this system on the Dusino incline between Turin and Genoa in August, 1863, appeared to have given great satisfaction to the commissioners of the Royal Institute of Lombardy. But the author was inclined to think that neither this system, nor any other yet developed, could compete with the central rail system for general traffic on gradients up to 1 in 10 or 1 in 12.

For mountain passes the author believed the middle rail system possessed great advantages. Besides being of service in the ascent, it afforded the means of employing pressure, acting with any amount of force, to any number of vehicles, and thus rendered the descent safe, and supplied a remedy against bad consequences from a fracture of the couplings. It also prevented the engines, or any vehicles of the train that were supplied with guide-wheels, from leaving the line, from a defect in the permanent way or rolling stock. A country which required very steep gradients demanded also, in most cases, very sharp curves; and the central rail contributed to safety as much in respect to the latter as to the former. On the Mont Cenis Experimental Railway the bearing wheels of the engine left the rails on two occasions, and on both they were brought back to the rails by the guiding power of the central rail. As, however, in the course of about three months, the line was expected to be opened from Susa to Lanslebourg or Modane, and in from five to six months from the present time throughout its whole length of 48 miles between St. Michel de Maurienne and Susa, there would then be an opportunity of becoming better acquainted with this plan.

Atlantic and Great Western Railway.

By an order of the Supreme Court of Pennsylvania, made on the 30th ult., Major-General Robert B. Potter, (formerly of the Ninth Army Corps,) was appointed receiver of the Atlantic and Great Western Railway in Pennsylvania. The General having been previously appointed receiver by the Courts of New York and Ohio, thus becomes receiver of the whole line from the Erie Railway to Cleveland and Cincinnati. The receiver is required to operate the lines, to give security in $300,000 for the faithful performance of his duties; and out of the net earnings of the line, to first pay the interest upon the prior or divisional mortgages on the line, and then upon the consolidated mortgage.

On the 3d inst., the Board of Directors met at the office of the company in Meadville, Pa., to take such action as was necessary to transfer the management to the receiver. Two sessions were held on the 3d, and one on the 4th inst. The President, S. S. L'Hommedieu, and the General Superintendent, D. McLaren, tendered their resignations, to take effect on the 1st of May. On the 4th, by direction of the Board, Mr. J. J. Shyrock, Vice President, turned over the books, papers and affairs of the company to the charge of General Potter, the Receiver. The various departments, we are informed, will remain under their present managers—for the present, at least. Whether any changes will be made is not yet certainly known.

☞ The surveys of the Western extension of the Central Pacific Railroad, from Sacramento to a point opposite San Francisco, have been so far completed as to develop a favorable line of less than 88 miles in length. The present route to the State Capital by water is about 120 miles long. The terminus will be on Goat Island, in the Bay, a mile and a half from the City Wharf. It is expected that the road will be completed about the time the line is opened from the Eastern States.

☞ A despatch to the Montreal *Gazette* dated London, March 29th, says the Canada Confederation bill and the Intercolonial Railway Guarantee bill have passed both Houses of Parliament and received the Royal assent. Both these bills are therefore laws.

☞ The Richmond *Dispatch* says that there is a tax bill already in force which will supply ample means to pay the July interest, and probably the January interest also, on the Virginia State bonds.

Prospective Trade of the Northwest.

The business prospects of the Upper Mississippi Valley, for the year 1867, promise to be better than those of any other portion of the Northwest; on account of the unusually large and successful lumbering operations of Northern Wisconsin, and the extensive railroad expenditures in our vicinity. Produce may not be supplied to Eastern markets to the same extent as in one or two former years, from the fact that near "home markets" are created by the thousands of people who are engaged in developing those two branches of business; but the consumption of staple articles of merchandise will be greater than ever.

In addition to the demand created by the causes above mentioned, it should be stated that, during the past two years, an immense immigration of Eastern and foreign people have been pouring into Minnesota, Western Wisconsin and Iowa. These new settlers have been opening up millions of acres of land, which will, in a few years, augment the productive wealth and commerce of the Northwest. Under the liberal and attractive provisions of the "Homestead Law," thousands of poor men from the older States of the East, and from northern Europe, have rushed into this new, and healthy, and prosperous country, to make for themselves and for their children, homes, where they can, in common with all industrious and frugal citizens, enjoy the privileges and comforts of life, and share in some of the luxuries that were beyond their reach in older and more populous communities.

The lumbering operations of this northwestern Congressional district of Wisconsin alone, for the winter and spring of 1867, exceed five millions of dollars; and if the present prices of lumber for Southern and home demand are maintained, the total value of our lumbering business will reach the round sum of $6,000,000.

The Southern Minnesota Railroad, which is endowed by the richest land grant that was ever conferred upon any railway, except the Illinois Central Railroad, is rapidly pushing forward from La Crosse to the Missouri River, and to a connection with all of the great system of Minnesota Railroads. The two years of 1867 and 1868 will witness the construction of about seven hundred miles of railway in Minnesota, Northern Wisconsin and Northern Iowa, with an expenditure of not less than $15,000,000, exclusive of rolling stock and iron. The Government appropriations for the improvement of navigation on the Upper Mississippi and its large tributaries for the year 1867, already exceed $2,000,000.—*La Crosse Republican.*

Specie Movement at New York.

The following statement will show the movement of specie at New York during the first quarter of the present year:

Received from California:		
In January	$2,482,310	
In February	1,749,900	
In March	1,913,984	
		$6,146,194
Imported from foreign ports:		
In January	$126,719	
In February	136,491	
In March	145,867	
		409,077
Total supply since Jan. 1, 1867		$6,555,271
Exported to foreign ports:		
In January	$2,551,351	
In February	2,124,461	
In March	1,891,141	
		6,566,953
Loss since Jan. 1, 1867		$11,682

This statement is very favorable, showing that the receipts of specie since January 1st, have about equaled the shipments, the difference being a mere fractional amount compared with the whole movement.

Rockland Copper Mine.

The product of this mine during the year ending February 28, 1867, was 186,381 lbs. of mineral, the gross value of which is estimated at $43,092 57. The proceeds of mineral actually sold was $37,335 62. The total mining expenses have been $56,440 28 (being a reduction from last year of $4,539 per month in mining costs), and the whole expenses of the year for all purposes $65,-347 39. After deducting the gross value of the year's product, a deficit is shown in the year's business of $22,254 82, being nearly $30,000 less than the deficiency of the previous year, to cover which an assessment of $1 per share was levied, payable June 1, 1867. The receipts for the year were $73,550 69, and the expenses $63,512 15, showing a cash balance on hand March 1 of $10,-038 54.

Memphis and El Paso Railroad.

The formal assent of Memphis, as one of the stockholders in this road, is alone necessary to give effect to a sale that is said to insure the completion of this important work. Under its terms: The road is to be completed and equipped by the first of January, 1868, and the purchasers agree to assume and pay all liabilities of the present Memphis and Little Rock Railroad Company. The El Paso Company is authorized to issue bonds to the amount of one million three hundred thousand dollars, to be used in completing and equipping the road. Two thousand tons of iron are to be delivered by the first of October, or so much as may be necessary for the completion of the road.

☞ The Paterson and Newark Railroad is being pushed forward with vigor, and the new Board of Directors promise that it shall be completed by the 1st of January, 1868. It is the intention of the company, when the road is completed, to connect their depot in Governeur street, Newark, with the depot of the New Jersey Railroad in Market street, by means of a horse railroad.

☞ The Costa Rica Inter-oceanic Railroad Company has contracted with Colonel Edward McGovern, of Pennsylvania, to superintend the survey of the route conceded by the Costa Rica government, connecting the Atlantic with the Pacific oceans, having excellent harbors at its termini and passing through a healthy, productive and populous region.

☞ We learn from the Louisville *Journal* that there is a project on foot to construct an air-line railroad eighty-five miles south of the Nashville and Decatur Railroad, connecting with the Louisville and Nashville Railroad. It is very favorably received, and the latter road stands pledged to aid the construction to the amount of $500,000.

☞ The Foxboro (Mass.) Branch Railroad Company has voted to accept the charter of the Mansfield and Framingham road, and the two will be merged in one. This consolidation and the completion of the route will place New Bedford and the Cape towns in direct communication with the West and Northwest.

☞ The Norwich and Worcester Railroad Company has given notice of an application to the Legislature for power to extend their road on the west side of the Thames River to New London.

Alexandria, Loudoun and Hampshire R.R.

This important line of communication between Alexandria and the interior of the State of Virginia, now in process of repair, is rapidly approaching Leesburg, to which point its construction had reached at the commencement of the war, and where an extensive trade depot had been established. The bridge over Goose Creek, an expensive structure, now being erected, will be completed by the end of the current month. Those over Sycolin and Tuscarora Creeks, between Goose Creek and Leesburg, each about 140 feet long, have been framed, and can be placed in position in a short time. The erection of these bridges, with the exception of about a quarter of a mile of track to relay, and two cuts to clean out, constitute the only work remaining to be accomplished in order that trains may run from Leesburg to Alexandria.

Interest and Dividends.

The Lehigh Valley Railroad Company has declared a quarterly dividend of two and a half per cent., payable April 15th.

The Central Railroad Company of New Jersey has declared a quarterly dividend of 2½ per cent., and the Government tax, payable on the 20th inst.

The Catawissa Railroad Company have declared, on account of the dividend due the preferred shareholders, three and a half per cent., payable on the 25th instant.

☞ The Philadelphia *Ledger* says that the Pennsylvania Railroad Company "has bought, and possesses the Columbus and Indiana Central Railroad—giving the company a continuous line from Philadelphia to Indianapolis. The bargaining for the Pacific Railroad of Missouri has already been commenced. That concluded, it will remain to acquire the line from Indianapolis, through Terre Haute and Alton to St. Louis, and then the company will control a line extending from Philadelphia to the western terminus of the Eastern Division of the Union Pacific Railroad, wherever that may be."

☞ The Union Pacific Railroad, Kansas Branch, has applied to the government for a commissioner to examine the 7th section of their road, extending to the Saline River, 45 miles west of Fort Riley track. They are laying and progressing at the rate of a mile and a half a day, and cars will reach the town of Salina, 50 [illegible]eyond Fort Riley, and 468 miles west of [illegible]s, on the 13th inst.

☞ Alexandria corporation stock is worth, at auction, 42 to 43 per share; Alexandria Water Company stock 45½, and Manassas Gap bonds, with interest due for six years, 33.

Union Pacific Railroad.

The Vice-President of this road, Thomas C. Durant, Esq., makes the following declaration in regard to the progress of the work:

"Work has not been suspended on the Union Pacific Railroad west of Omaha. Extreme cold weather and snow prevents laying track, but we were never doing more in accumulating material and getting it to the end of the track. We have now on hand the iron and ties for 150 miles, and I will pledge myself to complete two miles a day for the first 100 working days after the frost is out of the ground. Any investigation will only result to our credit, for we have built more road in a given time than was ever done before, and

propose accomplishing more this year. We are not asking any legislation."

Thistle Mill Waste,

A new and Superior Article of WOOLEN Waste, combining the following

ADVANTAGES,

1st. It is 30 per cent. lighter than ordinary waste.
2d. It will absorb 25 per cent. more oil.
3d. Has greater elasticity and will wear longer.
4th. It is less liable to ignite.
5th. And has a value as old waste.

The use of Wool as an ANTI FRICTION material is too well known to require discussion.

This waste is manufactured expressly for use in packing Locomotive and Car Journal Boxes, and will be sold as low as the best Cotton Waste.

The old waste taken in exchange at a price—including weight of oil, dirt, &c.—which will reduce first cost over one-half.

Small Sample Bales furnished FREE for trial.

OFFICE ERIE RAILWAY COMPANY,
No. 187 West St., NEW YORK, April 1, 1867.

NOTICE IS HEREBY GIVEN of the intention of this Company to extend its First Mortgage Bonds, due July 1, 1867, for Thirty Years, at Seven per cent. per annum. These Bonds are a First Mortgage of $3,000,000 on the entire property of the Company, and the power to extend them is given by a statute of the State of New York, which provides that the Company may extend any or all its Mortgage Bonds, in the order of their respective priorities.

Proposals will be received up to the 15th of May next, at the General Office of the Company in the City of New York, for extending any portion of the issue, and parties, whether present holders or others bidding the highest premium therefor will be entitled to extend said Bonds *pro rata*, on the amount of their bid, as the Bonds are presented by the holders.

On and after the 1st of July the Company will be prepared to extend, on the above terms, all such Bonds as the holders thereof may present for that purpose, at the office of the Company in the City of New York, and new sheets of Coupons for 30 years, with an indorsement thereon of a mutual agreement of such extension, will be issued and attached, with interest payable semi-annually as heretofore.

Persons whose bids may be accepted will have the option of extending Bonds in London, Frankfort, or Germany, on due notice to the Company, in manner to be hereafter determined, of the numbers of the Bonds to be extended in each place.

FOR SALE

3 LOCOMOTIVES,

4-8 1-2 GAUGE,

All thoroughly REBUILT by one of the best makers in the country, and ready for immediate use.

1—Cylinders 14x20, Link Motion, 4-56 in. Drivers connected, Copper Flues, Weight about 24 tons; 8 wheeled Tender, 1800 gallons.

This Engine has always worked admirably; Steams freely with dry or green wood, works and wears perfectly smooth; Well springed and brassed all around. Proportions every way suited to power. A good and stylish model, all in excellent order.

2—Cylinders 15x20, Link Motion, 4-54 in. Drivers connected, Copper Flues, weight about 23 tons, 8 wheeled Tender, 1,800 gallons.

Is a smart smooth working Engine, suitable for any work; has a good record throughout.

3—Cylinders 15x20 Hook Motion, 4-66 in. Drivers connected, Copper Flues, weight about 24 tons; Tender, 8 wheeled.

Every way perfectly sound, well brassed and springed up. All in fine working condition.

These Engines will be sold VERY CHEAP to close a transaction, and are GREAT BARGAINS to any company wanting this sized Engine.

PROPOSALS FOR THE CONSTRUCTION OF THE SUMMIT DIVISION OF THE ILLINOIS AND MICHIGAN CANAL.

OFFICE OF THE BOARD OF PUBLIC WORKS,
CHICAGO, March 18th, 1867.

Sealed Proposals will be received by the Board of Public Works, at their office, until 11 a. m. Wednesday, May 1st, 1867, for the excavation necessary to deepen the Illinois and Michigan Canal, according to the plan adopted, from Chicago River to Summit Lock, No. two (2) a distance of twenty-six (26) miles.

Maps, profiles, specifications, &c., will be exhibited in the office of the Board of Public Works in Chicago on and after April 15th until the day of letting.

There will be some two millions (2,000,000) cubic yards of earth excavation—some of it quite hard and embracing considerable detached rock—and about four hundred seventy thousand (470,000) cubic yards of stratified limestone.

The work must be prosecuted so as not to interfere with the use of the Canal during the season of navigation.

It is believed, however, that the most of the excavation, except the stratified rock, can be done with steam dredges without interfering with the navigation of the Canal, but the rock excavation will all have to be done between the close of navigation in the fall and the opening in the spring.

If a new line be adopted for any portion of the distance, operations thereon may be continued the whole year; and the navigation of the Canal will be suspended at least five months in each year unless otherwise mutually agreed by the Board and Contractors.

The whole of the work must be done on or before the end of the third season of the suspension of navigation.

A large amount of machinery will be required to excavate the work within the time required, consisting mainly of steam dredges, scows and cranes for the earth work, and drilling machines, pumping machinery and cranes for the rock.

Contractors will be required to commence work on the earth excavation within thirty days of the time of letting, and upon rock excavation by the first of November next.

The dredges, cranes and scows now in the Canal can be had at an appraised value which will be made known to bidders prior to the letting.

Parties contracting for the work will be required to provide all machinery, and to put up and remove all dams and all works of protection, and at their own expense to do all pumping, or whatever may be necessary to secure their work from water.

Proposals must be addressed to the Board of Public Works, endorsed "Proposal for Deepening Illinois and Michigan Canal," and be accompanied with the usual two hundred dollar ($200) bond, with surities, to be approved by the Board.

Contractors will bid, stating the price for which the work will be done on each of the different sections, and the work will be let as a whole or in part, and in such quantities as the Board shall determine.

The Board reserve the right to reject any and all bids, and no proposal will be accepted unless the party offering it shall give evidence satisfactory to the Board that he has the necessary skill, experience, energy, and ability for doing the work, is trustworthy, and has sufficient pecuniary resources.

The Board will require such security, as according to their judgment, will secure the doing of the work according to the contract.

The Proposed Railway Consolidation.

NEW YORK, April 11, 1867.

Mr. Charles A. Trowbridge, 48 *Pine street:*

DEAR SIR—May I ask for publication your views upon the proposed consolidation of the railways from Norfolk, Virginia, to the Tennessee line at Bristol, and thence to New Orleans, and through the Cumberland Gap into the State of Kentucky, looking ultimately to a continuous line from Norfolk to New Orleans, and from Norfolk to the Mississippi River at Hickman, Ky., and thence to St. Louis. From the great interests involved and the value which I attach to the measure in many respects, I hope you may find time to present the considerations which you so forcibly set out in our recent conversations. The proximity of the coal basin in Chesterfield County, Virginia, to the port of Norfolk, and the mineral deposits in South Western Virginia and Tennessee, are by no means inferior considerations in estimating the value of the railways, but the cotton and travel which must find this route the nearest, and, of course, the cheapest, from the Mississippi Valley to the Atlantic, must be the great sources of income, and I feel quite sure you will agree with me in the opinion, that no single measure of public policy could be of more importance to Virginia than the consummation of the objects proposed. With consideration, and awaiting your reply,

I am very respectfully,
D. H. LONDON.

---

48 PINE STREET, NEW YORK, April 12, 1867.

D. H. London, Esq.:

DEAR SIR—I have your note of yesterday asking my views respecting a proposed consolidation of railways from Norfolk, Virginia, to the Tennessee line at Bristol, and thence to New Orleans; and also through Cumberland Gap, &c.

On the general principle that "in union there is strength," it has been found in this country that long lines of railroad can be operated more advantageously for the public and their owners than short ones; and that one executive head can—whether in military, civil or commercial operations—work more efficiently than many, is I believe, an undisputed proposition.

There is probably no class of property more dependent upon the whims and caprices of the public, than our railways. This fact certainly is too patent to every one who has had the management of them to need illustration.

Short lines of railroads may have "traffic arrangements" to make close passenger connections, carry through freight expeditiously, and every other arrangement that can be conceived of, but experience has shown that it is next to impossible for them to work as promptly and harmoniously as though they were managed by one mind.

The expense of keeping up a full railway "executive staff" for each short road constituting a through line, in comparison with one such staff for the whole line, is no inconsiderable item and is vastly more than uninitiated parties are aware of.

The first considerable consolidation of several short railroads in this country into one line occurred in the State of New York some fifteen years since, when six (I think) short roads were united by law under the title of the "New York Central Railroad Company." That law required the company to carry passengers long and short distances for all time, at two cents per mile. Notwithstanding this low rate, I am informed that company has paid its shareholders nearly ten per cent. annually on the original cost of the shares of the companies which were thus consolidated, and at the same time has made its road one of the most frequented and popular lines on the continent.

The Pittsburg, Fort Wayne and Chicago Railway is, I think, one of the best illustrations of the beneficial results of consolidation. It is quite true that the line was originally known as the Pittsburg, Fort Wayne and Chicago Railroad Company, but the Illinois, Indiana, Ohio and Pennsylvania Companies constituting it, were distinct organizations, under separate management, connected by what is known as "a running arrangement" from Chicago to Pittsburg.

Although this line opened under the most flattering circumstances, and bid fair to be a splendid success for the several companies comprising it, it was not long before the jealousies, suspicions, and what not of the respective managers brought them all to the verge of ruin, with the probable loss of their roads by foreclosure of their first mortgagé bondholders for non-payment of interest. Under this state of things, a gentleman of my acquaintance, in no way whatever connected with either of the companies, was consulted by persons largely interested in their stock, as to the best method of extricating themselves from their unfortunate position. After looking minutely into their affairs, he saw that bankruptcy of all concerned (except the first mortgage bondholders) was inevitable. He then suggested that a new company should be organized under a charter to be obtained from the four States through which the roads ran—with perhaps the same name (slightly changed)—and that the whole management should be put under *one efficient head*. This course was adopted and resulted in saving to the second, third and fourth mortgage bondholders their bonds; the shareholders their stock; and the current creditors of the various roads the sums due; and finally in making it one of the most valuable lines of road in the country.

The consolidation of the Chicago and Northwestern Railroad Company (which originally was but one short road) with other companies, has

made it a corporation operating, at the present time, nearly eleven hundred miles of road, the western limit of which has, within the past year, been pushed through Iowa, and now connects with the Union Pacific Railway in the State of Nebraska. The gross earnings of this road in 1863 were less than *three million dollars*, while in 1866 they were over *nine millions*.

Other instances of the benefits of this kind of consolidation might be adduced, but I think the cases mentioned are sufficient to show the great advantages which result from such combinations.

As regards uniting the roads before mentioned under one management, I am clearly of the opinion, on account of their peculiar situation, forming as they do the only inland line from Norfolk to the Southwest, it would be very much to their advantage to consolidate with as little delay as possible. I passed over the line from Washington city to Knoxville a short time since and was particularly annoyed by waiting twenty-four hours at Lynchburg, caused by the trains failing to connect at that point. Notwithstanding we left Lynchburg "on time," my fellow passengers were detained twenty-four hours at Knoxville, the train having left but a short time before our arrival there.

I found the road from Lynchburg to Knoxville (from the operations of the late war) necessarily very much out of repair, and I have no doubt, from Knoxville to the extreme South it is equally so, from the same cause. I am unable to state the condition of the roads from Norfolk to Lynchburg, but I have no doubt they also need rebuilding quite as much as those I have mentioned. To put all these roads in first-class order will require a large amount of money.

If these several companies come into market to raise the small amount of funds each will need, it will be a difficult matter to accomplish it, as there will be such a diversity of interest, that capitalists will become confused with the variety of "Virginia" and other "southern railroad projects" presented at the same time. But, if on the other hand they all unite, put their roads as far as they can under one head, and present themselves before the moneyed men of Europe and this country, with *one distinct enterprise* which will be found extensive enough to induce the "great bankers" to take hold of it, they cannot fail to succeed. It is right and proper that I shall give a reason for this opinion.

In the first place, this line is the only direct railway route from New York to New Orleans; and if put in good order so that a person can be carried promptly (at fair speed) and without delay, it will take three-fourths if not the entire passenger business between those two points.

Secondly. Between Lynchburg and North Alabama, it has no competing road, and the topography of the country between the Cumberland and Smoky mountains is such that I doubt if ever a rival road will be built, consequently the local traffic, (as that is the only outlet for that part of the country) must be very large.

Thirdly. It will be difficult to estimate the amount of cotton that will be brought over the road from Northern Alabama, Eastern Mississippi and Tennessee. The rich mines of iron, copper, lead, coal and zinc in East Tennessee and Southwestern Virginia—to say nothing about those extensive coal-beds now being worked within eighty miles of Norfolk—which are now attracting so much attention among northern capitalists, and are being opened somewhat extensively, will furnish an amount of local freight to go East as well as West from those points, that will be difficult to estimate. As regards the line through Cumberland Gap to Hickman, Kentucky, with a view of reaching the Northwestern system of railroads at that point and Cincinnati, I think there can be but one opinion.

The surplus products of the country now find their market on the Atlantic coast by the Northern lakes, canals, the St. Lawrence river, the great lines of railroads from the Mississippi river over the Alleghanies, the Mississippi river and the Gulf of Mexico. The Northern lakes, canals, upper Mississippi and St. Lawrence are frozen many months of the year, during which time these products have to be carried by the railroads (to the extent of their capacity) I have mentioned to the seaboard. It will, I think, therefore, be readily seen, if a direct rail communication should be opened between Cincinnati and Norfolk, a large proportion of the products of Southern Ohio, Kentucky, Southern Indiana, Southern Illinois and Missouri will reach the Atlantic by that route.

It really seems to me, if the owners of the roads you have mentioned and your Legislature are wise, they will at once take the necessary steps to put themselves in such a strong position as will certainly ensure the consummation of the objects you have indicated.

I have already made this communication longer than I intended, but the subject is so prolific, and my desire for the early development of your part of our country (although I have not a farthing's pecuniary interest in it), is so great, that I scarcely know when to stop when I commence talking about it.

I am, my dear sir,
Very respectfully, yours, &c.,
C. A. TROWBRIDGE.

Boston and Worcester Railroad.

The gross income from operations of this road for the years ending November 30, 1865 and 1866, have been as follows:

Deduct dividend 10 per cent. including U. S. tax, on same.	473,684 20	473,684 20
Surplus undivided ..	$63,373 43	$16,517 13

The gross receipts have exceeded those of last year by $217,565 44; the expenses by $264,421 74; making the decrease in net income $46,856 30. The increase on local business was $120,927 38; on joint business $53,644 80. Total income per mile of road, $27,749 70; expenses, do., $20,645 39. Income per mile run, $2.62; expenses, do., $1.95. Cost of road repairs per mile, $3,455 20; do., per mile run, 32.50 cents. Per cent. of main track relaid with new rails, 13.15; do., with repaired rails, 4.76; do., with new sleepers, 13.79; cost per car per mile run, 2.30c. Cost per mile for fuel, 18.05 cents. Cost of transportation per ton and per passenger per mile, without distinguishing between them, 2.283 cents.

Miles run by passenger trains, 479,975; by freight trains, 233,242; by other trains, 16,253—total miles run, 729,470. The number of passengers carried in the cars has been 2,663,825; do. carried one mile, 42,008,825; do., carried one mile, to and from other roads, 14,300,624. Tons of merchandise carried, 569,319; do., carried one mile, 21,263,961; do., carried one mile to and from other roads, 16,321,481. Increase in passengers carried, 277,639; increase in passengers carried one mile, 1,509,359. Increase in tons of merchandise carried, 141,915; increase in tons of merchandise carried one mile, 5,213,864. The report says:

The gain on income from local passengers, as compared with last year, has been 11.75 per cent., while the loss on income from joint passengers has been 11.54 per cent. The gain from local freight has been 19.70 per cent., and from joint freight 26.77 per cent. The constant increase in business calls for a constant increase in the amount of accommodation, particularly in the freight department. Prior to 1854, we furnished our proportion of the merchandise cars for all the joint business with the Western Railroad Corporation. Since the commencement of that year, that corporation, by agreement, or under an award by which this arrangement was made in conformity with their desire, furnished all the cars, receiving compensation for their use on this road. This corporation was thus left overstocked with merchandise cars from that time to last year, when we furnished our proportion of the Red Line cars to run through to Chicago, and found other uses for all our own.

During this year we have taken down ten merchandise cars, unfit for use, and added to our stock eighty-six new eight-wheel and twenty-five four-wheel merchandise—also four passenger, one baggage, and our proportion of four passenger cars for the New York Line, at a cost of $100,721 87. We have built a freight house, a house for milk cars, a platform for petroleum, enlarged our engine house, extended the covering over our wharf, completed and furnished the inward passenger station and Albany Street House in Boston, and partially completed a freight house at Milford, and an engine house at Worcester, at a cost of $105,611 87. We have built a bridge over the Charles River, on the Newton Lower Falls Branch, at a cost of $7,764, and are preparing to lay two additional tracks under the Tremont Street Bridge in Boston. The wooden bridge, of twenty years' standing, has been removed, and a substantial iron bridge, covering four instead of two tracks, will soon take its place. The work, however, has been greatly delayed by the Cochituate water pipes over the railroad at this point. The amount already expended by the corporation is $8,000.

[Second mortgage bonds of the Grand Junction R. R. & D. Cos. ($106,176 65), being of doubtful value, not included.]

Since our last report, authority has been given by an act passed at the last session of the Legislature, Stat. 1866, chap. 278, to connect this road with the wharves at East Boston in pursuance of which a location has been filed. Under the proceedings, mentioned in our last report, then pending in the Supreme Court, after a protracted hearing before two Masters in Chancery, to whom the case was referred for the determination of certain questions, the Grand Junction Wharf property was advertised for sale, and the offer made by this corporation being the highest, a motion was made that the trustees be instructed to convey the property to them as the highest bidder. But the court have not yet acted upon this motion, and we are not yet in a condition to provide the improvements necessary to make the property "available for the public benefit."

Prior to 1854, an average time of more than thirty days, and not unfrequently a longer period, was occupied in the transportation of goods between Boston and Chicago. In July of that year an arrangement was made by which goods, transhipped at Albany, Suspension Bridge and Detroit, were taken through in twelve days under a tariff for first class freight of $2.15 per 100 pounds. This arrangement cost the managers of the line and the Committee of the Board of Trade, who aided in effecting it, much time and effort, and proved satisfactory to the merchants of Boston. In the first annual report of that body in January, 1855, they say, "A committee of the government has endeavored to introduce into the management of some of our railways the system of guaranteeing the time within which they should agree to deliver at its destination the merchandise entrusted to them for transportation. It was first adopted—to their praise be it said—in the line of railway extending from Boston *via* Albany, to Chicago, to the North of Lake Erie." And again, in their report for the following year, they remark, "We believe that much good has been accomplished; that the acknowledged increase of our Western trade the past season is owing in a great measure to the improvements which have been made in the regularity and speed with which goods have been transported, and that if the Board of Trade had effected nothing else, its influence has in this particular been of more benefit to you than can well be calculated. Not that your directors mean to arrogate to themselves all the credit of this improvement. It is due in the main to the managers of the railways, steamboats and propellers which form connecting lines, we may almost say thousands of miles long, from Boston to our far West. They have listened to our complaints, adopted our suggestions, and the result is as you have seen." Since that time the facilities for transportation of merchandise between Boston and all important points in the West and Southwest, have been still more improved, and cannot but give satisfaction to the merchants whose representatives aided in establishing this system. Three through lines, designated respectively by the color of the cars employed, are now in successful operation; the Red Line and the Blue Line to Chicago, St. Louis, &c.; the White Line to Cincinnati, Louisville, Evansville, St. Louis, &c. The Red Line cars are constructed, at an increased cost for building, use and repairs, to run over the 4 feet 8½, 4 feet 9¼ and 4 feet 10 inch gauges *via* Buffalo and Cleveland to Chicago and beyond; the Blue Line cars, by a third rail laid between Suspension Bridge and Detroit, run over one continuous track of a uniform gauge of 4 feet 8½ inches to the Mississippi River. Cars over both these lines run through from Boston to Chicago in five days, and under a tariff for first class freight of $1.88 per 100 pounds, or more than 12½ per cent. less than than the tariff of 1854, while every item of expense has been increased and some items more than doubled.

This corporation are building cars for the Blue and White Lines, and arranging special accommodations for the reception and delivery of the freight carried by all connecting lines. While we cannot lose sight of the necessity for a just consideration of the heavy terminal expenses imposed on this corporation, we shall spare no exertion to accommodate the through business, as well as all business done with connecting roads, in the expectation that a satisfactory arrangement in regard to this subject may be made. A highly respectable committee of the Board of Trade, to whose recognition of our former efforts in this respect we have already referred, after giving in their report an account of the establishment of the Red Line, and of the mode in which its business was transacted, add, "your committee believe that the system now referred to will if generally adopted, be of great advantage to all the interests involved. Its tendency must be to improve the manner of conducting the freighting business remaining under the immediate control of the roads, and to place the whole subject of transportation on a more satisfactory basis than has yet been reached. It has been estimated that the cost of transhipping freight on the route between Boston and Chicago amounts to half a million of dollars annually. How desirable if so heavy an outlay, or any part of it, may be avoided (involving also a saving in time) by the adoption of through trains between the principal cities of the country. To the public at large the system now recommended has many advantages. So far as the interests of Boston are concerned, your committee are of the opinion that one such company should be organized on each of the principal routes from this to the West."

So far as the line of which this corporation forms a part is concerned, this suggestion has been fully carried out in the manner above explained.

In order to meet the demands of the competing Express Companies seeking to do business over this road, an arrangement has been made, which took effect upon the first day of January 1867, to run through trains for the Expresses alone. The Adams Express Co. and the Merchants' Union Express Co. are each allowed the use of three cars between Boston and New York; one car is run to and from Albany for the Merchants' Union Co., and one for Thompson & Co. The same compensation is paid by each, and the sum received is divided *pro rata* between the corporations forming the line. The Adams and Merchants' Union Companies have equal accommodations at Worcester and intermediate sations on this road.

The change made in the Old Colony and Newport Railway two years ago, under Stat. 1861, c. 137, over Fort Point channel, directly in front of our wharves, rendered expensive alterations necessary, and left them in such a situation that, even with the best arragement that could be made, they were much less available than before. In view of the increase of water-borne freight, and grain in bulk, seeking transportation to this point, we felt it necessary to apply to the Legislature for authority to extend our track to the wharves below Federal street. Since the close of the year we have effected an arrangement with the Old Colony and Newport Railway Company, involving a settlement of our claims for damages by their new location, and the sale to this corporation of about an acre of wharf property on the channel, on which we contemplate erecting an elevator during the present year, with the hope that sufficient accommodation may thus be obtained for the present exigencies of this class of business.

The second section of the Agricultural Branch Railroad, from Northboro' to North Sterling, was opened for trial on the ninth day of July, thus making a continuous line through to Fitchburg by the way of Framingham. Three daily trains for passengers and one for freight, run by this corporation between Boston and Marlboro' and by the Agricultural Company between Marlboro' and Fitchburg, pass between Boston and Fitchburg without change of cars. The tariff to competing points has been amicably arranged between the manager of this line and the Fitchburg Railroad Company.

Not one of the 2,663,825 passengers transported during the year has been injured in the cars. This is the best testimonial that could be given of the care and fidelity with which the employees concerned in the management of the trains have performed their duty.

The equipment of the road consists of 36 engines; 58 8-wheel, 1 4-wheel, also 2-5ths of 5 on steamboat train, and 44-234ths of 25 on land route trains; 10 8-wheel baggage, also 2-5ths of 2 on steamboat and 44-234ths of 14 on land route trains; 371 8-wheel, 6 4-wheel merchandise, and 25 4-wheel coal cars.

☞ There is a proposition before the Virginia Legislature to consolidate the railroads between Norfolk and Cumberland Gap, so as to make the Virginia and East Tennessee Railroad a real trunk line, and give it access to the sea. It will require a good deal of money to put this road in order, and unless il s done, and the consolidation effected, the Virginians fear that Baltimore may reap all the rewards of the traffic of Central and Southwest Virginia.

Railroads and Canals of Pennsylvania.

Abstract of the Annual Report of the Hon. J. F. Hartranft, *Auditor-General of the State, for the year* 1866.
